July 30, 1945. I had called many times when he arrived at the 38th General hospital and I can assure you that all possible was done for him, and that he did not seem to suffer so very much, and that all was done to relieve any unnecessary pain. ## Esther Molnar Is An Autumn Bride

From Deford correspondent.

Miss Esther Molnar of Detroit, daughter of Mr. and Mrs. Joseph Molnar, Sr., of Deford, was united in marriage Oct. 16 at 2 p. m., to Mr. Rudolph Palmer, son of Mr. and Mrs. Joseph Palmer, of Detroit. The ceremony was solemnized by Rev. Joseph A. McGiffin at the home of the bride's parents, before a lovely array of mixed flowers which consisted of Picardy gladioli, chrysanthemums and daisies.

The bride wore a beige suit with brown accessories and a corsage of gardenias and lilies-of-the-valley.

Viola Gammon of Detroit was maid of honor and Mary Molnar, sister of the bride, was bridesmaid. The best man was Reginald Fell of Detroit and Louis Molnar, brother of the bride, was an attendant.

The bride's mother wore a black crepe dress with a corsage of red roses.

A wedding dinner was served to members of the family and close friends at 5 p. m. A lovely three-tier wedding cake with miniature bride and groom adorned the center of the table.

## Veterans' Reserve Fund Is Issue

Will Confront the State  
Legislature in Special  
Session Early in 1946

How Michigan should spend its \$50,000,000 veterans' reserve fund, already \$1,000,000 richer because of accumulated interest, is one of several issues which will confront the State Legislature in special session early in 1946.

Michigan's 629,000 veterans, of whom approximately 500,000 are still in the service, are interested chiefly in the decision.

Other legislative problems include these: Revision of the state's \$20,000,000 building program. Rising labor and material costs have already exceeded the appropriation.

Veterans' education and housing at state educational institutions such as the University of Michigan and Michigan State College. No housing is available for veterans and their wives (plus children for some) at college dormitories.

Construction of 15 harbors of refuge for small boats on the Great Lakes, a benefit to the tourist industry.

Revision of the state juvenile institute commission and possible reforms and improvements at the Boys' Vocational school, Lansing.

The veterans' multiple problems are not easy to solve. In the first place, there are five times more Michigan veterans today than 25 years ago, after World War I.

To divide \$51,000,000 equally among the 629,000 veterans—a number likely to grow larger before the sum is expended—would put less than \$80 in the hands of each veteran. The average bonus for World War I veterans was \$210, computed individually at the rate of \$15 per month of service. The federal mustering out pay varies from \$100 to \$300, well eclipsing an \$80 Michigan payment.

To equal the state bonus of the last war, the legislature would have to appropriate \$350,000,000 more for the veterans' reserve fund. This isn't likely to happen, other needs being what they are.

The first state bonus cost taxpayer's \$53,454,668.49, of which the veterans received \$31,395,006. Turn to Michigan Mirror, page 7.

## 4-H Leaders' Meet Set for Monday

Monday, Oct. 22, the Tuscola County 4-H leaders are having a get-together in Caro. The meeting is scheduled to start at 3:30 at the court house. Supper will be a pheasant feed at the Methodist church at 6:30. Differing from past years, leaders of both summer and winter 4-H clubs are attending. Verne Freeman and Mrs. Corine White, assistant state club leaders, will be present and help with the training.

The purpose of such a meeting is for 4-H leaders to get acquainted and acquire new ideas on leading clubs. The success of any 4-H program in the community depends upon the local leader who puts in a good many payless hours. Thus, the leaders can gain valuable training by exchanging ideas.

The meeting this year will be highlighted by discussion of a new type of 4-H program. This new program differs from the old, in that any given community could set up a year's activity schedule, centering around both winter and summer clubs and their leaders. Several clubs might join in certain activities to further promote 4-H in that community.

## Church Council Officers Are Elected

New Inter-church Society  
Is Composed of Laity  
and Local Pastors

At a meeting held in the Methodist church last April of the resident Protestant pastors and duly elected representatives of the respective churches, plans were projected for the formation of an inter-church organization composed of laity as well as the clergy in order to make more effective certain co-operative efforts of the churches in the community.

A committee was delegated the responsibility of drafting a constitution to be submitted to the churches for approval or recommended changes, the organization to become effective when a majority of churches ratified the constitution and elected its representatives.

The first meeting of the new organization was held in the Presbyterian church on Tuesday night at which time the following persons were elected to office: President, Rev. Melvin R. Vender; vice president, Harold Ostley; secretary, Mrs. Hugh Munro; treasurer, Frank Weatherhead; and the Rev. S. P. Kirm, a member at large, of the executive committee. The committee chairmen are to be named early next week by the president for confirmation by the executive committee.

The churches which ultimately voted to participate in the organization are the Evangelical, the Methodist, and the Presbyterian. The following persons are the duly elected lay representatives of the respective churches, four from each, who with the pastors make up the membership of the functioning body: Frank Weatherhead, Mrs. Homer Hower, Edward Helwig and Wilbur Silvernail; Mr. and Mrs. Audley Kinnaird, Harold Ostley, and Miss Velma Muntz; Mrs. Hugh Munro, Arthur Holmberg, Dr. Ivan MacRae and Miss Janice McMahon. These lay leaders represent the official governing body of each church, the women of the church, the church school and the youth.

## Save Water-stained Beans Is Request

They Can Be Used if They  
Are Dried at Once, Says  
M. S. C. Specialist

Save your water-stained beans. That's the advice issued by farm crops specialist at Michigan State college.

H. R. Pettigrove, college crops specialist, points out that continuous rains have caused many beans to become slightly discolored from the pod and soil. He says that such beans can be used if they are dried at once and serious damage does not occur.

The recommended method of drying the beans is to stake them or place them in field stacks. This will dry the beans quickly and reduce the amount of further damage.

Mr. Pettigrove finds that the bean crop at this time is carrying from 22 to 28 percent moisture or even higher in some instances. Such beans, even though they can be threshed, will not keep in storage.

As the capacity of Michigan elevators to handle high moisture beans is very limited, farmers are asked not to thresh them unless the elevator operator has agreed to take the beans, or the farmer is able to dry them on the farm. Also it's well to remember that the elevator may charge five cents for each percent of moisture above 18 percent.

Field stacking of beans in stacks not over three to three and a half feet in diameter will allow the beans to dry quickly and will prevent additional damage.

Consult your local elevator manager, county agricultural agent or agricultural teacher regarding field stacking is the advice of M. S. C. crop specialists.

# HOUSEHOLD MEMOS... by Lynn Chambers

When Company Comes  
High Degree of Ingenuity  
Is Essential to Success

A low-point roast made with frankfurters and bread stuffing can be nice enough to serve for company. Fried apple rings make a pretty and delicious garnish for this crown roast.

Have you ever in a moment of social graciousness invited someone to drop in for dinner and then discovered that the ration books cannot offer much help? This happens to all of us these days, but there are ways and means to skirt around this situation.

Did you know that a roast can be made from a few frankfurters and that it can taste as good and look as luscious as a prewar steak? Or, if the sugar bowl is bare, syrup can sweeten the cake and syrup can make an icing that stands in frothy peaks?

Don't let strict rationing keep you from being generous about inviting people over. It's more necessary now than ever when travel is curbed and we must seek "homey" entertainment.

And remember, too, there are no curbs on the niceties of serving. Good linens, shining silverware, sparkling glassware and attractive china will dress a table beautifully. A bowl of garden-fresh flowers or an arrangement of your own orchard's fruits can add personality touches even to simple dinners.

Now, here's the first dinner suggestion:

Melon Ball Fruit Cup  
Frankfurter Crown Roast  
Fried Apple Rings Broccoli  
Orange Rolls

Lettuce Salad French Dressing  
Peanut Brittle Sugarless Cake  
Iced Tea or Coffee

This frankfurter roast is a satisfying but low-point meat dish that is guaranteed to please your guests. The "franks" are kept moist and juicy by brushing with salad oil, and the meat, itself, is extended by the use of a spicy, well-seasoned bread dressing.

**Frankfurter Crown Roast.**  
(Serves 6)  
3 tablespoons salad oil  
1/2 cup chopped onions  
3 cups soft bread crumbs  
2 cups diced carrots  
1 1/2 teaspoons salt  
1/2 teaspoon pepper  
1/4 teaspoon marjoram  
1/4 cup chopped parsley  
2 eggs  
6 frankfurters

Heat oil. Add onions and simmer until soft. Do not brown. Combine bread crumbs, carrots, salt, pepper, marjoram and parsley. Add the slightly beaten eggs, the onions and the oil in which the onions were cooked. Mix well. Turn into the center of an oiled shallow pan and shape into a round loaf about 4 inches in diameter.

Cut frankfurters in half, the split lengthwise. Arrange, skin side out, around carrot loaf, overlapping them slightly. Tie a string around

**Lynn Says**  
If Recipe Doesn't Fit the Family: If you run across recipes that are too large for the family, let the following hints be your guide:  
One-fourth to one-third pound of lean meat is a good proportion to use for one serving. When buying a roast, plan to serve it for several meals.  
One-half to two-thirds of a cup of vegetables are good guides to vegetable serving.  
Don't try to divide eggs in small recipes. Too much egg is better than not enough and more than the recipe calls for will have little effect on the result, but will add more nourishment.  
When making half a muffin recipe, fill empty tins with water to protect the cups.  
Cakes and cookie recipes should not be divided. Both keep well for several days to a week, and a larger quantity can be made safely.

the frankfurter crown and secure with a few toothpicks above and below string. Brush frankfurters with oil. Bake, uncovered, in a moderate (375-degree) oven for 30 to 35 minutes. Remove from pan, using pancake turner or wide spatula, and place on a hot platter. Garnish with fried apple rings.

This sugarless cake, though made with syrup, is light, moist and fine-textured. The important point to keep in mind is to add the syrup to the creamed shortening very gradually. Pour it from a bottle into a measuring cup and add a little at a time, beating until the mixture is thoroughly blended after each addition. When syrup is properly blended in this way, a smooth, light batter results.

**\*Peanut Brittle Sugarless Cake.**  
(Makes 2 8-inch layers)  
2 1/2 cups cake flour  
2 1/2 teaspoons baking powder  
1/4 teaspoon salt  
1/4 cup shortening  
1 cup light, bottled syrup  
2 eggs  
1/2 cup milk  
1 1/2 teaspoons vanilla extract  
1/2 cup crushed or chopped peanut brittle

Sift the flour. Measure and sift again with baking powder and salt. Cream shortening. Add syrup gradually, beating after each addition. Add well-beaten eggs and beat until thoroughly blended. Add sifted dry ingredients with the milk, beating after each addition. Add vanilla and the crushed or chopped peanut brittle. Turn batter into two lightly greased tins. Bake in a moderately hot (375-degree) oven for 25 to 30 minutes.

**Syrup Frosting.**  
1/4 teaspoon salt  
2 egg whites  
1 cup light, bottled syrup  
1/4 teaspoon lemon extract  
1/4 teaspoon almond extract  
1/2 cup crushed or chopped peanut brittle

Add salt to egg whites and beat with rotary beater until stiff. Add syrup gradually, beating after each addition. Continue beating until mixture stands in peaks. Add extracts. Put between layers and on top and sides of cake. Decorate top of cake with crushed peanut brittle.

Here is an alternate menu plan for making wartime entertaining easier for you.

Chilled Tomato Juice  
Individual Beef Loaves  
Creamed Potatoes  
Green Beans Garnished with Pimiento  
Molded Cottage Cheese and Cucumber Salad  
Homemade Wheat Bread  
Lemon Upside-Down Cake  
Beverage

Crushed peanut brittle and syrup provide all the sweetening necessary for this lovely glamour cake. Sugarless frosting also made without sugar stands in high, beautiful peaks and stays soft.

These individual beef loaves are extended with bread crumbs but none of the precious meat flavor need be sacrificed when a seasoning of rich beef broth is used to highlight the meaty flavor.

**Individual Beef Loaves.**  
(Serves 6)  
1 1/2 pounds ground beef  
1 tablespoon beef broth  
2 tablespoons chopped onion  
1 1/4 teaspoons salt  
1/4 teaspoon pepper  
1 1/4 cups dry bread crumbs  
1 1/2 cups milk  
1 egg  
Lightly mix all ingredients together. Avoid over-mixing. Shape into individual loaves. Set aside in baking pan and bake in a moderate (375-degree) oven for 40 minutes.

# Farmers' Organizations!

Before joining any organization, farmers should consider the following ten prerequisites: Need, Membership, Leadership, Finances, Control, Scope, Objectives, Program, Performance, Organization.

Today we discuss SCOPE.

Small local organizations have merit in connection with local problems. Agricultural problems, however, are national in scope, and if its farmer membership is to be adequately served, the organization must be state and national in size. Industry and labor are well organized; consequently a farmers' organization that presumes to serve agriculture must have a large membership.

FARMER CO-OPERATIVES are just such organizations. They are strong locally, as well as state and national in scope.

Support your local CO-OPERATIVE.

Howard Wooley continues his onslaught on the maples and his rapid rise in the past two weeks now finds this bowler in second place with a neat average of 176. Mac McCullough is also on the upgrade and his last offering of 560 pins boosted him into third position. Wes Downing, our Gagetown member, came up with his best effort of the season and his 231 game was high for the week and his three game totals gave him both ends of the individual prizes.

Ludlow's team rolled the highest over average totals for three games to win the grand weekly prize, while the Juhasz Five accounted for the best single team game over average to take the other team prize. The Gross and Knoblet teams made the best showing for the week and each team won all of their three games. They were in 12th and 13th positions last week, while now they occupy third and fourth spots. The Gross squad hung up the season's highest team totals of 2492 pins. Murray DuFrain, a newcomer to our fair city and a member of the Gross Five, has been doing some real bowling since joining the league and he now carries an average of 159 and getting better each week. He appears destined to be-

come a team captain once the new year puts in an appearance, and he is left handed. Four of the bowlers hit the honor list by rolling better than 550. Wooley 565, McCullough 560, Landon 555, DuFrain 552. Games of 200 or better were rolled by Downing 231, McCullough 229, Wooley 226, DuFrain 212, Landon 212, Hoffman 211, Croft 205, Mann 203.

The small size of the summer valencias is the result of a very large yield of fruit on the trees without the usual heavy drop of fruit, which is nature's way of thinning overladen trees. The few large oranges are going overseas. The army also is purchasing small oranges for use of the armed forces in this country. The little oranges are as sweet and juicy, and the juice rates as high in vitamin content as that from large oranges.

## ADVANTAGES OF THE ELECTRIC RANGE

Clean, controlled heat expresses quickly the advantages of an electric range. The surface burners have several heat units from "simmer" to "high" that provide just the right heat for whatever dish is being cooked. The heat comes directly to the bottom of the utensil and as clean as sunlight. In the oven, a control regulates the heat to an exact temperature and maintains it. An electric timer can be provided to turn off the current at a pre-set time, thus letting the housewife forget all about the oven. The broiler grills meats to a perfect turn, and the deep well cooker is ideal for long, slow cooking, such as soups, cereals or stews.

Electric kitchen equipment is not generally available for sale now. Some is being manufactured and distributed. It will be to your advantage to have your name on your electrical dealer's list, so that you will be able to get it at the earliest possible time.

Food Shortage Will  
Last Another Year

Federal Bureau Reports on  
Supply Prospects.

WASHINGTON, D. C.—The bureau of agricultural economics advised civilians to expect no significant relief from food shortages within the next 12 months.

In a report on the national food situation, the bureau—which is the agriculture department's statistical agency—said such foods as meats, fats and vegetable oils, sugar, cheese, condensed and evaporated milk, poultry, eggs, canned fruit and canned vegetables would continue short in relation to demands.

In addition, rice, dry beans, apples, and processed foods using large amounts of sugar and fats and oils may become short, it said.

On the other hand, civilian supplies of fluid milk, skim milk products, canned fruit juices, many fresh vegetables and fruits, including citrus fruits, fresh fish and most grain products are expected by the bureau to be fairly plentiful.

Listed as the basic food problem of the United States in 1945 was how to distribute an over-all food output one-third greater than in 1935 to 1939 to meet an over-all civilian, military and export demand approximately one-half greater than the prewar demand.

The bureau said 1945 food production may be 3 to 4 per cent below 1944, but 33 per cent above the 1935 to 1939 average. The total production of food from livestock this year may be about 5 per cent less than last year, with most of the reduction coming during the first nine months.

Present plans indicate that the 1945 food supply will be distributed about as follows: United States civilians 77 per cent, armed forces—including relief feeding by the military—17 per cent, government purchases for lend-lease and civilian relief abroad 4 to 5 per cent, and other commercial exports 1 to 2 per cent.

Prospective food supplies for civilians indicate, the bureau said, the consumption per person will average about 5 per cent below the 1944 record rate.

Nazi 'Secret Weapons'  
Startle Navy Probers

WASHINGTON.—A navy mission sent to Germany to study Nazi technological developments was "startled" by the progress made in some fields; especially rocket and jet-propelled weapons.

The mission's chief, Commodore Henry A. Schade, said if the war had lasted another six months, the Nazis would have had "quite a few" new weapons in operation.

He declined to elaborate other than to say their major developments were in the field of rocket and jet-propelled weapons.

Such discoveries still are "top secret," he told a news conference because such things as the Nazis developed but didn't have time to use could be turned to good account by the navy against the Japs.

With a staff of about 200 technological experts, Schade was sent over to investigate and exploit German inventions for the navy's benefit.

Commodore Schade conceded the Nazis' development had far exceeded our own in the fields in which the Germans had concentrated attention for some special reason, such as the "V-weapons."

Revolutionary New Type  
Of Plow Turns the Soil

WARREN, OHIO.—A farm equipment plant is being established at Warren for manufacture of a revolutionary new type plow, a tractor and other agricultural machinery.

The company announced that mass production on the new plow, called the Rototiller, will start as soon as materials are available. The plow churns and crumbles the soil by means of curved edge tools which rapidly revolve like a paddle-wheel. It was invented in Sweden.

Vern R. Drum, vice president and general manager of the Warren City manufacturing subsidiary, said an experimental farm would be operated by the company near Warren for testing and development of new equipment.

U. S. Plans to Put Curb  
On Night Life in Berlin

BERLIN.—Military government authorities are going to curb night life in the American zone of Berlin to prevent any trend toward "promiscuity and perversion."

Currently there are 12 to 16 night clubs operating in the American zone and officials said most of them would be closed. Those permitted to remain open will be under strict supervision.

U. S. Officers Seize  
Big Cache of Watches

RED CROSS HOME NURSING

WHAT'S YOUR  
SICK-ROOM RATING?

HELPLESS HELEN—Under her willing, but unskilled hands, sheets wrinkle, food trays spill, bath water drenches the mattress and herself. Her equipment is scattered . . . she wears herself out running up and down stairs. The doctor gets little help from her . . . and the patient stays fretful and uncomfortable.

ABLE MABEL—She can make a comfortable, "stay put" bed, without disturbing the patient. She can give a good, relaxing back rub . . . and prepare attractive trays. She can keep an accurate daily chart of her husband's temperature, pulse, and respiration. She makes the doctor's skill count most.

NURSES ARE SCARCE—DOCTORS ARE BUSY!—To help you care for your own families, the American Red Cross is offering free courses in Home Nursing, taught by professional nurses. You learn the fundamentals of bedside care, and how to carry out the doctor's orders intelligently and report to him . . . by telephone, if necessary. You even learn how to improvise hospital equipment at home.

If there is no home nursing course offered at present in your community, ask your Red Cross chapter how you may help organize one.

National or Citizen	
The Nationality act of 1940 defines a national as a citizen of the United States or a person who, though not a citizen, owes permanent allegiance to the United States, such as the people who reside on Guam or in the Philippines, or other United States dependencies. These people are citizens of their respective islands, but they are United States nationals, not United States citizens. Congressional acts, on the other hand, raised the status of inhabitants of Puerto Rico and the Virgin Islands to that of citizens of the United States.	
Fish Vitamins	
Vitamins A and D are found in all varieties of fish and sea food, but vary in amount according to their fat content. Salmon, haddock, clams, crabs and oysters are all good sources of vitamin G.

He was preceded in death by a brother, Clyde Quick, of Cass City, who died in 1934 and by his sister, Mrs. Geneva Bryant, of Cleveland, Ohio, who passed away Dec. 31, 1944.

Save Juice  
Avoid loss of juice in preparing meat, poultry and fish by never soaking in water. Meat may need to be wiped off with a clean, moist cloth, and poultry or fish may need to be rinsed after cleaning, but none of these foods should be submerged in water.

Chipping Sparrow  
The chipping sparrow has been called the hairbird because of its fondness for horse hair which it uses for its nest.

Gambling kept him poor!

Canada Bill Jones was known as the cleverest three-card monte operator on the river, back in the heyday of the Mississippi floating palaces. But he stayed poor, because his passion for gambling was too great.

Marooned in a Louisiana village, Canada Bill found a faro game in a barber shop. After a few plays, his partner warned him the game was crooked. "I know it," Canada Bill replied, "but it's the only game in town."

Like Canada Bill Jones, you'll find the cards stacked against you, too, if you gamble your car against the weather. When the temperature drops suddenly, driving even a few miles without proper winter-conditioning can cause costly damage.

Right now is none too soon to prepare your car for cold weather. Your Standard Oil Dealer is trained to do the job right. Drive in now, for your Standard Oil Dealer's 10 Star Fall Tune-up.

Pvt. Raymond Gingrich of Camp Fannin, Texas, arrived in Detroit Oct. 9 and came Saturday to spend the remainder of his 21-day furlough with his parents, Mr. and Mrs. Edward Gingrich. He spent four days in Detroit with his brother, Harold.

S 2/c James H. Schneck, in a letter of Oct. 5, 1945, to his grandmother, Mrs. A. Butler, of R2, Cass City, says that this would be his last letter to her from Pearl Harbor as they were leaving the next day for Okinawa. He says in part: "It will be about a 21-day trip because we run only at 16 knots. It is going to be very rough because we haven't the two big guns and a lot of other things so the ship won't have much weight and will do a lot of tossing around."

"I can't make my rate this month but I think I will by Dec. 1. I hope to be a third class Petty Officer when I get home again. "Don't worry about me because I'm feeling swell. I hurt my shoulder carrying paint the other day but that lasted only a day. 'Doc' gave it a good workout."

In a letter, dated Sept. 21, to his sister, Miss Helene Creguer, of Grand Rapids, Pfc. Harold Creguer says in part: "My company and myself have been authorized to wear the Bronze Service Arrowhead for making the invasion of Luzon. I haven't seen the pin yet but I hear it's pretty nice."

"Yesterday I took an all-day pass and went to see Tokyo for the first time. The B 29's destroyed a lot of it. It's surely a pretty place."

"I saw the Imperial Palace too. Boy, what a mansion! It has a wide moat all around it which is full of big fish. No one is allowed to fish there so everyone feeds them and they are almost tame. There are such wide bridges and driveways over the moat. Most of the walls are built of huge stones. "You should see the people come and bow in front of the palace. They really are sincere in their belief."

"The newspapers today say that men with 60 points will start home in November. I have 64 points so if everything goes right I may spend Christmas with you! I can scarcely wait. That cold weather will be hard to take after sweating so long over here."

"May I say that prayers are said for you and the loved ones of Orton at home and that Orton is remembered and has been remembered in my prayers which are said every time I have a celebration of the Holy Communion, as is the practice and custom of the Episcopal church of which I am a clergyman."

"May our gracious Savior fill your hearts with the comfort and love of our Lord and Savior Jesus Christ in his earnest prayer. "Faithfully yours, Thos. S. Clarkson, chaplain."

## Hen Needs Auto Ride Before Laying Egg

LINTON, IND. — A reporter spied a hen in a parked car on a busy city street, cackling over a newly laid egg. Investigation disclosed that Covert McBride brought his pet hen to town quite often. "I have to take her for an auto ride every morning, or she won't lay an egg," he explained.

## Pushes Wife 65 Mi. Looking for Job

## Discharged Vet Finds Tough Going on Country Roads.

DANVILLE, ILL.—William Beam, 34, discharged army veteran, admitted that he was "a bit tired" of walking and was looking around for a job as chauffeur "so I can ride a little."

Beam arrived here over the weekend after pushing his crippled wife in her wheel chair from Terre Haute, Ind., a distance of 65 miles.

He said it was "tough going" along the country roads on hot days and the trip took six days. The last night, as they reached Possum Trot bridge on Danville's outskirts, the couple slept outdoors beside the highway. The other days they stopped at farms en route where Beam would do chores for food and overnight lodging.

Mrs. Beam, 40, said she didn't mind the trip a bit, as she tapped some tobacco into her corn cob pipe and asked an interviewer for a match. A native of Georgia, she says that Danville is as far north as she'd ever been.

"I am not an invalid and can do my own housework, but I can't do much walking. I could never have made the trip if Bill hadn't pushed me," Mrs. Beam said.

Beam, who was discharged for disability from the 4th armored division in 1943, was asked why the couple chose this mode of travel. He said:

"You don't see much of the country riding in a bus; besides, I wanted to look around for a job en route."

Mrs. Beam refused to permit a photographer to take her picture, saying she had never been photographed in her life and wasn't going to start now.

## Careless Japanese Saves U. S. Lieutenant's Life

TULSA, OKLA.—The son of former Oklahoma House Speaker Johnson D. Hill is alive to tell of his experience with a careless Japanese. The story was learned here by Hill from his son, Lt. J. D. Hill Jr., now in Letterman hospital in San Francisco, Calif.

Hill, who is recuperating from a shell wound, was a platoon leader of the 27th Infantry (New York) division and was hit on his second day in combat on the bloody Ryukyus Islands.

"The carelessness of a Japanese saved my life," young Hill said. "A mortar shell hit me squarely in the back, but luckily the gunner had failed to pull the safety pin and the projectile did not explode."

Hill worked on the Sacramento (Calif.) Bee newspaper before he enlisted in 1942. He earned a commission in the coast artillery, but later was assigned to the infantry.

Besides Hill's parents, his wife and small son live in Tulsa.

## Shoots His Wife While Dancing, Then Kills Self

CHICAGO, ILL. — While they danced cheek to cheek to the strains of "I'll Keep on Loving You," Edward Rzeszutko, 28, shot his pretty wife in the neck, then turned the gun on himself, police said.

Mrs. Rzeszutko, 27, was reported in critical condition. Rzeszutko, a clerk, died almost immediately.

Friends told police that the tragedy occurred in the apartment of Mr. and Mrs. Michael Wojcik, who were giving a homecoming party for their soldier son.

None of the guests was able to explain Rzeszutko's actions. The couple were happily married, they said, and apparently devoted to their three-year-old son.

They said three couples were dancing when two shots were heard. "Are you shot, honey?" Rzeszutko was heard to ask. "Yes," his wife replied. "Then I might as well finish the job," he said, and fired a third bullet into his head.

## Stays at Wheel Despite Flames on His Gas Truck

GREEN BAY, WIS.—With flames shooting 20 feet from the rear of a tank truck loaded with 5,000 gallons of gasoline, Robert Miller, 26, of Route 5, Green Bay, remained at the steering wheel for five blocks to get the vehicle out of the west side business district.

Firemen put out the flames with only slight loss. Prevention of an explosion was attributed to the melting of safety plugs on the top of the tank, releasing vapor pressure from the interior.

Miller said he believed that gasoline spilled on top of the tank when it was being loaded ran over the rear end and down a safety chain, and was ignited from a spark.

Many do not know what to do when stung by a bee, entomologists report. Bees working on flowers rarely sting unless a person picks up the bee. It is only when you go too near the nest, they say, that a bee may attack you. In case of a sting by a honeybee, the best treatment is to scrape out the sting at once with your fingernail. Do not run for help, the bee experts say, or try to pull out the sting. That causes more venom to work into the wound. If attacked by either honeybees or wild bees, the best protection is to cover hands and face, and leave promptly to avoid too many stings. But, as soon as possible, stop and scrape out all the stings.

To insure straight edges on scrim curtains, fold each one down the center and baste the edges together before washing.

## Why the Dancing Bear Clawed His Pal, the Keeper

Weird Tale Emanates From Underground; Puts on Act to Fool Nazis.

AMSTERDAM.—The true story of why the famous dancing bear at the Rotterdam zoo suddenly turned on his keeper, threw him to the ground and clawed and bit him has just been told. One of the weirdest tales yet to emanate from the underground.

The director of the Rotterdam zoo was Eerie Klant who took the name of Hagenbeck when his mother, after the death of his father, married into the famous circus family.

Because he had lived in Germany since childhood the Nazis in 1940 ordered Klant into the German army. Twice he was saved by city officials who said his services were essential. But they warned him that if the Germans asked a third time they would probably have to release him. Klant had a daring idea.

He arranged a special matinee at the zoo. Everything went smoothly until the famous act of the dancing bear. Klant had worked with the bear for years. It was his favorite performing animal.

Something Happened. But this time something happened. The tame, usually affectionate bear turned on Klant. It threw him to the ground, clawed him fiercely and bit him on the foot.

"It was the most difficult act I ever performed," Klant said. "The bear did not want to bite me. I had to make him. I also had to make him stop at the right moment. That could have been difficult but my bear was well-trained. An actor could not have done better."

On his way to the hospital Klant deliberately dug into his wounds with an indelible pencil. The lacerations became infected and for months he remained in the hospital. Finally the Germans sent him to a military hospital in Amsterdam.

He managed to stay there for several months more by another ruse.

Butis Against Wall. He wrapped his head in a towel and beat it against a wall until he lapsed into unconsciousness. The Germans were unable to figure out the strange high fever and apparent concussion.

Finally, he escaped from the hospital. For eight months he hid with his wife Mia in the attic of a house. Because it would have been dangerous if the neighbors had heard a man's voice he spoke only in whispers. When he finally got out, his voice was almost too hoarse to be understood.

Now he is going back into animal training—but as Eerie Klant, rather than Eerie Hagenbeck.

## Woman's Call Gets State Police in Another State

COLUMBUS, N. J. — Mrs. Alfreda Heck, a farmer's wife, said she had quite a time getting state police at Columbus to report a heifer missing from her farm in nearby Springfield township.

Trooper Joseph Lyons said Mrs. Heck told him she asked the operator to get her state police at Columbus. She got a sergeant who asked her where she lived. Mrs. Heck told him at Chambers corner and Hancock road on route 29.

"I've been in Columbus a long time and I never heard of those streets," the sergeant said. "What police do you want, anyhow?"

"State police at Columbus," she told him.

"Lady," the sergeant asked, "where are you calling from?"

"Springfield township, New Jersey," Mrs. Heck answered.

"This is state police at Columbus, Ohio," he said.

## Boy Hung by Toes, Tied Naked, Brutally Beaten

DUNDEE, SCOTLAND. — Twelve-year-old Norman Wilson testified in High court that his foster parents hung his 10-year-old brother, Harry, by his toes from a clothes wringer, pulled his lips with pliers, tied him naked to a chair and beat him, and locked him in a dark cupboard.

The foster parents, Mr. and Mrs. John Walton, are charged with cruelty to the two boys, who were put in their care last year by the Fifeshire county council. Both deny the charge.

Norman said that on one occasion both boys were beaten "for saying the same prayer over and over again."

"We only knew one prayer," he told the court.

## Shortens Name Formerly Apostolopanagiotopoulos

ST. PAUL, MINN.—Seaman Paul Panagiotopoulos, 21, St. Paul, had such a good time celebrating victory he was taken to police headquarters for the night.

"What's your name?" asked Police Lt. Frank Kennedy before releasing Paul.

"Seaman Panagiotopoulos," he answered.

"Why don't you shorten it?" Kennedy asked.

"I did," said the sailor. "It used to be Paul Apostolopanagiotopoulos."

of all enterprises, that the producer must have a profit, based on a cost-plus profit, and a profit and cost plus the cost of necessary labor. Only in organization, then, the farmers have a voice in determining the final price, just as final price is determined in every other aspect of nation is striving for.

Whether we deal in beef or hogs, sheep or chickens, dairy products or vegetables, grains or cotton, there must be a floor under farm prices not less than the cost plus a fair return for our work.

Only thus may be had reasonable compensation for our job of feeding and clothing the nation. No honest man wants more than that and only a fool would be content with less.

Recommendations of how the \$51,000,000 fund might be used to benefit Michigan veterans are to be submitted to Governor Harry F. Kelly by the Office of Veterans Affairs sometime between Thanksgiving and Christmas. Col. Philip C. Pack, director, says the report will not be made public as it will be for the personal use of the governor.

At present the OVA is a service agency, created by the legislature and a model for other state governments, which is likely to continue for some years if the \$51,000,000 fund is used for veterans' service and not doled out immediately in dribbling sums.

The OVA cooperates with the State Board of Vocational Control in operating a veterans' vocational training center at Pine Lake, north of Kalamazoo. The state pays \$15,000 annually from a state administration board appropriation of \$1,000,000 and the vocational board chips in \$118,000 a year from its federal aid kitty.

Another veteran service is likely to be a neurosis center operated by the University of Michigan, Ann Arbor.

Michigan veterans are returning home at the rate now of 30,000 a month. The 1946 peak will come in June when 50,000 are due back. At least 350,000 veterans will be back home in Michigan by next summer—a fact politicians are already weighing.

The Kelly administration, faced with the possibility of labor unrest

and widespread unemployment one year from today, is going to give careful and thoughtful consideration to all veterans' needs. Governor Kelly, a disabled veteran of World War I, has a personal interest in this field that transcends political ambitions.

Lieutenant Governor Vernon J. Brown has personal interests also in war veterans. Two sons served in World War I; five grandchildren—four boys and one girl—are serving in World War II.

Moving the Michigan State Fair from Detroit to an upstate city has been proposed by livestock breed associations and farm leaders, but the idea is already being snaggled on opposition from friends of county fairs. The ace objector is the Ionia Free fair at Ionia. Lansing boosters have been reminded that the fair was established permanently at the state capital city in 1869, but after running in the red for several years it was returned to Detroit.

Echoes of the labor movement to get 30 per cent more pay: Directors of the Michigan State Farm Bureau declare farm prices must be boosted 30 per cent, if organized labor gets a similar boost in pay.

Quoting the bureau statement: "Some wage adjustments undoubtedly are called for, but a general increase will surely force generally higher commodity prices and a degree of inflation that might become disastrous."

White House analysts insist that overtime elimination has cut manufacturing costs 5.5 per cent on the average, while an end of upgrading and fringe increases has cut costs another 4.5 per cent. Thus 11 per cent wage increase could be absorbed by most industries without need for price increase, they say.

However, a 30 per cent pay jump would lead, the analysts add, to a 22 per cent rise in war material prices, and a 12.4 per cent rise in finished-goods prices. Thus, an inflation spiral resulting in higher prices for everyone.

Rankin Peck, executive director of the Retail Gasoline Dealers' Association, has notified the OPA that if the government grants a relief to distributors in wholesale prices, the local dealers should have a similar boost in retail prices. "The dealers cannot operate if the margin is reduced further in any way," cautioned Peck.

## TECHNICAL TERMINOLOGY

An Inspector, suspecting his boys in class were drowsing, dropped into double talk to catch them. His talk went something like this:

"You then take the loose sections of fendered smolg and gwelg them, being careful not to overhear the brought tagooks. At this time, extract and wampf them gently for about time and a half. Fwengle each one twice, then dip them in blinger. Otherwise discobillate the entire instrument in twetwels. Now are there any questions?"

"Yes," came a sleeping voice from the rear. "What are twetwels?"

## Happy Hunting!

Carry your gun down and on safety. Never point a gun—either on purpose or accidentally—at anything you do not wish to shoot. Be sure of your target before you pull the trigger. Handle every gun as if it were loaded.

When crossing fences, let one member of the party climb over first without a gun. Hand all guns over to him, being sure to "break" the breech before handing over. Be sure barrel and action are clear of obstruction before shooting.

Never carry loaded guns in your car. Never look down the muzzle of your gun. Avoid horseplay while handling guns and never mix alcohol and gun powder. Teach children proper respect for firearms. Such simple precautions as these will make for happy hunting.
