It was speed against power Tuesday night for the Cass City Softball League post season playoff championship and speed proved to be the most potent weapon in the chips down battle

that Baldy's won, 8-5. But there was glory enough for both clubs in the final game of the season as Deford, the regular season's champions, smashed back after a defeat by Ellington to hand Baldy's their first loss of the play-offs Friday, 10-1, and keep the capacity crowd on their feet until the final out in the last inning Tuesday before bowing to the young gas team.

Both teams had their outstanding players and both looked every inch a champion in the crucial game. For Baldy's, Elwyn Helwig pitched a fine game, while Harry Hartwick lead both teams in hitting with three safetys in four trips to the plate.

But the game was won by the speed of Baldy's. By bunting and running, the speedsters racked up four runs in the third inning and Deford was never able to overcome the margin.

The gasmen jumped off to an early lead in the first inning with just one hit. Koert Lessman, who started on the mound for Deford, an into trouble by hitting two batters and setting the stage for the single that put Baldy's into a ead that they never lost.

Deford tied the game at two all pefore Baldy's unleashed their bunting attack to go ahead 7-2. Although apparently beaten, Deford bounced back with hits and a couple of errors by Baldy's shortstop to close the gap to 7-5, going into the top half of the sixth inn-

In their half of the seventh, Baldy's added an insurance marker on a single and an error by Deord's left fielder.

according to Campbell.

According to the Striffler-Benkelman Broadcast distributed to members of the two clans at the annual reunion of the two families on Labor Day, there were 11 marriages, 21 births, and four deaths during the year just closed. The publication which has entered its 14th year contained records of high school and college graduations, service news and other items of interest regarding the families. The editors, Mrs. Wm. McKenzie and Mrs. Harry Falkenhagen, were presented beautiful bouquets in recognition of their efficient services.

The clans found the recreation park in Cass City an ideal spot for their gathering. Rev. Roy J. Striffler said grace previous to the serving of the dinner at noon, Lawrence Buehrly, president, conducted the business session, and Mrs. Wilma Fry read the secretary's minutes.

Miss Jessie Fry conducted a memorial service for Willard Mc-Kenna, Mrs. George Kolb, Mrs. Wm. D. Striffler and Wm. Moreton, who had passed away during

Awards were made to John A. Benkelman, 95, the oldest man present; to Mrs. S. G. Benkelman, 90, the oldest woman in attendance; to Eric Esau, son of Mr. and Mrs. Jack Esau, the youngest child; and to Mr. and Mrs. Glen Benkelman of Cleveland, Ohio, who traveled the longest distance.

Eighty-six were present. The following officers were chosen: President, Rev. Roy J. Striffler of New Baltimore; vice president, B. A. Elliott, Cass City; and secretary-treasurer, Delvin Striffler, Caro.

Ideal Enlistment

Have you ever wondered why the Army found a 3-year enlistment period ideal for its needs instead of, say, a 2-year or a 4-year period? The Army enlistment period has varied through the years, but three years has been found to be an equitable period both for the man enlisting and for the Army. On a three year enlistment, the Army has found that the first year is spent in making the man a soldier, the second year it begins to break even on it's investment in him, and the third year he is pulling his load as a Regular Army man.

Modern Kitchen Snooper

"Black light", that eerie but appealing illumination used with fluorescent murals on the walls of modern theaters, is being turned into a super-detective on culinary cleanliness. General Electric reports that the New York City health department is experimentally using black light to inspect cooking utensils, dinnerware, milk containers and other kitchen equipment. The reason is that when a pot or pan is treated with a special fluorescent dye, the tiniest particle of unremoved food will absorb the dye and reveal itself under the black light.

Farmer Says Pond Keeps Kids at Home Increases Livability Of Modern Farm Home

C. H. Drew reasons that improving the livability of his farm and keeping the kids at home is just as important as building up the soil's fertility. He pays close attention to

Drew says one of the best investments he ever made was the 21/2 acre pond on his 160-acre farm near Huntington, Indiana. He hired a man with a bulldozer to dig it out. The pond is 8 to 12 feet deep at the deepest point and is fed by water draining off an 80-acre field. "The pond is entirely for recre-

Fringed by trees, the shore of the pond makes a beautiful picnic site. The family uses a big stump for a table for Sunday night suppers. The area around the pond is a wildlife preserve.

ation", he said. "It pays off in making a better family life. It increases the number of activities my wife and I and the youngsters can enjoy together. It encourages our children to stay at home."

Every spare moment during the summer, the children are swimming, boating or fishing. Their friends like the pond, too. Sometimes as many as 30 kids from the neighborhood come over to join in the fun. In the winter the pond is fine for skating.

Drew stocked the pond with bass and blue gills. Members of the family and their friends often pull out good catches.

Have you purchased or ordered your certified seed wheat? Yorkwin is the most popular of the recommended varieties in this area. Other recommended varieties are Cornell 595, Vigo, Fairfield, and Thorne.

4-H Canning, Freezing Important Club Projects

Two important 4-H club projects emphasizing home preservation of food are being carried out this year in 47 states. They are the 4-H canning and frozen foods programs, in which more than 217,000 4-H members throughout the nation participated in 1950. The programs are supervised by the cooperative extension service.

Putting up homegrown products the objectives of these projects. Another is to help cut food costs.

As incentives for outstanding records of achievement, county canning winners receive medals of honor. State 4-H champions get an educational trip to the National 4-H Club Congress in Chicago in November. These awards and six national college scholarships are provided by Kerr Glass company.

Alcohol Check

The most common methods of determining a person's blood alcohol concentration is to chemically analyze his blood, urine, or breath. The amount of alcohol in the urine or breath directly parallels the amount of alcohol in the blood, many scientists believe, and therefore, from the amount of alcohol excreted through the kidneys or lungs, the concentration of alcohol in the circulating blood can be determined accurately.

THE CONSISTEN ADVERTISER **GETS THE** BEST RESULTS

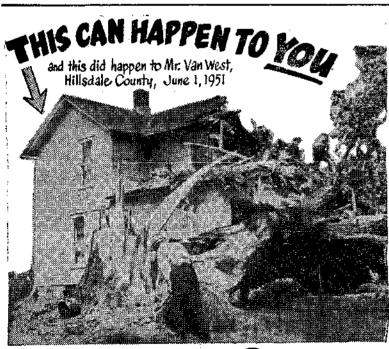

It pays to advertise consistently! Regular insertions add to the prestige and reputation of the advertiser, for they indicate that he has day-in-andday-out values for Cass City shoppers—values that are important enough to be publicized. Contrasting Flavors, **Textures Will Keep** Menus Interesting

A MEAL THAT'S LIVELY with color, exciting because of some soft foods, some crisp and crunchy, some tart and spicy while others have a subtle sweetness can keep appetite interest high.

Homemakers who want to keep their families looking forward to mealtime no matter what the weather plan menus with such rules in mind. Conse-

It's fun to see what ingenuity can be used in combining foods for interesting menus. Here's a broiled cheese and rice combination that is proud to appear at any dinner table after a quick trip to the broiler. Dessert and salad courses are combined in one with a watermelon salad bowl, which offers fresh fruit with its crisp texture, an excellent contrast to the soft-textured foods of the main dish.

Brolled Cheese-Rice Platter (Serves 4) 1% cups cooked rice 1 cup chopped, cooked, drained spinach

1½ cups cheese sauce

4 slices tomato Arrange rice on 10-inch oven platter. Pour half of cheese sauce over rice. Cover with spinach, Pour remaining cheese sauce over spinach. Place slices of tomato on top. Bake in a hot (450°F.) oven, about 10 minlutes or until heated. Broil, 4 inches from heat, until cheese is lightly browned, about 2 minutes.

Watermelon Bowl Salad

14 watermelon 2 cups cantaloupe balls 1 cup pineapple wedges 1 cup blueberries

Cream cheese French or other salad dress-

With a ball cutter, remove the center from half of a short, thick watermelon. Toss the watermelon balls together with the cantaloupe balls, pineapple wedges and blueberries. Place the watermelon bowl on green leaves

range groups of cream cheese cubes. Serve with French or other dressing.

A MENU THAT MATCHES the season and is full of contrast in texture and color is a broiled crabmeat and tomato sandwich. Pair this with green cabbage salad put together with sour cream dressing. A tangy lemon dessert completes

the menu: Broiled Crabmeat-Tomato Sandwich

(Serves 4) 8 buttered slices of bread (crusts removed)

1 6-ounce can crabmeat 2 medium tematoes

Cheese sauce

Place one slice of bread in the bottom of each individual casserole dish. Spread with flaked crabmeat. Top with tomato slice and another slice of bread. Pour hot cheese sauce over each sandwich. Place under broil and broil for 7 to 10 minutes or until bread is heated through and nicely browned. Serve immediately.

Liver Loaf slices nicely and has an interesting texture, as well as good color contrast when teamed with tiny pickled beets. Any type of liver may be used for this richly nutritious and appetite-satisfying main dish.

LYNN SAYS: Here are Foods For Out-of-Doors

When you're eating out, fix kabobs, those tempting tidbits on skewers. Cook them over coals, or broil them in the oven before bringing out to eat.

Sausage makes a tasty kabob when you form the meat into balls and alternate with chunks of apples

and cubes of onion. Oysters rolled in bacon make an excellent first or main course when they're broiled on skewers.

*Recipes Given

You may serve a half watermelon filled with pineapple, blueberries and melon balls as a salad-dessert for dinner, or as a main course salad for a luncheon. Fresh fruit flavors and colors in this type of salad offer cool satisfaction for warm day

L IVER LOAF is a nutritious menu brightener made of ground liver seasoned with a sly hint of onion and blended with egg and milk to come out of the oven a smoothly-satisfying meat loaf. Serve with pickled baby beets and peanut muffins for a menu that's thrifty and properly contrasted.

*Liver Loaf (Serves 6) 1 pound liver 3 cups enriched bread cubes 1 cap milk

11/4 teaspoons salt ¼ teaspoon pepper 2 tablespoons minced onion

Pour enough boiling water to cover over liver and let stand for 10 minutes. Remove from hot water and put through meat grinder, or

Barbecue sauce may be brushed over kabobs before broiling. A simple sauce includes ¼ cup chili sauce, 14 cup lemon juice, 2 teaspoons each grated onion and prepared mustard.

Jason Kitchin Tells About Vacation Trip

Los Angeles, Calif. Aug. 27, 1951

Cass City Chronicle Cass City, Mich.

Five years ago we made a trip through the west covering 10,350 miles and lasting ten weeks.

Our letters which were published in the Chronicle brought many words of appreciation, so thought we would again try to share some of our experiences with our friends.

This trip was not planned so far in advance and will not be so long either in miles or time but so far has been a very pleasant one.

When our son, David, wrote home to his wife asking her to meet him in California, we suggested that we might take her out. On the same day we made the suggestion he wrote another letter saying he thought Dad and Mom would bring her if she would ask

On Aug. 19 we left home at 9:30 and from Imlay City we followed M 21 across the state to Holland. Part of this was new road to us. The shore drive south from Holland on M 31 was rather disappointing as practically all the way

We stopped for breafast at Dyer, Ill., and again in Shabbona, Ill., to get some cards and take pictures of the statue of "A Noble Indian from going to war, sent his son in one direction while he went another warning the whites and thereby saving many lives.

Shortly after it began to rain and the rest of the day we drove through rain or where it had fallen. Skirting Chicago on the we crossed some twenty R. R.'s and the Chicago Drainage Canal. Crossing the Mississippi River at Clinton, we drove on thru Cedar Rapids and as far as Ames, Iowa, where we turned north on 69 to 20, west on 20 to Webster City then north to Eagle grove where we had supper with wife's Uncle and Aunt, who have celebrated their fifty-fifth anniversary. The night was spent on an lowa farm with another aunt.

Next to corn, soy beans were most in evidence and we saw some wonderful crops of them.

Today there are many trees growing in Iowa and eastern Nebraska, but each group marks either a stream or a farm home where they have been planted on the north and west as windbreaks. We were also interested in the growth of the trees which were planted after the dust bowl experience of the west following World War I. These were planted in strips perhaps half a mile apart and today have reached a size where they are very effective.

We noted how the corn became maller and smaller as we went farther west in Nebraska and suddenly as we topped a hill about 115 miles west of Sioux City the farm lands were gone and treeless land with some cattle pasturing on the scanty growth lay ahead. Later we came to flat lands where there were homes but the only crop was hay which was being put up with bullrakes and overshot stackers into hundreds of small stacks. Here, too, there had been an unusual amount of rain as we saw hay stacks setting in ponds and saw them raking hay right out of

the water. If you are looking for things long the road you see some amusing things such as a lady fishing in "Dry Creek" and E. Self,

Wheeled Feeder Boxes

Caring for chickens housed in coops is simplified with feed boxes like the one shown above. It has small wheels at one end and can be pulled out for filling without opening a door through which chickens might escape. The boxes are made like drawers with the front ends projecting beyond the sides so they cannot be accidentally pushed beyond the openings in the coop sides. Wheels are attached to the rear ends on nail axles and rest on the bottoms of the coops.

Factory Wages Buy More

An hour of work in a factory will buy, on the average, a larger quantity of nearly all kinds of food than it would a generation ago, according to the U.S. department of agriculture.

Department figures on food prices and factory wages for 1929 show was 4:30 but found later we were that the average wage for an hour in Mountain time so actually it of factory work would buy 6:4 was 3:30. Drove one hundred miles loaves of bread. Now it would buy
