Take Your Fertilizer Home with you Now!

It's a wise farmer who takes his spring fertilizer now. Shortage of labor in the fertilizer plants, combined with uncertainty of product restriction; potash and phosphate shortages in our Menominee Area are likely to lead to recurring fertilizer shortages next spring. A wise farmer buys now. When you buy now you are buying at the lowest possible cost. It's a wise investment, it's money you save. Buy now and you're ahead of the curve. Farm Produce Company, Menominee, Michigan.

It's the Little Things That Count

Babies grow, small holes in tissue get larger, a ——spread—you just can't dis—

tect the little things.

Especially in Recapping

Every detail is important, that's why we are as particular with the little factors in every phone for these to contribute to the nation you will win. It starts from the first inspection until it gets to our end O. C. D.

Being Certified Master Treads, we have certified only as those who do the best harvesting, most flax of the highest quality of lumber.

Turn out OFFICE LIGHTS at lunch time

Save electricity to save coal!

The government asks the utmost conser-

vation of electricity to save coal, man-

power, transportation and critical war re-

sources. Turning off your office lights for an hour at lunchtime may not seem like much of a saving. But one or two lights in thousands of offices, turned off one hour a day, would save a year thousands of tons of coal vitally needed today.

Electricity is not rationed and there is no shortage of electric power in this area. The Government asks no one to save voluntarily but use VOLUNTARILY as part of the national conservation program. Save electricity whenever and wherever you can—in stores and office and homes. The Detroit Edison Company.

Life for Johnny Jones Is Coming wrapped in PAPER

Blood plasma is saving thousands of Johnny Jones's lives. Every gallon lost in wounded, on the battlefield in fragile containers. But they won't break. They get to Johnny all right—because they are in a paper container.

Without that paper container, Johnny's chances of recovery would be small.

Remember also that paper wraps or makes 700,000 vital war articles—bomb parts, camou-

flage cloth, rubber, tin cans, etc. A bundle paper can be cut to size on the battleground by any man.

This is 1944!

What will you do to make it the victory year?

The Goal - VICTORY

The Place - EUROPE

The Time - THIS YEAR

The Responsibility - YOURS

You know that this year may bring great victories—if every American, civilian or soldier, stands loyally at his or her post. And, whatever else your duties may call for, there is one job that concerns every citizen—that concerns you: That is to help make 1944 one of the decisive years of human history. So make whatever sacrifice may be necessary to help make the 4th War Loan Drive the success it must be if we are to realize our great objectives this year.

Ask yourself honestly—how much of a sacrifice is it to give up some luxury just temporarily in order to buy the best investments in the world? When you've answered that question, buy at least one extra $100 Bond now—at your office or plant, if possible. And if you've already bought, buy again this month—and keep 'em!

Let's all back the attack!
