

There's True Economy in Improved Facilities

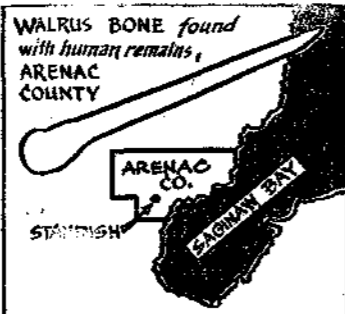

On farms, in small towns and big cities, improved methods of service benefit everybody without increasing living costs.

We will continue to add every improvement that will bring added beauty, dignity and comfort to our service. It will mean no advance in price.

"Women know what they want"

"One thing a dealer in electric appliances finds out early—women know what they want. They come into the shop with their minds pretty well made up—that's why they show so much interest in the electric water heater. They know they want convenience—which means having hot water always on tap. They know they want hot water all around the clock—washing, baths, cooking, dishwashing, scrubbing, laundry and many other household needs. They know they want their families to have the best. That's why they want electric water heating—dependable and trouble-free . . . completely clean. I'm always happy to tell them about electric water heaters and about Edison's special low rate for water heaters that reduces the cost to only a few cents a day . . . I'll be still happier when I'll have enough heaters to fill all orders. We don't have enough now to go around, but we do get a few from time to time and are taking care of orders just as fast as we can."

LARGE FAMILIES An electric water heater of large capacity serves the multitude needs of the large, active family.

SMALL FAMILIES The economy of a smaller electric water heater fits the limited needs of the small family.

WORKING FAMILIES With everyone at work all day, the dependability of the electric water heater is appreciated.

Water heaters are not generally available for sale now. A few are being manufactured and distributed. It will be to your advantage to have your name on your electrical dealer's list, so that you will be able to get one at the earliest possible time.

The DETROIT EDISON Co. See your dealer or your plumber for information. He will be glad to help you decide upon the model that will fit your needs.

Farmers' Organizations!

Before joining any organization, farmers should consider the following ten prerequisites: Need, Membership, Leadership, Finances, Control, Scope, Objectives, Program, Performance, Organization.

Today we discuss CONTROL. In order to grow, an organization must render a definite service and encourage local control. It is important that the control of the organization be vested in the membership and not in some individual or group of individuals outside of the state. Distant control and concentration of power always lead to dissatisfaction and loss of membership. FARMER CO-OPERATIVES provide for local control by the membership. Support your local CO-OPERATIVE.
