The first celebration of the birth of Christ on December 25 took place in the fourth century. Before that date the commemoration of Christ's Nativity and Baptism was held on

The first mention of Christmas is found in a Roman document known as the "Philocalian Calendar" in the year 354, and the first time the festival was celebrated in Britain was in 598, when St. Augustine bap-

In the year 567 the Council of Tours declared a twelve-day festival from Christmas to Epiphany, and in 991-1016 the laws ordained that all strife should cease at Christmas. Christmas was established in 813 In Germany and in Norway in the

#### Tree Decorations Symbolize Myths

You may not realize it, but most of the ornaments on your Christmas tree are symbols of myths and legends that were popular three thou sand years before the birth of

At that time the Aryian race, living in the foothills of the Himalaya mountains, saw in the rays of the rising sun, bent as they passed through the humid air, the image of a gigantic tree. These sun poets added to the tree image suggestions from the more distant heavens; the sun, the moon and the stars became the golden fruit that hung on the branches. The larger clouds suggested birds, swans and doves flying in and about the tree. The golden flash of heat-lightning became the mystical flower that grew on the tree, the celestial mistletoe. The showers that watered the tree came from the streams at its base.

From these fragmentary old legends in folklore we get the tree itself, the golden tinsel to represent the rising sun, the golden fruit for stars and the moon, swans and doves for clouds, mistletoe for lightning and showers or streamers of silver tinsel for water.

#### Animal Costumes For Christmas

Polish children masquerade in animal costumes on Christmas Eve It's done to honor the legend that attributes the power of speech to birds and animals during the midnight hour of Christmas Eve in recognition of the animals who, sharing the stable of Bethlehem, warmed the Holy Infant with their breath.

Hit-Run' Drivers Escaping detection is becoming an increasingly difficult task for

hit-and-run motorists due to improved police methods. Police now have a steptrophotometer that can tell more than 2,000,000 colors apart so that a speck of automobile paint, found at the accident scene, can be compared with paint on various makes and models as an aid in finding the car involved. In addition, a photograph of tire marks generally enables police to learn the make and size of tire.

Other nuts, so familiar at Christmas, the hickory nut, the black walnut and the chestnut, to say nothing of the pecan, are strictly American. The pecan is native to America and is found nowhere else. Two other American nuts worthy of mention are the chestnut and the butternut.

Although many nuts originated in other parts of the world, almost every variety known is now grown on American soil and experts are constantly searching for more kinds of nuts to transplant to this country.

The keeping of Christmas or saint's days, and the making of mince pies were illegal in the early Massachusetts and New Haven colonies. The strict religion of the Puritans banned observance of holy

# Woman's World Assure Good Looks for Holidays By Starting Grooming Schedule

By Ertta Haley

T'S not completely true, and some experts would say, it's not true at all, that clothes make the woman. If you have lovely clothes, they certainly help, but if your skin is cloudy, your hair dull and figure dumpy, then clothes can't do much.

Clothes are something money can buy, but good grooming, which is the basis of true beauty, can be achieved only by your own efforts. Nothing will take the place of a hundred strokes of the hairbrush on your locks; nothing takes the place of a good facial; nothing takes the place of a good figure.

If you want to look truly lovely for the holidays when you will be out calling-and be called uponprobably more than usual, start a beauty program now to assure yourself of truly radiant good looks. Time may be brief, but a beauty program followed faithfully will show results, even if you've been on it a short time.

Tip to Toe Loveliness Should be Sought

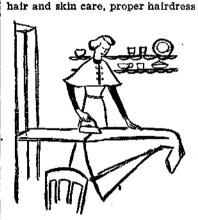

If you want to look your best, strive for loveliness from the top of your head to the tips of your toes. If you have lovely hair, this is not enough. Your figure should be able to stand up to critical inspection just as should your nails. Another good reason for striving for complete good grooming is to give yourself confidence. You need

never be the girl who to herself says," I'm making my face up so beautifully that they won't notice my hands are rough and my nails not what they should be."

Naturally we can't reach perfection in all departments, but the point is that we should try, and in trying, attain some improvement. Nature may not have endowed us all with shapely legs, but by learning to walk gracefully, clothing ourselves properly, and minimizing our weaker points, we can overcome many defects. This is different than concentrating only on one feature and ignoring our weaker spots.

A good beauty schedule includes

and make-up, hand care as well as foot care, and, of course, figure care, Cleanliness is the basis of several of these cares, so plan a time right now when you'll brush hair, use soap-and-water on your face, and when it's best to tub or shower,

Figure care is just as important. but in this case your care is controlled by diet, either to thin or fatten the figure. If your curves are not in the right place, plan to trim them down or change them with ex-

Be Smart!

A leading exponent of good line and tailoring that are designed with a fundamental understanding of the American woman's needs, uses ever-popular quilting in a new way, as a weskit. Her ensemble is in a gray jersey with pleats stitched down over the hips for true becomingness, teamed with a blouse of soft white crepe which is highlighted with rhinestone studs. This is a correct costume for campus or business ofClassic Pump

ercise. The latter is best done first thing in the morning for five minutes, and completed in the evening before bedtime for 10 to 15 minutes. Time-Tired Tips Given on Care

A mild soap and water cleansing for the face is generally advisable. You may apply this with a soft cloth or a complexion brush, but do get a good lather and work it into the pores. Follow this with a thorough rinse ending with cold water which acts as an astringent.

Creams and lotions are also good. but they can never take the place of soap and water. Use them with it. Many different types of make-up creams and preparations are available, and the choice is up to your personal preference. They help you to achieve a smooth base for the make-up and will make "your face" look nicer, smoother, and help it last longer

No extremes in make-up are advisable. It is best to study the face visable. It is best to study the face and to use a light hand in applying rouge, powder and lipstick. Simply second the returned lipstick. accent the natural lines and bring out the best, but do not try to change radically your mouth or eyebrow

Short hair is, of course, now in style. This should be styled to the shape of your face. If clever, you may do it yourself; if you do not feel competent, seek professional help in cutting and shaping. help in cutting and shaping.

Short hair is quite easy to keep well groomed. Brushing will help immensely to keep it fluffy, or sleek, whatever style you are using.

For those of you who want to trim ounds, start checking your eatens nabits immediately. Almost anyone who is plump can reduce simply by cutting out in-between meal eating foods.

Doctors say that most of us are plump, not because of glandular difficulties, but because of eating more than we require. The two tips I've given are easy enough to follow if you exert yourself. Also, give yourself 15 to 20 minutes of exercise daily.

For those who are slim, the routine also fails into two classes. They should eat richer foods-foods for tifled with milk or cream, butter and starches as well as sweets. Rest is also important to the slender person, for these are the people who are always on the go, thus using up energy.

There are several other items that should find a place in your care sheet and all of these would do well to find a place in the daily beauty checkup. First, how is your smile? There should be a brushing after every meal with a stiff. after every meal with a stiff bristled brush. Have the professional dental cleaning if you need it. and take care of repair promptly.

Go over your nails as you give yourself hand care. Polished, or not, nails must be trim, cuticle smooth, and the whole appearance immacu-

When you take the daily tubbing, give a care to your feet. The nails should be kept trimmed, and any ailments immediately attended unless you want to mar the lines of the face. Treat yourself to a pedicure and see how much fun it is. Check Clothing Habits For Good Grooming

Hang clothing promptly as you undress so that wrinkles are not caused unnecessarily. Press clothing on a regular schedule—not just undress so that wrinkles are not caused unnecessarily. Press clothing on a regular schedule—not just before you wear it.

Do your mending before laundering, or while ironing. A good idea is to have the sewing kit right next to the ironing equipment.

Since suede is so popular for gloves, shoes and bags, keep suede dressing and a stiff brush handy so you can treat your accessories before they become dusty and shabby. Keep veils pressed and felt hats brushed after each wearing. Use cleaning fluid on the inside of the lat so it will be spic and span at brushed after each wearing. Use cleaning fluid on the inside of the

hat so it will be spic and span at all times. Keep hose and Importe washed

New Insect Identified

A new insect which attacks about 30 California crops, flowers and wild plants has been found, but is not expected to become a serious menace. It is the omnivorous leaf tier. This pest, long known in Europe, was first discovered in California on flax early in May, 1948. It has been found nowhere else as yet, and has been found only on flax. It was identified by Dr. W. W. Middlekauff, University of Cali-fornia college of agriculture entomologist.

Chicago's Wholesale Trade Chicago's wholesale trade in 1947 approximated \$10,500,000,000. Contributing substantially to the wholesale volume are more than 200 trade shows and other forms of organized merchandising events which are held in this city annually, and which in the aggregate constitute an almost continuous Leipzig Fair. Trade shows catering exclusively to retailers annually attract more than 500,000 retail store wners and buyers.

Vitamins for Plants Vitamins are essential to plants as well as humans. Recent work

shows that vitamins B and C increase the growth of seedlings when added to their artificial food

Nursing Profession

Since 1910 the nursing profession in the United States has expanded 450 per cent, more than seven times the increase in the population, according to American Nurses' association figures. In spite of this, the ANA points out, registered professional nurses are still unable to meet the unprecedented demands for their services.

It was Christ who, by his volumtary acceptance of the role of servant, has been elevated to the royal purple and seated at God's right

At few, if any, times since Christ was born have all the people of the earth needed faith, trust, and peace

When we celebrate the birthday of Christ we ought not to think of Him only as a child. Those who think Christmas is only a festival about a child, for children, veer away from facing Him as an adult.

CHRISTMAS 'PUTZ'

and one village lot in Ubly. Sale will be held on The Christmas "putz" is a decorative feature in many Bethlehem, Pa., homes during the Yuletide season. It is a representation of the birth of the Christ Child in the

stable at Bethlehem in Judea. The residents of Bethlehem, Pa. follow this custom, which was brought to this country by early Moravian settlers, and spend months

arranging the exhibit. The word "putz" is short for the German "putzen" meaning to arrange or decorate.

Mail Carriers Walk Many Weary Miles

LOADED . . . A familiar sight on the streets this time of year. He wishes he had Santa's reindeer to help with the load.

Give a thought to the foot-sore mail carrier, who probably trudges more weary miles during Christmas week than does old St. Nick

His mailsack will be even heavier this year than in 1947. Last December, the nation's postal service delivered 5,000,000,000 pieces of mail. They expect to break that record this Christmas.

You can help spare your mail carrier's bunions—and incidentally speed delivery of your own Yule tide letters, Christmas cards, and packages-by heeding the Post Office Department's suggestions:

1. Shop now-get your Christmas mail and packages off as early as possible.

2. Wrap your gifts carefully. Address them plainly-Aunt Susie may be able to decipher your handwriting, but not all postmen carry magnifying glasses and crystal balls. Register valuable letters. Insure

ly if you slip up on Suggestion No. 1.

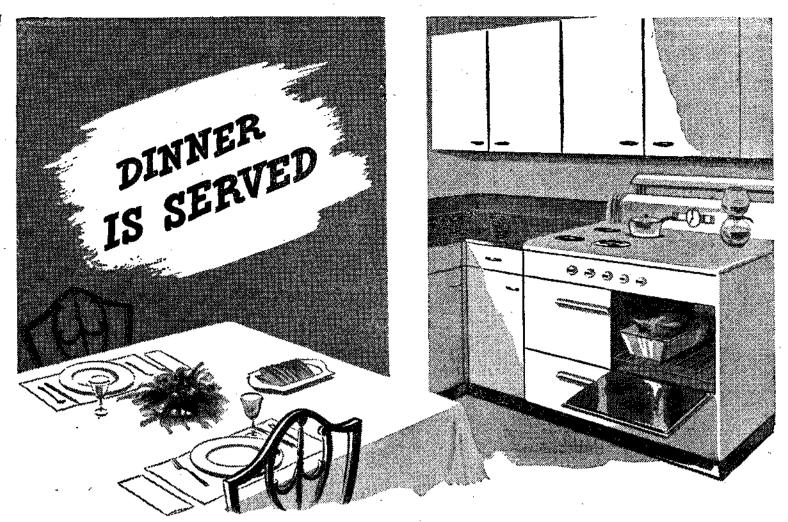

The bell, the world's oldest and simplest musical instrument, is the world's most universal Yuletide symbol. Each nation has its individual symbols of Christmas, but the bell will be found somewhere in the traditions of every one.

In recent years the ancient bell has "grown up" into the carillon, a highly sensitive instrument on which Christmas carols seem to find their most perfect expression.

# Parents Can Spoil Children's Play

Here's a Christmas resolution for parents. It's one that ought to be made before New Year's resolutions are even considered. It goes, "I will keep my hands off the children's toys all day on Christmas." It'll be a hard one to keep because Mother likes to fuss with Ann's doll. She pretends she is showing Ann how to put on the bonnet, but she's actually having a grand time playing. And once Father gets his hands on the train, or the auto that winds up, the boys can't get near them. It isn't fair. The children are crying for a little peace and freedom. After all, adults can play with toys for the next 364 days if they want to.

# Efficient Fertilizer Use Boosts Yields

# Good Soil Management Must Aid Plant Food

Every ton of fertilizer can be stretched or used more efficiently, boosting crop yields at the same time. Many farmers, says Middle West Soil Improvement committee, use fertilizer as a crutch. They try to make it substitute for good management practices. They put plant food in the soil without making sure the plant can send out its roots to use it.

Fertilizer is essential in giving the soil plant nutrients to feed crops. But fertilizer can't do the other practices that build and mainsoil "nailed down."

plant food. Roots need air and water to live. When a soil is packed down and tight, there is no room for awhile. the air and water needed by roots and plants for high crop production. The way to build soil structure is

to grow legumes and grasses regularly in the rotation. These legumes make a thick layer of good soil.

They add organic matter. Such soil has plenty of air space. Water soaks in quickly and more of it is held. Weak, scattered stands of legumes

won't build soil structure. For strong, leafy stands and vigorous roots, the legumes need phosphate and potash that can be added in commercial fertilizer. Getting thick stands isn't the whole story either. All these crops can't be cut for hay or graze close and still be expected to build the soil. At least a part of these crops must be turned back to still lost French treasure buried be-

Private Life of Bossy

ing private lives even Bossy is not immune. The inevitable prober comes up with these statistics:

Bossy grazes only seven and a half hours daily, regardless of how much feed she gets. She does 60 per cent of her grazing during daylight hours, 40 per cent at night. She spends five hours a day eating at a rate of 50 to 70 bites per minute. She chews her cud seven hours a day and spends 12 hours lying down, at nine different times. While grazing, she travels two and a half miles in the daytime and one and a half at night. She drinks 16 times a day.

#### Erosion Takes Alarming Toll of Good Crop Land

Erosion is taking an increasingly alarming toll of good crop land in the United States. Estimates by the department of agriculture indicate that about 100 million acres of once good crop land have been ruined or nearly ruined for profitable cropping by erosion, another 100 million acres have been badly damaged and still another 100 million acres are eroding too fast,

There are now approximately 460 million acres of good crop land in the U. S., including acreage now in crops as well as about 100 million acres that need clearing, drainage, irrigation or other improvement. All but about 71/2 million acres of this 460 million acres are subject to erosion unless protective measures are adopted.

#### Planting of Windbreak Will Improve Farmstead

Ranked as a major farmstead improvement project, planting of a windbreak around farm buildings not only improves the appearance of the farm but also saves fuel and gives wind protection to the build-

ings and livestock. In addition to the regular windbreak on the north and west of the farmstead, many farmers also are planting a garden windbreak on the south and west of the garden.

Red Squill, Good Polson

Poison which the farmer most commonly uses to make good rats out of bad rates is Red Squill, recommended by the department of agriculture because it is effective, cheap and harmless to domestic animals. When dogs and cats eat it they throw it up, for it is an emetic. Chickens, too, can eat it with impunity, but when a rat gets it into his system it is pay day. At the outbreak of World War II the supply of squill, which comes from Mediterranean countries, was suddenly cut off. Squill is an extract from a bulb grown chiefly in Italy.

#### The Lowly Mushroom

Romans referred 'to mushrooms as "food of the gods." They have always been considered a delicacy, a fine food to be eaten slowly and enjoyed. Until the 17th century only wild mushrooms were served. It was in France during the reign of Louis XIV that mushrooms got their start as a cultivated crop.

# Extension Group Chairmen Met for Training Session

Chairmen of organized women's extension groups throughout the county met for a training meeting last week at the courthouse under the direction of Miss Mildred M. Omlor, county home demonstration agent. Purpose of the meeting was to give suggestions on parliamentary procedure, discuss group projects, organization and aims, and to secure material for the group for the coming year.

Miss Elizabeth Roniger, assistant state home demonstration leader, from Michigan State College, was present and spoke to the group on "Purposes and Aims of a Good Extension Group." The various chairmen present reviewed parliamentary procedure and held a mock business meeting.

In the afternoon session the croup divided into smaller groups and using the "Phillips Sixty-six Method," discussed questions and problems relating to extension

Suggestions were given to the roup by Miss Omlor for special essons and projects during the year. Included in these suggestions were lessons on Cancer in our Everyday Lives, Safety in the Home, Fire Hazards, Parliamentary Procedure, Current World Agricultural Economic Policies, and Know Your Neighand bors.

A reception was held in the V. F. W. Hall at Pigeon. Lunch was served to 100 guests from a table decorated with a three-layer wedding cake, topped with a small bride and groom.

The wedding trip was the northern part of Michigan. They will make their home at Owendale.

The out-of-town guests were from Detroit, Caro, Cass City, Unionville, Bach, Pigeon, Port, Sebewaing and Bad Axe. The groom is employed with his

father in the mason business. The bride's mother wore a navy blue pin striped suit with black accessories and the groom's mother was dressed in gray with black accessories.

# High Blood Pressure

When the blood pressure remains continuously high, the heart enlarges. The heart muscle becomes thicker and stronger. This is the direct effect of the greater work required of the heart to maintain an adequate circulation. Your age, plus 100, is not a rule for proper blood pressure. Blood pressure should remain much the throughout adult life.
