## BOW ON MEN'S HATS.

Why do we have bows on the left side of our hats? In olden times when men were much in the open air and hats could not be bought for half a dollar, it was the habit to tie a cord around the crown and let the ends fall on the left side to be grasped on the arising of a squall. They fell on the left side so they might be grasped by the left hand, the right usually being more usefully engaged. Later on the ends got to be tied in a bow and later still they became useless yet the bow has remained. We have just received a consignment of

## Local Happenings.

Additional locals on last page.

Second annual Field Day at Cass City—June 7th.

Messrs. Robb & Coon made a trip to Detroit last week.

S. Y. Kenyon, of Ellington, greeted old friends in town on Monday.

A. H. Ale made a business trip to North Branch Saturday evening.

Dr. A. W. Truesdell, of Shabbona, did business in town on Monday.

Mrs. Lewis and daughter, of Bad Axe called on friends here on Monday.

F. Klump was at Lansing and Detroit last week on official business.

Dr. and Mrs. A. N. Treadgold, of Killmanagh, were in town last Thursday.

Mr. and Mrs. M. J. Cook and Mr. Barlow, of Deckerville, spent Sunday in town.

Rev. Torbet will preach in the Brookfield Presbyterian Church Sunday at three o'clock.

J. Roy Titus and Miss Kate Howard spent Sunday with the latter's friends in Evergreen.

Miss Florence Anderson, of Mahomet, Ill., is the guest of her sister, Mrs. M. M. Wickware.

Mrs. M. Metcalf moved the first of the week to the Weydemeyer residence on Seeger Street.

R. A. Lutz is building an addition to his residence at the corner of Main and West Streets.

Mr. and Mrs. R. L. Hollaway, of Caro, were the guests of Dr. and Mrs. M. M. Wickware on Saturday.

Alex. A. Sangster and Miss Millie L. Mosher, of Novesta, were married at Caro May 20th, by Rev. Salyer.

John Armitage and Miss Anna Mall of Uby, called on friends here on Saturday, while on their way to visit Miss Mall's home, near Gagetown.

A team of our junior ball players went to Caro on Saturday and met defeat at the hands of the "Stars" of that place, the score being 11 to 23.

Mr. and Mrs. James Fryke left on Monday morning for London, Ont., to attend the wedding of their niece, Miss Winnifred Thomas, on Tuesday.

The McMahon sisters have moved their dressmaking parlors to the second story of the new Fritz block, where they will be pleased to see their patrons.

Miss Ella Lee Pla, who has been taking a course at the Mt. Pleasant Normal, has accepted a position at the schools of Sidway, Houghton county, for next year.

Hill & Parrot sent three monuments to Bad Axe last week and one to Gagetown on Monday. They have also just placed one in Elkland cemetery for Louis Sandham.

The electrical storm of last Friday evening, as far as we can learn, did no very serious damage in this vicinity. A number of electric lamps and telephones were put out of commission temporarily.

Josiah Tompkins, of Fostoria, was in town on Friday in the interests of the Prohibition party, and will speak at the New Opera. He is meeting with encouraging success wherever he has been in the county.

Fancher & Son have been making quite a business of tree-trimming this spring, having been employed to trim the poplars for the M. E. Church, for I. A. Fritz at his residence and for the Cass City Bank. They do it right, too.

Frank Sykes, of Pontiac, came to this place last week and looked it over with the view of starting a shoe repairing shop, and being convinced that the opening was a good one has opened such a shop in the Orr building, west of the Town Hall.

May 27th, 1901. The following letters remain unclaimed at the P. O. at Cass City for the week ending May 25th, 1901: Mr. John O. Cormor; Mr. Henry Hartwell. When calling for the above please mention "advertised". H. S. Wickware, postmaster.

E. McKim returned on Saturday evening from Peoria, Ills., after having completed arrangements there for the manufacture of his patent hay, grain and stock rack. He will remain at home until about the 15th of June, when he expects to start for Cedar Rapids, Iowa.

We are indebted to E. C. Poppleton, of Birmingham, Mich., for a copy of the Weekly Edition of the Cape Times, published at Cape Town, South Africa. The paper is a large one, something after the style of English papers, but contains an illustrated supplement with half-tone cuts that compare with the best American publications.

A meeting is called for Friday evening, at the Council Rooms, to make the necessary arrangements for the proper celebration of the Glorious Fourth at this place. There should be a good turnout and the matter taken in hand at once, as time is fast passing and should not be allowed to go by unimproved if we expect to have a successful celebration.

Dr. G. M. Livingston arrived last week from Kalamazoo, and is snugly settled in his suite of offices over the Cass City Bank. Judging by the comment of the Kalamazoo press his services as a physician and surgeon at that place were fully appreciated and his departure generally regretted. His many former friends here are pleased to have him choose Cass City as a location and wish him unlimited success in his profession.

## EXPLOSION

Boiler Bursts—Angus Leitch Killed—Four Others Injured.

The Cass City Brick and Tile Company's Yards the Scene of the Sad Disaster.

At a few minutes past seven o'clock on Monday morning, the boiler exploded at the yards of the Cass City Brick and Tile Company, a high-pressure boiler of Angus Leitch, who was acting as engineer at the time, and injuring four others. The report of the explosion was heard fully five miles away, and the concussion caused the windows to rattle in the houses about town. It was but a few minutes before a large number of men were on the spot and it was found that Angus Leitch was killed outright, while Perry Withey, Geo. Warner, Jas. Comstock and Hiram Baxter had received slight injuries and other employees had had very narrow escapes.

The Cass City Brick and Tile Company was organized a little over two years ago and have done a thriving business. The boiler was purchased from a gentleman in Novesta, who was using it in a saw-mill and the company had to wait for him to saw out his yard before it could be delivered. It was carefully inspected and re-fitted where necessary and considered to be in good condition. During the former season, Ed. Brotherton had charge of it, but owing to his connection with the Cass City Foundry and Machine Company, and being engaged this year as manager, it was necessary to get someone else. Leitch was employed, but Mr. Brotherton started the machinery at the commencement of the season's run, testing the boiler with 110 pounds pressure, and instructing Leitch that sixty pounds was sufficient to do the work required. Mr. Leitch had several years' experience about engines before coming from Ontario here and was considered thoroughly competent. No watchman has been employed by the company and we learn that the boys or young men have visited the gauges and stopcocks, and on Monday morning the steam throttle was found open. The fire was started and the steam gauge indicated forty pounds pressure. The engine was started at a slow speed, but the boiler began to blow off. It is stated that Leitch realized that something was wrong and appeared to think it was about the safety valve, while in all probability it was the steam gauge, as there must have been much more pressure in the boiler, possibly as high as two hundred pounds. The opinions of engineers are different as to the probable cause of the explosion. Some claim that the water must have been low enough to allow the accumulation of gas in the upper part of the boiler, in order to get the force to throw the parts as far as it did, while others claim that a greater force would be obtained with a full boiler. It seems that the inspector would not work properly with less than sixty pounds of steam and some think that while the engineer was waiting for the gauge to indicate that amount, the water ran low causing the explosion. It is possible that the gauge had been tampered with on Sunday and had not been noticed by the engineer.

When the explosion took place, Leitch was standing between the boiler and engine, and it is not known positively whether parts of the boiler struck him or the force threw him against a post near by. The injuries received were all about the face and head, rendering him unconscious instantly and causing his death a few moments later. Perry Withey was scalded slightly about the face and received a scalp wound but was able to resume work shortly after. Warner, Comstock and Baxter received slight bruises about the arms, shoulders and back but none of them of a serious nature. George Meiser had just picked up his wheelbarrow to start away from the engine when the accident occurred and the barrow was taken from him and smashed into kindling, while he escaped unhurt. Claude Bentley had just driven into the clay pit and does not know whether he jumped from the cart or was thrown from it, but he was not hurt. The dome of the boiler was carried probably forty feet or more in height and fell about thirty rods away to the westward, while the head of the boiler was carried more than half as far. The engine was damaged some but can be repaired. The company has a 90,000 kiln of brick ready for burning this week, and has engaged Come & Bixby, of Gagetown, with a portable engine, to assist them until they are able to install the new boiler. The plant will be in full operation next week.

Angus Leitch, the deceased, was forty-two years of age, and came here from near Dutton, Ont., some twelve years ago, having been married two years previously. He purchased and occupied a farm in Novesta township, which he still owned, but a few years ago he leased his farm and moved to the M. Sheridan farm, just west of town, now owned by C. H. Topping. Upon the farm being sold to Mr. Topping, Mr. Leitch moved to town, occupying the residence at the corner of Leach and Sanilac Streets, owned by M. Sheridan. He leaves a wife and three children to mourn his sudden departure. The funeral services were held in the Presbyterian Church, on Wednesday afternoon, conducted by the pastor, Rev. A. Torbet. The fat-

## PUBLIC DEDICATION.

The New Masonic Hall at this place to be Publicly Dedicated on Wednesday June 12th.

Tyler Lodge, No. 317, F. & A. M., has completed all arrangements for the formal opening of their new commodious and well-arranged hall in the Ale Block, on Wednesday, June 12th. The Hall is one of the very best in the Thumb and no one should miss the opportunity of being present at the christening. The ability of A. H. Ale as a constructor is well known and the fact that the building and completing has been under his management and close supervision, speaks plainly as to the excellence of the work.—The arrangement of the Hall will be spoken of later. The dedicatory ceremony will take place at two o'clock in the afternoon, and a banquet will be served in the Hall at 7:30, followed by the regular evening program as follows: Toastmaster, J. D. Brecken. Music, Finney's Orchestra, Detroit Address by Grand Master, Frank O. Gilbert, Bay City Toast—"Free Advice", W. S. Wikson, Caro Toast—"The Test of Fraternity", Geo. M. Clark, Bad Axe Toast—"The Badge of a Mason", F. H. Arnold, Marlette Toast—"Our Secrets", R. Crosby, North Branch Toast—"The Brotherly Hand", R. L. Cope, Ellington Music, Finney's Orchestra.

The brethren expect to be able to seat three hundred at the banquet and the expense will be fifty cents per plate. Many of the lodges in adjacent towns have signified their intention of attending in a body and the day promises to be a red letter one in the history of Tyler Lodge.

## FIGURE OUT THE FACTS.

LOGIC, ACCORDING TO WEBSTER MEANS CORRECT REASONING.

Now if you will take the trouble to reason a bit, that is, to figure out the facts, for yourself, you will have little difficulty in arriving at a safe conclusion as to the best place to buy what

## BUILDING MATERIAL

you need. Drive some out of your way. You will be more than repaid in genuine satisfaction, when you come to use the stuff. It's not economy to pay as much for poor lumber, just because its handy, as you would be asked for gilt edge material only a trifle farther away.

Figure out the facts in this proposition instead of being guided by prejudice, and you will save money by buying lumber from us.

## CASS CITY LUMBER & COAL YARDS.

The department of agriculture in its annual report gives the amount of money the people of the United States spent in buying flowers at retail in 1939 as follows: Roses, \$6,000,000; carnations, \$4,000,000; violets, \$750,000; chrysanthemums, \$500,000; miscellaneous, including lilies, \$1,250,000.

A remarkable burglary has just been committed at the suburban station of Herkules, Buda-Pesth. Three men delivered a coffin, apparently empty, for conveyance to Buda-Pesth, "carriage to pay." The last train having gone, it was locked for the night in the station master's office. Next morning the coffin was found with the lid off, and the office safe had been rifled.

The geodetic commission of Switzerland has undertaken an exact leveling of the whole country by the most scientific methods. The work has been going on for many years. Each point determined is fully described so that, in its turn, it may serve as a datum point for more detailed work and all the points are referred to one origin—namely, to a monument in Geneva whose altitude above the sea has been fixed.

A German expert in the east points out that as time goes on more and more men are required to coerce China into doing the will of another power. The opium war required only 4,000 Europeans, the Anglo-French war against the Chinese 16,000 and 4,800 Indians. The Japanese needed 95,000 men and 115,000 coolies, and today we find 90 men-of-war and almost 150,000 men attempting to compel obedience from the giant empire.

Most curious are the sewing or tailor birds of India—little yellow thump. To escape falling a prey to snakes and monkeys the tailor bird picks up a dead leaf and flies up into a high tree, and with a fibre for a thread and its bill for a needle sews the leaf onto a green one hanging from the tree; the sides are sewed up, an opening being left at the top. That a nest is swinging in the tree no snake or monkey or even a man would suspect.

In the Hawaiian legislature the native or reactionary element, which calls itself the "Home Rule party," is in control. Its leaders were opposed to annexation, and some of them have not abandoned the hope of the recall of the ex-queen. Not all the members speak English, and few of them are familiar with American institutions. They make unreasonable demands upon Governor Dole, and consume much time in personal bickerings. Many radical measures have been introduced, but the only bill enacted during the first half of the session was one appropriating money for the expense of the legislature. Altogether, it is a disappointing beginning; but legislative vagaries will be held in check by the executive, and gradually experience and growth of intelligence will bring improvement.

A London scientist is exploring the "color cure" or "chromopathy," based on the influence on disease or morbid states of the system which different states of light waves are presumed to exert. The modus operandi is to allow light to pass to the patient through glasses of different tints. Disease, says the discoverer, "shows a want of harmony in the system—in other words, a want of color." The main doctrine propounded under the system is that red is a stimulant and should be used where there is lack of vitality, while blue exerts a soothing and sedative action. Yellow is "a capital cerebral stimulant." But the color curists are not content with the action of light alone. They think that colored rays should be played on water and that fluid with curative properties, the water being used externally or for internal administration.

Uncle Sam is not only building a big, new mint in Philadelphia, but he is making it the finest in the world. He is also bringing it wholly up to date; for electricity, and electricity only, will be the power which makes the thousands of wheels go round. Electricity is the password for every appliance that knocks for entrance here, and nothing that will not lend itself to the energy of dynamite can find a resting place. The building is a gigantic bunch of electric nerves, and the floors of the many rooms are tattooed with little brass plates, which mark the spots where these vibrating nerves may be tapped to secure the power used in driving the machinery. Every machine in the place will have its own motor attached, thereby rendering its use independent of any other part of the system, making it possible to operate the smallest device, both night and day, without moving any other part of the system.

Ten thousand dollars worth of hardwood lumber was destroyed by fire at Hart on the 30th. Judge Donovan, of Detroit, holds that estates in excess of \$5,000 are subject to the one per cent inheritance tax law. Elizabeth Fitzgerald, better known under her fortune-telling name of Mildred Preston, and who recently humbugged a young Grand Rapids lady out of several hundred dollars in cash and jewels, was on the 30th sentenced to the Detroit house of correction for five years.

ASCHER GETS A NEW TRIAL

The Convicted Murderer of V. C. Nichols, a Farmer, HAS BEEN GRANTED NEW TRIAL

By the Supreme Court—The Case Attracted Much Attention in Detroit Where the Murder was Committed—Other Events of a Week Briefly Related.

Weather Crop Bulletin. The weekly weather crop bulletin of the U. S. climate and crop service, issued at Lansing on the 21st, says that in most sections of the state the rainfall has been sufficient, but in the extreme southern counties are almost droughty. Several sharp frosts occurred, which were quite general, but the damage, in nearly all cases, was very light, and in most counties confined to low lands; strawberries, early garden truck and early potatoes were affected most; in the extreme southern counties some early corn was cut down and will have to be replanted. Wheat and meadows are generally improved; wheat continues very uneven, some fields being reported in fine condition, while others are very poor; oats and barley look healthy, have generally made slow growth. Pasturage has improved. Rye is heading and in general promising condition. Early potatoes have germinated nicely. Plowing for corn and beans is well advanced in most counties of the lower peninsula; corn planting is quite general and in the extreme southern counties nearly finished; sugar beet seeding is well advanced and in Monroe county the early seeding is up, and being cultivated. With but very few exceptions, correspondents report that fruit prospects continue very good.

Ascher Gets a New Trial. Edward Ascher, convicted in Wayne county of the murder of Valmore C. Nichols, was on the 21st granted a new trial by the supreme court. Ascher's case attracted widespread attention. His alleged victim was interested in spiritualism. He went to Detroit from near Ypsilanti to consult a medium. He made several visits, and on the evening of August 10, 1898, he was robbed and his body thrown into the river. Stones were attached to the feet and bound around with copper wire. His money was gone, and his gold watch and other effects were in his clothes. It is claimed that he had worn a cotton belt containing \$400 in gold about his person. The day before Nichols was found in the river he rented a boat at Belle Isle, Detroit, and was then accompanied by a man, partially identified on the trial as Ascher. The supreme court finds errors in the trial of the case sufficient to warrant reversal.

Oakman Ousted From Tax Commission. The supreme court has ousted Root, Oakman as a member of the state tax commission. The opinion was written by Chief Justice Montgomery and concurred in by the four other justices. As soon as the order of the court is served upon Mr. Oakman he must relinquish his office to Wm. T. Dust, who was appointed by Gov. Bliss. The facts surrounding Oakman's reappointment by Gov. Pingree, his confirmation by the senate, and the immediate reconsideration of the vote by which confirmation was had, and the reference of the appointment to a committee, where it has ever since lain, are familiar. The contention of Oakman's counsel was that having once voted to confirm the appointment the senate had no authority to reconsider the same. This, the opinion says, is the most important question in the case.

'Twas All a Dream. Mrs. John Moon, the mother of Mrs. Ethel Costello, the Kalamazoo nurse, alleged to have recently fallen heir to \$300,000 through the death of a rich uncle of her first husband in Honduras, arrived in Kalamazoo from Marcellus on the 23d. She went directly to the home of J. H. Bostwick, where her daughter had been engaged as nurse, but was informed that the alleged heiress had slipped away on the 18th and that her whereabouts was a mystery. Mrs. Moon says that the story of her daughter having fallen heir to the large estate was untrue, and also that her daughter was never married to a man named Costello, but after she was divorced from her husband, Ira Washington, she assumed the name Costello because of her dislike of both of her former names.

An Outrage at Lake Odessa. A heavy charge of dynamite was placed under the window of Mrs. Alce Montague's residence at Lake Odessa on the night of the 20th, and exploded. All of the windows of the residence were torn out and the woman and her daughter frightened so they have had a doctor in constant attendance ever since. Gossip has been running wild about the woman, and it is evident that this is the result. Mrs. Montague has always been a good reputation. Her daughter is a teacher in the village schools. Great excitement prevails and arrests may follow.

Ten thousand dollars worth of hardwood lumber was destroyed by fire at Hart on the 30th. Judge Donovan, of Detroit, holds that estates in excess of \$5,000 are subject to the one per cent inheritance tax law. Elizabeth Fitzgerald, better known under her fortune-telling name of Mildred Preston, and who recently humbugged a young Grand Rapids lady out of several hundred dollars in cash and jewels, was on the 30th sentenced to the Detroit house of correction for five years.

MINOR MICHIGAN MATTERS.

Hart is to have a starch factory. A "Jack the Hugger" is operating at Grand Rapids.

There are several cases of smallpox in Tuscola county. South Haven is to have free mail delivery service on July 1.

Potatoes are still being shipped from Hart in large quantities, the price being 33 cents.

Nearly \$50,000 worth of property was destroyed by fire at Traverse City on the afternoon of the 23d.

Fairfield people are making great preparations for Memorial Day. S. Milo Dole, of Adrian, will make the address.

The Holland furniture factory, recently burned, is nearly completed again, and will employ 75 more men than formerly.

Counterfeit money is in circulation at Alpena. Dollars of 1885 and nickels of 1901 are the most numerous. It is believed they are of local manufacture.

Owosso's mayor has announced that he will close up every business place in that city on Sunday. Restaurants and cigars store proprietors and confectioners complain bitterly.

The annual reunion of the 6th Michigan cavalry will be held in Ionia, July 4. A fine program is being prepared, including a description of the battle of Monterey Gap, July 4, 1863.

The 13-year-old son of Mr. and Mrs. Geo. Landon, who reside just outside the limits of Alcona, was struck by a Rapid railway car on the 19th, and received injuries which caused his death a little later.

Thos. Smith, aged 27, of Sturgis, suicided at Mishawaka, Ind., on the night of the 21st. His wife left him some time ago, and this is supposed to have prompted the deed.

Detroit capitalists have secured options on 300 acres of valuable marl lands at Coion. The citizens of that village immediately raised a bonus of \$5,000. The plant is to have a capacity of 1,000 barrels per day.

The April report of State Salt Inspector Dunwell is as follows: Manitowish county, 175,261 barrels; Mason, 62,318; St. Clair, 48,146; Saginaw, 37,815; Bay, 29,995; Wayne, 2,746; Iosco, 2,182; Midland, 1,850; total, 379,273.

Because his father pawned his mother's shoes for drink, Earl C. Truesdell, aged 17, a postal messenger at Saginaw, secured an old shotgun and shot his father between the eyes. The wound is serious but not fatal.

The village of McLean claims to have the most efficient fire department for a village of its size in the state. In two minutes and 20 seconds after an alarm was turned in the firemen had a stream of water playing on the flames. The fire was extinguished with small loss.

A good Stanton man was late home from prayer meeting the other evening and his angry spouse attacked him at the door with a stick of wood. An ugly gash in the head is the result. Then people wonder why there are more women in the churches than men.

A franchise has been granted to the new electric railway company which is to operate a line from Muskegon to Ludington. Right of way is being secured along the route and there seems to be no question but that it will be built at an early date. The people of Oceana county are enthusiastic over the enterprise.

It is said that a scourge of curl leaf throughout the western Michigan fruit belt, is threatened. The growers and owners of peach orchards for miles around report that the prolonged cold and wet weather is causing great damage, and that unless a change is experienced soon, the loss will run high in every section.

Mrs. Sarah Quimby, wife of a farmer living five miles south of St. Louis, gave her two children, a girl and a boy, a fatal dose of morphine on the 19th, and then tried to suicide by the same method, but failed. The children she killed were those by her first husband. She must now answer to the charge of murder.

Railroad Commissioner Osborn's power to grant or refuse applications from suburban street railways for grade crossings over street railroad tracks is curtailed by a bill which passed the house on the 21st. It vests the power in the state crossing board. The bill also provides for a general law for incorporation or reincorporation of suburban railways.

The civil service commission will hold examinations at all cities in Michigan having free delivery on June 18, for the positions of botanical clerk and assistant zoological clerk and assistant ethnologist. The salaries of the positions range from \$840 to \$1,200. An examination will also be held at South Haven on June 15 for the positions of clerk and carrier at that postoffice.

Undoubtedly one of the smoothest rascals ever liberated from the state prison is John R. Davis, who was paroled by Gov. Pingree just at the close of his administration. Davis within a month from the date of his release broke his parole and skipped. Recently the prison officials learned that he was in St. Louis, Mo., and secured his arrest, and Deputy Warden Northrup went to St. Louis and brought him back, arriving at the prison on the 21st.

Reports to the state board of health by representative physicians in active general practice in different parts of the state, indicate that rheumatism, bronchitis, neuralgia, tonsillitis and influenza in the order named caused the most sickness in Michigan during the week ending May 18. Cerebrospinal meningitis was reported present at 4 places, whooping cough 19, typhoid fever 31, diphtheria 34, measles 40, scarlet fever 66, smallpox 85, and consumption at 207.

Sheep killing dogs are getting in their work at Willow—one farmer losing 26 on the night of the 19th.

DOINGS OF THE 41ST SESSION.

The house passed the following bills on the 23d: Abolishing office of chief deputy game warden; Detroit police pension act; amending charter of Port Huron; amending Saginaw charter; appropriation upper peninsula prison, \$16,635; providing that officers making levy on personal property shall file a statement within 48 hours of where goods are stored; setting aside certain state lands in Crawford and Roscommon counties for the use of the forest reserve commission; dairy and food commission appropriation, \$23,000 a year and increasing salaries of commissioner, deputy and chemist; amendment to the law relative to the taxation of inheritances; repealing sparrow bounty law; amending Detroit charter so as to authorize the common council to license laundry branch offices; providing for the drainage of highways where it is necessary to secure private right of way; authorizing the incorporation of associations for the instruction of embalmers; providing that processes against electric interurban railways may be served on conductors outside of cities; providing for the appointment of boards to examine and license plumbers; placing the state census of 1904 under control of the secretary of state; income tax, 1 per cent on incomes over \$2,000; organizing the township of Miller, Alcona county, into a union school district; authorizing the state board of health to examine and license undertakers to embalm bodies infected with contagious diseases for transportation; abolishing political conventions in Kent county—referendum attached; general military bill.

The senate passed the following bills on the 21st: To make a boulevard of Lafayette avenue, Detroit; railroad taxation bill; to authorize Houghton county to build a pest house; amend Manistee charter; to pension Detroit policemen to recognize school districts in Saginaw county; to fix the salaries of officers of the legislature; relative to the fees of registrar of deaths; relative to the incorporation of A. O. U. W. lodges; relative to the incorporation of fraternal beneficiary societies; relative to the incorporation of societies for the prevention of cruelty to children; relative to estates in remainder; relative to the duties of salt inspectors; for a county abstract system in Ontonagon county; to fix the salary of the state superintendent of fisheries; to empower the state board of education to prescribe the courses of study in state normal schools.

The following bills were passed by the house on the 21st: Revising laws for the incorporation and regulation of interurban railways; providing a salary of \$1,800 a year for the superintendent of fisheries in lieu of all other expenses; geological survey appropriation of \$2,800; ad valorem taxation bill; increasing state tax commission from three to five members; appropriating 5,000 acres of state tax lands for the purpose of clearing the channel of the Kawakawin river, Bay county; amending the charter of the city of Adrian; amending the charter of Grand Rapids to provide for the election of city attorney and to prevent defaulters from holding office; providing a specific tax of 3 per cent on telephones and 7 per cent on telegraph; fixing compensation of employes of senate and house; amending charter of Manistee; authorizing common council of Detroit to make a boulevard of Lafayette avenue.

The following bills were passed by the house on the 23d: Amending Saginaw county salary bill; allowing members of Wayne county jury commission 10 cents a mile for travel; providing specific tax of 3 per cent on gross earnings of sleeping car companies; establishing union school district in Tittabawassee township; authorizing sale of delinquent tax lands in Bay City; amending charter of Sault Ste. Marie; Detroit water board bill; same subject; publication of the laws and documents.

The general military bill was finally passed by the house on the 23d, by a vote of 58 to 6 and if the senate concurs to Rep. Ames' amendment relative to a colored company the state military board will be able to make the necessary preparations for a 10-day camp, which this year will be held at Manistee.

The senate passed the following bills on the 23d: To amend Port Huron's charter; to amend Saginaw's charter; for the transfer of certain state lands to the city of Lansing for highway purposes; relative to pay of Saginaw county officers; for the Torrens system of registering land titles.

Gov. Bliss has appointed the seven members of the state road commission, which was recently created by a bill, as follows: Senators Earl and Palmer, Reps. McKay, French and Goodrich, and Capt. E. P. Allen, of Ypsilanti, and C. J. Munroe, of South Haven.

For all practical purposes the work of the present session will be brought to a close at noon on the 29th, the senate concurring in the house resolution providing for no further business after that time and fixing the date of final adjournment for June 6.

A delegation of labor men from Detroit, Grand Rapids and Flint had a hearing before Gov. Bliss on the 22d on the garnishee bill, and they presented numerous arguments to support their petition that the governor veto the bill.

The following bills were passed by the house on the 20th: Authorizing Houghton county to construct and maintain a pesthouse; amending general tax law relative to vessel property.

The joint conference committee railroad tax bill passed the house on the 21st by a vote of 67 to 21.

Italy has demanded satisfaction from Turkey for the death of Decoreis, the Italian who was summarily shot by the sultan's order on suspicion of being an emissary of the young Turkey party.

PRESBYTERIANS IN SESSION

At Philadelphia—General Assembly Takes Up Question of REVISION OF THEIR CREED.

Fifty of the 233 Members Ask Dismissal of Subject—Many Ask Revision or an Explanatory Statement—An Indian Outbreak Looked for in Wyoming.

Revision of Presbyterian Confession. The important question of revising the creed, which for the last two years has been agitating the Presbyterian church, came before the general assembly at Philadelphia on the 23d. The controversy regarding revision has led to the formation of three groups among the 640 commissioners to the general assembly. One group opposes change in doctrinal standards. Another is desirous of setting aside the confession of faith as not truthfully expressing the belief of the church. The third favors maintaining the old confession with a few modifications, and desires the adoption of a clear "declarative" statement, setting forth the most important doctrines. In answer to the questions submitted to the assembly, 50 asked the assembly to dismiss the whole subject, one was undecided, four said they neither desired a revision nor a supplemental statement, nor the dismissal of the whole subject, and of the 233 presbyteries, 15 in the U. S. and 16 in foreign lands, failed to respond. Of the remaining presbyteries, nearly two-thirds of the whole number ask for some change in the creedal statement, 47 desire a revision of the confession, 11 an explanatory statement, 1 a revision and an explanatory statement, 52 a supplemental statement, 15 revision and a supplemental statement, 1 a substitute creed, 1 an alternative creed, and 6 some change, not specified.

Allen's First Annual Report. Gov. Charles H. Allen, of Porto Rico, has presented to the President, through the state department, his first annual report. He expresses the opinion that a scheme of colonial administration, such as is found in the Danish, French and English West Indies, might be safely instituted with variations dependent upon the future policy of the home government. The governor refers to the many suggestions offered that the form of territorial government adopted by the U. S. be applied to Porto Rico, but points out that a standard form of such government, while useful in the U. S., would not apply successfully to this island possession. He calls attention to the fact that while in such close proximity to the U. S. Porto Rico has been a comparatively unknown island to Americans. In conclusion, Gov. Allen urged the introduction of fresh blood and Anglo-Saxon push and energy as the means of lifting the little island out of its lethargy, and by thrift and industry, develop its riches to their full measure.

Indian Outbreak Expected. A dispatch from Lander, Wyo., dated the 21st, says an Indian outbreak is imminent on the Shoshone reservation. Six hundred Arapahoes have defied the authority of the agent, Capt. Nickerson, who has refused them permission to hold their annual sun dance and denied them passes. Trouble has been brewing owing to an order giving them rations but twice a month instead of weekly, as heretofore, and the failure of the government to issue seed grain for sowing. Capt. Nickerson has applied to the Indian department for U. S. troops to maintain his authority and is fearful that a clash may occur at any moment. The Shoshones have not yet joined the revolt.

King Edward had a Narrow Escape. The most dramatic incident in the history of the America's cup occurred on the 22d when a sudden squall on the Solent completely wrecked the new challenger and endangered the life of King Edward and several distinguished persons, including Sir Thomas Lipton. Sir Thomas calculates that a delay of three weeks or a month in the date of the contest in American waters will enable him to come to the scratch. He says that he is greatly handicapped by the fact that he has no duplicate masts for the Shamrock II, but by an unlimited expenditure of money and energy he believes the defects can be remedied in time to sail this year.

Carnegie's Big Gift Gets a Cold Welcome. Scotland is not very enthusiastic over Andrew Carnegie's gift of \$10,000,000 to establish free education in four Scotch universities, Edinburgh, Glasgow, Aberdeen and St. Andrews. Carnegie stipulated that the beneficiaries be his "Scotch fellow countrymen" only, no English, Irish, colonial or foreigners. According to the education authorities the administration of Mr. Carnegie's gift presents considerable difficulties and for this reason the Scotch papers for the present, are rather looking the gift horse in the mouth, while the English press is inclined to cavil at the method of Mr. Carnegie's munificence.

Hart has three churches, three newspapers and three saloons. The census of Ireland shows the population to be 4,556,546, a decrease of 5.3 per cent. This is less decrease than during the previous decade. Scotland, the census shows, has a population numbering 4,717,977 persons.

Gen. MacArthur celebrated the surrender of the insurgent generals Mascardo and Lacena by releasing 1,000 Filipino prisoners. Gen. Moxia, the insurgent chief on the island of Leyte, has surrendered with 20 men, the regiment of his command.

TERRIBLE TRAGEDY.

An Indiana Man Murders Three and Then Commits Suicide.

Ernest Conway, aged 27, married, of Evansville, Ind., shot and killed C. W. Garrison and wife, fatally wounded a patrolman, and driven to desperation by the police, killed himself, on the 19th. After killing Mr. and Mrs. Garrison, his neighbors, he shot their cows and later set fire to the barn. He then barricaded himself in his own house and when a patrolman attempted to arrest him, he shot him. At this point a riot alarm was sounded and the entire police department turned out. They surrounded the house and were about ready to break in when they heard a shot. Later it was learned that Conway had kissed his wife goodbye, ran upstairs and shot himself in the heart.

New Garnishee Law. The amount of wages of a working-man with a family to support that can be attached for debt is 20 per cent of what he earns each week. If he earns but \$8 a week, the entire amount shall be exempt. No matter how much he earns, at least \$8 a week shall be exempt. In no case shall more than \$20 of a family man's weekly wages be exempt from a garnishee writ. If he is a single man with only himself to support, at least \$4 a week shall be exempt from garnishee, but in no case shall more than \$15 in one week be exempt. Working girls shall have the same amount of their wages exempt as unmarried men.

Threw Acid in His Face for Revenge. Charles A. Spencer, better known as "Doc" Spencer, committed a cowardly assault upon Attorney John S. Starkweather at the railroad station in Romeo, on the 20th. As Starkweather entered the door of the building Spencer sprang at him and threw the contents of a bottle containing a strong acid in the attorney's face. Spencer was immediately placed under arrest. Starkweather was badly burned about the right eye, chin, mouth and breast, but his injuries are not serious. Spencer says he intended to main his victim for life, and expresses no regret for his act. He says he has waited for years for an opportunity to wreak vengeance upon Starkweather. Spencer used to live at Romeo, but his home is now at West Bay City.

NEWSY BRIEVITIES. The new Shamrock yacht was again beaten by the old Shamrock on the 21st. Heavy rains caused much damage to property in North Carolina and Tennessee on the 21st. Bresci, the assassin of the late King Humbert, has committed suicide at the penitentiary at San Stefano, Italy. Nine hundred Porto Ricans embarked on the steamer California at Guanica for Hawaii on the 21st, and 400 more are ready to sail. Jack Moffat, the Chicago middleweight, has been matched to box 20 rounds with George Gardner of Boston, at San Francisco, on July 4. Mrs. Lyman J. Gage, wife of the secretary of the treasury, died at her home in Washington on the night of the 17th, after an illness of nine weeks. She was a victim of the grip.

Dave Sullivan has agreed to fight Terry McGovern in a 20-round battle at Louisville next August. Dave thinks it is no cinch for Terry, but there are others who think otherwise. One man was killed, one fatally injured and six others injured by the falling of a part of the sidewalk in front of Central Music hall, Chicago, on the 21st, which is being demolished to make way for an addition to a department store.

The British steamer Para, Capt. Stranger, which arrived at Kingston, Ja., on the 19th, from Colon, reports the suspension of hostilities on the part of the Colombian rebels, and that the Colombian government is believed to be negotiating to end the revolution.

Fr. Edward S. Phillips, of St. Gabriel's church, Hazleton, Pa., who had been missing since April 28, was found dead in a house in New York on the 16th. It is believed he was murdered, and a man by the name of Kirk Stanley is under arrest, charged with the crime.

Two men, Barney Johnson and Thomas O'Malley, were killed by a flyer on the Erie railroad in Cleveland on the night of the 23d. Their bodies were badly cut up. A card found near one of the men showed that he held membership in the longshoremen's union of Lorain, O.

An explosion occurred at the Cambridgeport National bank, at Cambridge, Mass., on the 21st, which badly wrecked the building and seriously injured the cashier, W. H. Ross. The cause of the explosion has not been ascertained definitely, although the police claim to have evidence that it resulted from a time bomb.

The Philippine commission has passed the weather bureau act and has also voted a loan of \$2,500 for each province to be paid by the expenses till the land taxes are available. These loans are payable at the end of 1902. The commission has imposed a registration tax of one peso, annually on all males over 18, excepting soldiers.

By the bursting of the dam at the Victor reservoir at Pike's Peak, Col., on the 20th, 65,000,000 gallons of water were released and a raging current 30 feet deep and at places 300 feet wide, poured down the mountain, carrying wreck and devastation down West Beaver valley to the Arkansas river. No loss of life is reported but considerable damage to property was done.

A number of miners were killed by the explosion of a boiler at the Slope mine, near Lisbon, O., on the 22d. Others received lesser injuries. The engine house and a railroad trestle near by were demolished.

CHINA WAR NEWS.

The state department has been made fully acquainted by Mr. Rockhill with the character of the proposition as to the floating of the indemnity loan unfolded at Pekin. While grave objections are perceived to the Russian project for a joint guarantee of the loan, because of the immense difficulty of securing the assent of congress to an agreement which would entangle for more than a quarter of a century at least, there is nothing in Mr. Rockhill's instructions which would cause him to antagonize the proposition, provided it is fully developed so as to secure the safety of the loan while assuring the integrity of China. It is suggested that these objects can be best secured by causing China to deliver to each nation bonds bearing 4 per cent interest to the face value of the nation's indemnity claim. The nation holding the bonds could dispose of them at its pleasure, it could fix its own guarantee and sell the bonds in the open market. England, too, is opposed to a joint guarantee of loan.

Reports have been received from Pekin to the effect that Field Marshal Count von Waldersee has informed the Chinese that the troops will not leave Pekin until the court returns, and he himself is received in imperial audience. The French have withdrawn from the Shansi expedition, and the English have refused to take any part in it. It is probable, therefore, that the Germans will be compelled to go alone. In spite of constant and threatening difficulties, Count von Waldersee, single-handed, continues to maintain the prestige of foreigners in this part of China.

A dispatch from Taku says that Gen. Chaffee was told as he was about to leave Pekin that there were two cases of smallpox among the Indian troops now in camp at Tonku, where the Americans were to proceed to board their transports. Gen. Chaffee is now awaiting developments. In the event of being held by quarantine he will probably move up the Pei river for two weeks.

The foreign ministers' meeting at Pekin on the 22d was very unsatisfactory. No power was willing to accede to the Americans' idea of a reduction of the Chinese indemnity to \$200,000,000, though Great Britain recognizes the advisability of some reduction.

TRANSVAAL WAR ITEMS. Eight hundred Boers have crossed the Orange river from the northwest, and have reinforced the commandos in the eastern district. The latest reliable report locates Dewet near Philippolis, in Orange River Colony, and not far from the Cape line, with 40 horsemen. All the commandos in the Orange River Colony have instructions to cross the Orange river. Several British patrols have been ambushed. A parliamentary paper just issued shows the total of British troops in South Africa, May 1, to be 249,416. The total deaths were 14,978 and wounded 17,209. In hospital April 15 there were 13,797.

Marthinus Wessels Pretorius, the first president of the Dutch African Republic, the title of which was changed in 1858 to the South African Republic, died May 19 at Potchefstroom, Transvaal Republic.

Servia is on the verge of a revolution. The Obrenovitch dynasty, always hated, is certain to be overthrown now because of what is regarded as a swindle in which both the king and queen were involved. Alexander is showing strength for the first time in his life, and has repelled all suggestions from the cabinet that he divorce his queen.

How To Gain Flesh

Persons have been known to gain a pound a day by taking an ounce of SCOTT'S EMULSION. It is strange, but it often happens.

Somewhat the ounce produces the pound; it seems to start the digestive machinery going properly, so that the patient is able to digest and absorb his ordinary food, which he could not do before, and that is the way the gain is made.

A certain amount of flesh is necessary for health; if you have not got it you can get it by taking Scott's Emulsion.

You will find it just as useful in summer as in winter, and if you are thriving upon it don't stop because the weather is warm.

Prepared only by E. C. DeWitt & Co., Chicago. The \$1. bottle contains 2 1/2 times the 50c. size.

THE HOME GOLD CURE.

An Ingenious Treatment by which Drunkards are Being Cured Daily in Spite of Themselves. No Noxious Doses. No Weakening of the Nerves. A Pleasant and Positive Cure for the Liquor Habit.

It is now generally known and understood that Drunkenness is a disease and not weakness. A body filled with poison and nerves completely shattered by periodical or constant use of intoxicating liquors, requires an antidote capable of neutralizing and eradicating this poison, and destroying the craving for intoxicants. Sufferers may now cure themselves at home without publicity or loss of time from business by this wonderful "Home Gold Cure" which has been perfected after many years of close study and treatment of inebriates. The faithful use according to directions of this wonderful discovery is positively guaranteed to cure the most obstinate case, no matter how hard a drinker. Our records show the marvelous transformation of thousands of Drunkards into sober, industrious and upright men. "Wives Cure your Husbands! Children Cure your Fathers! This remedy is in no sense a nostrum but is a specific for this disease only, and is so skillfully devised and prepared that it is thoroughly reliable and pleasant to the taste, so that it can be given in a cup of tea or coffee without the knowledge of the person taking it. Thousands of Drunkards have cured themselves with this priceless remedy, and as many have been cured and made temperate men by having the "CURE" administered by loving friends and relatives without their knowledge in coffee or tea and believe today that they discontinued drinking of their own free will. DO NOT WAIT. Do not be deluded by apparent and misleading "improvements." Drive out the disease at once and for all time. The "HOME GOLD CURE" is sold at the extremely low price of One Dollar, thus placing within reach of everybody a treatment more effectual than others costing \$25 to \$50. Full directions accompany each package. Special advice by skilled physicians when requested without extra charge. Sent prepaid to any part of the world on receipt of One Dollar. Address DEPT. C337 EDWIN B. GILES & COMPANY, 2830 and 2832 Market Street, Philadelphia, Pa. All correspondence strictly confidential.

The round up of the May term of circuit court took place last Friday when Chas. Murdy, of Fairgrove, the rapist, was sentenced to three years at the Jackson state prison. Marshall Mapley is quite ill.

Mr. Coban lost his horse on Sunday.

E. Moshier is visiting his parents, here.

The Ladies Aid met Wednesday afternoon with Mrs. John Brown for tea.

Mrs. Ben Graves and children are spending the week at her father's, W. Wilson.

One week from next Sunday afternoon Children's Day will be observed in the church here.

Our new store keeper is talking of putting up a hay shed and potato cellar in the near future.

W. A. Howard and son, Clifford, of London, Ont., who spent a week with relatives here returned to his home Tuesday.

Mrs. N. Hartt who has been visiting relatives in Sanilac and at Marlette the past two weeks, returned to her home Sunday.

Mr. Hallack was at Marlette consulting Dr. Atchison in regard to his eye, which is giving him considerable trouble lately.

Mrs. J. Legg visited a couple of days with her daughter, last week, and is spending a few days with another at Caro this week, as she has not entirely recovered from her recent illness.

The many friends here of Wm. Weldon, who worked in the brick yard at Cass City when the explosion took place Monday, were pleased to hear that Will escaped without injury but lost his bicycle.

### W. C. T. U. Convention.

The nineteenth annual convention of the Woman's Christian Temperance Union of Tuscola County met at the Presbyterian Church in Caro, May 22nd and 23rd. The Cass City Union was represented by Mrs. J. W. Macomber, the chosen delegate, Mrs. C. H. Morgan, Mrs. W. I. Jones, Mrs. J. C. Leing, Mrs. E. A. Jones, Mrs. P. R. Weydemeyer, Mrs. Chas. McCue and Mrs. D. J. Landon. The first session opened at 1:30 p. m., on the 22nd. Devotions were led by Mrs. Andrews, of Vassar. She spoke of the much needed elements in temperance work, viz: backbone, pluck and ambition. This was followed by the roll call of officers and superintendents and appointment of committees. The county treasurer, Mrs. Christina Rounds, of Mayville, read the annual financial report. The local presidents of the unions represented gave five minute talks on their work. A business session occupied the remainder of the afternoon. The evening session opened at 7:30, the devotions being led by Dr. Barlow, of Caro. Mrs. H. M. Luzzillo delivered the address of welcome. A very pleasing feature of the program was the piano solo rendered by Miss Hattie Park, of Caro. The response to the address of welcome was given by Mrs. K. R. Hill, of Vassar. Her paper was finely prepared and closed with an original poem on Mrs. Nation. A paper entitled "The New Call to the Temperance Womanhood of America," was read by Mrs. C. H. Morgan, of Cass City. The paper dealt upon the social evils existing to-day in the Philippines and Hawaiian Islands as reported in the New Voice. At the close Mrs. Morgan presented a petition addressed to President McKinley, which read as follows:

"We, the undersigned, in behalf of the Christian womanhood of America, do earnestly petition you, the head of our American civilization, to do something and do it quickly, to suppress the awful evil that is existing to-day in the Philippines and Hawaiian Islands, concerning the system of license and official medical inspection of those who serve the evil passions of our soldiers." At the suggestion of Rev. I. E. Springer, it was arranged that another petition be prepared, for the voters of America. Later, Mrs. Morgan was chosen delegate to the convention to present her paper and petition to the state W. C. T. U. at Marshall, beginning June 6th. The Thursday morning session opened with prayer service, led by Mrs. Ad. Mareland, of Caro. Singing, reading of minutes, reports of auditing committee and department work followed. An article on Franchise was read by Mrs. W. E. Clough, of Caro, and Mrs. R. N. Mulholland, of Vassar, led in an animated discussion of the subject, "Where are we as Temperance Workers." An impressive paper on Narcotics, prepared by Mrs. Mary Phillips, of Mayville, was read by Mrs. Christina Rounds. Mrs. Nellie Forbes, of Vassar, reported work done for soldiers and sailors, and also Flower Mission work as done by the Superintendent, Mrs. Harry Miller, of Vassar. The afternoon session was taken up with discussions and reports from various committees, and the convention closed, having inspired every heart with a determination never to let our zeal in the temperance cause wane, so long as the liquor traffic is permitted to be a legalized industry.

**Dr. Loyd Ford's Dyspepticide** is the new and perfect cure for indigestion, dyspepsia, constipation, heartburn, sick headache and all ills from poor digestion. It makes the stomach right. T. H. Fritz, Cass City; F. A. Francis, Kingston.

It is a safe assertion to make that not one third of the girls and women who wear airtight corsets have the faintest conception of what they really are and at what cost they are secured—a cost which appeals with peculiar force and significance to every woman with the first instinct of maternity within her. — June Ladies' Home Journal.

"I have been suffering from Dyspepsia for the past twenty years and have been unable after trying all preparations and physicians to get any relief. After taking one bottle of Kodol Dyspepsia Cure, I found relief and am now in better health than I have been for twenty years. I can not praise Kodol Dyspepsia Cure too highly," thus writes Mrs. C. W. Roberts, North Creek, Ark. Amos Bond, Cass City; F. A. Francis, Kingston.

### A Cashier Testifies.

Pepsin Syrup Co., Monticello, Ill.

Gentlemen:—After twenty years of aches and pains caused by constipation brought on by sedentary habits, I have found more relief in two bottles of Dr. Caldwell's Syrup Pepsin than all of the hundreds of other remedies I have tried, and I take pleasure in giving you this testimonial to prove that the finest preparation made for stomach troubles.

Very truly yours, D. F. LANGE, Cashier Wahash R. R., East St. Louis. Sold at A. Bond's, Cass City; F. A. Francis, Kingston.

Before Justice Denton last Friday the civil damage suit of George Story against McCarly Bros. of Argyle, was up for hearing but quashed on account of defective summons papers. Story is one of the proprietors of the German Medicine Co., which is holding 10 cent shows of none too elevating a character around the county. While at Argyle they made too free a use of the names of the McCarly boys in their entertainment and an assault and battery followed in which the German Medicine Co. came out second best. As the latter left town soon after Argyle citizens are not worrying much over the occurrence. A new suit was started on Friday and adjourned to June 3rd. —Sanilac Republican.

### Beware of a Cough.

A cough is not a disease but a symptom. Consumption and bronchitis, which are the most dangerous and fatal diseases, have for their first indication a persistent cough, and if properly treated as soon as this cough appears are easily cured. Chamberlain's Cough Remedy has proven itself and spread so rapidly that it has won a reputation and extensive sale by its success in curing the diseases which cause coughing. If it is not beneficial it will not cost you a cent. For sale at Bond's Drug Store.

Last Saturday at noon the frame house of Robt. Pickels, six miles north of here burned to the ground. The fire started from a defective stove pipe and spread so rapidly that he was unable to save anything and if it had not been for the timely arrival of Sam Lunge, of this place, Mr. Pickel's aged mother would have been consumed by the flames. Mr. Lunge went into the burning building and got her out just as the second floor came down with a crash. There was no insurance on the building. —Elkton Advance.

### A WORTHY SUCCESSOR.

"Something New Under the Sun."

All doctors have tried to cure CATARRH by the use of powders, acid gases, inhalers and drugs in paste form. Their powders dry up the mucous membrane and irritate the lining of the throat. The powerful acids used in the inhalers have entirely eaten away the same membranes that their makers have aimed to cure, while pastes and ointments cannot reach the disease. An old and experienced work done for soldiers and sailors, and also Flower Mission work as done by the Superintendent, Mrs. Harry Miller, of Vassar. The afternoon session was taken up with discussions and reports from various committees, and the convention closed, having inspired every heart with a determination never to let our zeal in the temperance cause wane, so long as the liquor traffic is permitted to be a legalized industry.

### It Saved his leg.

P. A. Danforth, of LaGrange, Ga., suffering for six months with a frightful running sore on his leg; but writes that Bucklen's Arnica Salve wholly cured it in five days. For Ulcers, Wounds, Piles, it's the best salve in the world. Cure guaranteed. Only 25c. Sold at T. H. Fritz's, Cass City; F. A. Francis, Kingston.

Peletich M. Case, aged 86 years, died Saturday night of old age. He was once sheriff of Tuscola county. He was a pioneer merchant of Vassar, and had lived there a half century.

A tramp stole a bottle of Dr. Caldwell's Syrup Pepsin. When he appeared in court he explained that he saw in the advertisement that it was "easy to take," so he took it. "Discharged," said the Judge. "I will go and take some myself." It is easy to take and a perfect laxative. Sold at A. Bond's, Cass City; F. A. Francis, Kingston.

A case of smallpox exists in the village of Caro. It is that of a man named Nelson Welch, who went there from Vassar on Monday. The house has been quarantined and the health officer is doing everything in his power to isolate the case.

Skin affections will readily disappear by using DeWitt's Witch Hazel Salve. Look out for counterfeits. If you get DeWitt's you will get good results. It is the best and positive cure for piles. Amos Bond, Cass City; F. A. Francis, Kingston.

The Adrain Press puts the whole thing in a nutshell when it gives this little piece of advice to the path masters of Lenawee county: "Do not touch a piece of road in your district unless you can make it better. It is preferable to build ten rods right than to tinker ten miles of it."

Thos. Maple, Birkbeck, Ill., writes: "I had a very bad case of kidney trouble and my back pained me so I could not straighten up. The doctor's treatment did me no good. Saw Foley's Kidney Cure advertised and took one bottle which cured me and I have not been affected since. I gladly recommend this remedy." T. H. Fritz, Cass City; F. A. Francis, Kingston.

"The Winning War Against Consumption" is the title of an article contributed by Sylvester Baxter to the Review of Reviews for June. Mr. Baxter shows what has been done in this and other countries by the best of medical science, and the "pure air" treatment of tuberculosis, without resort to mild climates.

The Great Scourge of modern times is consumption. Many cures and remedies have been tried in vain, but Foley's Honey and Tar does truthfully claim to cure all cases in the early stages and always affords comfort and relief in the very worst cases. Take no substitutes. T. H. Fritz, Cass City; F. A. Francis, Kingston.

If people only knew what we know about Kodol Dyspepsia Cure, it would be used in nearly every household, as there are few people who do not suffer from a feeling of fullness after eating, belching, flatulence, sour stomach or water-brash, caused by indigestion or dyspepsia. A preparation such as Kodol Dyspepsia Cure, which, with no aid from the stomach, will digest your food, certainly can't help but do you good. Amos Bond, Cass City; F. A. Francis, Kingston.

The contract for the construction of the Caro & Lake Huron Railroad has been awarded to Messrs. W. E. Tench & Co., 33 West Montcalm street, Detroit, Mich. While they have the entire contract of Lenawee county, it will probably be sub-let. This road runs from Caro north through the counties of Tuscola and Huron and connects with the Pontiac, Oxford & Northern Railroad at Owendale, a distance of 25 miles. The contractors have opened an office in the Bank building, over the Caro Exchange Bank. Ground will be broken for the road on Monday, and the contractors will put a large force of men and teams to work at once. —Caro Journal.

How it is Done. The first object in life with the American people is to "get rich," the second, how to retain good health. The first can be obtained by energy, honesty, and saving; the second, (good health) by using Green's August Flower. Should you be a despondent sufferer from any of the effects of Dyspepsia, Liver Complaint, Appendicitis, Indigestion, etc., such as Sick Headache, Palpitation of the Heart, Sour Stomach, Habitual Constiveness, Dizziness of the Head, Nervous Prostration, Low Spirits, etc., you need not suffer another day. Two doses of the well-known August Flower will relieve you at once. Go to Fritz's Drug Store, Cass City; or Francis' Drug Store, Kingston, and get a simple bottle free. Regular size 75 cts., get Green's Prize Almanac.

Dr. A. B. Spitzer, of Detroit, also proprietor of Reed City Sanitarium, is coming to your town, where he will remain for one day only, to give the sick an opportunity to consult him. He cannot see him at his Sanitarium. The Doctor has so much faith in the experience he has had in treating chronic diseases that he will give one month's treatment and medicine free. Also Free Surgical Operations to all those that are too poor to pay. All that he asks in return is that every patient will state to their friends the results obtained by his treatment. All forms of chronic diseases and deformities successfully treated. No man in this State has had such extensive experience in the treatment of CATARRH, EYE, EAR, THROAT AND LUNG DISEASES as the Doctor. He graduated 37 years ago from Cleveland, Ohio; was 15 years in general practice; after that lectured as Professor of Anatomy and Physiology in Detroit, Homoeopathic Medical College for 2 years; was 3 years Superintendent of Anna and Ypsilanti Sanitariums. The experience, combined with many years' study in the best hospitals in the country, and examining and treating thousands of chronic cases, has prepared him to cure when the general practitioner fails. Have you been sick for years? Are you discouraged? Call and see us; we will tell you whether we can cure you or not. If we cannot cure you, we will tell you what relief we can give you. Remember, one month will be absolutely free—medicines, surgical operations and the benefit of all our skill—to all who are too poor to pay. Our methods of treatment embrace that known by all the schools, with the aid of electricity, that most wonderful of all agents in Nature, Loss of Power, Rheumatism, and all diseases of the nervous system. Go early, as my office is always crowded. N. B.—Cancers, Tumors, Blood and Skin Diseases cured by a new system. Piles cured in from 5 to 30 days without the knife. Female and private diseases of all forms treated successfully. Many patients that cannot be treated at home can be cured at our Sanitarium, which is in charge of the best of medical skill, under the Doctor's direction. Terms for board and treatment the lowest of any sanitarium or hospital in the United States. Remember, we give a written guarantee to cure every case of PILES and RHEUM. # LAUNCHING OF THE BATTLESHIP OHIO.

**THE PRESIDENT AND MRS. M'KINLEY.**  
Some pictures of the President and his wife taken at different periods of the past thirty years.

Everywhere the vessel went it was visited by thousands and was universally admired and praised. She out-sailed everything that came in competition with her, and became a model for other nations to imitate. In the Mexican war she saw her only war service, and was the flagship of the American fleet at the siege of Vera Cruz.

When the steam era began she became effete and took her place with the old Vermont and the old Constitution as a receiving ship. Finally in 1883 she was sold to be broken up. She had long been as useless in war as the galleys of Julius Caesar.

Such was the Ohio of 1820, and now enters the Ohio for 1901, a magnificent ocean steel fortress that depends on neither wind nor tide, but can steam out in the face of a storm as easily

as the old Ohio could sail with favoring winds.

The wooden walls of the first Ohio would be splintered into fragments by a single shot from the new vessel, while all the guns of the old vessel that could be brought to bear could no more injure the sides of the new than if they were so many pea shooters.

Nothing so vividly illustrates the marvelous advance that has been made in the art of naval construction and naval warfare in the past four-score years as the contrast between these two vessels.

Nor would it be strange if, after the lapse of another eighty years, the parallel then made would be as much to the disadvantage of Ohio II. as it is now to Ohio I. Progress is now advancing more rapidly than ever.

to his son, J. Donald Cameron, who served continuously for a period of twenty years—namely, from 1877 to 1897, when he retired from political life. The aggregate number of years served by the father and son is forty-two—twenty-two years did the father pass in the senate, and twenty years did the son. In 1887, with the help of the junior Cameron, Quay was elected to the senate, and with the expiration of his present term will have served seventeen years, with the exception of one session in the senate in 1899 when the Pennsylvania senate failed to elect. So that since 1887 to the present time either a Cameron or Quay has been in the United States senate, and if Quay fills out his present term it will complete a term of service by these three gentlemen of thirty-seven successive years; or, including the total time of this triumvirate in the senate, a period of fifty-nine years. To one of his trusted lieutenants, after his withdrawal from official position, Matthew Stanley Quay will doubtless delegate the power of leadership, and thus as he nears the end, as the memories of his strenuous political conflicts become fainter and fainter and the inevitable impairments of age dim his vision, the influence of the Cameron dynasty, begun over half a century ago, and the long years of his own matchless leadership will yet be a power in the ranks of the Republican party of Pennsylvania, and

## FARM AND GARDEN.

### MATTERS OF INTEREST TO AGRICULTURISTS.

**Some Up-to-Date Hints About Cultivation of the Soil and Yields Thereof—Horticulturists, Viticulturists and Foresters.**

#### Seeding Lawns and Permanent Pastures.

Press Bulletin 220 of the Ohio Experiment Station says: Many inquiries are received at the Ohio Experiment Station for information respecting the best grasses for lawns and permanent pastures and for instructions in seeding. The station has successfully established several lawns by the following method: As soon as the ground is dry enough to work in the spring it is plowed and thoroughly pulverized by harrowing and cross-harrowing until in the condition of a garden. Unless the soil is very rich it should be made so, either by the liberal use of manure or of a complete fertilizer, the latter being preferable because of the seeds of weeds and coarse grasses usually carried in manure. For lawn purposes the fertilizer should carry 4 to 5 per cent of nitrogen, 8 to 10 per cent phosphoric acid and 6 to 8 per cent potash, and should be used at the rate of 600 to 800 pounds per acre.

A mixture of equal weights of Kentucky blue grass and red top, with a pound of white clover seed to a bushel of the mixture, is then sown broadcast, at the rate of two or more bushels per acre of the mixed seed, and harrowed in with a fine toothed harrow. If the ground should be very dry it may be sown, but the finishing touch should always be given with a smoothing harrow, or other fine-toothed harrow, as this leaves the surface in such condition as not to be so liable to be injuriously packed by rain as if sown with the roller.

The reason for mixing the Kentucky blue grass with red top is that the two grasses mature at different seasons, the red top reaching maturity some weeks later than the blue grass, thus keeping up a better succession through the season, while the blue grass is better adapted to the drier and red top to the moister portions of the land. The clover is not only useful in thickening the sod, but by its ability to gather nitrogen it assists the growth of grasses with which it is sown.

For permanent pastures no better grasses have been found by the Ohio station than the varieties above recommended for lawns. Sown together they give a succession throughout the season and adapt themselves to differences in soil, thus giving much better results than if either be sown alone. The seed of these grasses is relatively expensive, however, and it is more economical to reduce the quantity of seed of these varieties and substitute a moderate quantity of red clover and timothy seed. The first year after seeding the crop may be chiefly clover, and should be mown for hay. The second year it will be chiefly timothy, and after that the timothy will gradually disappear and the pasture grasses take its place. By this method of seeding not only will the first cost be reduced, but the clover will serve a most useful purpose in preparing the way for the grasses which are to follow. A mixture of equal weights of clover and timothy, sown at the rate of a bushel to six or eight acres, and cross-sown with half a bushel to a bushel to the acre of mixed blue grass and red top, the whole harrowed in together, will make a fair seeding. In the case of pastures, as well as of lawns, the land should be manured or fertilized if not already rich, and here manure is the better material, if it can be obtained.

All old pastures or lawns should have occasional dressings of manure or fertilizer. The object lessens in the scattered cattle droppings on the pastures demonstrate this point effectively. Such treatment will often thicken up the grass in an old lawn without re-seeding, but if bare spots have made their appearance it will sometimes assist matters to apply a dressing of air slacked lime, at the rate of a bushel to the square rod, work it into the surface with a sharp harrow, and after a few weeks re-seed as for a new lawn.

#### Use of Crude Petroleum in Orchard.

The varying and sometimes disastrous results obtained from the use of refined petroleum on growing trees as an insecticide, and especially against the San Jose scale, have led to the suspicion that the crude product might be less variable and drastic in its effects. But so far as it has been used it would appear that we have yet much to learn, before we can, with safety, recommend the application of the crude product to the different varieties of fruit trees. That it is efficient in destroying the San Jose scale if it is brought in contact with this insect, seems now quite probable. But the hundreds of dead trees that mark the areas where it has been indiscriminately used, point very clearly to the fact that great caution is necessary, and no one is as yet able to say just where safety ceases and danger begins. Then, too, when no permanent injury is apparent, as in the case of the seedling apples on the ground of the Ohio Agricultural Experiment Station, who can say that this unnatural retardation may not, after the first application, prove to be a menace to the life or general vigor of the tree? It is well known that, in nature, these retardations sometimes occur, but nature seldom, if ever, covers the bark of a tree or shrub, and then only in part, with vegetable growths like lichens, and even these are known to be detrimental, a smooth, clean bark being always desirable. In the use of refined

## INDIAN RELICS ARE BOGGUS.

### Southerners Doing a Profitable Business in Their Manufacture.

There is an organized system of imposition in Indian relics. Very few of those found in the cities were ever seen by redskins; they are made by wholesale for purpose of deceiving the credulous. One firm in North Carolina does a large business in this line. The fraud they practice is almost impossible to detect so thoroughly have they mastered the art. Recently this firm tried to palm off on Rev. J. H. Frazee, D. D., of Knoxville, Tenn., who is a collector, some of their goods, but without success. Dr. Frazee received a letter from the firm which mentioned that his name had been recommended by a prominent physician of Knoxville as a person who would likely wish to buy some relics. They represented that they had been making extensive collections of all kinds of relics and had disposed of some, but wished to go out of the business, and therefore would sell relics on hand cheap. The letter said a box of samples would be sent, which was done. Dr. Frazee examined the contents of the box and finding nothing that he did not already have returned them. Shortly afterward a man in the west who had heard of Dr. Frazee as a collector of Indian relics, wrote him, asking that he might put him in the way of getting some Tennessee relics. Dr. Frazee, having given little attention to the specimens from North Carolina, and not detecting the fraud, recommended to his western friend this firm as having represented that it had some relics for sale. In a short time the western man answered and branded the North Carolina firm as flagrant frauds. He had already fallen into their trap. He said the relics he had secured from the bogus dealers of North Carolina were difficult to detect from the real. He had the relics investigated by prominent collectors in the west, who could not determine accurately as to the fraud. The relics were then sent to government experts, who said the whole collection was bogus. The North Carolina tricksters have probably done an extensive business.—Chicago Chronicle.

#### The Plum Curculio.

Prof. E. C. Green—The plum curculio comes forth from winter quarters usually in May. The egg-laying mark of this insect is so characteristic that this curculio is commonly known as the little Turk. The snout is used in cutting the deep crescent mark, while the Turkish emblem is partly made by the ovipositor. The egg hatches and the small, footless maggot begins feeding on the plum under the tiny willed flap which formerly protected the egg. As the larva grows it eats its way to the pit of the young plum and there it sets up an irritation which eventually causes the immature fruit to drop. The larva soon leaves the fruit and enters the ground to pupate, emerging in a few weeks as an adult beetle. It is reported by growers of European plums that the curculio can be controlled by the use of arsenical sprays alone, the success of the operation depending entirely upon the thoroughness of the application. It is advised, by way of preparation, to prune the plum tree so that no cross or parallel branches remain. The tree must be sufficiently open to allow the nozzles to be used freely in all parts of the head. The plums must hang free from the branches. Shortly after the blossoms fall a very thorough spray of Paris green should be thrown from the inside of the tree outward, as well as from the outside inward. In case of rain the poison must be renewed. When the mark of the little Turk is noticed the strength of the spray should be doubled and sufficient lime added to protect the foliage. This mixture should be put on the plums themselves, drenching them thoroughly, the object being to fill the incisions made by the insect in the egg-laying process. I am assured that if this is done carefully the larva is usually killed shortly after hatching, the wound gradually grows together and the fruit develops perfectly.

#### Ships That Carry Live Stock.

The number of vessels carrying live stock that were inspected in 1900 by the Bureau of Animal Industry inspectors was 862. The enforcement of the regulations formulated by the Bureau in accordance with the act authorizing the secretary of agriculture to inspect vessels carrying export cattle from the United States has been most beneficial. The poorer classes of ships have been replaced by specially constructed ships for the cattle traffic, with ample space and proper ventilation, and "having every convenience, with perfect fittings built in them, and all the comforts and safety which ingenuity could provide," thereby diminishing the losses of animals while at sea from twenty-one in every 1,000 that were embarked in 1889, before inspection was authorized, to three in 1,000 in 1893, two years after inspection was begun. Further more, in consequence of the greatly reduced risks of transportation, there has been a corresponding reduction in the insurance rates and a total saving in insurance of more than \$2,000,000 per annum.

#### Foot Bark Beetle.

Another pest discussed at some length in a recent New York bulletin is the fruit bark-beetle. This was especially prevalent last season and did much damage in peach orchards in Western New York, and in some scattered plum and cherry plantations. On peaches its principal injury was due to punctures of the bark on the trunk and larger limbs, through which the sap oozed and formed gummy excrecences. On plum and cherry, however, more injury was done by punctures in the twigs, causing death of the foliage. The natural home of this insect is in dead bark, so all brush piles and dead trees should be removed from the orchards. Caustic washes upon trunks and branches serve as a preventive measure, and cutting off and burning the infested twigs destroys many of the beetles.

The cause of the "wilt" disease of cotton, which has been more or less destructive during the past two or three seasons, is a fungus which attacks the plant from the soil. It first enters the small roots, and subsequently grows into the tap, or stem. The result is that the supply of food and moisture carried up from the roots is greatly decreased. W. A. Orton of the division of vegetable physiology and pathology, United States department of agriculture, says that land once infected with this disease has never been freed from it.

The fruit grower must understand his business. A novice should not venture into the field of horticulture recklessly. To be successful he must determine to know the laws that govern the growing of fruits, and most of these laws he can understand only as he comes into contact with them. It is therefore necessary that he go into the business only on a small scale, and increase as he learns.

An angry person in an argument resembles a cripple in a foot race.

## WESTERN CANADA'S DECEMBER WEATHER

### Equal to That of May in Minnesota.

To the Editor:—Thomas Regan and C. Collins of Eden Valley, Minnesota, went out to Western Canada last December as delegates to look over the grazing and grain lands that are being offered at such low prices and reasonable terms. This is what they say: "We arrived in Calgary about the 20th of December and although we had left winter in Minnesota and Manitoba, we were surprised to find beautiful warm weather at this point, quite equal to what we have in May in Minnesota. There was no snow nor trace of winter to be seen, and the climate was really splendid. Horses, cattle and sheep were running out, in prime condition, with plenty of feed on the prairie, and really better than that of ours established in the south. We are impressed with this country as one of the finest mixed farming countries we have ever seen. The immense tracts of fertile lands well sheltered and abundantly watered leave nothing to be desired.

"Leaving Alberta we returned east and visited the Yorkton district in Assinibola. We drove out about ten miles at this point and were highly pleased with the splendid samples of grain we were able to see—wheat yielding 25 bushels, oats 60 bushels. Roots were also good specimens. From what we have seen, we have decided to throw in our lot with the Yorktoners—satisfied that this part of the country will furnish good opportunities for anyone anxious to make the best of a really good country."

"Any agent of the Canadian government, whose advertisement appears elsewhere in the columns of your paper will give you full particulars of the new districts being opened out this year in Assinibola and Saskatchewan. Yours truly, Old Reader."

The transportation facilities would seem to be ample for all possible demands of the mammoth crowds which are expected at the Pan-American Exposition. The entire street railway system of Buffalo, driven by the power of Niagara Falls, is so laid out as to secure direct communication from all parts of the city to the Exposition grounds. At the northern boundary of the grounds there has been built a fine steam railway station. A two-track steam belt line encircles the city of Buffalo, reaching this station, and all the steam railroads centering in Buffalo have access to these tracks. This means of transportation will be extensively used both for excursion trains from out the city and for conveying people from the various parts of the city to the grounds.
