### From the ditor's Corner

Going to college is getting tougher every year as the na tion's higher education institutions seek to cut down the num ber of students that are taxing facilities to capacity and beyond.

D. B. Varner, vice-president of off-campus education, illustrated the point by quoting admission figures at Michigan State University speaking at the Tuscola County Alumni banquet in Cass City Wednesday, Jan. 15.

He said that the figures at

MSU are repeated in many colleges in the nation. Of all the students who applied for admission to MSU in 1957, he pointed out, 51 per cent were unable to meet the stiffened enrollment requirements.

Despite extensive building and higher entrance requirements, the colleges of the nation will be unable to handle the eligible students expected in the next 10 years under the present rate of college expansion, Varner said.

How to handle the ever-increasing student load at the nation's colleges promises to be one of the biggest problems for this country in the next 20 years. With constantly increasing costs, it is without a solution at the present time. \*\*\*\*

#### Will Use \$50,000 For Township Roads

Members of the Tuscola County | Supervisor David Andreychuk. Road Commission appeared before the county board this week to discuss road monies for local (township) roads.

One of the principal items of discussion was the use of money for road work. Under Public Act City Mother and 51, all money received from the state for use on township roads must be matched from the county. The discussion centered around division of the funds over the county.

Supervisors voted that \$50,000 of the money received in 1958 must be used exclusively for construction of new roads. The remainder can be used for maintenance of existing roads.

inched closer to the bed and tried to smile. "Good evening. I was just passing by," Ken explained. 'And thought I might do something." The man looked up hopefully. His eyes seemed begging. "You can." The words at first

were dim, but the old man smiled, then closed his eyes to rest. "In the bottom drawer." Ken turned and saw the cabinet and walked quickly to its shabby bulk.

He pulled it open and looked in real surprise. The book he took was worn with use and old. Before he stood to return to the bed, Ken flicked the cover back.

The words "a light unto my path" were written there in the scribbled hand of "Martha."

He walked back to the bed. The man was fighting fear. "You found

it then," the man said smiling. 'Just read a verse and you can go. Ken turned the pages slowly in sudden revelation and began the words aloud, but only did he hear the ones: He restoreth my soul . . ## Are you neglecting yourself?

Many mothers are so busy looking after their families that they often neglect themselves. Are you like that? Do you, for example, give your children plenty of milk but neglect to drink enough yourself. You should drink at least three glasses of milk a day—especially if you're over thirty-five.

Milk, you see, helps rebuild body tissues as they wear out. Helps you feel more vigorous and alert. Milk keeps your skin smooth and free of premature wrinkles. Even gives your hair more sheen. That's why you-feel younger ... look younger ... when you drink more milk.

The Want Ads Are Newsy Yoo!

I was wondering out loud to a friend of mine recently why women generally drive slower than men and I had to chuckle at his snappy reply: "Most women will do anything to stay under thirty."

This brings to mind a point I wanted to make from last week that I hope you'll find has more to recommend it than the joke, even though it's definitely not funny.

If you were with us then you'll recall the sad story of a car buyer we know who'd convinced himself he'd saved a hundred on the 'deal' he'd made in another town - until he found he'd bought Tuscola County boys and girls himself a car that had been wrecked and cleverly can still enroll in the 4-H Tele- | patched up. It never would run properly short of a major repair job with a king-size bill. What he'd 'saved' plus a few more hundred went down the

We gave him some pointers on "How To Spot A Wreck" and we're passing them on to you this week even though you'll never need the information around our place.

Firstly, it's a good idea to look the car over in daylight free of reflections. Put your head close to the body and fenders and sight along them looking for ripples. Ripple areas are signs of sheet metal that has been bent and improperly straightened. A fender's not too important but the top or a body panel's a different matter. The big thing to fear here is that the car's frame may have been

bent. If it's been bent badly enough there is just about nothing a repairman can do to make it run properly again short of a new frame, which even then sometimes leaves the car permanently out of kilter.

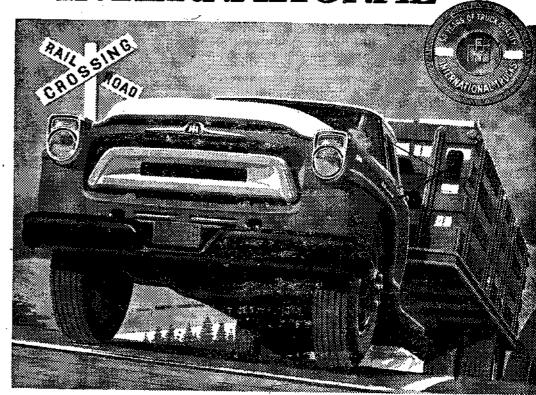

Another sign of this is doors that sag and can't be adjusted to fit snugly. Check the overall paint for slight differences in shade which can mean a partial repaint job.

There's one last check that covers all points and it's the one that really matters: CHECK ON YOUR DEALER. If he's interested in your future business and dealing squarely with you the folks who've dealt with him will know. Ask them. We'll be glad to give you a list anytime -a nd you'll find they're folks who've come back to us for most of the cars they've ever owned.

DISAPPOINTED? YOU EVER BEEN

## Sure You Have---At Meal Time

The tragic story of a housewife who has spent many hours preparing a chuck roast for her family's dinner.... only to find that when she carved the roast there was more fat, bone waste than lean, edible meat, takes place in the homes of Cass City area housewives every day of the week.
