Lad of 17 Gets **Prison Sentence** of 5 to 15 Years

Judge Recommends Release of Young Man on His 21st Birthday.

Lyle Fuller, 17, of Tuscola was sentenced to serve from five to 15 years in the Southern Michigan State Prison at Jackson Wednesday morning in the Tuscola Circuit Court by Judge Geo. W. DesJardins. The judge recommended his release on the young man's 21st birthday provided his conduct in prison warrants such treatment.

Fuller, who came from Frankenmuth to Tuscola three months ago, has a criminal record which was responsible for the severe sentence given a lad of his age. Court records show that Fuller has appeared before the judge of probate three 15, will be the Hon. Wilbur M. times on charges of breaking and Brucker of Detroit, former goverbefore the judge of probate three entering, was sent to the boys' vocational school at Lansing after a larceny charge had been entered against him, and was later arrest- Mr. Brucker will be the speaker ed for driving without a license. Electric power is playing an important role in the nation's war production. This country alone has more horsepower than the combined total of all our enemies. Here in Detroit and southeastern Michigan, the power supply of The Detroit Edison Company totals more than a million-and-a-half horsepower. More than half of this enormous power pool is being used directly in war production. During 1942, power for war production totaled over TWO **BILLION** kilowatthours.

The combined generating capacity of all Detroit Edison power plants totals 1,655,000 horsepower. Insofar as one can be sure of anything in time of war, there should be no shortage of electricity in this section, and all war plants will continue to get electric power to meet peak production. The Detroit Edison Company.

ELECTRICITY IS NOT RATIONED. BUT ITS PRODUCTION REQUIRES COAL AND RAILROAD TRANSPORTATION.

DON'T WASTE IT!

zhzhzhzhzhzhz

is a different animal.

Food will win the war. Lack of it can postpone victory if **#** doesn't spell defeat.

And food, or lack of it, can lose an election, that is what you are

hearing in Washington these days. An electorate, like an army, moves on its stomach. On an empty stomach, it moves away from the "ins," hollers for the "outs" to bring back the bacon. And when you get a customer with both an empty stomach and a full pocketbook hammering on the table and demanding service, you have a hard eustomer to please

Slowly, the Washington politicians are beginning to awaken to that fact -that food is going to be the big issue in the next election.

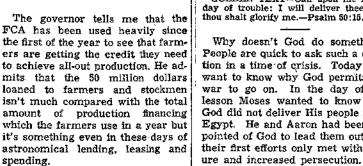

President Saw It First

The President and his keen-eyed, ears-to-the-ground political scouts recognized it first, and when Phil Murray, head of the CIO, and William Green of the AFL began to call for the roll-back of prices, the administration was quick to promise that they would be served "right away." Meanwhile, some of the other guests are beginning to feel neglected.

But before roll-backs au gratin could be served, congress stuck its foot out and tried to spill the tray. For a while, it looked as if there was going to be embarrassment in the political kitchen.

Even if the administration is able to silence the demands and threats of labor, there are a lot of other Oliver Twists who "want some more" and who will twist out of their straight-ticket voting and start looking for "a better 'ole" unless this food question is solved before the ides of November MCMXLIV,

Through the days when congress was first trying to fold its tent and steal away from the banks of the Potomac, one thing was clear: unless the administration pulled a nice, fat and succulent rabbit out of which could be served up to the electorate with enough basketsfull left over for the fighting forces and the hungry Allies and other pospective clients, the Gallup poll vaulters which had re-re-reelected the New Deal in advance would have to start their polling all over again, The enemies of the administration are building up a barrage to the effect that Mr. Roosevelt has babied labor and has left his old friends. the farmers, in the lurch. They say that because he was afraid to offend labor, he listened to their demands for lower prices and turned a deaf ear to the farmers' troubles. This, of course, since it comes from hardly non-partisan quarters, has to be taken with a grain of salt, but whatever the working man says, when he sees the cost of living eating up his former "raises" if he has had them, the record will show that despite John Lewis' polysyllabic attacks on the President, labor has not been treated exactly as a stepchild.

The loans are made through the Regional Agricultural Credit corporesponse of God make an instrucration.

Here are just a few of the facts Black produced from his briefcase. Take flax-flax is as important in its way as tanks are in theirs. The automobile manufacturers have had it made worth their while to manufacture tanks instead of autos. The farmers up in-take North Dakota, for instance-have "shared the risk" as Black puts it, with the RACC (Regional Agricultural Credit corporation) which extended them credit to "change over" to flax. Instead of one million three hundred thousand acres of this valuable crop that was harvested last year, a million EIGHT hundred and forty thousand acres were seeded this year (41.4 per cent government financed).

Take dry beans in Montana: 50,-000 acres seeded this year, double last year's planting, 84.5 per cent of the crop government financed. I could go down the list with peanuts in South Carolina, sweet potatoes in Louisiana and Mississippi, ad infinitum.

Simple Machinery

The way this share-the-risk thing works is simple. The farmer puts up his land and labor, the RACC puts up the out-of-pocket costs after the county war board and its own representatives have approved the deal.

If the crop comes out all right, the farmer pays the loan. If it is wiped out by bugs, drouth or disaster (and when Ol' Man River went hog-wild this spring, there was a lot of wiping out) his liability isn't wiped out, too, because his liability is limited to what he took in from the crop and the incentive payments or insurance on it.

"It wasn't so much a matter of how much money was loaned." Governor Black said to me. "as where it was loaned and what it was loaned for. In the past few months, the

attitude. They should have been patient. They ought not to have assumed that the loss of the first skirmish meant the loss of the whole

campaign. Are we not just like them? The new minister or the recently elected Clinton, Ionia, Eaton, Ingham and Sunday school superintendent makes possibly a mistake and instead of helping him to pick up the pieces and start over, we decide that he just will not do, that we must have a change. Even though the people were

wrong, however, the man of God should not have lost his faith and accused God of failure to keep His promise. He was supposed to have learned the lesson of patience in the long years on the backside of the desert. Had he forgotten the experience of the burning bush?

Thou Shalt See What I Will Do" (Exod. 6:1-7).

In other words, Moses was to remember that he was dealing with mated two-million bushel loss in the Eternal One, unchangeable, and always true to His word and able to make His will come to pass. So often men in dealing with God

think of Him in terms of their own weakness and failure. What we need is to have a Godlike conception of 1931-1942 period. God, not a manlike idea of Him.

God is the infinite and Eternal One with whom we have no right to of previously salted barberries to quarrel, and whose dealings with us

II. God Said, "I Am Jehovah,

But what has the farmer been getting meanwhile?

A couple of assists, at least, which have benefited him and the war effort at the same time.

FCA Head Reports

ⁱ Let me report to you what I learned from Governor Black of the Farm Credit administration, an institution which has managed to escape the attacks which most of the government agencies have had to weather. Governor Black was in Washington the other day-the headquarters of the Farm Credit administration were moved to Kansas City a year ago, you know, in the interest of decentralization and with the idea that after all, Kansas is nearer the center of American agriculture than the Atlantic seaboard.

country has awakened to the necessity of producing the vital crops to the limit, and that's where we concentrated our financing."

Well, that is one agency that has been able to go ahead without having to duck the political brickbats.

Other government agencies, not so lucky, had to take a lot of punishment that wouldn't have been directed at them if it weren't for politics. The poor Commodity Credit corporation, which everybody seems to love for itself alone, got into an unpleasant jam with the subsidies. and had a tight source partly through pure politics, partly because congress and the President didn't see eye-to-eye on the anti-inflation program.

What most people fail to realize is this: even now with all the splendid effort the farmers have made, agriculture has not yet been entirely "converted"-I don't mean converted to the "all-out" idea but converted in the sense that civilian industry was converted to war productionautos to tanks and planes, sewing machines to machine guns. Industry had plenty of "incentive." The farmers have had some help, will have more.

And the consumer (who is really everybody) and the farmer and the worker, haven't gotten it through their heads yet that unless they all hang together, they'll hang separately.

If we don't get the food, we won't be able to eat the dollars, no matter how many we may have in our sock.

. . .

The per capita use of eggs in 1942 was 316. Prospects for this year are about 324 per capita. The army and lend-lease need about 3 eggs out of every 10 produced, which leaves 7 out of every 10 for civilians.

are too high for us to judge (Ps. 139:1-6). God's covenant with His people

was established (v. 4). He had heard their cry (v, 5) and His deliverance was sure (v. 6). The only thing berry identification. Moses had to do was to wait and see God work.

That word "wait" is a little one. It seems to call for no effort, to be easy of fulfiliment; yet it seems to be the hardest thing for a human being to do. Men who carry the burden of active warfare with ease and with honor become discouraged and sick when they must sit in a prisoner's concentration camp and

wait for deliverance. Christians who can speak and work for God when things are active and moving become querulous

and despondent when they have to wait for something to happen, or when they are laid aside for a time. terson. His promise is sure. That is not just a religious sentiment. It is a

fact, and it is proved by history. Note that in the case of Moses-III. History Said, "It Came to Pass the Selfsame Day" (Exod. 12: 51).

Moses had to take God's word. for "the selfsame day," which we

read here came later. It came in God's own time, after He had, through Moses, humiliated and broken the hard will of Pharaob. Then ing them the needed lesson that re- at 11:00 a. m.

early spring.

anti-aircraft shells.

tail

Sweden's warrior king Gustaphus Adolphus for a time controlled all of Germany. His successors held northeast Germany, Finland and the part of Russia where Leningrad now stands until 1709. In that year the Swedes were defeated by the Russians at Poltava, in the Ukraine, scene of recent fighting between German and Russian armies. A Viking graveyard, just north of Karlskrona, recalls a still earlier period of the Northman's strength.

Cut Smoke Pail

Salt Lake City's anti-smoke ordinance, stringently enforced during the last year, has cut in half the density of the smoke pall that used to hang over the city, whose surrounding mountains make a natural smoke harbor.

FIRST-AID to the AILING HOUSE By ROGER B. WHITMAN

Roger B. Whitman-WNU Features.

You may not be able to replace worn or broken household equipment. This is war. Government priorities come first. So take care of what you have . . . as well as you possibly ean. This column by the home-swner's friend tells you how.

STORING PAINT A reader has sent in the following: "When preparing a partially empty can of paint for storage, first clean all paint from the sealing surfaces of the can and lid to insure an airtight closing of the lid. To prevent the trapped air in the can from evaporating the paint solvent, shake the can vigorously for a few seconds to saturate the trapped air thoroughly with the solvent. Thus, when the can is stored the air cannot absorb any more solvent and film cannot form. Stand the can upside down for storage, so that the joint around the lid will be sealed.

Condensation on Walls

Question: Some time ago my stucco house was brick-veneered. No air space was left between the walls. During rainy or humid weather the walls sweat and stain the wallpaper. Is there a preparation which can be applied over the plaster to prevent sweating? If so, can the walls lution?

Answer: No kind of paint will stop the condensation. The answer to your problem is insulating board applied over furring strips to provide the air space that now is lacking and to minimize differences in temperature. It will help to dry out the air of the house if you leave the weather. Additional ventilation also would help.

Turning Circle for Cars Question: What is the minimum diameter necessary for a turning circle in front of our house to accommodate any type of car? We plan to make an island in the center containing an old millstone. Answer: For large passenger cars the radius of the outside curb should be 28 feet, and the radius of the inside curb 16 feet. This will accommodate small trucks.

Finish for Shingles Question: The wood shingles on the walls of our house were put on ten years ago and now are in need of attention. One painter advises restaining, another suggests painting. Which do you recommend?

Answer: After ten years the stain undoubtedly is weathered out of the marks, gorgeously beplumed headwood, and the shingles either can be painted or stained. The choice of armbands. the finish is up to yourself. Fireplace Plans Question: Where can I get plans for building a stone fireplace for a frame cottage? to their home neighborhoods. Answer: I do not know of any publication for this. But you can get On the whole, troops will garner

Yanks Send Back **Many Souvenirs** From War Zones

Silk Gowns From India, Jap Flags and Armor Among Prized Gifts.

WASHINGTON .- Souvenirs are beginning to pour home from the war's many fronts. Veteran postal authorities, recalling the flood of mementos that rolled back from England and France during World War, I are bracing themselves for an even greater deluge this time.

What with a much larger army and navy by far than we had in 1917-18, the torrent is expected to be enormous when it reaches its peak. This time the boys have virtually the entire globe to pick from, or will have when victory is

achieved. Fing souvenirs and trophies came from the Philippine campaign, then from the strange lands of the south west Pacific.

When the AEF descended or North Africa, however, the troops discovered that the Germans and Italians virtually had stripped the French colonies of valuables. But enough trinkets, jewelry, hand-wov en garments remained to give the native merchants a land office business.

Gifts Often Puzzle.

In India the pickings are much more varied and attractive than in North Africa. U. S. soldiers there are buying all sorts of souvenirs some of which are specially pro

duced for the tourist trade. A popular gift to send the girl friend is a native silk gown. Often the garment is boldly decorated with boy weighed 4 lbs. 6 oz. and the famous sights of the country, like girl 3 lbs. 7 oz. Mrs. Vincent famous sights of the country, like the Taj Mahal or the vice-regal palace at New Delhi with appropriate labels.

Jewelry-necklaces, bangles, ank lets and rings-are the stock in trade of countless Indian bazaars and these find their way to our soldiers for shipment home. Native knives, coins, amulets also are collected. Sometimes the recipients back home are puzzled by the objects their menfolk send. The Smithsonian Institute here, the Field Museum in Chicago, the American Museum of Natural History in New York frequently are called on these days

to identify unfamiliar objects from the other side of the world. Real War Trophies. From the South Pacific war areas,

the first souvenirs were really war trophies. Things like Samural swords captured from Japanese officers, Jap battle flags and other articles of the enemy's military equipment

Best known of these was the sword taken from a Jap officer on Bataan and sent by General MacArthur to **President Roosevelt through Francis** B. Sayre, returning high commis-

sioner to the Philippines, Now the bulk of the mementos from South Pacific consist of na-

tive spearheads with needle-like points, odd shell ornaments, war

break of hostilities. "Swift results,"

Despite the acute need for fresh fruit to supplement curtailed wartime rations of canned goods, conservation department officials fear that some of this year's bumper crop of Michigan blueberries may go to waste because of the shortage of pickers to harvest the crop. pickers in the Lake Superior State Forest, shown above selling their crates of freshly-picked berries to truckers who transport the fruit to the city markets, last year shipped more than \$60,000 in berries from the one forest alone. Pickers are also moving into the Higgins Lake, Houghton Lake, Au Sable, and Mackinac State Forests to take advantage of this year's high price on blueberries.

Martin, Mrs. J. McGrath, Southworth and other friends here.

Clean Metal Before Repainting

All grease, oil, rust or corrosion should be carefully cleaned from metal before repainting or revarnishing. If rusted or corroded, the metal should be cleaned down to a bright surface with fine sandpaper or steel wool. Any greasy or oily film should be completely removed by the use of a good grease solvent, and the metal then thoroughly rinsed and dried before paint or varnish is applied.

Inexpensive Produce

Good turkeys and poultry were grown for years on a little cereal grain, a few table scraps, and on range where they picked up what other nutrients they needed.

WITH ALL THE TRIMMINGS

served from 1:00 to 5:00, fast time.

Looking Backward at Events That

Happened 25 and 35 Years Ago

Washington, D. C.

CORN 'SIT DOWN STRIKE' High ranking officials of the agriculture department are frank in saying that farmers are impeding the war effort just as much as striking coal miners when they stage a sitdown strike on corn.

Feed corn is desperately needed by poultry farmers, dairy farmers, journ. Carried. and corn processors. But corn is not moving to market because farmers are holding for a higher price.

The typical farmer in the corn belt today is looking at his bins full 1943. Meeting called to order by of corn and reasoning that he might | President Mann. Trustees present as well hold it for a while, since he were Asher, Pinney, Patterson and doesn't need the cribs yet, and since Kinnaird. the price might go up.

Washington is partly to blame for ular meeting and intervening this. The attacks on OPA, the firing special meeting were read and of Chester Davis, and the congres- approved. sional demands to set aside the price ceiling, all have created unsented: certainty. So the farmer sits tight, saying, "I'll just wait till they make up their minds."

But when thousands of farmers do the same thing, it creates a scarcity which throws the national economy out of gear just as much as the lack of coal production. The patriotic thing to do, say Washington officials, is to send your corn to market now, especially since the farmer is guaranteed the benefit of a price rise, if it comes.

Meantime, the corridors of the department of agriculture are seething. Pressure for a corn rise is terrific. This is Marvin Jones' first big battle.

WICKARD GOES SHOPPING

Secretary of Agriculture Claude C. C. Sand, and Gravel Co. Wickard went shopping with Mrs. Frank Rennells Wickard the other day. He stood in Geo. Ackerman ... the grocery store watching the shop- Louis Crocker ... pers, while Mrs. Wickard did the buving.

He noticed a crush in front of the meat counter, while the vegetables. including potatoes, were going begging.

"That's human nature for you," mused Wickard. "Only a few weeks ago, when potatoes were short for a few days, there was a great howl from the public, and potatoes were sold in the black market. Now there's plenty of potatoes-but everybody wants meat."

When Mrs. Wickard appeared from the crush, she announced with pride that she had some meat. "How much did you pay for it?"

asked. Wickard. and orders drawn for the several "Nine points," replied Mrs. Wickard.

"No," said the secretary of agriculture. "I mean how much money -how much a pound?"

"Oh, I don't know," she said. "All I know is it cost nine points out of my red stamps."

Wickard shook his head. "That's the trouble with you women," he Carried. said. "You're not thinking about the cost of food, but only whether you can get it or not. How do you expect merchants to hold to the price ceilings, if you don't even

Want to Move Fast. The method used in invading Sicily was a compromise among land, air and naval elements, resulting in the "peculiar amphibious operations" Churchill talked about. But the air forces believe they can move 'even faster and more effectively in conquering other parts of Italy if they don't have to be tied down by classical warfare.

For instance, with bases in Sicily, army airmen think they can so pulverize the industrial plants of northern Italy that they can bomb that country out of the war without waiting for huge landing operations to come up and help them.

Then with air bases in northern Italy, they are within range of the hidden synthetic gasoline and rubber factories which Hitler has moved into Austria and Czechoslovakia. Thus, step by step, the air forces believe they can knock out the enemy without resorting to classical warfare.

Axis Planes Knocked Out.

Here is one significant thing army airmen point to. During the ten days just before we invaded Sicily the Nazis had been sending a lot of new planes into Sicily and southern Italy.

air strength, which was heavily damaged by U. S. planes, there followed a day or two of weak resistance. In other words, Axis planes were knocked out and had to wait for reinforcements. These reinforcements kept coming up until about two days before the invasion, after which Axis air resistance was light.

. . .

CAPITAL CHAFF C Since the Washington Post exposed the use of diplomatic cars for driving to dinner, many a Washington diplomat has been going out on foot . . . Among five Washingtonians who were penalized for pleasure driving was John Quincy Adams.

Cone reason for the Nazi announce ments that an Allied invasion will start on such-and-such a date is that if the invasion does not materialize Hitler can boast that it was called off because of German strength.

The Secretary of the Treasury Washington, D. C. Both you and the country are to be congratu-My dear Mr. Secretary: lated on the striking success of the Voluntary Payroll Savings Flan. Through it twenty-neven million wage earners are regularly investing in Government bonds more then \$420,000,000 a month to meet the cost of the war. This is of primary importance as an aid to minning the war and as a safeguard against inflation. But it is also important that so many of our fellow citizens are reviving the forgotten art of saving from earnings. One way of securing freedom from want in the future is by saving something from the planty of today. Yours sincoroly, Mary

y of the Treasury. ston, D. C.

Thank you for sending us the description of your expanded payroll savings drive based on the these "Figure It Out Yourself".

The House Ways and Means Committee and the Senate Finance Committee are happy to support the present drive to increase the Furchases of War Savings Bonds through the Payroll Savings Flan. This plan has already achieved a fine record. The fact that twentyseven million American workingmen and women are setting aside almost percent of every pay envelope and salary check speaks for itself. We agree with you, however, that public participation in the financing of this war should be and must be stepped up materially. Not only does the Trassury need added funds, but every dollar diverted from the purchasing stream into savings is a contribution to the fight sgainst inflation. We wish you success in this

Nutrition Chart Helps Avoid 'Hidden Hunger'

Food is always important, but in wartime it becomes strategic material. That's why the seven basic food groups form the groundwork of a plan to get full benefit, nutritionally, from all the food in the national larder, according to the U.S. department of agriculture.

It's easy to figure out a balanced diet, nutritionists say, if the food chart is followed. If one or more of the "Basic Seven" groups is left out, day after day, it's a danger signal.

"I'm never bungry. I est plenty of steak and potatoes." People who talk like that, who never order vegetables, may be suffering from "hidden hunger." This "bidden hunger" shows up in subtle ways. Workers who suffer from it tire more easily,

> ne raw—some cooked, frozen or canned

are more liable to stumble into accidents resulting from abnormal fatigue. They fall prey to minor illness, their morale is lower, they are irritable and difficult to work with. All this may add up to millions of lost working days, if "hidden hunger" spreads across the land.

By dividing food into seven groups, the problem of selection is simplified. Each group has enough different kinds of foods in it to allow wide variety in meals. If, during wartime, you find some usual kind of food to be scarce, try new ones, urday evening. making sure you hit all seven food Among the foods in Group 1tian Service met in the church basement on Thursday, July 29. green and yellow vegetables—are asparagus, beet greens, broccoli. City spent Sunday at her parental cabbage, chard, collards, dandelion greens, escarole, green peppers, lettuce, mustard greens, okra, parsley, green peas, snap or string beans, son of Pontiac are spending some spinach, turnip greens, and water- time at the home of their grandcress. Also carrots, pumpkins, rutaparents, Mr. and Mrs. Charles bagas, squash, sweet potatoes, wax Britt. beans, yams and yellow turnips. In Group 2 are all the citrus fruits and certain greens-oranges, tomatoes, grapefruit, cabbage and salad greens-served raw. In Group 3-a large one-are po tatoes, and other vegetables and fruits. It includes beets, cauliflower, celery, corn, cucumber, egg plant, lima beans, kohl-rabi, leeks, mushrooms, onions, parsnips, radishes, salsify, sauerkraut, turnips, and many others. Fruits included, and not mentioned in Group 2, are all those excepting the citrus, such as apples, berries and plums. Milk and milk products make up Group 4. In it are buttermilk, cultured milk, evaporated and condensed milk, dry whole and skim milk, cream, all kinds of cheese, and ice cream. Group 5 is the meat, poultry, fish and egg group. It includes also the protein alternates, dried beans, peas, nuts, and peanut butter. If your meat points don't last you through the week, switch to some unrationed food in this group, to be sure your meals contain enough protein. Bread, flour and cereals (natural whole grain or enriched or restored) fall into Group 6. Breads and cereals should be of whole grains or enriched with vitamins so essential for health. Group 7 contains butter and fortified margarine (with vitamin A added). Farm Notes

er milking is finished.

GRADE*1

SEPARATING CREAM BY WATER DILUTION COSTLY TO FARMER WATER DILUTION METHOD-(1)40% OF CREAM GRADES No. 1 GRADES No. 1 (2) BUTTERFAT LOST =IN= 25% SKIM MILK On the milk pro-

duction of four average cows this means a loss of 180 pounds of butterfat a year. At a value of 30 cents a pound this would amount to \$54.00

efficient and costly method of separating cream on the farm has been shown by laboratory tests at the University of Arkansas College of Agriculture and by examinations of the quality of cream received at its

creamery. Of four per cent milk so separated a full one per cent is lost in the skim milk. This compares with the negligible one-fiftieth of that amount lost when a good mechanical separator is used. To the farmer milking four cows and selling his butterfat at 30 cents a pound this means the difference between an annual loss of \$54.00 if he uses a water dilutor, and only \$1.08 a year if he uses a mechanical separator.

But that is not his only loss. Surveys show that only about 40 per cent of the water-separated cream is of No. 1 grade, in comparison with the 70 per cent of cream from mechanical separators which reaches the market as No. 1 grade. Since

That water dilution is an in- No. 2 cream usually sells below the No. 1 price, the farmer using water dilution again takes a licking. The same holds for his skim milk which because so diluted, has lowered feeding value, simply because farm animals cannot consume enough of it.

duction of four average cows this means a

loss of 3.6 pounds of butterfat a year. At a value

of 30 cents a pound this would amount to \$1.08

The 40 per cent figure for water dilution separation is probably too high, except under the most favorable conditions, since the method opens up many avenues of possible contamination of the cream. The water itself may carry bacteria that cause cream spoilage; its temperature may hasten their multiplication and cream damage. As the cream rises it carries most of the bacteria and mold with it, thereby increasing the amount of contamination and hastening spoilage. The construction of the average dilutiontype separator does not invite frequent cleaning, and the cream is not so readily cooled as that from a mechanical separator.

Early Orreries

planetarium, the correct name for the orrery, is a difficult one to trace, Mrs. Francis Butler is taking descriptions prior to those of the early 18th century being often ambiguous. For example, in 1232, the sultan of Egypt presented to Frederick II of Germany a timepiece which "resembled internally a celestial globe in which Sun. Moon and planets moved, being impelled by weights and wheels, so that they pointed out the hour, day and night, with certainty."

By Cornelia Fort (WNU Feature-Through special arrange-ment with Woman's Home Companion.)

(Here is one of the most remarkable articles ever published — a personal story by the first woman pilot to die on war duty in American history. Shortly after it was written, Miss Fort, 24, of Nashville, Tenn., was killed when the bomber she was piloting crashed in Terge.

I knew I was going to join the Woman's Auxiliary Ferrying squadron before the organization was a reality, before it had a name, before it was anything but a radical idea in the minds of a few men who believed that women could fly airplanes. But I never knew it so surely as I did in Honolulu on December 7, At dawn that morning I drove

from Waikiki to the John Rodgers civilian airport right next to Pearl Harbor, where I was a civilian pilot instructor. Shortly after 6:30 I began landing and take-off practice with my regular student. Coming in just before the last land-

saw a military plane coming directly

The painted red balls on the

tops of the wings shone brightly in the sun. I looked again with complete and utter disbelief. Honolulu was familiar with the emblem of the Rising Sun on passenger ships, but not on air-

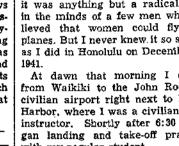

I looked quickly at Pearl Harbor and my spine tingled when I saw billowing black smoke. Still I thought hollowly it might be some kind of coincidence or maneuvers. It might be, it must be. For sure, dear God! Then I looked way up and saw the formations of silver bombers riding Something detached itself from

for my little baby airplane and I set about landing as quickly as ever I could. A few seconds later a shadow

an airplane and came glistening down. My eyes followed it down, down, and even with the knowledge pounding in my mind, my heart turned convulsively when the bomb exploded in the middle of the harbor. I knew the air was not the place

A LADY" -starringpassed over me and simultaneously bullets spattered all around me. LUCILLE BALL Suddenly that little wedge of sky with above Hickam Field and Pearl Har-GenerKelly---"Rags" Ragland bor was the busiest, fullest piece of Virginia O'Brien-Zero Mostel sky I ever saw. We counted anxiously as our little and civilian planes came flying home to **Tommy Dorsey and His Band!** roost. Two never came back. They Geo. Givot—Donald Meek were washed ashore weeks later on 8 DuBarry beauties right out of the windward side of the island, bulthe pages of Esquire! let-riddled. Not a pretty way for the brave little yellow Cubs and their It's a Bombshell of Laughs pilots to go down to death. A Barrage of Beautiful Girls! When I returned, the only way I ALL IN TECHNICOLOR! could fly at all was to instruct Civilian Pilot training programs. Weeks -Special Featurettespassed. Then, out of the blue, came a telegram from the war depart-"Bugs" Bunny Cartoon Headline Hot News ment announcing the organization of the WAFS, and the order to report within 24 hours if interested. Aug. 4-I left at once. Mid-Week Special! Because there were and are so many disbelievers in women pilots, Metro-Goldwyn-Mayer's especially in their place in the army, ensational, Stark, Stirring Story officials wanted the best possible qualifications to go with the first ex-"HITLER'S perimental group. All of us realized what a spot we were on. We had MADMAN" to deliver the goods or else. Or else there wouldn't ever be another The Story That Pulls No chance for women pilots in any part of the service. Punches! The attitude that most nonfliers -starring have about pilots is distressing and often acutely embarrassing. They Patricia Morison—John Carradine chatter about the glamour of flying. aptive Women Sentenced to a Well, any pilot can tell you how iving Death! The Firing Squad glamorous it is. We get up in the for All Men! cold dark in order to get to the airport by daylight. We wear heavy cumbersome flying clothes and a 30pound parachute, You are either too cold or too hot. If you are a female your lipstick Fri.-Sat.-Sun., July 30-31, Aug. wears off, and your hair gets straighter and straighter. You look -SMASH TWIN BILLforward all afternoon to the bath eon Errol-Mary Beth Hughes you will have, and the steak. Well, we get the bath, but seldom the steak: sometimes we are too tired to eat and fall wearily into bed. **"FOLLOW THE** None of us can put into words why we fly. It is something dif-BAND" ferent for each of us. I can't say exactly why I fly, but 1 ---PLUS---"know" why as I've never known anything in my life. Of this I am TIM HOLT most positive. I knew it when I saw my plane in silhouetted against the clouds, framed by a circular rainbow. I "SAGEBRUSH knew it when I flew up into the extinct volcano Haleakala on the island LAW" of Maui, and saw the gray-green

Pacific.

ing, I looked casually around and

toward me. I jerked the controls away from my student and jammed the throttle wide open to pull above the oncoming plane. He passed so close under us that our celluloid windows rattled violently and I looked down to see what kind of plane it
