Appeal for Nurses Available for Polio Duty in the Midwest

An urgent appeal for registered nurses available for polio duty in midwestern states was made today by Rev. Donald Bates, chairman of the Tuscola County Red Cross Chapter. Red Cross Headquarters in St. Louis has advised that prolonged recruitment during summer months for widely scattered communities where local nursing staff were overburdened has exhausted regular procurement channels.

Indications are that the number of polio victims will increase up through early fall, Rev. Bates said. The present need for nurses not heretofore reached by this appeal is expected to continue throughout this term as new patients are admitted to hospitals and replacements on long-term cases become necessary.

According to Rev. Bates, chairman of the Tuscola County Chapter, nurses now are needed particularly in polio centers in Michigan, Wisconsin, Iowa, and Texas, with 245 nurses already recruited this year by the Red Cross for these states. So far this year, Rev. Bates said, more than 680 nurses have been recruited by the Red Cross for assignments in 14 of the 16 states in its midwestern area.

"It is not our intention to drain nurses from our community or out of duty in which they are vitally needed," Rev. Bates pointed out. "However, there are numbers of registered nurses not active in the profession. No doubt some could arrange their personal affairs to serve during the period when death or serious crippling may be prevented through their service. In a number of instances, married nurses with children have enlisted for general ward duty in their local hospitals, thus relieving other nurses for polio duty. Nurses who take Red Cross polio assignments are expected to serve at least two months."

According to the chairman, the Red Cross recruits nurses at the request of the National Foundation for Infantile Paralysis, the organization which provides expert polio care for all and meets the cost of treatment where family finances are inadequate. The National Foundation will pay the cost of transporting those nurses recruited to their place of assignment, and will pay a subsistence allowance, in addition to their salary, while they are serving in polio work.

All nurses available for polio duty should contact the Tuscola County Chapter at Courthouse, Caro, Michigan. Phone 612.

Council Acts to Curb Number of Fine Reductions

Fifty-five Dollars Were Collected in Fines During the Month of August

A 30-day extension for the collection of village taxes was approved Tuesday by the village council, moving the tax deadline to Oct. 15.

Mrs. Wilma Fry, village clerk, asked for the action since taxes amounting to \$1,428 are still outstanding.

Councilmen also took steps to curb an increasing number of traffic violators attempting to get reductions in fines levied by village officers. A motion passed Tuesday stipulates that fines be collected as determined unless the defendant pleads not guilty and stands trial with the complaining witness present.

The council also heard reports from the violation bureau and the dog warden. Fifty-five dollars in traffic fines were collected during August. One ticket for running a red light, one for an improper turn, three for reckless driving and nine for speeding are still outstanding. Last month, \$118.00 was collected on traffic fines, with six tickets still unpaid.

Of six dogs caught during August, three were disposed of and three were returned to their owners, according to Arthur Escelsen, dog warden.

Councilmen moved to ask the Edison Co. to install a street light on Garfield Ave., west of the Grand Trunk Railroad.

A free pavement dance in celebration of the lighting of the new boulevard lamps along Main St. will begin at 8:00 next Thursday night, according to members of the Chamber of Commerce.

The dance, which will be held on Main St. in the block west of Seeger St., will be preceded by a short program. It is expected that a representative of the Edison Co. will be on hand for the formal lighting ceremony. A company spokesman said wiring of the new lights will definitely be completed next week.

Music for the dance will be supplied by Bob Quinn and his Ramblers of station WLEW, Bad Axe, with Howard Loomis of Gagetown calling the square dances. The back of a platform truck will be used as a grandstand. The dance is being held next week to enable out-of-town crews who worked on wiring and installation to attend.

Each Main St. business man will be asked for a donation of two dollars to help defray the cost of the program, according to Chamber of Commerce members.

Mr. Holmberg pointed out that all students will report to the school Thursday.

Gagetown students who will attend the Cass City High School this year are asked to meet the school bus on Main St. in Gagetown at eight o'clock Wednesday morning, according to Willis Campbell, superintendent of schools. Service Gives German Women Will to Live

NUREMBERG, GERMANY.—Hundreds of German women, exhausted and depressed by 10 years of war, poverty and uncertainty have found strength to go on living with the help of the Bavarian Mothers Service.

This 15-year-old independent voluntary agency of the Evangelical church of Germany, headed by Dr. Antonie Nopitsch, is helping about 4,000 women a year to find themselves again. It operates seven "rest homes" where a woman can have a two-week spiritual retreat from the struggle against poverty and trouble.

One of the rest homes and also a Bible school and the headquarters of the service, overlooks the green farmlands of Slein, near here. There a mother can find a soft bed, quietness, spiritual help and friends. It is a complete change of surroundings.

Unable to Sleep
Some mothers who come to Stein and to the other rest homes have been sleeping on straw mattresses and chairs for so long in crowded rooms in Bavarian villages that they cannot sleep on soft beds the first few nights.

"It's like heaven," exclaimed one woman. "It's like a fairy story here. It's all light and bright and there is plenty of room and big windows."

"Everyone is so friendly—I feel I am loved again."

The small, tired mother spoke with tears in her eyes. She gazed at the pictures on the walls of the dining room, longingly. Her face was lined, but she smiled occasionally as she told of her life in the last few years as a refugee.

Her husband was the manager of a distillery in upper Silesia, now a Russian occupied territory. They had three children. He joined the German army in January, 1945, and was taken prisoner by the Russians. He was sent back to her in October, 1945, ill and depressed. He died a year later.

She and many other women in the village, in the same plight, fled with their children by wagon across the border into the Bavarian forest. They live in peasant houses and villages. Some day they would like to go back home "when the Russians are gone."

Many Can't Get Jobs

They cannot get jobs because of current unemployment. There are about 100,000 such mothers in the area served by the Bavarian Mothers' service. They are allowed about \$12 a month from the government, in an economy where a pair of shoes costs \$3.

"Nobody wants them," said Dr. Nopitsch. "It is worst for those women whose husbands return from Russian camps."

The man returns, exhausted, without energy, ideas or initiative. He is always thinking about his comrades who were left behind in camp. He is hardened. He does his own sewing. He has been away for so many years that the children don't recognize him as their father.

"Imagine what this does to his wife, who has grown old with the cares and worries of trying to make ends meet. Difficulties arise and the neighbors gossip. There are seven million more women than men in Germany, so that the men are encircled by women."

Policemen Sell Blood To Help Fellow Officer

ST. PAUL, MINN.—St. Paul policemen are doing something unique for a unique fellow officer, Alfred E. (Big Al) Jakobson.

Jakobson had one of his lungs removed recently in Rochester, Minn. His officer friends made a deal with the Rochester hospital, which billed Jakobson for \$800. The hospital agreed to take their blood at \$25 a pint and apply it to Jakobson's bill.

Four officers went to Rochester, contributed a pint of blood apiece and knocked \$100 off the bill. Other officers are planning to follow suit.

Big Al—he's 6 foot 7—is a familiar figure in the St. Paul loop, where he has been a traffic officer most of the time since 1929.

Always eager to help tourists, Jakobson produced, at his own expense, pocket sized maps of the Twin Cities and handed them to confused visitors.

Then Big Al developed another idea, after night motorists almost clipped him a couple of times.

He sewed reflecting green material on the palm side of his right mitten, and red on the back.

At night he'd halt traffic with a wave of the red, then wave them on by turning and opening his hand.

But more unique among policemen was Jakobson's refusal of a promotion to detective.

Big Al had a good reason. He was studying law nights. If he took the detective rank he'd have to quit his studies to serve a night shift now and then.

He kept his patrolman's rank, worked days and studied nights, right up to the time he became ill. Just before he got sick he passed an examination for the rank of detective lieutenant. He was certified to that position, but never has had a chance to work at it.

When he told his parents he had secured a job at the blacksmith shop, they laughed, and said: "You surely don't mean to tell us that a little fellow like you can shoe horses."

"No," said the boy, "but I can shoe flies."

'Taint So Easy

An angler who had been trying to hook something for the last six hours was sitting gloomily at his task when a mother and her small son came along.

"Oh," cried out the youngster, "do let me see you catch a fish."

Addressing the angler, the mother said severely: "Now don't you catch a fish for him until he says 'Please.'"

JUST TO BE SURE

"Does she have her own way?"

"Does she? Why she writes her diary a week ahead of time."

Hoe Safer Than Spray For Gardens, Report

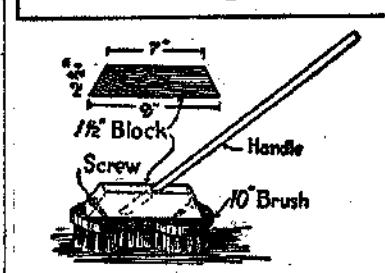

The U. S. department of agriculture advises against using a chemical weed killer in the home garden to avoid more damage than gain to the vegetable crop.

In a recent bulletin, the department reported spraying with chemical weed killers is effective and a work-saver if done with care to avoid injury to vegetables.

In the home garden, rows are close and several of the favorite garden crops—tomatoes and beans, for example—are highly sensitive to weed killing chemicals.

In a family-sized garden the job of using a hoe or cultivator would probably take less time than to spray with a weed killer since the chemical must be precisely measured and mixed and the equipment thoroughly cleaned afterwards, the department pointed out.

Back-Saving Brush

One of the hardest jobs of the housewife is scrubbing, as it necessitates her getting on her knees. Use a labor-saving helper and obviate that everlasting scrubbing floors on the knees. It is made of an ordinary 2 1/2 by 10-inch fibre brush by attaching a block of wood to the top. The block is 1 1/2 inches thick and 2 1/2 inches wide and 9 inches long at the bottom and beveled to 7 inches at the top. The corners are rounded. After the block is planed it is attached to the brush at both ends.

Learn, Obey Farm Safety Rules, NFSW Theme

The background for National Farm Safety Week, to be observed July 23 to 29, is a picture blacker than it need be. It includes an annual 17,500 fatalities from accidents, and 1,500,000 disabling injuries. Also about 35,000 buildings are destroyed by fire. The annual loss, much of it preventable, is estimated at about one billion dollars. "Learn and Obey Farm Safety Rules" is the theme.

Forward, Men

Seth Smith was reckoned the laziest man in the village. So tired had the authorities become of contributing to his support that they decided to confine him to living tomb. Accordingly he was prepared for burial. The hearse was an old ramshackle country wagon.

As the strange cortege moved along some old resident asked, "Who is it?"

"Why, Seth Smith, who is too lazy to get anything to live on, so we are going to bury him alive."

"I'll give him a bushel of corn," said one.

"So will I," said another.

Slowly raising his head, Seth asked:

"Is the corn shelled, neighbor?"

"No, you'll have to shell it yourself."

Gently replacing his head, he said: "Drive on, boys, drive on."

Sprayed Paint

Approximately 85 per cent of the paint manufactured for the industrial field is applied by spray gun.

The products costed range in size from the smallest bobby pins and clock hands to the largest locomotives and ships.

Dialects

Dialects are as regional as the weather or the scenery. There are many American dialects, but no one is ashamed of his own.

Railroad Earnings

American railroads in the past 30 years have earned a return of 6 per cent in only one year—1942—and in 13 of those years the rate has been less than 3 per cent.

The Modern Touch

The farmer's rosy-cheeked, bobbed-haired daughter came striding along the lane from the farmhouse. She was clad in grimy overalls; from the pockets bulged bunches of cottonwaste and sundry tools. One hand carried a bag of tools, the other a wrench.

"Where are you going, my pretty maid?" jokingly asked the squire's son, who met her.

"I'm going a-milking, sir," she said.

The squire's son looked surprised.

"But the tools—what are they for?" he asked.

"Trouble," sighed the girl, "with that new milking machine that father has just installed in the cowshed."

How to Avoid Accidents While Preparing Meals

Home accidents are on the increase. Many of them have to do with the everyday job of preparing meals for the family. Most of them result from careless practices and work habits.

Undue hurry and fatigue are responsible for many of the injuries. Miss Gladys Ward, home management specialist, University of Illinois college of agriculture, suggests that we analyze work schedules. Allow enough time to take care of meal preparation and to do it safely. Then study habits and practices and work for improvement.

Take time to cover your hand with a dry cloth before opening a steaming kettle or roaster. Remove the cover away from you to permit the steam to escape away from your face and body. Make it a rule to use a dry padded cloth to lift any hot dish or utensil.

To avoid burns from deep-fat frying, thoroughly dry the food to be cooked. Water causes the grease to spatter, presenting a fire hazard. In addition it may cause a painful burn. Keep the handles of all pans and pots turned toward the back of the range.

Take time and care in using grinders, beaters, slicers and other power-driven appliances. Be sure the extension cord is of approved make and in good condition. Turn off or remove the plug before changing the location of a fan or heater. Check the outlet from time to time and have repairs made promptly.

Use a can opener—not a knife—to open cans. When using a knife cut away from your body.

Edwin W. Klump

WILL BE A
CANDIDATE
FOR
RE-ELECTION
TO THE
State
Senate

at the primary election September 12th as a Republican from the 20th District and is willing to stand on his past record.

Since taking the office as Senator January 1, 1947, he has attended every daily Legislative session. He is a member of the committees on elections, highways, insurance, public health and social aid, and has never missed a meeting of any of these committees.

He is in favor of fair taxes but is opposed to higher state tax for the general fund, including the proposed corporation tax, which in the end would be paid by the consumer. He is opposed to taking money from the general fund for highway purposes, as general fund money is collected through sales tax, etc. To be fair, the highways should be financed from gas and weight tax.

His record will prove that he has been in favor of helping the crippled children, tubercular patients, mental cases, blind, and old folks in need. (But he is not in favor of taxing a small home owner to help a lazy chiseler.)

Public welfare must be protected by their State Representatives and Senators, and he has tried to protect the little man; the big fellow has his lobbyist to look after his interest. For an example, the Hittle Bill, which he favored and which was passed, will stop finance corporations from charging 50%, 75% and even more than 100% interest on loans made on automobiles that were bought by the poor man. (The rich man pays cash.)

4-H Club 'Fencer' Foils Post Decay

Creosote Treated Posts Will Last Thirty Years

Terry Liston, 17-year-old president of South Carolina Four-H Clubs, has "snowballed" one well-known conservation practice into triple savings—savings of timber, money, and his own time and energy.

Thinning a woodlot on his father's farm near Smoaks to allow healthier growth of the trees, Terry ended up with 700 fine fence posts. But he had noticed that pine fence posts rotted out in the ground faster than he could grow new ones.

Presenting his problem to the local county agricultural agent, Terry learned that pressure-treating the

posts with creosote would give them a life expectancy of more than 30 years.

Although he realized that he was making an unusual request that normally could not be filled, Terry contacted a nearby Charleson, S. C., wood treating plant and asked to have his posts pressure treated with creosote, along with ties and poles which Koppers treats for railroads and utilities.

Word of Terry's attack on the farm fencing problem spread among the community with the result that other farmers have turned to use of the specially treated posts as a better farming method.

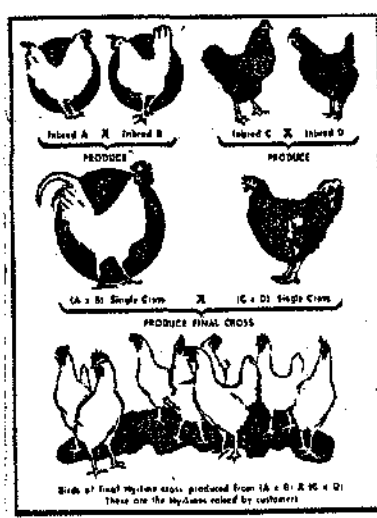

Sale of Farm Churned Butter at New Low

The U. S. department of agriculture reports the dairy farmer and his wife who used to take pride in the fine quality of the butter they churned and retailed to a favored list of discriminating buyers in town—often at a good premium above the price of "store butter"—are vanishing.

In 1947, farm butter produced for sale had dropped below the 50 million pound mark, and for 1949 it had dropped still further to about 41½ million pounds. This is less than one quarter of the 175 million pounds marketed in 1924.

In only eight states in 1949 was the total of farm butter marketed greater than 2 million pounds.

Hy-Line Chickens

The Hy-Line chicken was developed by Robert Wallace at his Doylstown, Pa., hatchery. The breed was developed by much the same formula used in developing hybrid corn.

The above illustration shows the cross breeding which produced the Hy-Line.

Nebraska Farm Families To Have Less Income

Nebraska farm families will have about 10 per cent less net income in 1950 than they did in 1949, according to L. F. Snipes, extension farm management specialist at the University of Nebraska.

He says these are the reasons: The total cost of farm production this year will be about as high as in 1949. Items needed by the farm family will be as high or higher than in 1949.

September. This management practice enables alfalfa plant to store food for winter use and in this way will have sufficient plant food nutrients to give it a good early start next spring. This past spring was a good test of what happens to weak alfalfa. Heavy weeding occurred in fields where the alfalfa was weak and on previous year's seedlings that had a slow and weak start.

Older 4-H club members who have been in 4-H for three years or more and have kept accurate records on this year's 4-H project may be eligible for county awards available through several national contest sponsors. Medals are awarded to county winners in dairy, canning, food preparation, field crops, gardening, poultry, and many other projects. Four-H members with several years' experience who have kept good records will be given the most consideration. Any member wishing to be considered in one of these contests may get further details from his leader or from the extension office.

Farmers are cautioned not to plant wheat until after the Hessian fly free date which normally occurs the latter part of September. When the date is known the county agent's office will release it. In the past, considerable damage was done by the Hessian fly to wheat crops if planted too early.

Cotton Insects

Early efforts against cotton insects included such primitive methods as carrying torches through the field at night and building fires around the borders of fields. Paris green and London purple proved of some value against several insects, but the coming of the boll weevil in the 1890's led to active research and experimentation.

Hybrid chicks are the first generation poultry produced by the combination of breeds, varieties, or unrelated inbred lines.

It is the opinion of Donald S. Leonard, state police commissioner, that Russia intends to attack the United States.

Testifying before the house ways and means committee at Lansing, Leonard opined: "Russia knows that we have no intention of attacking her. Therefore, her development of a civilian defense organization must be intended as a defense against retaliatory bombing by us after she has attacked this country."

Governor G. Mennen Williams has requested a supplemental legislative appropriation of \$392,740 for 180 additional state police.

The state legislative finance committee, mulling the governor's request for defense funds called in Dr. Albert E. Heustis, state health commissioner, for questioning about the "living blood bank." Says Heustis: "If the legislature is convinced there is no danger of an atom bomb then wipe the program off the books."

Governor Williams praised the National Guard with a hearty navy-like "well done." This came after he painted a drab picture of future world peace. "America may be headed for a generation of crises," he said.

Universal military training is on the boards again now that our pitifully weak army has been exposed for all of Asia to see. The senate armed services committee has endorsed it, but Chairman Tydings says Congress may not go along with it. He cites the desire of weary legislators who must hurry home to campaign for reelection.

Our vices become more expensive. Most of the large coffee roasting firms are raising their wholesale prices two to three cents. Again!

Less than 700 fires have been reported as against some 1,300 for the same period last year.

A Federal law giving health and welfare benefits to all school children will be passed next year is the prediction of Selma Berchardt, representative of the American Federation of Teachers. (Michigan has defeated once a mandatory immunization bill.) Another school measure gives \$300,000,000 in Federal money yearly for teacher salaries.

Charles F. Brannan calls for curbs on gambling on food prices. The solution: More restrictions on consumer credit, he says, to hold down marginal commodity market operations.

Michigan's old regular in politics, D. Hale Brake, state treasurer, has announced he will seek nomination. Since 1943 Mr. Brake, once a gubernatorial possible, has led the Republican majority on the state administrative board.

The problem children—inflation and the federal debt—have been dragged out again. The treasury department wants cheap terms and easy terms for the government. The federal reserve board asks dear money and less inflation. The treasury denies its program would mean more inflation.

Comforting to many is the re-

velation that cortisone, the new drug for arthritis, has been cut from \$95 to \$50 per gram. The drop is due to improved engineering and production methods. It's available in 6,500 hospitals.

The late one-man grand jury law may again storm the bastions of the legislature. Ex-Gov. Wilbur M. Brucker has told a senate committee that "nothing ever equalled the one-man grand jury for cleaning up bribery and corruption of public officials."

A Chrysler employee in Detroit insisted on working despite a wildcat strike. "It was a matter of principle," he told pickets, since the union had not called the walk-out. His next statement was made from Henry Ford Hospital.

Painting Wood
The same painting procedure and kind of paint are suitable for painting all native softwoods and the native hardwoods that have relatively small vessels (pores). Hardwoods with relatively large vessels require a wood filler before painting or varnishing.

New Insect Killer
Many vegetable gardeners will use a new insecticide for the first time this year. It is methoxychlor, a close relative of DDT, but far less poisonous. The new insecticide does not injure foliage or stunt growth of plants.

President's Oath
Before entering on his duties, the President of the United States must take the following oath: "I do solemnly swear, (or affirm) that I will faithfully execute the Office of President of the United States, and will, to the best of my ability, preserve, protect and defend the Constitution of the United States."

Protect Machinery
If you protect your machinery you may be protecting your life. Many accidents are caused each year by machinery that has not been kept in good condition. All machinery and even hand tools should be thoroughly lubricated and make-shift repairs avoided.

FOR
State
Senator

I have been Representative from Sanilac County for 15 years. This experience should be beneficial to the 20th Senatorial District.

My friends signed petitions for me to run for Senator from Tuscola, Sanilac and Huron Counties. Under a long time agreement, in order that one County could not gain any advantage over another county, the Senator has been elected as follows for four years or two terms each:

TUSCOLA CO.	HURON COUNTY	SANILAC CO.
1919 to 1923	1923 to 1927	1927 to 1931
1931 to 1935	1935 to 1939	1939 to 1943
1943 to 1947	1947 to 1951	NOW IT IS SANILAC COUNTY'S TURN

For 10 years I have led a fight as Chairman of Roads and Bridges Committee for MORE HIGHWAY REVENUE. I have fought for more weight tax on HEAVY COMMERCIAL trucks that are destroying the Highway System of the State; also brought to light during the last session of the Legislature an instance where one truck was caught with more than 25 tons OVERWEIGHT on one load.

Have opposed RE-APPORTIONMENT of the Legislature that would take away any representation from small cities, towns and rural districts and place it in "large city" counties largely controlled by radical thinking labor leaders, which is not good or sound government.

ON THIS BASIS I SOLICIT YOUR SUPPORT AND VOTE AT THE PRIMARIES, SEPTEMBER 12TH, But VOTE! VOTE! VOTE!

LYNN SAYS:

Put Wild Greens to Use

As Cooked or Raw Vegetables
Wild greens can be useful as a vegetable. They're cooked like other greens and are delicious.

Strong-flavored wild greens are better when parboiled for two or three minutes in lots of water. Drain and cook as for other greens. For cooking greens, use lightly salted boiling water, and cook until leaves just wilt and greens are tender. Season and serve.

Standard baseball bats are made from ash wood.

This cherry mousse made in a mold is a cool invitation to lazy summertime appetites. Made of smooth, whipped cream and sprinkled throughout with tempting bits of tart red cherries, this dessert is bound to please.

LYNN CHAMBERS' MENU

*Oven-Fried Chicken
Cranberry Sauce
Mashed Potatoes
Cream Gravy
Sliced Cucumber-Tomato Salad
Carrot Sticks
Radishes
Celery
*Coconut Ice Cream Balls
Chocolate Cup Cakes
Beverage
*Recipes Given

Brown chops thoroughly without added fat. Add salt and water; cover and cook for 30 minutes. Remove chops; add dry ingredients, liquid and green pepper and pineapple, cut in pieces. Simmer until thick stirring constantly. Add chops and let simmer for 10 to 15 minutes.

Cherry Mousse

(Serves 6-8)
1 No. 2 can sour red cherries
1/2 cup sugar
4 drops red food coloring
1/4 teaspoon salt
2 teaspoons gelatin
1/2 teaspoon almond extract
1 1/2 cup heavy cream, whipped
Drain cherries and grind them medium fine; combine with sugar and food coloring. Heat to boiling and cook one minute. Remove from heat and add salt. Soften gelatin in one tablespoon of juice, dipped from ground cherries, then stir into hot cherry mixture until gelatin is dissolved. Chill until cherry mixture is thick, then fold in whipped cream lightly but thoroughly. Turn immediately into cold refrigerator tray and freeze at lowest temperature until firm. Return to normal temperature to let mousse mellow.

Menu III

Chilled Apricot Nectar
Sea Food Salad in Tomato Cups
Potato Chips
Pickle Fans
Coconut Ice Cream Balls
How to prepare: Chill apricot nectar and all salad ingredients overnight. Ice cream balls may be made in advance if they can be frozen in refrigerator.

*Coconut Ice Cream Balls
(Makes 12)
2 cups moist coconut
3 pints vanilla ice cream
Food coloring (red, yellow or green)

Place coconut in glass jar and add whatever color food coloring is desired. Cap jar and shake vigorously until color is distributed evenly on coconut. Scoop ice cream into balls, two inches in diameter. Roll in coconut until well coated. Place in freezing tray or freezer until serving time.

Seafood Salad

(Serves 6)
1 can tuna fish, crabmeat, shrimp
2 tablespoons French dressing
1 cup diced celery
1/2 cup diced cucumber
2 tablespoons chopped radishes
2 tablespoons lemon juice
1/2 cup mayonnaise
Salt and pepper to taste
Flake tuna fish and shrimp; remove black line from shrimp. Mix all seafood together and add French dressing. Marinate for 15 minutes. Add remaining ingredients and toss lightly.

If the wild green hunt does not yield much, you might try combining several different kinds to give enough for a vegetable.

Wild greens will wilt quickly. Plan to use them as rapidly as possible to get them at their best, and for their vitamins and minerals too. Discard wilted and damaged leaves, and cut off roots when you prepare them for use. Lift out of water several times to dislodge all dirt.

Irresponsible youthful drivers seldom improve with age.

Electric Hired Hand

Electricity can lighten farm chores and greatly increase productivity. How it's done is shown in a new color film, "Electrified Farming" which has been released by General Electric.

Crop dryers, barn cleaners, milking machines, water pumping systems, electric brooders, and ventilating fans are cited as examples of the widening use of electricity in production on modern farms.

Soybeans Important Cash Crop in Minnesota

Soybeans as a cash crop in Minnesota responded to high prices during the war and post-war years. The acreage harvested for beans increased from 30,000 acres in 1939 to 920,000 in 1947 and then dropped back to 709,000 in 1949. Most of the increase occurred from 1945 to 1947.

In 19 counties 5 per cent or more of the tillable land was in soybeans harvested for beans in 1949.

Water Reserves
During the recent war, more than 300 war plants and installations had to forego "ideal" locations because of insufficient water reserves.

Being a slave to bad thinking is on the road to being a slave to bad habit.

Drain Wet Spots
Wet spots in a field are a nuisance. Through tile drainage they can be dried up so that all the field can be plowed at the same time.

Joseph Sweeney invented the banjo, so called because he was dubbed a one-man band.

Beef Herds
In average beef herds, less than one set of identical twins occurs in every 2,000 births.

WARDS RETURN FROM TRIP TO WASHINGTON, D. C.

Mrs. William H. Ward accompanied her daughter, Miss Caroline Ward of Flint, on a five-day Drake Tour of Washington, D. C., and the Annapolis Naval Academy last week.

They visited Mt. Vernon, Arlington National Cemetery, the Tomb of the Unknown Soldier, the Memorial Amphitheater and Old Georgetown. They also saw Christ Church which counts George Washington and Robert E. Lee among its early members.

At Annapolis they visited the chapel where John Paul Jones is buried as well as training buildings and dormitories.

Humane Act

A farmer, on his way to town in his wagon, overtook a peddler with a heavy pack on his back. The kind-hearted farmer pulled up his horse and offered the wayfarer a ride, which was gratefully accepted.

After a while the farmer noticed that the peddler kept his pack on his back. "Why don't you relieve yourself of that load, and put it in the back of the wagon?" he asked. "Well," said the peddler, "you have been so kind to me, and I noticed that your horse did not seem particularly strong, so I thought I would take some of the load myself."

KNEW HER GUESTS

Two travelers arrived at the hotel and were shown a rather dingy room.

"What," said one, "does this pigsty cost?"

Promptly the proprietor replied: "For one pig, two dollars; for two pigs, three dollars."

No Overtime

The boss came in early and found his bookkeeper kissing the stenographer.

"Is this what I pay for?" he asked.

"No, I do this free of charge," replied the bookkeeper.

The Hard Way

"Hard work never killed anybody," said the father.

"That's just the trouble, Dad," returned the son, just out of college.

"I want to engage in something that has the spice of danger in it."

Mean Man

"Is this the Humane Society?" inquired the feminine voice over the telephone.

"That's right, lady; what's your problem?"

"Well, you must do something! There's a book agent sitting in the tree in front of our house teasing my dog!"

What Else?

"What is cowhide chiefly used for?" a teacher asked his class one day.

A boy raised his hand. "I know, sir. To keep the cow together, sir," was the reply.

Mud in Your Eye

"My father always proposed a toast before he disciplined me."

"That's funny. What was 'it'?" "Bottoms up."

One way to send soaring prices down might be to send our hoarders up.

Family Reunion of Pettinger Clan

A family gathering of more than usual interest assembled on Sunday, Aug. 20, at Canastota Park, Sarnia, Ontario, when nearly 100 relatives of the Pettinger family came from points in Ontario and Michigan, as well as from Quebec and Alberta.

Some such annual gathering as this had been contemplated for some time, but the arrival of Mr. and Mrs. William Pettinger from Calgary, Alberta, to visit their relatives on both sides of the border, was a suitable occasion for this event.

A potluck lunch was served at noon and after all had been served, the afternoon was pleasantly spent reminiscing over many things of family interest.

Among the guests, the oldest members were Mrs. Sarah Pettinger, Tillsonburg, Ontario, and Peter Pettinger of Niagara Falls, Ontario. Other members were Mr. and Mrs. John Pettinger and family, Courtland, Ontario; Mr. and Mrs. Charles Marshall and family, Tillsonburg, Ontario; Mrs. Lenora Cowan and family, Tillsonburg, Ontario; Mr. and Mrs. Cecil Pettinger and family, Courtland, Ontario; the family of the late Mr. and Mrs. James Otis, Ontario; Mr. and Mrs. William Pettinger, Calgary, Alberta; Mr. and Mrs. Warren Nugent and family, Bad Axe, Michigan; Mr. and Mrs. Cyrus King, Argyle, Michigan; and Mr. and Mrs. Chester Pettinger and family, Cumber, Michigan.

It is planned to make this event an annual affair.
