Mrs. Sam Blades Retires Next Week

Mrs. Sam Blades, 70, has announced that she will retire when the Wickware rural school closes Wednesday, May 23, after teaching 28 years in rural schools in Tuscola, Huron and Sanilac counties.

Mrs. Blades does not look her seventy years and admits that retiring was a most difficult decision for her to reach.

She would very much have liked to return to the Wickware school for another year where both the school board and the pupils were anxious to have her. However, due to the health of her husband and herself, she decided to retire to their farm home.

Mrs. Blades' teaching career dates back to 1905 when as Miss Maud McCrea she started teaching 47 pupils in Arbela Township in Tuscola County.

She is the mother of three sons and 12 years after her marriage she returned to teaching. While at the Abke School in Columbia Township, Mrs. Blades was in charge of 57 pupils and at one time at the Stone School in Sanilac County she had only nine.

Her many friends wish her many years of enjoyable retired life.

Wheat Acreage Can Be Adjusted Until June 10

Farmers with a 1956 wheat acreage in excess of allotments may adjust their acreage until June 10, according to Charles B. Eckfeld, Tuscola County ASC manager.

Excess wheat may be plowed under as green manure, pastured or cut for hay.

Farmers with allotments can grow 15 acres without being subject to quota penalties.

Regardless of the size of the allotment, Eckfeld emphasized, wheat from any farm on which the allotment is exceeded is not eligible for price support.

Corn Support Price Set at $1.50 Bushel

Charles B. Eckfeld, county office manager of the Tuscola County ASC Committee, announced that the base for minimum price support for 1956 crop corn will be $1.50 per bushel.

The support price is for farmers who stay within their corn acreage allotments. The $1.50 per bushel reflects 86.2 per cent of current corn parity.

The support program will be carried out through Commodity Credit Corporation loans and purchase agreements. These will be available from harvest time through May 31, 1957.

From the Editor's Corner

Of all the weeks that are announced and promoted each year, none are proving more successful than Michigan Week that starts Monday in the state.

Probably the one feature that has done more to promote it than any other is the mayor's exchange. It has constantly received reams of publicity. This year Michigan Week will receive national publicity over radio and television.

The purpose, of course, is to call attention to Michigan as a desirable location for industry, a good place to live and a state with outstanding tourist attractions.

With all the senseless weeks fostered on the public each year, it is welcome to have one that is effective and well directed.

In Cass City

Disaster Warning System Inaugurated

The village of Cass City has set up a disaster warning system for residents that is now in effect, authorities announced this week.

The details were arranged at a meeting of the village council, Elkland Township Fire Department, Elkland Supervisor Evard Rawson and the Civil Air Patrol.

The authorities called attention to the difference between an alert and a warning. An alert means that conditions are favorable for a tornado . . . citizens must depend on radio and television for this news.

A warning means that the disaster has been sighted and is expected to hit in the area.

In Cass City plans have been laid to have a three-man crew from the fire department on duty at all times during an alert. There will be constant contact with the police through the use of radio.

Also on duty during an alert will be the Cass City Police Department.

Authorities say that panic is the worst hazard during a disaster. In the case of tornadoes, there are several procedures that may save your life.

At home, seek shelter in the southwest corner of your basement unless you live in a cinder block home or have no basement. Best bet for survival then is to take shelter under a sturdy table in the southwest corner of the first floor.

Village authorities have listed the procedure to be used in Cass City during a tornado warning. They suggest that residents clip this information and keep it for reference. This procedure will be used only during a warning and not during an alert.

The disaster warning will be three blasts of the village siren with intervals of 10 seconds between each blast.

The all clear signal will be a single blast three minutes long.

If power fails, the sirens of the Elkland Township Fire Department trucks will be used.

If the warning sounds, do not use your telephone except in a case of emergency.

If you should sight a tornado while driving, turn down the first street away from the twister's path.

Theaters, field houses and similar structures are especially dangerous because ceilings are high and not as well supported as other buildings.

If you are in the open and see a tornado, seek a ditch or depression. Both at home and in public buildings, stay away from windows.

Merchants Open 3-Star League Play Sunday

The Cass City Merchants will open the baseball season at Vassar Sunday when the 3-Star League opens play for the summer. Their first home game is scheduled for Sunday, May 27, with Mayville.

The team is expected to have only two practice sessions before the first game as weather has cancelled practices scheduled.

The team is expected to have good power, paced by the return of Carl Kolb, Joe Kilbourn, Lee Hartel, Chet Dorland, Eli Holes, Eugene Kloc and the return from service of Bob Alexander.

Pitching is expected to be the club's big problem. Only Gerald Whittaker and Irv Claseman are available for mound duty now. The club is looking for strength on the mound. John Ellis, a returning serviceman who is pitching for Central Michigan College, has indicated that he is interested in playing.

Defensively, the club looks good in the infield, Claseman said, but is badly in need of a pair of good glove men in the outfield.

Coach Claseman said that the club is again struggling with finances.

Champion Tells Rotarians History Of Guns Tuesday

The history of firearms was explained Tuesday noon to Cass City Rotarians by James Champion, speaking at the regular noonday luncheon of the club.

Mr. Champion explained that gunpowder was first invented by the Chinese in about 1200 and the Chinese matchlock was the first accurate gun.

Improvements on the matchlock came with the flintlock gun. Following this was the percussion type gun. The next improvement was the metallic cartridge, the basis for today's firearms, he said.

Mr. Champion is an antique gun collector and brought various guns and ammunition to show Rotarians.

Included in his collection was a matchlock estimated to be 300 years old, the famous Colt used in the West, a Winchester 73 and a Sharps 44. The Sharps, he said, was the gun that was used by hunters to slaughter the buffalo herds in the West.

Most of the older guns, he said, have an effective range of about 50 feet. All of the guns are in firing condition but are seldom used because of wear to parts.

In the business meeting, the club voted to have square dancing along with modern dancing at the club's first annual "Spring Frolic," May 29.

Over 200 Students In School Operetta

Over 200 students in the fourth, fifth and sixth grades participated in an operetta, "Cinderella's Slipper," that was to be presented at the elementary gym Thursday afternoon, May 17.

Hawks Tighten Grip On Conference Lead

Cass City strengthened its hold on first place in the Thumb "B" Conference with a 9-2 victory over Sandusky, Thursday, May 10. The Hawks are undefeated in league play.

Cass City posted enough runs in the second inning to win the game when they scored three times as Kenny lost his control and walked three men, coupled with a pair of base knocks by Perry Hoagg and Ron Behr.

Bob Martus hurled another good game for Cass City as he limited the Redskins to one run in six innings. Behr was touched for a pair of hits and a run when he pitched the final inning.

Sandusky scored a run in the second on an infield hit and two errors as Benny Lopez dropped two fly balls.

The Hawks picked up a single counter in the third on a hit by Dick Hillaker and an error by the Sandusky shortstop.

The Hawks turned the game into a rout in the fourth with three runs on hits by Jerry Dearing and Bob Walpole, a walk and error and hit batter.

In the sixth, hits by Hillaker, Walpole and Hoagg counted the final Hawk runs.

Martus has now pitched 49 innings. He has fanned 69 and walked 10 while posting a 6-1 record.

A scheduled game with Vassar was washed out and will be played Monday at the Municipal Park. Thursday the Hawks were to have played at Marlette.

Non-conference tilts also remain with Kingston and Unionville.

BODY BY FISHER

The meaningful emblem of Body by Fisher

When you see "sterling" on silver you know what it means—solid silver, all the way through.

And when you see the medallion "Body by Fisher" on an automobile it means much the same thing—quality all the way through, in things *unseen* as well as on the visible, gleaming surface.

The significance of this emblem cannot be tested on the showroom floor. Its meaning was not built up in a day but only after long years in which owners learned that "Body by Fisher" was a veritable symbol of solid, enduring satisfaction.

Only one who has owned a Chevrolet for several years can fully know the deep sense of satisfaction this emblem pledges. It is the warranty of an inner soundness that your eye or your touch cannot test. And only Chevrolet in the low-price field is entitled to wear the small, proud plaque that proclaims "Body by Fisher."

CARS Like My Line

By H. M. Bulen

There's a brand-new model automobile out this year but I'm afraid it's not worth waiting for.

You can't buy it, we don't sell it, and I don't think you'd want it anyway.

The U. S. Army is the owner of every one of these new models—which have been designed to eliminate the mule and the horse. It's taken two or three wars to find a four-wheeled vehicle that can outperform a four-legged animal, but at last they've done it.

This strange vehicle is a large, flat platform that covers all four wheels. It has no driver's seat and no cab.

The driver, if that's what you call him, has to walk. He ambles along behind the contraption, holding on to the steering wheel at the back of the right hand side.

This gas-driven mule hefts along its load at about one mile-an-hour. If you want to turn, it will dart off in an instant because all four wheels turn at the same time. This gives it a turning circle of 18 feet, compared with the turning circle of 40 feet or so with any ordinary car.

And if you want to repair it, you just turn it upside down, special valves keep the gas and oil in their proper place.

If this is the car you want, I'm sorry. But if it's sound reliable transportation going slightly faster than one mile-an-hour, there are no cleaner cars, no cars more thoroughly inspected for year-round service than at our lot.

Perhaps you've noticed that the population of our Used Car Lot has been decreasing of late, which makes us very happy. We like to think it's because we give people their "Money's Worth" and stand back of what we sell. We know many are satisfied because they tell us when they come back the second, third or even fourth time. We still have a fine selection of "OK Used Cars and Trucks." Won't you give us a chance to turn you into one of our satisfied customers? Our Sales Office is open till 9:00 p. m. every day (except Thursday).

The bridegroom is the son of Mrs. Eunice Doyen of Deford.

Mrs. Douglas Don of Caro was the vocalist for the Mass and sang the hymns "Ave Maria" and "On This Day." The double-ring vows were spoken before Rev. Fr. Glenn Wm. Cronkite. The bride and groom left a bouquet of flowers at the Virgin Mary altar.

The bride, given in marriage by her father, chose a traditional white waltz-length gown of imported lace with tiers of lace down the sides and panels of lace extending down the front and back of the skirt. The gown had a strapless bodice with a fitted lace jacket, wrist point sleeves and a mandarin collar dipping to a point in the back, matching the point in the lower part of the jacket. A small pillbox of net adorned with irridescent pearls and sequins held the illusion net finger-tip, over-the-face veil. She carried a cascade bouquet of white roses centered with pink roses.

Acting as matron of honor for her sister was Mrs. Alger Freiburger of Cass City. John Downing, brother of the bride, was best man. The other attendants were Patrick Doyen of Akron and Thomas Doyen of Detroit, brothers of the groom, who wore black tuxedo suits. Paul Downing of Caro and Cecil Doyen of Bay City, uncle of the groom, seated the guests.

Following the ceremony, a wedding breakfast was served at the Gagetown Hotel for 30 members of the immediate family.

For her daughter's wedding, Mrs. Downing selected a beige suit with green accessories and Mrs. Doyen, the groom's mother, was attired in a princess style print dress with black and white accessories. Both wore corsages of yellow roses.

When the newlyweds left on their trip to Daytona Beach, Fla., Mrs. Doyen was wearing a brown silk dress with white polka dots and a matching coat lined with brown polka dot silk with brown and beige accessories. She fastened the pink roses from the center of her bridal bouquet to her coat.

The bride graduated from the Cass City High School with the class of 1951 and is a graduate nurse from the Mercy Central School of Nursing in Bay City. She is employed in the office of Drs. Nigg and Miles in Caro.

Not Too Late to Plant Sugar Beets

Recent rains have delayed almost all farming operations, so states Alfred Ballweg, Tuscola County agricultural agent.

Farmers can be rightfully concerned over the delay in planting of the small grains and sugar beets. However, Agent Ballweg cautions sugar beet growers not to arrive at a faulty conclusion that it is getting too late to plant sugar beets.

"It is true enough," he stated, "that in comparison with last year, when 79 per cent of the crop was planted by May 11, we are much behind schedule."

However, he stressed last year was an exceptionally early spring. In terms of both a long time average of 14 years from 1942-1955 and the five year average from 1951-1955, less than 40 per cent of the sugar beet crop was planted at the comparable period in the past.

To date 21,575 acres of the sugar beet crop has been planted. Percentage-wise this is not far short of the long term average. It is almost twice as much as was planted in 1954 when only 15 per cent of the crop was planted at this time, and considerably ahead of 1953 when only 17 per cent had been planted.

In 1951 the first beets were planted the week of May 1 and only 2,740 acres were planted by May 11. During 1952 the first beets were planted the week of April 24 with 3,089 acres planted by May 1. Again in 1953 only 803 acres were planted by May 7. On May 6, 1954, 1,468 acres were planted.

Agent Ballweg states—"improved planting equipment permits growers to plant more beets in a shorter space of time than ever before."

Use Timothy in Thin Alfalfa Stands

An alfalfa stand that's too good to plow up and too thin to leave is a problem that hits many Tuscola County farmers every year. But a farmer can seed timothy in the spring or in the fall to do a patch-up job, points out Don R. Kebler, assistant county agricultural agent. Michigan State University tests show that the patched-up alfalfa gives up to one ton per acre hay increase over the thin alfalfa. The seed needed very little loose soil. Dragging with a spike-tooth harrow was as satisfactory as using a spring-tooth. Such patching up with timothy keeps out the weeds as well as increased yields.

Bromegrass was tested, too, for the patch-up job, but it was too slow in getting established in thin alfalfa stands to make it worthwhile. Red clover will establish itself but it is not considered as good as timothy.

Bulletins Available For Flower Gardens

Many cultivated and wildflowers are beginning to appear in our flower plots, fence rows and wooded areas now that spring has finally arrived.

Planning flower beds, arrangements and selection of annual, biennial, and perennial blooms for the home flower garden are fun, reports Bill Muller, county 4-H club agent. He also states that boys and girls have a very good opportunity to study and identify wildflowers in the state land areas that cover much of Tuscola County.

Bulletins on flowers, wildflowers and home landscaping are available to boys and girls enrolled in these summer 4-H clubs.

Additional information on summer 4-H club projects can be obtained from the 4-H club office in the Tuscola County courthouse.

Michigan Mirror News Briefs

New pep is evident among state GOP leaders. It developed at the convention in Detroit when the lurking fear was stilled that Republicans would enter the fall campaign without a leader whom they felt could engender solid support.

The uneasiness gave way to a show of enthusiasm, the likes of which has not been seen in recent year.

* * *

"A man who gets things done." That's the way Detroit's Mayor Albert E. Cobo will be presented to voters of Michigan. Republican leaders are sure that Cobo's record of accomplishment in the Motor City will appeal to outstate citizens, and that their candidate can be sold as the sound, solid administrator he is.

* * *

Party leaders are wondering what to expect from and what to do with the other candidate. He is Donald S. Leonard, who lost to Gov. G. Mennen Williams in 1954 by 250,000 votes. Leonard announced for the contest several months ago, and seemed outwardly unimpressed by Cobo's entry into the campaign.

Though Leonard's presence in the political picture makes an obvious problem for the GOP, there seems little pressure to remove him. There were reports that he was asked to run for Congress in order to clear the field for Cobo. But Leonard stated: "I'm in the race to stay."

* * *

At least it shows we've got no boss in the Republican background, stated a GOP leader, referring to the Leonard situation.

* * *

Republicans are also happy about the Governor's "report to the people" which they considered thinly veiled campaign trips. They feel that Democratic machinery is somewhat out of gear as a result of their efforts, and that they have scored a moral as well as strategic victory. Victories of this type have been relatively few in the past, which makes the present situation all the sweeter.

* * *

Democrats are biding their time. Apparently concluding the iron is not hot right now, an unusual lack of activity is evident. They have declined to attack either Republican aspirant for governor until after the primary in August. This is said to be Governor Williams' decision.

But nobody expects things to stay calm in the camp for any length of time. In fact, it seems like the coming campaign will be more lively than ever.

* * *

A princess was crowned in Michigan. She is Louise Lucille Lagoy, an MSU freshman from Albion. The Coronation took place at a luncheon which marked the end of the 1956 Michigan Dairy Princess Contest. Her title is Dairy Princess of Michigan and her duties are to represent the industry for the coming year. This includes trips for her to Washington, New York, Philadelphia and many other places.

Alternate princess is Muriel M. Goodrich, Walkerville senior in Hart High School. Naturally enough, both girls come from dairy farms.

* * *

Michigan is described as the leading state group within American Dairy Association. The Princess Contest, as most other dairy industry promotions, was conducted under the watchful eye of Charles E. Stone, Michigan ADA manager.

This state's contest was more elaborate than others. Some 37 girls, each nominated from her local dairy district, spent two days in East Lansing for final judging. Their stay included tours, gifts and special programs. Parents were invited for the crowning event.

* * *

The Princess will help promote the "June is Dairy Month" campaign, which is one of the annual events in the dairy program. The Dairy industry is consdered to do more self promotion of its products than any other state agriculture commodity group.

* * *

Communications at the next civilian emergency will be less a problem than they were when state and local agencies rushed to the tornado scenes in western Michigan several weeks ago.

John E. Griffin, state civil defense director, is preparing a radio network to be operated through the Michigan State Police mobile communications trailer.

It will include amateur radio operators, the conservation department radio cars and National Guard equipment in addition to the State Police radio.

* * *

Officials said the state services involved would be able to carry their own radio communications with them to the scene without having to depend on overloaded telephone lines.

Dr. Albert E. Heustis, state health commissioner, said the lack of communications delayed for hours a request for water supplies for one stricken area near Grand Rapids.

"We don't want these delays in the future," said Williams.

* * *

Jurisdiction over the more than 500 convalescent homes and homes for the aged will be transferred from the state welfare department to the public health department Jan. 1, 1957.

When it occurs, Dr. Heustis plans to create a team of nurses, food and sanitation experts to safeguard standards in the homes.

The transfer was approved by the 1956 legislature because leaders believed the homes were more directly concerned with health than welfare.

Give your chicks a
Super-Start!

Your chicks should grow up to 5.4% faster on 7.6% less feed per pound of gain than ever before on Purina Startena!

Purina scientists have done it again! They have improved even last year's wonderful formula so much that you can *see* the faster growth—the better coloring—the extra fine feathering.

97% LIVABILITY. Last year over 11,000 folks who kept records on 2,364,891 chicks proved that they could get 97% livability. This is 97 chicks raised out of every 100 bought.

LOW IN COST. It costs so little to give your chicks a wonderful start on Super Startena. Feed just 2 lbs. per small breed chick or 3 lbs. for heavies. That is all it takes—just a few pennies—to grow big, well-feathered young pullets about 5 weeks old.

Here's Where the New Ideas Come From...

General Motors' new Technical Center—largest of its kind in the world—employs 4,000 engineers, scientists and stylists. These vast resources combine with Pontiac's own ultramodern engineering facilities to bring you America's greatest automobile value—Pontiac, a General Motors Masterpiece.

Watch "Wide, Wide World"—NBC-TV, Sunday, May 20—report on GM's new Technical Center.

...and Here's Where they GO!

"CAN YOU SEE, STEER, STOP SAFELY?... CHECK YOUR CAR—CHECK ACCIDENTS."

You'll know the engineers have been up to something special the first time you ask this long, low beauty for action, for here's "go", you can't get anywhere else.

The "go" of the newest in high-compression, high-torque engines—Pontiac's Strato-Streak V-8, so advanced and so efficient it delivered *more actual miles per gallon than any other "eight"* in the Mobilgas Economy Run!

The "go" of the newest in automatic transmissions—Pontiac's Strato-Flight Hydra-Matic*, specially engineered for Strato-Streak power and smooth as silk at any speed!

Plant Corn Right For Better Yields

A corn farmer will get a better stand if he uses the right planter plates and keeps his tractor speed down to three miles per hour.

That's a corn planting time suggestion from Don R. Kebler, assistant county agricultural agent. Most seed corn has a label suggesting the proper plates, he points out, but he suggests this in order to make sure:

Put the plates in the corn planter and pull it a short distance on the driveway. Then check the seed spacing and make adjustments to give the plant population desired.

Tractor speed over three miles per hour makes for inaccurate planting, but the speed can be checked easily as follows:

Drop a rock to mark your starting place. Check your watch and travel with the planter for 30 seconds. Drop another rock and measure the distance between the rocks.

The number of feet you have traveled divided by 44 equals your miles per hour.

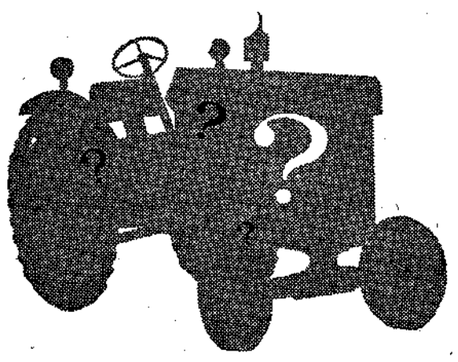
What is a TRACTOR?



Any tractor is a piece of machinery for furnishing power for farm work. It consists of an engine, a frame and a number of wheels.

And there the resemblance among all tractors ends. This one has some features; this one has others. And each of them must be valued in relation to price.

A low price should not tempt you to go without features that will pay a profit in your farming operations. Nor should you pay for features which are impractical in the field, or will be of little use on your farm.

To get the most useful tractor for your dollars, it's necessary to make a thorough comparison. We ask you to come see us and make that comparison, *on paper*, in our place of business. Check our comparison sheet, it will give you data on all leading makes of tractors in the 3-4 plow class, including the Oliver Super 77.

Then you decide on the tractor that's best suited to your needs.

We believe *facts* sell tractors best.

Zesty Sauce Flavors Leftover Ham Loaf Easily Prepared

IT LOOKS like Spring, it tastes like Spring, but you'll probably want to tuck this recipe in an easily reached place for all seasons of the year. Gourmet Ham Loaf makes good use of ham leftovers with fresh pork spiced with mustard and clove.

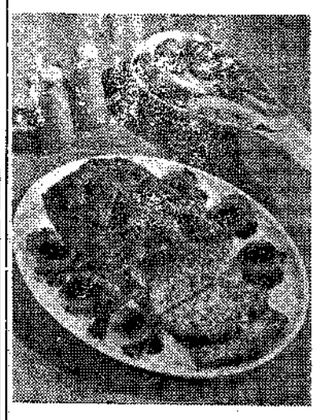
If you're on your way to meetings for the day, prepare the loaf right after breakfast and chill. It's ready for the oven an hour and a half before dinner.

Using rolled oats as a binder is good news for the budget-conscious cook as the oats will retain meat juices, yet lose themselves completely in the meat mixture.

Gourmet Ham Loaf
(Serves 10)

Loaf:
1 pound ground, cooked ham (lean)
1 pound ground, fresh pork (lean)
2 eggs
1½ teaspoons dry mustard
½ teaspoon salt
½ teaspoon ground cloves
1 cup rolled oats (quick or old-fashioned, uncooked)
Sauce:
¼ cup mayonnaise
2 teaspoons prepared mustard
2 tablespoons pickle relish

For the ham loaf, combine all ingredients thoroughly. Place in an ungreased loaf pan. With finger, form decorative indentations on top. Bake in a moderate (350°F.) oven for about 1½ hours.



A juicy mixture of leftover ham or pork, this Gourmet Ham Loaf is flavored with mustard and cloves, then served with a mayonnaise-relish sauce in the indentations made on top of the loaf before baking.

Remove from pan; fill top indentations with sauce, made by combining all ingredients thoroughly. Garnish with apricot halves filled with tart jelly.

As a green vegetable for Gourmet Ham Loaf, select slivered green beans, asparagus spears or broccoli. Parsleyed new potatoes go well with it or you might choose candied sweet potatoes, if you have some leftover from the baked ham out of which you're preparing the loaf.

Assorted fresh vegetable relishes like carrot strips, celery curls and radishes can substitute for a salad course. Finish it off with a pineapple chiffon pie or a lemon sherbet or crunch ice cream.

Apply Make-Up With Know-How

No matter how little or how much a woman makes up her face, she can be more attractive if she knows how to do it properly. There is the slapdash way of putting it on, as well as the precise and careful way in which the experts apply it.

A bit of study and some pointers are all you really need to get started. After some practice and even a bit of experimentation, you'll be amazed at how well you can look.

Some women will say, "Well, I use only lipstick." She can count herself fortunate that that's all she needs, and there are many with such good coloring and skin, that lipstick is the only essential.

How is it put on? Swiveled out of the case and applied in 10 seconds? It should be put on with a good lipstick brush so the mouth looks clean, tidy and straight.

Outline the Mouth

To use a brush, draw the color first on the inner lip edge, then outline each side from the center. Both sides should match, of course. Once you get the outline of the mouth properly, it's very easy to fill in with the brush.

Let the color set, then dust with powder, and finally, blot off the excess. Lipstick applied in this fashion does the most for the mouth and lipstick will last longer so the mouth does not need to be made up constantly during the day.

Rouge and Powder

Have a good light when you apply rouge. It's never applied in a circle, by the way no matter what the type, liquid, dry or cream. Put on your gayest smile, then apply the color in dots to the highest point of the smile.
