Tuberculosis Deaths Greatly Decreased in Late Years

Miss Mary Alice Smith, medical social worker of the Michigan Tuberculosis Association, was the speaker at the Tuesday luncheon of the Rotary Club at Hotel Gordon, and explained the program of the society, the methods employed in education and in tuberculin testing. Tuberculosis is the leading cause of death between the ages of 15 to 45 years, she said, but the reduction of the annual death rate of 103 per 100,000 population in 1918 to 33 per 100,000 in 1940 shows a remarkable decrease in tuberculosis deaths. Miss Smith said 289 participated in the tuberculin testing clinic at the Cass City Public Schools on Monday.

Gerald Kerbyson, Mark Gruber, Carl Schell, Gordon Anthes and Esperidion Reyes, young men from this community who were inducted into the Army at Fort Custer on Wednesday, were guests of the Rotary Club Tuesday.

Two Instantly Killed in Caro Auto Accident Saturday

Victims Discussing Previous Auto Crash When They Were Hit by Car.

Lue Keilitz, 59, and Charles McLellan, 49, both of Caro, were instantly killed a half mile northeast of Caro, on M-81, when they were struck by an automobile driven by Mike Marker, 22, of Unionville. Mrs. McLellan was struck a glancing blow by the same automobile and received minor injuries. The accident occurred at 6:30 p. m. on Saturday.

Automobiles of Lue Keilitz, driving southwest and alone in his car on M-81, and Charles McLellan, with his wife and children traveling northeast, were involved in an accident just previous to the fatalities. The two men and Mrs. McLellan were discussing the occurrence when the Marker car came from the northeast on M-81 and hit both men and the woman. Marker told Deputy Sheriff Julius Goslin, who investigated the accident, that he was blinded by the lights of one of the cars involved in the first crash which had been left standing on the side of the road and that he did not see the three persons standing in the road until he had passed the lights and it was too late to avoid hitting them. The left front fender of his car hit the two men. He stopped his car with-in 50 feet from the scene of the place where the three were struck. At the inquest held Monday afternoon, the coroner's jury decided that the accident was unavoidable. Turn to page 4, please.

Workers Will See Sunrise Most of Coming Year

Michigan Clocks May Be Set an Hour Ahead on Monday, February 9th.

Lansing—Michigan's working population will see the sunrise most of the year, in the opinion of R. Glen Dunn, deputy attorney general.

Despite the fact that this state is officially on Eastern Standard Time, it is very probable that Michigan clocks will be set one hour ahead, 2:00 a. m., Monday, February 9, when Daylight Savings Time, established by an act of congress, becomes effective.

Only by an act of the state legislature can Michigan time remain as it is. At the present time there is no indication that the legislature will take such action.

The new Daylight Savings Act, intended to save electricity and step up war material production, requires that clocks all over the county be set ahead one hour. President Roosevelt has signed the bill and the law becomes effective 20 days after the signing.

Michigan is in a unique position on the time question.

With most of the state normally in the Central Standard Time zone—west of the 75th meridian—an act of the legislature has made Eastern Standard Time the legal time in the entire state. The change came as a result of several years experience with Summer Daylight Savings Time, following World War I. Although some agricultural districts objected to tampering with the clocks, the folks in most cities liked the extra hour of daylight in the evening and the legislature listened to the demand for adoption of "fast" time. Detroit and a small portion of the Thumb section fell within the Eastern zone, but all the rest of the state, was officially on Central

It seals metal, masonry, glass or wood or any combination of these. Packaged ready for use—no mixing—it is applied with an ordinary putty knife.

Our government has put into effect severe restrictions on the sale of automobile tires for civilian use. If your car is not engaged in work that is vital to national defense, it is impossible for you to secure new tires. Therefore, it is necessary that you get as much as possible from your present tires.

You must know several important facts in order that you might use old and well worn tires safely. First, as tires get more worn, speed must be reduced. Second, tires that have become worn must be inspected often.

You are also anxious to know how you can make tires last longer. Here are a few tips:

- 1. Save tire wear with slower speeds.
2. Inspect tires frequently.
3. Inflate tires properly.
4. Check often to see that the wheels are in line.
5. Don't strike the curb.
6. Avoid skidding or spinning your tires and take curves at a much slower speed.

Don't forget carbon monoxide! That enemy, just as much a killer as any foreign enemy we have, will be with us until summer.

Carbon monoxide may get you if you let your car run in the garage with the doors closed. Or it may creep upon you when you are driving if the gaskets are not tight and exhaust pipes are not carefully inspected.

Remember! You can't see it—you can't smell it—you can't feel it, and you can't take it.

THE STORY OF ELECTRICITY

Number Two in a series published by The Detroit Edison Company

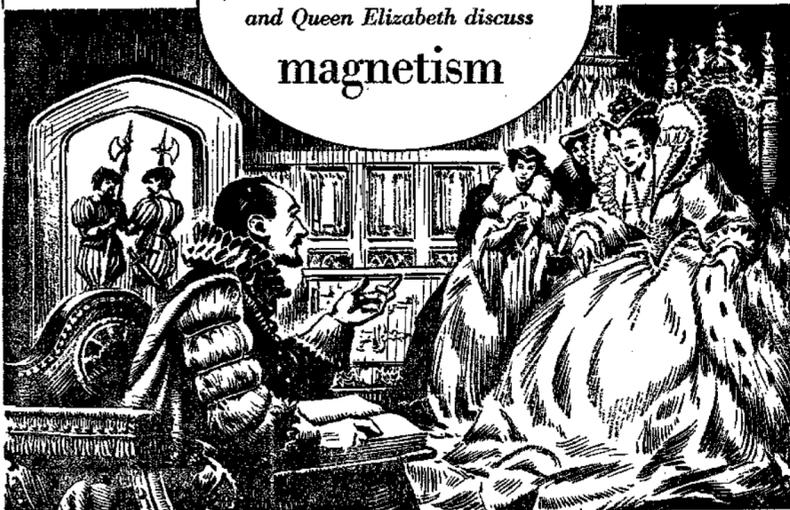

For more than 2,000 years after Thales' experiments with amber and lodestone, his discoveries lay dormant. No one recognized their great importance and significance, or troubled to follow them further. Not until the year 1600, in the reign of Queen Elizabeth of England, was the thread of electrical knowledge again picked up.

dation of the whole science of magnetism as we know it today. Queen Elizabeth and her Court were so interested in his demonstrations that he was granted a pension of £100 a year to further his studies.

Gilbert took up the study of amber, and showed that its power of attraction was common to many other materials: glass, resin, sulphur, rock crystal, sapphire, diamond. These substances he called "electrics." He also showed that the earth itself is a giant magnet, and that this explained the behaviour of the magnetic compass. He used a sphere of lodestone to demonstrate the earth's magnetism. He also devised the "versorium," a light needle or pointer mounted on a pivot for detecting electric charges. The Great Fire of 1666 destroyed nearly all of Gilbert's instruments.

Dr. William Gilbert, Physician in Ordinary to the Queen, was a far from ordinary person. A doctor by profession, he performed and recorded so many experiments with "electrics" that his observations were published in a book, "De Magnete." This monumental work represented 17 years of study and research, and is a magnificent example of inductive philosophy. Written with the "inquiring mind" of a true scientist, Gilbert's book laid the foundation of the whole science of magnetism as we know it today.

Uses for Paw-Paw
The paw-paw has many uses in Bermuda. Leaves of the tree, high in pepsin content, are used to "tenderize" meats. The fruit is served as a vegetable, when green and as a delightful dessert in the ripened state.

BASKETBALL

Cass City High School lost their second game in eight starts Tuesday night by a 17-12 score and their second successive game to Sandusky. Neither team could hit the basket with any degree of accuracy and both played a slow, deliberate style of offense.

Sandusky led at the quarter 2-1 by virtue of making two free throws against one for Cass City. The Maroon and Grey scored two field goals and two free throws the second period to lead 7-4 at half time.

Sandusky came back the third stanza to even the score at nine points each and then scored eight points to Cass City's three to hold a five-point lead when the game ended.

Davison of Sandusky led the scorers with eight points.

Cass City used eleven men in the ball game and ten of them broke into the scoring column. Sickler with nine points and Bugbee with eight led the winners in scoring, while Stacer with nine points was high man for Vassar.

The play of the so-called reserves was the bright spot of the contest when they rang up 19 points in the final period.

The Vassar second team nosed out the local team in a preliminary contest 17-15.

Tuesday, February 3, Cass City travels to Caro to meet the league leaders in a tussle which will go a long way to determine the league championship.

The Upper Thumb Athletic Association had adopted an idea to be tried out during the present season in order to get an opinion of spectators, players and coaches as to its value. The rule states that: "In second team games, a player may not play in consecutive quarters, thereby eliminating the necessity of a rest period between quarters."

The reasons for the new rule are to give more boys an opportunity to compete in athletics by making it compulsory to alternate teams each quarter. The second reason is that by making play continuous and eliminating the intermission between quarters spectators will not be bored by the delay. A third reason is that by saving time it

enables spectators and players to be home earlier. This is a great advantage to teams playing out of town.

Carpenter Prefers Spare Ribs to Cracked Ones

Vernon J. Carpenter may like spare ribs, but he is getting so he has no desire for cracked ones. The morning following New Year's Day, he fell on the ice and cracked several of the curved bones attached to his spine. The following Tuesday, he snapped the ribs again when he made an injudicious movement of an arm. The injuries were healing nicely when they "went wrong," a week or 10 days later, for the third time. Now, Mr. Carpenter is "staying put" in bed, resolved that no matter how long it takes, he's going to take matters easy until the chest cavity bones knit firmly and well.

Editors Study Effects of War

Editors and publishers of Michigan newspapers, attending the 67th annual convention of the Michigan Press Association at Michigan State College Friday and Saturday, were warned by newspaper leaders that one-eighth of all newspapers quit publication during World War I and that advertising and subscription rates may have to be adjusted in 1942 to meet higher production costs during World War II.

One-third of Michigan daily newspapers increased advertising rates in 1941, while nearly that number have raised subscription rates. The trend has been marked since December.

Among the speakers were Grove Patterson, editor, Toledo Blade; Dr. Charles L. Allen, Medill School of Journalism, Northwestern University, Evanston, Illinois; E. Marston Johnson, Syracuse, New York; S. M. William, Washington, D. C.; Frederic R. Gamble, New York City; C. V. Charters of Canada; Brigadier General Clyde R. Abrahams, Fort Custer; Col. E. R. Rosecrans, state selective service director; and Linwood I. Noyes, Ironwood.

Lt. Col. Harold A. Furlong, administrator, Michigan Council of Defense, told how the council had gone on record twice in the past seven months in opposition to civilian censorship of news, other than voluntary application. Governor Murray D. Van Wagoner sent a message complimenting editors on their war service through the defense council, adding that the program had received national recognition. Captain Herbert A. Hall, Fifth division public relations officer, said that the Michigan media's "code of volunteer censorship" was "all that could be asked" by military authorities.

Captain Don Leonard, civilian defense director, explained the urgency of immediate preparation in Michigan against air raids and disaster.

New officers are: President, Herman Millerwise, Sebawaing; Blad; first vice president, George A. Osborn, Sault Ste. Marie Evening News; second vice president, W. Webb McCall, Isabella County Times-News, Mt. Pleasant; and treasurer, Leslie B. Merritt, Livingston County Press, Howell. New directors are: Tom Conlon, Crystal Falls Diamond Drill; Richard Cook, Hastings Banner; George Campbell, Owosso Argus-Press.

Suggestions for Cooperation in Salvage for Victory

Machinery for Tuscola County coordination with the newly created Michigan Salvage Committee was set in motion last week by County Defense Council Chairman E. C. Swanson of a six-man salvage committee, members of which are: William Barriger, Caro; Harry Burns, Millington; Rev. S. T. Bottrell, Millington; Andrew Barnes, Cass City; Norris Wilber and James Gallery, Caro.

The county committee has made the following suggestions for the collection of so-called waste materials:

Round up your waste paper: Old newspapers, wrapping paper, cardboard cartons and boxes, paper bags, magazines, advertising materials.

Old rags: All cast-off clothing, especially shirts and underwear, draperies, pillows, sheets, towels, mattresses, flour and sugar bags, rugs and carpets, burlap bags, if in good condition.

Scrap metal: Everything made of metal (except tin cans)—Such as: Garden tools, metal beds, stoves, ornaments, old heaters and boilers, wash pails, wire fencing, iron railings, tire chains, pots and pans, tablewares, picture frames, hangers, toothpaste containers, pipe and hardware, batteries, washboards, fireplace equipment, door knobs and locks, ashtrays, drain pipes and gutters, window stripping, metal roofing.

Old rubber: Discarded auto tires and tubes, rubbers and overshoes, garden hose, old bath or sink mats, etc.

Store neatly, save space: 1. Flatten out all cartons and boxes. Tie in neat bundles; keep dry and clean.

2. File newspapers separately, and tie in separate bundles.

3. Keep rags, metals, and rubber separately—in cartons and bags if possible.

Do not call a collector until your waste paper has reached 100 pounds, or a pile about five feet high. Metals, rags, and rubber should be disposed of at the same time.

Sell all materials to your local scrap collector (junk man) or give it to charities, schools or other organizations (such as Boy Scouts) which collect them free of charge, or, better still, take your accumulation to the nearest collector's yard yourself to relieve strain on truck facilities.

Later, when it is established, central salvage headquarters will handle your collection requests. Important—Don't sell anything you are still using which would need replacement.
