MAKING PROGRESS-Work on the addition to the sewage disposal plant in Cass City is proceeding on schedule, according to persons in charge of its construction. The big tank is the digester which is expected to eliminate the village's disposal problems. The pit in the foreground will house the controls and a building will also be erected at this spot. Work on the project is expected to extend into the winter months. The village hopes to have the plant in operation in January, 1956.
