Power Sweeper Hurries Cleaning

A large sweeper attached to the front of the truck owned by the village cleaned the pavement on Main Street in the early hours of Saturday morning. "Bud" (Frank) White, who operated the new contrivance, says that it did a much better job than hand sweeping and the trial run of two hours cleaned a much greater area than could be done in 20 hours by the old method of handwork.

New Weed Killer
A newcomer among weed killers may replace reliable 2,4-D in the chemical control of woody plants, but it usually gives poorer results than 2,4-D on ordinary weeds. 2,4-5 T is fairly expensive now, but experimental results with it on woody plants has been excellent.

Mrs. Thompson Tells Of Missionary Work Among the Indians

Whiteriver, Arizona.

July 24, 1949.

Dear Editor and friends of Cass City:

I have thought about writing this letter for sometime, but we are kept busy doing visitation work. When we left Cass City we had planned to work among the Navajo Indians at Winslow, Ariz. We were very much in need of a building in which we could open up a mission, but after spending a month there, we heard of the work here in Whiteriver among the Apache Indians, which is a very needy field.

Rev. and Mrs. Suhl, missionaries from the Assembly of God Church, have been here for the past four years and have a fine mission built, which will seat 200 Indians. The strange thing about it is that we new missionaries on the field have a hard time in remembering their names. When Mrs. Suhl is having roll call, we are studying faces and names.

Miss Georgia Thompson has the primary children and I have the juniors. We do well if we can keep their attention for five minutes at a time. They are very lively children and we very seldom have the same children every Sunday. I don't know where we would place them if they did come every Sunday.

The Apache Indians are the last tribe to become civilized. There are 4,000 Indians in this tribe, and are very much in need of Christianity.

There have been fourteen murder cases this year among the Indians in Whiteriver. Last Wednesday evening across the road from where we are staying an Apache man quarreled and fought with his wife until he broke her neck. Two weeks before that he had been in the Sunday evening service and Rev. Suhl had to call the police to take care of him.

We try to attend court every Monday morning. Judge Lester Oliver, a soft spoken full-blooded Apache, tries the cases on his tribe's reservation.

The Assembly of God Church had an Indian camp meeting before the Fourth of July. The Indians from all over the reservation moved into Whiteriver, for the Fourth of July pow-wow which lasted three days. We attended court on Tuesday, July 5, and found some of the Indian people had been arrested that had been attending camp meeting regularly. There were 54 cases heard. We are learning fast.

Whiteriver is at a 5,280-foot elevation. There are very high mountains on every side all covered with beautiful pine trees. This is truly God's country and we see God's handiwork everywhere we look.

I will try and tell you something about an Indian funeral. After the person is dead they fire a gun several times to let the Indians know there has been a

death. Then the relatives and friends start moving in to mourn. Then they kill a beef and everyone that goes there, they give a piece of meat. They also have plenty of Tulle pie to drink. After they have had a couple of drinks they can cry real loud. This goes on all night. The next morning they don't care what becomes of the body. Anyone can take it to the grave.

Sincerely yours,
MRS. W. THOMPSON.

Here and There Around the Thumb

Croswell—The finance committee and township chairman of the Yale Community Hospital met recently and laid plans for the final drive to raise sufficient funds to build the long wished for hospital. The board of directors feel that construction of the hospital will begin April 1, 1950. The committee hopes to secure additional pledges for \$25,000 to be paid before Dec. 31, 1949. This will give the directors the sum of \$160,000.00. To secure the assistance of the federal government, it would be necessary to set aside \$25,000 of the above amount as a reserve for operation of the hospital when built. After the \$25,000.00 is put in reserve, there would be \$135,000.00 left, to which the federal government is expected to add one-half, or \$67,500.00, which would give the directors the sum of \$202,500.00 with which to build.

Croswell—On racing programs in Michigan and Ontario, the name of Chauncey Bears of Croswell has appeared annually for the past 56 years. The venerable driver, who will be 81 in November, can be seen daily at the Croswell fairground track conditioning his small stable for the various county fairs and racing meets before going to Northville Downs to compete with some of the nation's best drivers and horses.

Pigeon—Members of the board of education have set August 12 as the date for voting on the question of erecting additional buildings to house the increasing number of students at the Pigeon Rural Agricultural School. Cost of the two buildings is estimated to be \$150,000, but it will be necessary to raise \$140,000 by taxation, school board members said. The present school building was erected in 1917, having an enrollment of 228 students. That same school is now housing almost double that number, with an average student body of 515 students during the past year.

Caro—Swimming pool finances reached a less than half way figure last week with pledges then totalling \$8,480. Caro Board of Commerce launched the campaign as a major objective of that organization this year. A goal of at least \$20,000 has been set.

Capac—The Michigan Associated Telephone Company has announced plans to increase and improve its service in the Capac, Avoca, Emmett, Goodells, Jeddo and Smiths Creek exchanges.

Minden City—Committeemen for the homecoming here on Saturday and Sunday, Aug. 13 and 14, are making final arrangements for the two-day event. A big street parade will be held at 1:30 p. m. Saturday.

Bad Axe—Huron County electors will vote Sept. 14 on a one mill tax levy for three years for building a new county jail. The Board of Supervisors decided at a special meeting last week. Two proposals will be presented to voters, one for setting up a sinking fund with a one mill levy for three years and the other for increasing the 15-mill tax limitation for three years. Both proposals must be passed by a majority vote if the tax is to be levied.

Kingston—Special elections held in two rural school districts in Kingston Township to vote on the question of closing the schools and transporting the pupils to the Kingston village school resulted in both districts rejecting the proposals. In the Beverly Dist. No. 1 the vote was 54 to 12 and in the White Creek Dist. No. 5, 45 to 17 against the proposal.

Vassar—This city celebrated the 100th anniversary of its founding at a centennial celebration last week end and immense crowds attended the four-day event. The Tuscola County Pioneer-Times, published in Vassar for 91 years, printed a 36-page centennial edition in honor of the event. The edition was replete with early historical articles of the Vassar community and halftone pictures of pioneer residents and early industries. The big paper is a credit to its publishers, Ray Strong and Robert Colladay, and represents many hours of toil on the part of the newspaper's staff.

ABA Approves Training of Koepf

The Huron-Tuscola Artificial Breeders' Association board of directors at a recent board meeting approved the training of assistant inseminator - manager Bernard Koepf of Unionville. The five day training course is being given at Michigan State College this week, under the direction of George E. Parsons, extension dairyman at Michigan State College. The Unionville Milling Company of Unionville is financially sponsoring the training expense of Mr. Koepf, who will later assist Franklin Stoll, the present inseminator-manager.

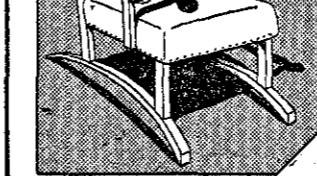

The Huron-Tuscola Association, organized in November, 1948, has shown substantial continuous increase in membership and services rendered. During recent months over 100 services were given. Detailed information can be received from Inseminator-Manager Franklin Stoll or your County Agricultural Agent.

HOW TO FIX IT

A SECTION OF AN OLD LOG OR TELEPHONE POLE WILL MAKE A SURPRISINGLY COMFORTABLE GARDEN SEAT AFTER IT HAS BEEN FITTED WITH A BACK AND ARM RESTS.

A BACK BRACE IS ADDED TO PREVENT ROLLING. THIS SEAT MAY BE MOVED ABOUT READILY AND CAN BE LEFT OUTDOORS DURING THE WINTER WITHOUT SUFFERING TOO MUCH FROM THE WEATHER.

IF YOU ARE POSSESSOR OF AN OLD ROCKING CHAIR THAT IS TOO DECREPIT TO BE USED IN THE HOUSE YOU DON'T HAVE TO SAW IT UP FOR FIREWOOD. IT CAN BE MADE INTO A COMFORTABLE, ATTRACTIVE LAWN CHAIR AT THE EXPENSE OF ONLY A FEW MINUTES' WORK. THE LEGS OF THE CHAIR SHOULD BE SAWED OFF IN ORDER TO GET THAT DESIRED COZY BACKWARD TILT. THEN INVERT THE ROCKERS AND FASTEN THEM TO THE LEGS WITH LONG WOOD SCREWS.

They are cornets on Wednesday, 10:30 a. m.; clarinets Thursday, 10:30 a. m.; French horns on Tuesday, 10:30; drums on Wednesday, at 1:00 p. m. Students are requested to keep these times in mind and attend whenever they possibly can.

It is expected that the band will also play an open-air concert in Cass City some evening during the last week in August.

Parents of students in the fifth grade and up who wish to start their children in the band should see Mr. Borg soon so that they may get an early start. A display of instruments for beginners is in the band room on the second floor of the high school. You may arrange to meet with him by calling 79R11.

Tuberculosis
Many people do not know that tuberculosis is contagious and symptomless in the early stages. They are not aware that tuberculosis can be transmitted from one person to another by kissing, inhaling germ-laden droplets of sputum or by handling things contaminated with germs. Many believe that tuberculosis is inherited and that they are immune to it after reaching the age of 45.

The want ads are newsy, too.

Building Repairs Urged Immediately

Delay Adds Cost,
Extends Damages

An unusually severe winter has taken a heavy toll of farm buildings. Winds and snows have torn at roofs. Spring thaws have washed out and weakened foundations. Buildings have settled. Agricultural engineers point out that repairs should be made quick-

FILL WITH 1:2:5 CONCRETE

To support an undermined foundation, jack up the sill and dig out under the foundation. Fill the excavated area against the wood form with concrete (1 part cement, 2 parts sand, and 5 parts coarse aggregate.)

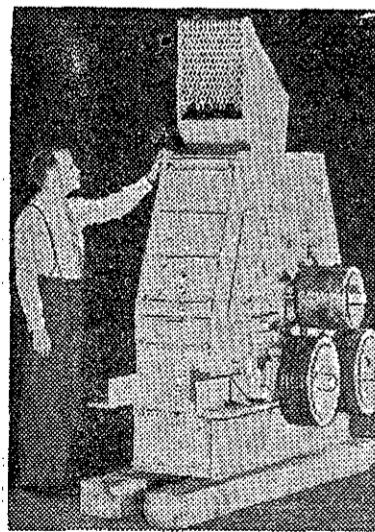

To delay will only extend the damage and add to the cost of restoring buildings to a sound condition.

When the foundation does not extend below the frost line, or has been undermined:—

1. Use jacks under the sill every 10 feet and square up the building.
2. Excavate 10 or 12 foot sections at 10 or 12 foot intervals. The excavation should extend under the full width of the wall, plus enough to provide an adequate footing, and go down below the frost line.
3. Form and place the new footing. Allow new concrete to set, remove the form, and backfill against the new foundation. Grade the yard so water will flow away from the foundation, and make sure the roof drainage system is clean, adequate, and in good repair.

Farmers will find it far easier and more economical if they select a roofing material, such as fire-resistant asphalt shingles which can be applied right on over the old roof.

Mighty Mite

The mighty mite weighs four tons and takes stone up to 12 inches in size. It operates with whirling impellers which catch incoming stone and keep the pieces smashing against breaker bars until they are the right size desired. The impellers in the machine weigh a half-ton each.

Poultry Flock Care Calls for Sanitation

Good care of the poultry flock calls for sanitation, declares John Weeks, of the Auburn polytechnic institute extension service poultry division. He says it is the best way to prevent poultry diseases.

Another important thing to remember, he points out, is that the amount of heat required depends upon kind of house, kind of brooder, and age of chicks. Chicks should be kept comfortable.

Michigan Mirror

By Gene Alleman.

Every Michigan incorporated municipality—city or village regardless of its size—is eligible to get a share of federal rent subsidies and federal housing grants.

This fact is emphasized by Governor G. Mennen Williams.

Furthermore, the governor feels that since Michigan taxpayers pay more to the U. S. treasury than they ever get back in federal pending, the Michigan community which does not "get its share" of public housing dollars will in effect be paying for something it does not receive.

Governor Williams told newspaper editors at an Associated Press meeting at the Higgins Lake conservation training school that Michigan could get as much as \$500,000,000—a half BILLION dollars.

This startling announcement—so it seemed to the Michigan Mirror factfinder—prompted an inquiry into what it was all about. In brief, here is what we learned at the governor's office:

A 1933 special session act of the legislature permits any incorporated municipality to set up a public housing authority. If the voters approve, the authority may issue bonds, build homes and rent them. So far, the cities of Detroit, Hamtramck, Ecorse, Saginaw, Pontiac and Flint have gone into the public housing business. Grand Rapids voters turned down the idea this summer.

Governor Williams in March asked the state legislature to vote a \$3,000,000 bond issue as a revolving fund to help finance the city housing projects.

Because the state constitution forbids use of state money for internal improvements, except in the case of highways, airports and waterways, the idea was abandoned.

The governor would like to submit a constitutional amendment in 1950 to remove this prohibition for state aid to public housing. He also would like to see the 1933 act amended to include counties and townships as well as incorporated municipalities.

How does a municipal public housing authority operate?

If its plans are approved by the federal housing administration (Raymond Foley is the U. S. administrator), the authority can apply for a federal advance of money. The authority pays this back to Uncle Sam when its tax-free bonds are issued and sold.

These municipal bonds are supported by a federal rent subsidy as security for the bonds. This subsidy makes up the difference between housing rent on a COST basis and actual rent on a BELOW COST basis. When the tenant's personal income exceeds five times the annual rent, he is no longer eligible for subsidized rent in the municipal housing project. Likewise, the subsidized rent must be 20 per cent less than COST rent in private housing.

How much is all this going to cost the federal taxpayer?

Quoting Foley: "The maximum possible total, with 810,000 units, comes to around \$12,000,000,000 (12 billion dollars)." The rent subsidies are estimated by Foley to come to around 7 billion dollars, spread over 30 to 40 years.

Who pays the cost of running the local housing authority? The administrative overhead is covered by money obtained from bonds and rentals.

How much can Michigan get of the federal housing aid? Not more than 10 per cent may go into any one state.

Farm housing benefits are also available. In fact, submarginal farms (those which are not self-supporting) may obtain an outright gift from the Great White Father. A fourth of a billion dollars has been set aside for housing loans to farmers who cannot get private loans.

In 1929 the Federal government spent \$1.3 billion on goods and services; \$5.2 billion in 1939; \$21 billion in 1948, and an estimated \$28 billion in 1949. The 1950 spending will be close to \$30 billion with a treasury cash deficit of \$5 to \$8 billion.

Well, there it is: The public housing program in a nutshell.

If your community is interested, officials may write the governor's office at Lansing for details.

Premium Money of Caro Fair Will Total \$7,000

Over \$7,000 in premiums will be paid by the Tuscola County Fair Association this year, and early entries promise one of the greatest exhibition years in the fair's history, says Carl F. Mantey, secretary.
The fair will last all of the week of August 22 to 27, and harness racing the last four days will be the main features of interest, said Secretary Mantey. Purses for the races total \$10,900. The fair will reach a high point of interest with the "million dollar livestock parade" in front of the grandstand Thursday afternoon, August 25.
Increasing interest has been shown for the past dozen years in the display of members of 4-H clubs, and chapters of Future Farmers of America. A special department has been set aside for the boys and girls of Tuscola County exhibiting livestock, grains, handicraft, sewing, etc.
Secretary Mantey says that the big Merchants' Building will be crammed with exhibits of several hundred business concerns. The latest in farm machinery will be on display by distributors of the country's most famous lines.
Tomorrow's unfinished work is easy—provided you do today's today.
