### Farm Produce Co. **Had Best Annual** Profits in 18 Years

Stockholders Re-elect All Seven Directors; 10% Dividend Is Paid

A year ago, Frank Reid, in his report as manager of The Farm Produce Co., stated that the annual volume of business and the profits had been the best in 17 years. Tuesday afternoon at the annual meeting of the company, he told stockholders that profits in the year just closed had been slightly higher than the previous year. The gross sales of the company the past year were \$420,068.27 which is considerably more than in the previous year.

Members of the board of directors were elected to succeed themselves in these positions. They are W. J. Schwegler, C. J. Striffler, J. A. Benkelman, I. W. Hall, Smith Hutchinson, Charles Bond and J. E. Snover Couple Crawford. Not many stockholders were present in person Tuesday and much of the stock was represented by proxies in the voting. Mr. Reid will continue as man-

ager of the company, having recently been given a three-year con-The company late last month sent stockholders 10 per cent dividend checks. A contribution of slightly more than \$1,000 was set

# Injured in Car, **Truck Collision**

Mr. and Mrs. Wilbur Jones Are Victims in Accident on Monday

Mr. and Mrs. Wilbur Jones of Snover were injured in an automobile-truck collision at the intersection of M-53 and Cass City road shortly after noon on Monday. They were treated in Pleasant Home hospital here and discharged Monday afternoon. Mr. Jones suffered a dislocated left elbow and lacerations on the right shoulder blade. Mrs. Jones had a fractured right collar bone and multiple bruises.

Harold J. Lotter of Elkton, who was driving a truck owned by the Elkton Export Boxing Company, was not hurt.

According to state police of the Bad Axe post who investigated, the automobile driven by Jones pulled out on the highway and ran into the truck which was traveling north on M-53.

### Calf Scramble Is New Feature At County Fair

In All Departments the Premiums Have Been Increased Around 25%

The outstanding new feature of the Tuscola County fair of 1944 will be the calf scramble to be held Friday afternoon, Aug. 25, im-mediately following the afternoon

A large corral will be constructed in front of the grand stand, into which 15 Aberdeen Angus calves will be turned loose. Twenty 4-H or FFA boys selected by County Agent Norris Wilbur will also be placed in the ring, each provided with a new rope. At a given signal by the judges, it will be the object of each of the boys to capture and tie one of the calves to a designated post. To the boy who is successful in capturing a calf will be given the privilege of taking the same to his home, feeding and fattening it for market. The boy agrees to return the calf for public evention of the 1045 foir pu lic auction at the 1945 fair, at which time the boy will receive all the funds received from the sale of the calf over and above its ori-

ginal cost. Public spirited firms and organirations have responded very freely in making these calves available, and it is hoped that they will all be of the Aberdeen Angus breed as a good-will gesture to the exhibitors of that breed who will be hibitors of that breed who will be here this year to participate in the

Michigan State Fair Angus show. As in previous years, the fair will take place in the afternoon, begin at 1:30. its purpose being to eliminate all teams except the five leading teams. In the evening, just prior to the night show, the final contest among the remaining five teams

will be held. Prizes in these contests this year will total \$470.00 with \$100 of that amount set aside for Tuscola countable, or both. ty teams. National and international championship teams are expected, and inquiries are now reaching the secretary from owners of teams in many states out-

side of Michigan. In every department of the fair, premiums have been increased anproximately 25%, thus proving At ten o'clock on Thursday that the directors of the county morning, Aug. 10, in the Presby- fair intend to keep pace with the flowers. terian church here, Miss Evelyn times, realizing the increased cost Lafayette, daughter of Mr. and of production of all items for ex-Mrs. C. ### Awarded Air Medals Lawrence Weihl Killed in Action In France July 19

Parents Received Word of His Death from the War Department

Mr. and Mrs. Ottis Weihl of Evergreen township received a telegram from the war department Saturday telling them that their son, Pfc. Lawrence Alfred Weihl, 23, had been killed in France on July 19. A letter was received on Wednesday from the department confirming the telegram.

The most recent letter the fam-

ly received from Lawrence was dated July 7 and they believed him to be still in Ireland at that time. Lawrence A. Weihl, son of Ottis and Hazel Weihl, was born in Sepand Hazel Weihl, was born in September, 1920, at Coleman. He was inducted into the army at Fort Custer from Columbia township, Tuscola county, on Nov. 13, 1942. He was stationed at Camp Robinson at Little Rock, Ark., Fort Leonard Wood, Mo., and Nashville, Tenn., before he left for overseas Tenn., before he left for overseas in November of last year and land-

ed in Ireland. Surviving are his parents and the following brothers and sisters: Sgt. Edward Weihl now in Italy, Erwin and Raymond Weihl of Bay City, Mrs. Norman Schultz (Theima) and Mrs. Cecil Abke (Mar-tha), both of Unionville, Homer Weihl of Cass City, and William and Marietta at home.

### **Awarded Silver Star** And Air Medal

Mr. and Mrs. Ira Reagh of Branch, Michigan, former residents of Cass City, have received word that their son, Second Lieutenant Grant L. Reagh, had been awarded the Silver Star and Air Medal at the direction of President Roosevelt. Since Lt. Reagh has been missing since Feb. 25, 1943, the decorations will be presented to his father, Ira Reagh. The citations are as follows:

"Silver Star-For gallantry in action while participating in an aerial operation against the enemy over the Solomon Islands, on 19 December 1942. Lieutenant Reagh, pilot of a P-38 airplane, was a member of a flight of eight fighters escorting five B-17 bombers on a mission to Bougainville Island to bomb shipping at Tonolei Harbor. On reaching the target the Class 12-Best display all white flight was intercepted by thirty enemy fighters. Although the supercharger on Lieutenant Reagh's right engine had gone out of commission previously and with heavy odds against him, he pressed a determined attack on the enemy, putting a burst of fire into the cockpit of one fighter which spun towards the sea, with final results unobserved due to poor visibility caused by the weather conditions. During the rest of the one-sided struggle, Lieutenant Reagh's flight destroyed two and probably five enemy fighters and successfully fulfilled the mission of protecting the bombers. The flying skill, courage and resolute devotion to duty displayed by Lieutenant Reagh in pressing home attacks while at such disadvantage is in keeping with the highest traditions

of the Army Air Forces."
"Air Medal—For some ten fighter sorties during the period of 23 November to 19 December 1942." Grant Reagh was graduated from Cass City high school in 1937. He spent one year at Central Michigan College of Education at Mt. Pleasant and then enlisted in the air corps.

### **School Officers'** Meetings in Sanilac

There will be a series of meetngs in various parts of Sanilac county with school officers to discuss the new financial accounting system for schools, according to an announcement by School Commissioner John R. Francis. A part of each meeting will be taken to discuss procedure in reporting withholding tax deductions.

Meetings will begin at 8:30 p. m., E. W. T., and all school officers are urged to be present at one of the following: Aug. 10, Shabbona Community

Aug. 14, Snover school. Aug. 16, Sandusky high school. Aug. 18, Brown City high school. Aug. 21, Croswell high school.

### Chic Cottons for Youngsters Are Gay With Pretty Handwork

By CHERIE NICHOLAS

WELL, well, look who's here! Meet little daughter of the household posing right in the very foreground of the illustration. She wants to make sure that you take note of the cunning black pinafore she is wearing, for it's the "latest style" and she has come to tell you

It has been the fashion among our Latin-American neighbors to dress their youngsters in black cotton. We have borrowed the idea this year and now it's quite the fashion-correct thing for little American girls to be wearing black pinafores. However there is nothing somber about these modish black aprons for they are gaily bedecked with bright embroidery, and smartest of all, the new handpainted decor.

There's an idea for you! Handpainted design on black sateen! The story-book motifs that decorate the pinafore pictured are handpainted. which together with the pastel piping that finishes the edges all around makes a most lovely color effect. Not only is handpainting enhancing cottons for the little folks, in the adult fashion world it's blouses that flaunt flower motives done by hand with brush and color that are the big news. It is likewise on party frocks and the "last word" is the handpainted bathing suit.

Cute as a button is the little lady wearing a trim striped cotton frock | checks. The blouse is of white sheer, decorated with ready-cut cotton cherry applique. These appliques come in their own packages with complete sewing instructions. It's grand to have a collection on hand,

color and individuality to simple dresses. It's a question as to which is the prettiest, the new handpainted technique or these appliques, which offer endless possibilities in designful arrangement.

This year, styles for children have come definitely under the Mexican spell. Take note of the dainty dress of cotton muslin shown to the right. It has a band of Mexican-inspired embroidery around the skirt, which brings into the picture vivid color

There's just no end to the clever styling given to cottons nowadays. It does not matter how simple a frock or a pinafore, it is sure to take on a clever trimming accent of some sort. A white cotton jersey frock that has a drawstring neckline and waistline tied with yellow ribbons takes on a wide border effect about the skirt hemline worked with an applique of yellow cutout flowers.

Mother-and-daughter fashions are important on the fashion program. They are showing in the shops such clever twosomes as the new black suspender dresses embroidered in hearts and flowers in red, white and green with long-sleeved dimity blouses. Necklines and wrists have lace-edged ruffles and drawstring

Little tots look too cunning for words in the smart blouse-and-skirt dresses. One type has a skirt of red and white checked gingham with a deep border effect worked in red cross-stitch smocked about neckline and sleeves. using red thread. Lots of gay rickrack is also being used to trim in clever ways.

Released by Western Newspaper Union.

### Tremendous Demand For White Jewelry

If you want to make the most of your looks, the stunning white jewelry, which is the "last word" for summer, will do just that for you. Wear white jewelry to accent your colorful prints. Frost your black dresses and suits with white plastic costume jewelry. An all-white vogue is on the way for summer and white necklaces, earrings and bracelets with your white costume makes an ideal ensemble. In the collections of white jewelry, you'll find plastic necklaces of lacy flowers that are too flattering for words. These are often matched with ear bobs and bracelets. The craze for summer white is also reflected in corsage sprays with complementary earrings done in the new gardenia white, grape clusters being a favorite motif. White beads, white cordand-plastic combinations are everywhere in evidence in the nowso important displays of glamorous white jewelry.

### Tiny Sailors Maintain Their Style Prestige

Speaking in terms of the little hat that still maintains its style prestige although it must now share honors with the enormous brims that are coming into favor, milliners declare that the tiny sailor, tilted jauntily over the front hair arrangement, is proving to be one of the most successful hats brought out this season. The little flower-covered sailors are gay flatterers indeed, and are always bewitchingly veiled, which makes them all the more alluring. Smart too, are the wee sailors covered with check or plaid taffeta especially when they are complemented with gloves made of the same check or plaid.

Envelope Handbags

be worn like a bracelet.

### Flower Technique

More flowers will be worn during the coming months than have been worn for many a season past. Years ago, it was the fashion to wear flowers at your waistline. The pendulum of fashion has swung back to this charming vogue. The young lady pictured is fashion-wise as to flower technique prescribed for this spring and summer, in that she positions a cluster of pretty spring posies at the waistline of her prettily styled rayon dress. Note that the becoming neckline is finished off with detailing that is matched to that used on the skirt panel and sleeves. Duration kind of wear is assured for the rayon material used for her chic gown be-A big envelope style handbag in cause it bears a label indicating luggage ian has a huge plastic ring on the zipper closing chain that can be worn like a bracelet.

#### Fig Rubber

Rubber from trees of the fig family is not an altogether new development. One of the first sources of natural rubber was the India rubber tree-"Ficus elastica." Even the cultivated fig, grown chiefly for its fruit, drips a latex containing natarral rubber, but the presence of resinous materials has made it commercially unprofitable.

#### Make Back Rest

If the patient needs a back rest, try slipping a washboard into a pillowcase behind the pillow, "lean" a folded card table or bread board on a slant against the back of the bed; or use a straight-back chair, bottomside up, so that its legs lean against the head of the bed and its back forms an inclined plane; and cover the support with pillows.

That big Red Cross surgical dressing quota needs your help.

### Wet Cloth

One way to avoid waste while washing the face or taking a bath or doing any other type of washup with a wash cloth is to wet the cloth before rubbing the soap on it. This is much more economical than rubbing moistened soap on a dry cloth. A good lather can be made by one or two rubs of the soap across the

#### Pasture and Forage Important This Year

Lime, Fertilizer Boost Crop, Improve Quality

The supply of feed grains relative to livestock and poultry numbers promises to be less favorable in 1944 than it has been for several plan to take every possible advanthis year, according to the War Food administration.

One of the best ways to increase production of pasturage and forage, and at the same time to improve the quality, the WFA says, is to apply more lime and superphosphate on pasture and hay land. The 1944 conservation program of the Agricultural Adjustment agency is designed to stimulate increased use of both these materials.

of the Great Plains, and in some of desirable for two reasons. They produce heavier crops of more nutritious hay than most of the non-

Competition from war crops has made the legume and grass seed creps problem a serious one. Reserves have gone and it will be necessary to conserve all present acreage as well as provide in some manner for additional seed.

transfer it to the soil, they increase

When superphosphate is used as top-dressing for pastures and hay land, it enables the more desirable. more nutritious, and more palatable sedge were top-dressed with super-Mr. and Mrs. G. H. Burke and phosphate. Kentucky bluegrass and out the poorer plants.

Neither lime nor superphosphate can do the job of the other, nor can both together take the place of other elements of good land management. the WFA warns. But on soils which require both, each adds to the effectiveness of the other.

Farm Woodlands

In total our farm woodlands have a larger area than the combined forests of Norway, Sweden, Finland

Marines' Artillery

at Vassar Aug. 5.

After operating in many wars for nearly a century and a half without any artillery of its own, the marine corps first used organic artillery units in San Domingo in 1916. In all previous engagements involving artillery, marines had been supported either by naval gunfire or by army artillery units, as was the case in France.

### **EUROPE:**

The War

Quivering under the assault of Allied forces, German lines buckled and gave all along the perimeter of Adolf Hitler's crumbling Fortress Europe.

In France, U. S. tanks and armored columns spearheaded a break from the narrow neck of the Cherbourg peninsula into the open country of Brittany to the south, chasing seven enemy divisions in their drive and bagging upwards of 30,000 prisoners. While the U.S. forces smashed into Brittany on the western end of the 100 mile French front, British troops took up the assault on the eastern flank and pounded forward. As the Allies fought into the open country, leaving the tall, thick hedgerows and peaked hills behind them, they were in position to bring the full force of their mobile, armored equipment into play and slug it out with the

As German commentators emphasized the Russian numerical superiority on the eastern front since the Allied invasion of the west had necessitated the diversion of many divisions to that battle-sector, the Red avalanche rumbled further north and westward, threatening to cut off 300,000 Nazis in the Baltic states and engulfing the old Polish capital of Warsaw. Already half-way across prewar Poland, the Russian drive had come within 150 miles of

Normandy-Bazooka team directs fire at entrenched enemy dur-ing heavy fighting in lightning U. S.

Germany proper, with the Nazis trying to stabilize the sagging front along the lower Vistula river, where the Reds pressed to expand their bridgeheads.

In Italy, five German divisions fought viciously to stem the Allied approach to the vaunted "Gothic Line" below the famed art center of Florence, while farther to the drew from the historic city of Pisa to the mountains above the municipality. As the two armies locked in combat about the "Gothic Line," the advantage still lay with the enemy. entrenched on the mountainous terrain and making full use of the rocky heights to pour artillery fire upon the advancing U. S., British, Canadian. French and Indian troops making up the Allied forces engaged

### DIPLOMACY: Allied Gain

If the war was going well for the Allies on the battlefields, it was going equally well in the shimmering diplomatic ranks, with Turkey breaking off all relations with Germany short of war, and pro-Nazi President Risto Ryti of Finland turning over his office to popular, 77vear-old Marshal Baron Gustav Mannerheim.

Disposed to sit on the fence and make concessions to whatever side appeared to be gaining the upper hand on the battlefield, Turkey's rupture of all commercial and political relations with Germany indicated the growing success of Allied arms. Only after the Allies had promised to furnish protective aerial cover against possible German bombings did the Turks make

Always for Finland first, Marshal Mannerheim took over the political reins of his country following ex-President Ryti's effort to hold the tiny nation in line behind his open declaration to stick the war out with combat. Germany, Because Finland's abiding faith in his patriotism would enable him to weld all factions together, Moscow is reported to find | revealed that 63,000,000 tons of suphim acceptable as head of a peace plies have been shipped overseas since Pearl Harbor.

### HIGHLIGHTS . . . in the week's news

LIQUOR: The 31 day "holiday" from manufacturing industrial alcohol for war purposes that the WPB has granted distillers during August is being utilized by 121 companies to make whiskey. Eight other companies will continue using their full capacity to make industrial alcohol. The others have converted 50 per cent or less of their facilities to manufacture of beverage alcohol.

BRIDGE FALLS: The central span of a steel bridge across the Mississippi at Chester, Ili., has fallen into the channel, blocking water traffic. The bridge section is 650 feet long and 90 feet high. It was dislodged

apparently by high winds. 10,000 American planes have been planes are operating in the Pacific, our upbuilding of strength for the sent to Russia under lend-lease ar- | and to some extent in Europe. rangements since October, 1941.

### AGRICULTURE:

Potato Crop Suffers

With the prolonged drouth affecting the potato crop in the northeast, and small improvement expected in certain sectors even with rainfall, OPA granted growers an increase of 90 cents a bushel to bring returns from \$3.30 to \$3.65 per hundred

With the drouth general, potato production in the southeast also was reported to have suffered, and crops in Ohio, western New York and Long Island were said to be off 40 to 50 per cent. Despite recent rains, damage reportedly spread to Indiana, Illinois, Missouri and

#### Fewer Lambs

High swirling snowdrifts, shortage of sheep herders, wolves and wild dogs were among the factors contributing to a heavy toll of lambs and ewes on the western ranges durthat only 78 lambs of every 100 ewes survived.

Popular since sheep raisers began marketing the animals early instead of waiting for two or three years as formerly when many pecple disliked the mutton flavor, lambs will be in smaller supply this year than last.

Despite the big death loss, how ever, western ranges were expected to market over half of the nation's lambs in the coming crop year,

#### Proudly They Serve

When Thelma A. Young joined the WAC in Philadelphia, Pa., she became the 19th member of the family to enter service. Five brothers have been killed in action in sectors varying from Bataan

Serving overseas are Mrs. Kathleen Young MeBride, who is driving an ambulance in Great Britain; Mrs. Eileen Young Gallagher, British WRENS; Emsign Virginia Young Otto, navy nurses corps; Pharmacist's Mate Paul Young. on a hospital ship in the Pacific; First Lt. Gordon Young, a marine in New Guinea; Pvt. Alden Young in Italy; William and Phillip Young with a navy construction battalion in Iceland, and Machinist's Mate Edwin Young in the Mediterranean.

In this country are First Lt. Anne Young Barnett, WAC; Lt. Frances Young Crawford, WAVE; Sgt. Nancy Young Cooper, marine, and Yeoman Diana Young Gentenaro, SPAR.

#### DDT: New Guinea and approached to

Medical Weapon

Deadly when applied against lice, flies and fleas, the new insecticide DDT will soon be brought into use against the malaria bearing mosquito plaguing U.S. fighting men overseas, Maj. Gen. Norman T. Kirk, the army's surgeon-general,

Impressed by DDT's effectiveness in checking a typhus epidemic spread by body lice in Naples, Italy, last winter, and its quick action when sprayed against insects, the army's present pre-occupation is in developing methods for applying the chemical against the malaria bear-

DDT is the shortened form for the jaw - breaking term dichlore - dinyl.trichloroethane, one of whose constituents is chloral-hydrate.

### **SURPLUS GOODS:**

Disposal Progresses

With estimates that from 50 to 100 billion dollars worth of surplus goods would be available after the war, government authorities already have developed plans for disposing of the material without throwing the whole economic machine out of

With more than 400 million dollars' worth of surplus goods already disposed of, the Office of War Information said, plans call for selling such material through sealed bids and auctions at about 75 per cent of cost to discourage speculators, and making the goods available in small lots for little business men.

One billion dollars of government defense housing also will be declared surplus after the war, it was said, and individual units will be offered separately if satisfactory bids for whole projects are not forthcoming.

### ALIENS:

Number Decreases

Because of an increase in naturalization proceedings, a relatively high death rate resulting from their advanced age, and a sharp downturn bring the end sooner. in immigration, the number of aliens in the U.S. was reduced to 3,400,000 by June 30 of this year.

There were 5,000,000 aliens in the U. S. before the big decrease in their numbers got underway in 1940, with the all-time peak for naturaliza tion set during the year ending last June with 435,483 new citizens.

With only 30,000 immigrants admitted into the country during the 12 month period ending last June, one alien came in for every 15 naturalized.

Rocket promost of the increase. Rocket produce strong points, clear beachheads, and to attack both surface

NAZI DISINTEGRATION WASHINGTON.-Our enemies are in the final stages of disintegration.

By Paul Mallon

The end may come soon. Their growing weaknesses are evident plainly in their confessed switches of military leadership-in Japan the dethronement of Tojo, in Germany the jump from Von Runstedt to Rommel, the attempt on Hitler's life, etc. These glaring symptoms of théir approach to collapse are so ing the last season, with estimates obvious as to hardly require comment or interpretation.

> Yet no one in authority here expects the end to come through internal collapse. There will probably have to be a military breakthrough. In short, our leaders are counting only upon crushing the foe by superior military might. There are no signs to justify an assumption that internal revolution will do the job. For instance, the Japanese change

from Tojo does not in any degree denote a change in the ruthless military leadership of that country .. The old gang is still firmly entrenched. They just changed faces, not controi. They are having a problem to keep their people working for war in the face of our overwhelming displays of superior power and their cabinet change simply reflect their efforts to improve internal morale. HAS RESERVE STRENGTH

So also in Europe, Von Runstedt was ousted because he failed to bring up his forces, refused to commit his reserves at once to the Normandy battle. Rommel wanted to push his power fully into the fray and has brought 21 to 24 divisions into that front since he assumed control. Yet this is not more than a third of his potential strength in western Europe. Hitler can still command 58 to 60 divisions on that front. They are not full strength divisions, or crack troops, most of them being merely police forces for the Lowlands and France. Hitler has had to keep much of his power in Belgium where hidden local resisting forces last week took a toll of 1,000 Nazis killed and disrupted railroads at 100 points, and otherwise his potential is scattered. But it is true that in Normandy we have faced the best he has, about six crack armored divisions, and while these have been defeated, they are

Italy, he apparently considers as a sideshow, and has produced there no more than 28 divisions, largely second grade. His main show is still on the Russian front where he is yet able to maintain about 180 divisions.

still to be routed.

Thus he still controls great military power. Say there are only 10,-000 men in the average German division now as against normal strength of 15,000 and he still is able to present an army of nearly 2,000,000 men in Russia. 600,000 in western Europe and 240,000 in Italy, To win, we must crush this strength, break through it, demoralize it by fighting, DEFEAT IS SURE

Yet the inevitable destiny of defeat for our enemies is handwritten on the wall for all to see, on every front we are able to present superior power. In the Pacific, for instance, our sea might is reputed to be so far above the Japs as to be a joke among navy men. We do not yet appreciate the growth of the navy. One congressional authority I trust says our three or four task forces in the Pacific are separately the equal of the Jap navy. The change in cabinet may bring them out to fight, may cause a new sea offensive against us, but it is feredcomed, if we can muster a semblance of our power at the point of battle. Some think the Japs will try attack upon the Pacific coast to restore home prestige, or in some other sensational way, attempt to cast off the yoke of defeat which is upon them. It cannot succeed. We have out-produced them, and when we can get our overwhelming power to bear at any point, they will be defeated. Any attack by them will probably

The boys may be coming home before long. At the Chicago convention I heard several officials predict both of our wars, in the east and west, would be over by September.

The nature of our enemies is such that this is really the crucial point of the war. They understand no language of reason in their fanaticism. Indeed they proudly proclaim fanaticism, which is a lack of reason and understanding.

What we must look for next is a pause in the Russian marching to bring up communications lines. That

jectiles of various sizes are being the Lwow area. (The Nazis probaused to strafe enemy airfields, re- bly have removed most of their men.) In Normandy the same Nazi weakness is evident. The slow fighting PLANES TO RUSSIA: More than and submarine craft. Rocket firing there lately has merely represented

### Rationing at a Glance . . .

Boards open to the public 10 . m. to 5 p. m., every weekday. Processed Foods.

Blue stamps A8 through Z8 and A5 through F5 in Book 4 good indefinitely for 10 points each. (Five blue stamps valid first of each

Meats, Cheese, Butter, Fats. Canned Fish, Canned Milk.

Red stamps A8 through Z8 and A5 through C5 in Book 4 good indefinitely for 10 points each. (Three red stamps valid every fourth Sunday). Sugar.

Stamps Nos. 30, 31, 32, in Book

are good for five pounds each indefinitely. Stamp No. 40 in Book 4 is good for 5 pounds canning sugar through Feb. 28, 1945. Obtain application from local rationing board for additional canning sugar up to 20 pounds per person. In mailing application back, attach SPARE stamp No. 37. Shoes,

Airplane stamps Nos. 1 and 2 in Book 3 good indefinitely. Gasoline

A-12 coupons good for 3 galons through Sept. 21. B-3, C-3, B-4, and C-4 stamps good for 5 gallons until used. Make application for B and C renewal at least 10 days before rations are exhausted. Fuel Oil.

Period 4 and 5 coupons are good through Sept. 30.

Return application for next sean's rations as soon as received. New period 1 coupons for the 1944-45 heating year may be used as soon as they are received from local boards. Tire Inspection.

Be sure to keep your tire inspection records because OPA will continue to use them in the rationing program. Before you can get a ration certificate to replace a tire from your local board you will have to have your tires checked by an authorized OPA tire inspection

#### NOTICE OF MEETING OF DRAINAGE BOARD.

To Whom It May Concern:
Notice is hereby given that on the 17th day of June, 1944, a petition was filed with Michael W. Murray, County Drain Commissioner of the county of Huron, arking for the domains widen, asking for the deepening, widen-ing, extending and relocating of

### Sterton Drain

ocated in the Township of Greenleaf, County of Sanilac, Townships of Grant and Sheridan, County of Huron, and Township of Elkland, County of Tuscola.

And Whereas, a certified copy of said petition was served upon Mel-vin Pollard, County Drain Com-missioner of the County of Sanilac, James Osburn, County Drain Commissioner of the County of Tuscola, and the Commissioner of Agriculture, by Michael W. Murray, County Drain Commissioner of the County of Huron.

of the County of Huron.

Now, Therefore, in accordance with Act No. 316, P. A. 1923, as amended, a meeting of the Drainage Board of said drain will be held at a point where the drain crosses the highway between Sections 25 and 36, in the Township of Creat County of Huron on the of Grant, County of Huron, on the 14th day of August, 1944, at 10:00 o'clock, C. W. T., in the forenoon, to determine the practicableness of said improvement.

Now, Therefore, all persons own-ng lands liable to an assessment for benefits or whose lands will be crossed by said drain, or any mumicipality affected, are requested to be present at said meeting, if they so desire.

Dated at Lansing, Michigan, this 2nd day of August, 1944. CHARLES FIGY,

Commissioner of Agriculture.

### **United Dairy Farmers'** Meeting

WILL BE HELD AT THE

DEFORD TOWN HALL

ON MONDAY EVENING, AUG. 14 Beginning at 8:30 P. M.

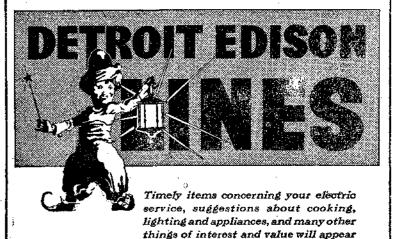

It is very important that all farmers attend this meeting. There will be a delegate elected to attend the national convention of the United Dairy Farmers, District 50, U. M. W. A. of America, at Cincinnati, Ohio, in September.

The tester will be at the meeting to test the milk samples. Don't forget to bring one.

Potato and bean growers should attend this

EVERYONE INVITED.

Sponsored by Cass City and Deford Local No. 12346

from time to time in "Edison Lines."

Make "Edison Lines" a reading habit!

HEATING INSIDE OUT . . . To most of us, heat is heat -but not to the scientist. To him, heat has a wave length-either "short" or "long." And, like a tailor measuring a pair of pants, the scientist can choose the wave length best suited for a certain job. For example, by using the proper wave length, the scientist can heat things from the inside out. Some startling war production jobs have been done in this way. Making heat do new jobs is only one of many important projects under way in our research laboratory.

TASTY SUMMER TREAT . . . Here's a nourishing salad the whole family will like.

1/4 cup French dressing pound elbow macaroni, cooked 1 cup diced celery 1 green pepper, chopped Salt and pepper

I onion, minced 1/4 cup pickle relish or sweet pickles 3 hard-cooked eggs

Add French dressing to macaroni while still slightly warm. Let stand until cool. Add celery, green pepper, onion, relish, and two of the eggs, sliced. Mix lightly with mayonnaise enough to moisten (1/4-1/2 cup). Season with salt and pepper. Pack in paper container, garnish with sliced hard-cooked egg, and chill. Serves from five to six.

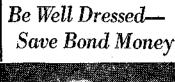

NEWCOMERS TO MICHIGAN . . . If you have recently moved into this area, you may not know about the special services we provide for our residence customers—especially our lamp bulb replacement service. You simply exchange your burned-out lamps for new ones-larger or smaller-at any Detroit Edison office, without added charge. We will repair your electric toaster, iron and other small appliances with no extra charge except for necessary parts.

BUY 'EM AND HOLD 'EM . . . A War Bond is like captured territory-it's not much good unless you keep it! Although we are a whole year nearer victory than we were in 1943, we dare not slacken our pace on the fighting front or the home front. Our men across the seas are doing their job; we at home must do ours. Buy War Bonds . . . and keep them!

Question: Should the outside of my

gravity-feed hot air furnace become intensely hot, regardless of how cold Answer: Ordinarily hot-air furnaces are not insulated; but if the

outside shell of the furnace is very hot, cover it with insulation-such as three layers of corrugated asbestos paper or a rock wool blanket Cover the sloping top of furnace with asbestos cement.

#### UNFINISHED BOOKCASE

Question: I have some unfinished bookcases that I should like to lacquer. How should I prepare the

wood, and what type of lacquer should I use?

Answer: Smooth the wood by rubbing with fine sandpaper, and then clean the surface by wiping with fire. Get the brushing variety of gional map. lacquer, and follow carefully the manufacturer's directions on the

Mold and Musty Odor

Question: We moved into a firstfloor flat two months ago and are the ground. What should we do about the moldiness?

Answer: The moldiness comes fense. from the earth under the floor. If a out of the question, the best thing to do is to paint the underside of the floor with liquid tar or asphalt, including the beams. The furniture should be aired in the sun on a bright day and it should be well brushed on all sides.

### Painting Plywood

Question: I have remodeled my kitchen, placing plywood on side walls and ceiling. I should like to paint the kitchen white. What would you suggest for the first coat?

Answer: Clean the wood and see that it is smooth, and then apply a first coat of enamel undercoater or flat paint thinned with a pint of raw linseed oil to the gallon of paint. After the first coat is dry, put on a second coat of undercoater or flat paint. When dry, smooth the surface by rubbing lightly with No. 000 sandpaper. Wipe off the dust and finish with a good quality quick-drying enamel.

### Hole in a Tile Wall

Question: I tried to fill a hole in a tile wall through which a valve of a hot water pipe projects with plaster of paris and cement. After a short time the filling falls out. What can you suggest?

Answer: When using cement, always wet down the old surfaces with water before putting the patching cement in place. After the hole has been filled, do not use the hot-water line until the cement has hardened; otherwise, the heat in the pipe will dry out the cement before it has become set. Six to/ eight hours should be allowed.

### Closed House

Question: When closing our country house, should we leave the oil burner running or shut it off? There would be only occasional attention given to it.

Answer: When a house is to be left unoccupied for a long time with little or no inspection, the oil burner should be shut off. It should not be allowed to operate without frequent attention. It also is a waste of fuel to heat a vacant house.

### Stained Chair Back

Question: A chair upholstered in flowered silk was stained on the back by perspiration, which left a big street). round mark. How can I take off the canal because of the portage this mark?

Answer: For best results have the chair cleaned by a good upholsterer. If you wish to try the job yourself, you may be able to get the stain off with a spot-removing liquid, preferably noninflammable. Follow printed directions.

Concluded from page 1. strategic importance of this town of 13,000 souls along the St. Mary's river between Canada and the United States.

The war department released a news item at Washington a few days ago, telling how more than 10,000 American airplanes had been sent to Russia under lendlease. Highly significant was this fact: Approximately 5,000 of these planes were flown to Russia over the northern circle route by way of Alaska! Delivery of Yank aircraft is being made in 1944 in this manner—over the Bering sea between Alaska and Russia, a route hereto considered by the public as barred to air transportation because of natural hazards.

Modern air power has annihilated space.

Sault Ste. Marie, hub of the only international military zone on our North American continent, is proof of this truth.

It was our privilege, one year ago, to inspect the army air defense headquarters here at the Soo. Then the peril of German raids across the northern circle from Europe was a military reality. Throughout the Upper Peninsula and in many northern counties of Michigan, as well as hundreds of distant outposts in Canada's vast wilderness, volunteer airplane watchers were on the job, each hour of the day, ready to dispatch information by telephone to the Soo headquarters any minute an enemy plane was sighted.

Col. Norman M. Nelson. commanding officer, led us into the control room where uniformed WACs were on duty to receive telephone messages and to place benzine, being extremely careful of signal flags upon a large flat re-

> On his desk was a small globe. Colonel Nelson picked it up. He pointed to Sault Ste. Marie.

"Here is the most direct route from Europe to the United States," he said. "If an enemy wanted to having trouble with our overstuffed attack us, the St. Mary's canal locks at the Soo would offer a codor. There is no basement under the house; the floor is 2½ feet from the house; the floor is 2½ feet from the Midwest—Detroit, Chicago, elsewhere-would be next. and Yes, the Soo is our front line de-

Remembering the city's ring of concrete floor in the basement is military airports, the concrete strips of which are wide as superboulevards, we nodded in understanding.

> It was Jacques Marquette, the Catholic explorer-priest, who established the first settlement of Europeans in Michigan at Sault Ste. Marie.

Thus you have the ever-astonishing fact that this northern city antedates all but two cities on the North American continent and the entirety of Michigan.

Father Marquette founded a church for 2,000 Indians who lived along the loud rapids of the river here. He had left France in 1666 at the age of 29. Marquette's ar rival had been preceded by Etienne Brule, the first man to reach the northern lakes, who visited the

rapids in 1612. When the Jesuit priests first gazed upon this spot, they are said to have exclaimed "Sault" (falls) and later "Sainte Mary," believing that only the Blessed Virgin could possibly approach anything so

To the north lies the Canadian Laurentians, for the most part a vast wilderness known to Canadians as the "bush."

The abundance of the whitefish in St. Mary's river, together with the availability of maple sugar at Sugar Island, had provided a paradise for the Chippewas. To the west was Gitche Gumee, Lake Superior, the greatest body of fresh water in the world with a depth of 1,300 feet, 300 feet below sea level! This was the land of Hiawatha, made famous by Longfellow and first recorded by Henry Rowe Schoolcraft in his "Algic Researches."

The story of Sault Ste. Marie is the tale of an American northern frontier which saw in 1844, just a century ago, the sinking of the first shaft for copper at Copper Harbor in the Keweenaw penin-

The copper boom led to building of the Soo canal which was finished in 1855. Before the canal's completion, 15 large boats totaling 3,000 tons had been hauled over the portage (now Portage Soo merchants opposed

### Lack of Machinery Calls for Sharing

#### Million of Workers Needed for '44 Harvest

With the harvest season well under way in most farming areas, the problem of getting enough labor and machinery to do the job at the right time is again present.

With little or no prospect of more large combines and labor-saving equipment for haying this season, the War Food administration is urging small grain producers to make the greatest possible use of existing machinery. Owners of combines suitable for custom work will have to help their neighbors to insure harvest of the crop. Sharing of all types of equipment will be necessary, says WFA, but the production schedules have run far behind on heavy machinery.

Custom use of large combines and the more expensive types of haying machines would be necessary even if manufacturers had completed their production schedules on time, it is pointed out, as a result of curtailed manufacture since the beginning of the war and the failure of some old machines to carry through. Production of corn pickers was reported as lagging in late spring. but there were prospects of a step-up before the harvest. Shortages of manpower for manufacturing plants and of component parts for the machines are reported as largely re-

sponsible for production delays. Emphasis is also being given to the need for keeping old machines in tip-top condition. While most farmers will have checked over their equipment before harvest time, to avoid breakdowns after the beginning of the work season, frequent check-ups during the period of operation are also essential to efficient

It is anticipated that some four million volunteer urban workers will be required to complete the harvest, 🚁 farm population is at a 30-year low and those remaining on farms need every bit of help they can get. Farm labor requirements are based on farm production goals, set at another record-breaking level for 1944

Requirements for volunteer farm labor are for two million men, 1,200,-000 boys and girls, and 800,000 women. In addition to increased use of women and part-time workers, and intensive local community recruiting drives, labor recruitments include more imported labor from Mexico. Jamaica, the Bahamas and other nearby countries, and a number of available prisoners of war.

Processing plants handling large quantities of the food produced by America's farmers are also in need of some 750,000 part-time workers before the end of the year.

After reaching a record high figure Warner at Unionville. in 1943, farm cash income has continued to show expansion in 1944, according to the Alexander Hamilton institute. Although government benefit payments during the first quarter dropped to \$224,000,000 this
