

## Big Government Securities Sale Starts April 12

Tuscola's Quota to Finance the War Effort Is \$1,200,000.00.

During April, the United States Treasury Department is conducting a drive to place \$13,000,000,000 worth of government securities with the public in order to finance the war effort.

The quota assigned Michigan in this gigantic war financing program is \$362,500,000. Of this amount, the upper peninsula will be asked to subscribe \$5,000,000 worth—the balance of \$357,500,000 will be sought in the 68 counties of the lower peninsula. Of this amount, the banking interests, corporations, etc., will subscribe \$137,500,000 worth, which will leave \$220,000,000 to be absorbed by the general public.

In this program, the Treasury Department has decided to combine the services of the War Savings Committees and the Victory Fund Committee, under the direction of the president of the Federal Reserve Bank.

The Michigan War Savings Committee, of which Frank N. Isbey is the chairman, will cooperate with the Victory Fund Committee in the state; and both organizations will endeavor to carry on the drive to a successful conclusion.

The securities that will be offered will include the Series "G" War Savings Bonds; Series "C" and "G" Bonds; the Series "C" Tax Anticipation Notes; 26-year 2 1/2 per cent Government Bonds; 9-year Government 2 per cent Bond; and Government Certificates of Indebtedness which will carry 1/2 per cent interest.

The War Savings Committee, under Mr. Isbey's direction, is now recruiting an organization known as "The Gallant Sixty Thousand of Michigan." This volunteer army will comprise 1 per cent of the population of each community in the state, and each member of "The Gallant Sixty Thousand" is enlisting pledges to sell at least \$1,000 worth of series "E" War Savings Bonds during the month of April.

In Tuscola County, the Victory Fund Committee under the chairmanship of Samuel Park of Caro and the War Savings Committee under the leadership of Clarence L. Bougher of Caro will combine forces as the Tuscola County War Finance Committee. Tuscola's quota for the April bond sale is \$1,200,000. Individuals will be asked to purchase \$720,000 worth of these securities and approximately \$500,000 will be assigned for the banks of the county to subscribe.

Tonight (Friday) a meeting of members of both committees from all parts of the county will be held at the county court house to make plans for the campaign. C. L. Bougher is general chairman.

Mr. Park is optimistic and says he anticipates that Tuscola's quota will be oversubscribed. In his bankers' group, he has named four vice chairmen: Frederick H. Pinney and M. B. Auten, Cass City; Louis Walton, Vassar; and C. R. Myers, Caro.

Bond subscriptions will be received at banks and post offices of the county.

## Aileen Heron Marries Pvt. M. N. Peterson

The soft gleam of candlelight contrasted beautifully with the altar flowers used in the Cass City Presbyterian Church Wednesday evening, April 7, at the wedding of Miss Aileen M. Heron, daughter of Mrs. Andrew B. Champion, of Cass City, and Private Maitland N. Peterson, son of Mrs. Thorwald Rymers Peterson and the late Mr. Peterson, of North Lincoln Ave., Bay City.

Great clusters of palms and gladioli banked the altar, while lighted tapers in cathedral candleabra formed a beautiful setting for the nuptial ceremony, which was performed at eight o'clock by the Rev. Lee N. Page, pastor.

Preceding the ceremony, Mrs. Ethel McCoy played organ selections of wedding music and Miss Eleanor McCallum sang "Du bist die Ruh" by Schubert. Mrs. McCoy also played the processional and recessional marches.

The bridal robes were of pearl pink satin, made with sweetheart neckline and her fingertip veil of illusion was held in place by a satin bow covered with seed pearls. Delicate pink marquisette was worn by Miss Lulu Belle Heron, sister of the bride, as maid-of-honor, and in her hair, she wore a bunch of forget-me-nots. Both carried shower bouquets of gardenia and shadowed carnations.

Private Peterson was assisted by Harry Charters of Bay City, who performed the duties of best man. Guests were seated by Neville Mann, Willard Minnes, James Champion and Hugh C. Munro.

Immediately following the ceremony, a reception was held in the church, 170 guests being present. The tables were pretty with bouquets of forget-me-nots, rosebuds and smilax.

Private and Mrs. Peterson left on a short trip and will then go to Fresno, California, where the groom is stationed.

The bride was graduated from Turn to page 4, please.

Whether the state legislature accomplished anything or not during its streamlined 90-day session depends on a number of things.

For instance: If you are an avowed dry, the session was all "wet", to use the vernacular. Sale of beer and wines and liquors is still legal, and millions of dollars' profit are still going into the state treasury, no doubt, some of them for the schools, a very outrageous situation to be sure.

If you feel that the legislature spent all its time needlessly wrangling over highway bills, then, too, the session was a terrible flop, and Governor Kelly ought to hang his head in shame, et cetera.

And if, for example, you haven't had a good cup of coffee for weeks, and the icebox is still bare of a good steak, and the country is going plumb to the dogs, why the legislative session was an outright disgrace to 100 per cent Americans, if you get what we mean.

And so we approach the legislative record with some misgivings, realizing that what is an accomplishment to one person, perhaps is just the opposite to someone else.

Without justifying or condemning what did or did not happen at Lansing, we will try to review the highlights and let the chips fall where they may. If your appetite is bad and it's raining cats and dogs outside, then it's just too bad.

Consider the governor's problem, for a minute. He takes office at the first of the year. Six days later (Jan. 6) he delivers his message to the legislature. And about ninety days later, March 26 to be exact, the legislators put on their hats and coats, say their goodbyes, and leave the janitors to clean up the place. Harry F. Kelly had just that situation. Here's what happened in 90 days:

Post-War Reserve, Act No. 4, of the Public Acts of 1943, signed by the governor on Feb. 16, created a post-war reserve fund of \$50,000,000. The state administrative board was directed to transfer immediately \$20,000,000 from the surplus which is now about \$40,000,000. In his legislative message the governor had asked for "not less than \$15,000,000."

A post war planning commission was created, and for its use in Turn to page 6, please.

## Republicans Elect Their Candidates on State Ticket

Voters Approved Two Proposed Amendments to the State Constitution.

Republican candidates on the state tickets were all elected Monday in the lightest total vote in Michigan since the spring of 1917. Voters Monday approved two proposed amendments to the state constitution.

One extends from a year to two years the terms of all township elective officers, including members of county boards of supervisors. Attorney General Herbert J. Rushon has held that under it township officials elected Monday would benefit by the longer terms.

The second amendment changes the constitution to validate—a lapse of 25 years without a challenge—mortgages and deeds on homestead properties which are faulty for lack of the co-signature of a wife.

Few contests developed in this election of township officers in this section of the state.

## Cass City Woman Reports for the Marine Training

Private Shirley E. Beardsley, Cass City, is one of more than 700 enlisted Marine women who reported March 26 at the Naval Training School, The Bronx, New York City, for the initial recruit training course for the U. S. Marine Corps Women's Reserve.

First to join the ranks of the Women's Reserve, they will go through a strenuous six-weeks' program of drill, physical conditioning and military indoctrination under instructors detached from regular Marine training bases.

Upon completion of this course, some of the recruits will be assigned to duty immediately to release Marines for combat duty overseas. Others will go on to specialist instruction in such fields as aviation, mechanics, photography and radio.

Private Beardsley was formerly employed by the Cadillac Motor Division of the General Motors Corporation, Detroit. After graduation from Cass City High School, where she was active in athletics and music, she attended the Business Institute in Detroit. Her parents are Mr. and Mrs. Ernest Beardsley of Cass City.

## LOCAL ITEMS.

Miss Wilma Severn, a student at Bay City Business College, spent the week end with her parents, Mr. and Mrs. George Severn. Miss Deloras Slack of Bay City was the guest of Miss Severn for the week end.

An especially pleasing musical program was presented by local talent at the Rotary Club luncheon Tuesday. Chas. Keen played saxophone solos, G. W. Landon and Arthur Holmberg sang solos and Mr. Landon, Mr. Holmberg and A. C. Atwell sang several trio numbers. Mr. and Mrs. Keen were the accompanists and Mr. Atwell was program chairman.

The Golden Rule class of the Evangelical Sunday School met on Friday evening with Mr. and Mrs. Andrew Seeger. About 20 were present and enjoyed a potluck supper at eight o'clock, followed by a business session and social time. Miss Helen Hower had charge of entertainment and Ernest Goodall received a prize for making the best apron while Mrs. Goodall was given a prize for the best hat.

If the two lads had caught a small whale, Tommy Fritz, 3, and Mike Fritz, 2, sons of Francis and Dr. Edwin C. Fritz, would not have caused more excitement than they did Tuesday morning when they wandered out of town and up the railroad track on a fishing expedition. For two hours, parents and neighbors searched for the boys and were greatly relieved when Don Koeppgen, who found them near the creek bank, brought them into town. "We went fishing, but didn't see any fish," one of the youngsters told his parents.

## GRADE OPERETTA.

#### PETER AND JOHN WITNESS CHRIST'S GLORY

LESSON TEXT—Mark 9:2-8; II Peter 1:16-18.  
GOLDEN TEXT—A voice came out of the cloud, saying, "This is my beloved Son; hear him."—Mark 9:7.

Christ is God! The one who comes to know that truth is ready to follow Christ, and to make Him known to others. The want of such a true conception of the Son of God weakens our convictions and hinders our usefulness.

"Where there is no vision, the people perish," said the wise man (Prov. 29:18). For want of a true vision of Christ as God, and the God-given constraint which makes men give themselves in sacrificial service, the people perish in their sins.

Peter and John saw our Lord in His transfiguration, and the glow of that experience lighted their entire life and ministry. The touch of the supernatural was on these men and their message—for they had seen the glory of Christ.

**I. The Amazing Glory of the Son (Mark 9:2-9).**  
The transfiguration of Christ is one of those wonderfully beautiful and deeply spiritual experiences which defy analysis or satisfactory description. Poetry and art have vainly tried to depict it only to become "in fact a confession of the impotence of the loftiest art to rise to the level of the divine" (Van Dyke).

Peter was so dazzled that he could only suggest that they remain there, forgetting for the moment that down in the valley was demon-ridden humanity waiting for the divine deliverance of the Son of God (see Luke 9:37-42).

What took place on the mount can possibly best be explained as the outshining of the inner glory of the Christ. He had laid aside His glory when He became flesh, but not His divine attributes as very God. There in the presence of God and the heavenly visitors that glory shone through His humanity and His appearance became dazzling in its whiteness.

**II. The Approving Word of the Father (Mark 9:7, 8).**  
A cloud, like the cloud which filled the Temple of old (I Kings 8:10, 11), covered them, and the Father spoke out of it words of approval of His Son.

These words carry "both judgment and command; judgment concerning Jesus, 'This is my beloved Son,' and command to the disciples, 'Hear ye him'—that is, 'Listen to him'" (Lesson Commentary).

John and Peter came to a fuller conviction that He was the Son of God as they saw Him transfigured and heard the words of the Father. They learned more plainly the fact that He was God manifest in the flesh for the redemption of man. They saw in the indescribable beauty of that moment a foregleam of His coming glory. What important truths—His deity, His redemption, His coming kingdom. Have we learned these as we have beheld His glory?

**III. The Assured Faith of the Disciples (II Pet. 1:16-18).**  
These words were written by Peter when he was nearly eighty years of age—about thirty-five years after the transfiguration. John wrote sixty years after the event and said, "We beheld his glory, the glory as of the only begotten of the Father" (John 1:14).

The one who follows these eye-witnesses in believing in Christ may share their assurance expressed by Peter that we do not "follow cunningly devised fables" in making known to the world the power and coming of our Lord Jesus Christ. Our faith is built on God's Word, and upon such testimony as this by eye-witnesses. Here is real ground for assured belief in Christ.

Great experiences of spiritual renewing and power lead to effective life and testimony for Christ. They may not be in outward manifestations, in fact they are most often in the inner recesses of man's soul; but they do transform men and send them forth to magnificent living for God. One wonders if much of the dearth of power in the Christian Church is not to be attributed directly to the lack of such experiences with God.

The disciples had an unforgettable mountain-top experience. Even so have many others found the secret of power. It came to D. L. Moody as he walked down a New York street, praying in agony, "Deliver me from myself. Take absolute away." The story of what happened to him and through him as a surrendered instrument in God's hand is written large on the pages of history. Others have had similar experiences.

Let us remember that such privileges are not reserved for a few, they are the birthright of every Christian. Power without knowledge is a dangerous and destructive thing, but knowledge without power is a dead thing, resulting in a stale and unfruitful orthodoxy that in turn produces a dreadful and unchristian religious system.

## Wooden Springs Are Tested at U-M

Wooden springs, wartime replacement for steel, are here being tested in the wood utilization laboratory of the University of Michigan for a Michigan manufacturer who is seeking O.P.A. approval. In this test, a 40-pound weight is dropped on the seat of a wooden-spring chair 10,000 times to see if it "can take it." Successful use of wooden springs, University technicians say, will save the jobs of many furniture workers and may reduce production costs in the furniture industry.

April Fool's Day brought spring-time weather with every indication that winter was definitely on the way out. That's why, undoubtedly, the leaping insect of the family Acrididae, commonly known as the grasshopper, ventured out on the farm of Frank Cranick in Elmwood Township. That night brought colder weather and a slight fall of snow, conditions discouraging to hopping on even as fine a farm as that of the Cranicks. Frank bottled the "hopper" together with sprigs of clover leaves and a spring flower to prove it wasn't an April Fool joke.

# Donald Nelson sets Farm Scrap Goal 3 MILLION TONS BY JULY

That means YOU have to get to work NOW!

Big figures don't mean much—because nobody ever saw 3,000,000 tons of scrap piled up in one place. But think of it this way:

You and every other farmer in the United States must turn in 1,000 pounds of scrap metal to reach this goal. And it must be reached—because if you fail, there simply won't be enough steel to make the weapons our boys need to win the war.

### HOW YOU CAN COLLECT THAT 1,000 POUNDS

One half a ton of scrap iron and steel from your farm! You can't make that much up out of old buckets and shovel blades—though these are needed too. You've got to throw in that old car body—that rusted cultivator—those old plow bottoms you've chucked into the weeds along the fence for so many years. It's there, all right, if you'll only drag it out!

Don't say you can't find time, because you've got to. You owe it to the boys that are fighting 24 hours a day in the Pacific and in North Africa. It's your job to see that they get weapons—just as it's your job to help keep them fed. And you won't let them down.

### HERE'S WHY YOU WON'T FAIL OUR FIGHTERS

The reason you won't, is that they're your own boys, fellows from up the road, sons of your friends and neighbors. And if Donald Nelson says they're going to need 1,000 pounds of scrap from

your farm, you're going to see that they get it... and more if possible.

You'll find time to do this job—if you've got any pride in yourself, your Country, and the men who are fighting and dying for your freedom!

### HERE'S HOW TO TURN IN YOUR SCRAP

FIRST pile up every piece of scrap iron and steel on your place.  
NEXT sell it to a junk dealer. If you're in the Cass City community, and you have a half ton or more, phone No. 231 or No. 40 and ask for the junk man. A truck will be sent after the scrap and you'll be paid for it.

Concluded from page one.

post-war construction of buildings at colleges, hospitals and institutions the legislature set aside \$8,000,000. A separate appropriation was made whereby \$150,000 would be available immediately for architects' plans.

The Michigan Council of Defense, an independent policy-making body, becomes the Michigan War Council, an advisory agency to the governor. War-time powers were also granted. Efforts to collaborate OPA law enforcement activities through state courts were defeated by agricultural groups. Butter fat content was lowered for the duration.

Retirement Fund for Employees. Senate bill 292, adopted, provided for a retirement fund for state employees. This will complement civil service and it also fulfills a recommendation of Governor Kelly.

And if the state payroll goes up, and it undoubtedly will, remember this recommendation, "I am firmly of the opinion that State Government should pay a proper wage to those in its employ." (Inflation note: Michigan-born Tom Dewey, governor of New York, has signed

a legislative bill increasing wages of New York state employees around 7 1/2 per cent.)

A few minor consolidations were effected. A department of business administration, headed by Dr. Robert Ford of the University of Michigan, was created.

Benefits to Labor. The workmen's compensation act was thoroughly overhauled for the first time since 1912, ceiling payments were increased from \$18 to \$21 a week and other benefits were authorized for dependents of injured workers. Likewise, liberal benefits under the unemployment compensation act were extended. Efforts to remove the appeal board were defeated. Also efforts to permit grants to dependents were defeated.

Minimum wage proposals and child labor bills were shelved on the theory that industry has enough troubles as it is.

(Note: The state C. I. O. council recently condemned the governor for removing John Gibson as chairman of the department of labor. Gibson was replaced by George W. Dean as chairman, although he still remains a member of the commission. And who is Dean? A top leader of the American Federation of Labor!)

No taxes increased or decreased. In the tax field, the legislature refused to increase or decrease the 3 per cent sales tax; it defeated a proposed tax on cigarettes and liquor, sought to finance a soldier and sailor state bonus; it defeated an effort to remove the ceiling on corporation franchise taxes, a "savings" of around \$6,000,000 a year to manufacturers; and it defeated a plan to change the sales tax bracket.

Also, no new taxes were imposed. Old Age Pensions increased. The governor's recommendations to increase old age pensions and to liberalize property restrictions were enacted into law.

Another recommendation carried out was an apportionment of the legislature, benefiting the metropolitan counties of the state. On January 6 the governor advised the legislature: "The rise in cost of living requires the adjustment of teachers' salaries in many communities. The state and the local communities should join in seeking an immediate solution to the salary problem." Result: Fifty million dollars were appropriated for state aid to schools, an all-time high for public education.

The tourist and resort industry, together with Michigan farm products, received a \$155,000 appropriation.

Although the election was coming April 5, Republican legislators decided by devious logic to rout the partisan enemy—the Democrats—from the highway department where every employee was classified by civil service and to do so in advance of the election itself. Thereby they precipitated a

knock-out, sock-em and slug-em feud, not between Democrats and Republicans as you might expect, but among the Republicans!

From the standpoint of color, it was a reporters' harvest. Republicans fighting Republicans. The governor opposed by the lieutenant governor. Friends of the Republican nominee for highway commissioner trying to beat a bill whereby the governor would appoint the commissioner. Muddled waters! All highway bills were beaten or vetoed.

Result: A golden opportunity for the Democrats.

And there you have the highlights, good, bad, and otherwise. Did the legislature do anything in 90 days?

Well, as we said before, it depends on a number of things even down to a cup of coffee for breakfast. As we see it, the legislature worked hard and accomplished much.

You can be the judge. The record speaks for itself.

# The 2<sup>nd</sup> War Loan Starts April 12

## 13 billion dollars must be raised!

**THE GOVERNMENT** of the United States is asking us to lend it 13 billion dollars in the next few weeks. We can do it. And we must do it. Every American must realize the truth:

In this, our toughest war, we've made a good start. We've trained a lot of men—made a lot of weapons—built a lot of ships.

But it's only a start. No man or woman among us would contend for a single instant that we're doing enough now to win this war!

**We've Got to Build More!**

We broke all records building 3 million tons of shipping last year. But grim-faced Army and Navy men will tell you that the 18 MILLION tons we're building this year still won't be enough!

**We've Got to Fight More!**

From now till this war is won, America must be on the offensive. In ever-increasing numbers, your sons, brothers, husbands must go into actual battle. Our losses have already begun to mount—and they will not grow less.

**And We've Got to Buy More War Bonds!**

Sure we're all buying War Bonds now. But we've got to help pay for our increased fighting and

building... We've got to match, as best we can, the sacrifice of those Americans who are toiling and sweating on a dozen battlefronts—with the bloodiest yet to come. The blunt fact is this: to keep our war machine going, we've got to dig up 13 billion extra dollars this month. 13 billion dollars over and above our regular War Bond buying!

In the next few weeks you may be visited by one of the thousands of volunteers who are contributing their time and effort to this Drive. But don't wait for him. Make up your mind now that before this drive is over, you're going to march right down to your nearest bank, Post Office, or place where they sell War Bonds, and do your duty. And don't ever forget this: in doing your duty, you're doing yourself one of the biggest favors of your life!

For United States War Bonds are the greatest investment in the world—bar none. They're investments tailored to fit your particular situation. And they give you the chance of a lifetime to order and get the kind of world you want to live in after this war. Every cent you put in War Bonds now will help to guarantee plenty of peacetime jobs making peace-living for every one of us.

For your Country's sake—for your own sake—invest all you can!

MACHINE GUN LINKS  
made automatically—

...another job Electricity is doing to help win the war

A MACHINE GUN firing 1200 shells per minute requires mass production on a big scale to keep it supplied with ammunition. The metal links that make a continuous chain of machine gun bullets are a good example. Millions of these links are turned out daily in a single local plant, and thanks to electricity, the whole job is completely automatic from start to finish.

Starting with a steel strip, the stock feeds through multiple stamping machines to make the "green" link (not yet heat treated). Then on a continuous conveyor belt, the links go successively to electric furnaces for hardening, to shot blasting machines, to draw furnaces for more heat treating, to a rust preventive bath, and finally to bins where every link is tested for strength and accurate dimensions. They then slide down a chute and are packaged into waterproof cartons, which—after spot testing by Army inspectors—are conveyed directly into box cars.

Machine gun links by the carload are only ONE of the thousands of jobs that electricity is doing today in arsenals and war plants. Electric power is a weapon of war... making its strength felt on the production lines that equip our fighting men. The Detroit Edison Company.

Department officials, who have been urging a longer season and more hunting of the pheasants will meet with farmers of the affected regions to plan avoidance of damage to the soybean crop next season.
