New Fire Truck For Cass City Arrived Thursday

Fire Laddies Respond to False Alarm and Find Long Awaited Equipment

As a rule a fire department does not enjoy an alarm because the summons may mean either loss of property or life, and sometimes both, and fire department officials frown on false alarms. There are exceptions to all rules, it is said. At any rate, the false alarm that was sounded around five o'clock last Thursday afternoon brought smiles of satisfaction to the faces of Cass City fire laddies, for when they arrived at the department headquarters, they found a brand new fire truck for which the order had been placed last October and which has been anxiously awaited for several months. Delay in securing certain parts for the pumping machinery by the manufacturers accounts for the late delivery.

A 300-gallon "booster tank" furnishes water the moment the department arrives at a fire scene. The truck also carries two 200-ft. reels of one-inch high pressure hose and two fog nozzles. The pump has a capacity of 500 gallons of water a minute. The department gave the new equipment a "try out" Friday afternoon and members were well pleased with the results.

The fire truck, according to the statement of a department official, cannot leave the village limits until such time as a duplicate equipment is installed which will provide adequate fire protection during the period the present fire truck is out of town. Otherwise, he said, local insurance rates would be affected.

GET READY FOR THE Tin Can Pickup Week of April 16 to 21

The favorable outlook of the war in Europe does not mean that we on the home front can "lie down" on our war efforts!

Tin, the war's No. 2 critical material will be needed just as badly after the war with Germany ends as before due to the fact that the Japanese now control over 70% of the world's tin mines.

Tuscola county needs at least 12 tons of cans to fill a railroad car and the week of April 16 to 21 has been set for the effort. Please have your cans ready.

In rural areas, take the cans to your schoolhouse. Each village has a chairman who will take care of the collection in their town. The Tuscola County Road Commission trucks will pick up the cans and bring them to Caro for shipment.

Prepare cans by removing paper labels, washing, folding in the tops and bottoms and flatten by stepping on them.

THIS IS A VITAL WAR SERVICE! DO YOUR PART!
WE'RE DEPENDING ON YOU—AND YOU—AND YOU!!!

Hard to believe...
but true!

Edward P. Weston, the famous pedestrian, at the age of 24, walked from Boston to Washington in 10 days. In his 72nd year, he walked from Coast to Coast and back, doing as much as 72 miles in a day. Among many other feats in his long career, he walked 100 miles in 20 hours and 38 minutes. Mr. Weston enjoyed being a pedestrian. Many car owners are becoming pedestrians and they're not enjoying it. Their cars are wearing out! If you don't want to join them, give your car the care it needs to keep it running right, running longer, and running farther on every gallon of gasoline. Right now it's time for your Standard Oil Dealer's 10 Star Spring Tune-up.

Novel Cement

Remarkable performance is reported for a new cement that sticks layers of material together—rubber to metal, rubber to wood, metal to metal, plastic to plastic, and so on in practically endless combination. The cement is sprayed or brushed on—it may be applied as tape between metal pieces—and "welded" with mild squeezing and heating. The bond is said to be excellent from far below zero to a temperature above that of boiling water, and highly resistant to corrosion.

Window Dressing

As far as possible all windows in a house should have a similar appearance from the outside; straight window hangings attract less attention than do tiebacks. If the draperies hang straight, sheer curtains used with them also should hang straight.

Delicious Flavoring

The sirup left from pickled fruits, such as peaches or pears, makes a delicious flavoring for roast meats. Try pouring such juices, diluted with an equal amount of water, over a roast veal or beef.

City Bowling League.

With three more weeks to go before the bowling schedule is completed, it would be hard to determine the probable winning team at this time. On paper, the Starmann and Reid squads appear to have the better chance, yet with nine games left to bowl, there are still a few other teams that could and may change the present situation.

The Parsch team is moving along at a nice clip and may cause the leaders plenty of trouble. Coleman, who is substituting as anchorman in the absence of Private "Ike," has been doing a lot of timber tumbling since assuming his place on the Parsch team and their exceptional bowling has again won for them the weekly double prizes. Just a couple of bowlers hit the maples well enough during the week to make the honorable mention list and one of these was Dean Robinson with 569. Dean made the grade last week also with a pin count of 552. The other pin mauler chopped and topped over 603 pins. His front name is Guy but sometimes called "Grandpappy." Landon scored the high game of the week with a 236 count and was followed by Knoblet's 214, Coleman's 204, Robinson's 203, Kirtson's 202 and Retherford's 200. McClorey and Landon shared the weekly individual prizes. Dean Robinson won the alley's open bowling prize for the week on a 211 game.

Merchants' League.

In the Merchants' league, the Sam's Tavern five and Schwaderer's Construction team were able to win but one out of their three-game series and are still one game apart. The Bankers' squad appears to be the only team that threatens the two leaders at this point and with two more weeks to go before their schedule is finished, they can still make plenty of trouble. Last week this same Bankers' team took two out of three from Schwaderers, winning one game by only two pins.

New Tank Destroyer M-18 Is 'Hottest' in Action

LIMA, OHIO.—The army's new tank destroyer—the M-18—is regarded by the army ordnance department officials here as "the hottest thing in today's armored warfare."

Capt. Charles R. Adkins, Columbus Grove, Ohio, an army automotive expert of 16 years' experience, who saw the M-18 in operation in France, said the vehicle "is a streamlined speed demon that put a streak of lightning in our drive across France into Germany."

The M-18, he said, has a mechanical system which permits complete installation of a new engine in less than two hours.

Captain Adkins asserted that the tank destroyer's 10 bogey wheels operate independently, "thus one broken wheel will not incapacitate the vehicle, which mounts a 76-mm. cannon."

Boulder Dam

Congress allotted \$70,000,000 for Boulder dam and reservoir, \$38,200,000 for the power development, \$38,500,000 for the all-American canal and \$17,700,000 for interest while work was progressing. The contract for the dam and power plant was let to the Six Companies, Inc. of San Francisco for \$48,890,895.

Once upon a time Caro had in its street lighting system a few lamps that were an interesting variation on the familiar street light of today...

Experts reasoned that since horses had eyes, and that newcomer on the road—the automobile—had headlights, it was unnecessary to extend street lights out over the road. So they turned them in over the sidewalk! Then came the age of speed—and the end of the picturesque sidewalk lamp.

Today Caro's street lighting, rebuilt completely by Detroit Edison in 1939, is widely known for its modern, scientific excellence. Directional luminaires aim the light down where it will do the most good, making the streets safe and friendly.

How is the street lighting in YOUR community? Our engineers will be glad to discuss a postwar plan now.

JUNIOR CLASS PRESENTS CAMPUS QUARANTINE

Imagine a girls' sorority house on the campus of a well known university. It is Saturday night and the girls are ready to go out for the evening. Some are wishing that they could stay in, when suddenly one of the girls is taken ill. A doctor is called in who says that it is chicken-pox and quarantines the house for two weeks. When one knows that several of the boys who have been working in the house are quarantined also, one can readily realize the many screamingly funny complications and mix-ups that follow. This is the basic plot of "Campus Quarantine," the whirlwind comedy to be presented by the junior class on April 5 and 6 at eight o'clock in the high school auditorium. The local cast have been working hard in order to give a performance that will rival the professional stage production. They are enthusiastic over their parts and the play. The cast includes: Gloria Smith, a Kanna Jamma sorority girl, Janice McMahon. Mrs. Smith, her aunt and house mother of the sorority, JoAnn Bigelow. Beryl Shepherd, who causes all the trouble, Isabel Martin. Edythe Rhodes, another sorority girl, Dorothy Loomis. Deborah Mercer, who tries to have a romance, Marjorie Kettlewell. Lela Dunn, a nurse, Clara Field. Dr. Atwell, meek and mild, Grant Glasie. Gordon Dunn, who loves to manage things, Bill Benkelman. Ronald Steele, his pal, Bob Foy. Elliott Maxim, who has a flair for theatricals, Joe Jones. Finlay Curruthers, his roommate, John Sommers. Howard Ross, from a rival school, Paul Jones. Sorority girls, Margaret McCarron, Shirley Damm and Louella Hartley.

Scorch Pan

When you scorch a pan, try sprinkling dry baking soda over the scorch, letting it stand for a while. You will be surprised at how much more easily it can be removed.

Michigan Mirror

Despite any rumors to the contrary, Michigan farmers aren't getting rich as a result of wartime prices.

Here's the evidence, straight from the Michigan State Farm Bureau:

A survey of the bureau membership has disclosed that the gross income of farmers in 1943 averaged \$4,005 with an average net income of only \$1,422. Nationally, the net farm income of 1942 was \$1,320. Half of the farm-operator families in 1941 received less than \$760 net cash income from all sources, including net receipts from operation of the farm, earnings from employment off the farm, rents, pensions and other income.

In fact, only in recent war-time years has the income of the American farmer approached pre-war (1910-14) parity with other workers. For years the farmer has been using up accumulated reserves; now he must replace these at inflated war-time prices—a source of further irritation to a man who has never known an eight-hour day, time-and-a-half additional compensation beyond 40 hours, or double pay for Sundays.

Because the farmer owns both the land and the tools with which he produces, he is a capitalist and hence on the other side of the fence from the industrial laborer.

The Michigan survey disclosed that the average Michigan farmer worked 13.3 hours every week during the summer season, and 9.8 hours on weekdays during the winter. Nearly 90 per cent of all Michigan bureau farmers own their own homes; the average farm is 150 acres; the average family has lived on their own farm 41.5 years.

Here is a population group in Michigan, outnumbered by city dwellers nearly two to one, which is working long hours, under extreme handicaps due to lack of labor and limited machinery, and still receiving only a modest earning.

We wonder how high food prices would rise in cities if the farmer adopted the same pressure techniques of organized labor and went out on a strike for increased earnings, overtime compensation after 40 hours and other industrial benefits.

The farmer, owning his own machinery of production, doesn't do this.

More and more, he is studying his problems through farm organizations and is joining farmer-d-

ricated producer cooperatives as one effective way to raise his income and his standards of living.

Is the present \$50 million fund adequate to meet postwar needs of the State of Michigan? New York state legislature adjourned last week after tagging \$80 more millions for the state's postwar building projects. Funds previously saved totaled approximately \$150 millions, making a new total of more than \$230 millions.

The population of Michigan in 1940 was 5,256,106, of which 3,454,867 people lived in urban areas. New York state's population was 13,479,142, of which 11,165,893 were in cities. These figures are significant.

On the basis of New York's post-war fund and comparative populations, Michigan should increase its state post-war fund from \$50 to \$100 millions.

Hospitals and similar institutions were important consumers but most of the remaining 70 per cent were distributed through retail outlets, about half being consumed on the premises.

Quinine Species

Quinine is obtained from the bark of various trees of the genus Cinchona. Thirty to forty species are known from the mountains of northwestern South America from Bolivia through Peru, Ecuador and Colombia to Venezuela, where they grow scattered in the forests above 2,000 or 2,500 feet to altitudes approaching 10,000 feet near the equator. One species extends northward to Costa Rica.

Map Garden

The gardener who makes a plan of the garden on paper in the winter, is ready to make fast work of the actual planting when the ground is ready for seed to be sown. The plan may be a detailed map of the garden drawn to scale, or it may be merely a list of the crops that are to be grown, the number of feet in a row of each one, and the probable planting date for each.

Fuel Wood

The average farm family uses about 15 cords of fuel wood every year. Use the cull trees and the poorer species.

CHANGE OF CLIMATE

There once was a farmer who lived right smack on the Russian-Polish border. He worried over it for years.

"I'm a man without a country," he would wail aloud. "I don't know where I live."

Eventually, he paid a surveyor to size up the situation. "My friend," the surveyor stated at length, "you live just inside Poland."

"Thank God!" the newly made Pole cried. "No more of those horrible Russian winters."

OUT COLD!

She—Did you get hurt badly while you were on the team?
He—No; it was when the team was on me!

Tough Job

Myron—What does your uncle do for a living?
Byron—He's a tank tester.
Myron—What's that?
Byron—They run tanks over him, and if the treads don't break, they're okay.

Summer Furs

City Boy—I never could understand why women wear furs in the summer.
Farm Boy—Kindheartedness, I guess, it's the time of year when the animals themselves don't need 'em.

Looking Ahead

School Boy—What business do you expect to take up when you finish school?
New Boy—Well, it looks as if I'd have to take up land, a shovelful at a time!

Never Fails

Boy (in store)—Do you have anything that will wake me early in the morning?
Clerk—Yes, we have, but I'm sure his mother would refuse to part with him.

Down on the Farm

Hi—That certainly was a sure-footed horse Mr. Crumm bought last week.
Si—How did you find out so soon?
Hi—He kicked me in the same place three times!

In the Navy

First Gob—What would be the first thing you'd do if you fell overboard?
Second—I don't know. What would you do first?
First Gob—Land in water!

Tight Fit

Mr. Newlwyed—This shirt is so tight I can hardly breathe.
Mrs. Ditto—The shirt's all right. You've just got your head through the buttonhole.

NOTHING ON THE BALL

Nit—Why can't the Yankees play poker as well as baseball?
Wit—Easy. Because all the "cards" are in St. Louis!

Black Market

Driver—What's the charge for this battery?
Mechanic—Six and a half volts.
Driver—Here's a buck. Slip in an extra volt and don't tell anybody.

Distant Enchantment

Bessie—Don't you think that young widow is rather good looking?
Tessie—In a way.
Bessie—What kind of a way?
Tessie—Away off!

Do or Dye

Myron—Your girl is a decided blonde, isn't she?
Byron—Yes, but she just decided last week.

Correct!

Lecturer (showing bird pictures)—And now where do you think this strange-looking bird comes from?
Voice in the back—From an egg!

Fun in the Navy

Nit—What's the difference between a ghost and a lame sailor?
Wit—Easy! One's a hobgoblin and the other is a gob hobblin'.

Try the Weather!

Tom—Have you any children?
Dick—No. Why?
Tom—That's too bad. I was going to ask you how they were.

School Daze

Teacher—Who was the first man to fly over the North Pole?
Smarty—Santa Claus!

Modern Millinery

Nell—Do you like my new hat?
Belle—Shall I say "yes" or tell the truth?

Forget It!

Bill—Have you a good memory?
Joe—Sure, I always remember faces I never saw before!

Letters from Men in the Service

Pfc. R. H. Lapp, writing his parents, Mr. and Mrs. R. T. Lapp, of Cass City, says:

"I'm sitting in a German house at the present time, by a nice warm fire, writing this with German ink on German paper—pretty good, eh? We are in what's left of a town at the present moment; wish we could stay. I could stand to sleep on a nice mattress again and don't think we don't every chance we get, shoes and all."

"It was in the Stars and Stripes, our army paper, so don't see why it won't be ok to tell you. Our outfit was one of the first to reach the Rhine river, capturing many towns and prisoners along the way. I went through it all ok but now have an infected hand from a cut between two fingers. Don't know how I got it. Just one day I took off my glove and there it was. You don't think of a lot of things as they happen. The swelling is slowly going down now and in a few days I ought to be as good as new. My shoulder is still raw but isn't too bad either. Doesn't smell very good, though."

"Here's a 200,000,000 mark note for a souvenir. Boy, if this stuff was only good I'd be a millionaire. A mark was worth a dime in our money so figure it out. I found some of this stuff a few days ago."

Mrs. C. K. Roblin of Greenleaf has received the following letter from Sgt. Malcolm MacCallum, son of Mrs. Neil MacCallum, at Old Greenleaf. The letter was written Mar. 6 in the Philippines.

"I was very happy to receive the fruit cake you sent me from the church. It arrived all ok and was very good. A couple of my buddies and I had it one night with a cup of tea on the boat along about midnight and it really was nice. I received it the last week in February, but it didn't lay around here long. It probably would have reached me sooner but we moved from New Guinea and landed in the Philippines on S day and we spent about six weeks at sea before landing here. I am still getting Christmas boxes."

"The weather here is very hot but much better than it was in New Guinea."

"I want to thank the church very much for sending me such a lovely cake for that is really a treat over here as those rations get hard to swallow after you eat them for so long."

"How are you and Mr. Roblin this winter? Wash Machine Charlie, as we call him, comes over quite often during the night and drops a few 'eggs'."

Well, Mrs. Roblin, I don't have much time to write and there is so little we can say, but I did want to write and thank you and the church for the cake. I often think of everyone back there."

From their son, Julius Gurdon, B M 2-c, Mr. and Mrs. Charles Gurdon received the following letter:

"No doubt you have worried about me for the last couple of months. I can tell you now where I am."

"Leaving Hawaii we went to the Marshall Islands, then to another little place. After that I was in the invasion of Iwo Jima. I guess you have heard plenty of that little island. Well, it was plenty close to Japan and we didn't exactly like the idea of going there. We first got the news aboard ship. Everything turned out OK and we are now safe on another island far off from Iwo."

"I guess it was a lot tougher on the beach when the Marines got on land, but that doesn't mean we had it easy as there were around eight hundred pill-boxes in the area the LCS's had to cover."

"There really isn't much more to write now so I'll close and please don't worry about me."

Cpl. Arthur P. Dewey, writing his parents, Mr. and Mrs. Louis Dewey, from Holland regarding his meeting his brother, Wayne, said:

"I heard Wayne's outfit was in our vicinity so I started out to find him if I could. It took me two days but I succeeded. I found him the second day about five o'clock and his mess sergeant gave us our supper. I had another fellow with me who has a very good buddy in the same division but he didn't find him. Wayne's first sergeant let him go and stay all night with us and I took him back the next day in the jeep. He is only around 20 miles from us here. Am going over there tomorrow if we aren't put on the alert to move out. I sure hope we don't. He was with me almost two days."

"He is driving a 6x6 or GMC truck. I guess he hauls everything. They have it pretty easy in their outfit, never too close to the front lines like we are. I'd sure like to be in his artillery outfit. I met several of his buddies. They are very good. Everything is kept so secret now it's sure hard to find anybody. I surely was lucky even though he is so close to us. Wayne seems not to mind it over here too much although he is like me, he'd rather go home soon. He was telling me

all about his outfit taking Metz and all the big forts the Germans had. It surely was a tough place to crack."

"Wayne hasn't seen anyone he knew before I met him and boy, he surely was one tickled boy! I hope we see one another more often now we are in the same army. He said before I left him that mother will surely be happy that we met." He saw Clayton Rondo here in my company I go with. They used to play ball together and at Motor Maintenance he saw 'Merit' McAlpine. They had a great chat."

Animo Acid

Arginine, an amino acid, has been found important in the production of sperm cells. A diet deficient in it resulted in a marked decline in the production of these cells, but when it was replaced in the diet, the cells were again produced. The effect of arginine on sterility is now being studied.

This war victim family believes that "the only good Nazi is a dead Nazi." From such a dead Nazi, "Mom" obtained the overcoat which covers her and the baby. "Junior" got the shirt, his only garment. "Pop" got shoes to smarten up his ragged rig, and little "Tony" got a strip of canvas for a makeshift toga. Millions of others in war-ravaged lands need all the serviceable used clothing, shoes and bedding you can give to the United National Clothing Collection.
