STYLE COUNTS IN CARS, TOO

The other day, I was standing in front of the barber shop talking to a friend. Two young ladies passed. They were in the middle of a discussion about the new 'sack' style. I can't say it was an argument, because they both agreed that as a style a sack is a bag and that's all there is to it. Whether you are a "sack" fan or a "sack" hater, it is a style and it seems to be here for a season anyway.

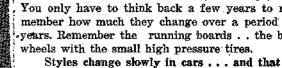

> Dress styles do vary a lot from year to year and from season to season. Car styles change, too. You only have to think back a few years to remember how much they change over a period of years. Remember the running boards . . the big wheels with the small high pressure tires.

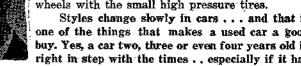

Styles change slowly in cars . . . and that is one of the things that makes a used car a good buy. Yes, a car two, three or even four years old is right in step with the times . . especially if it has been well looked after.

All over the country "June is Dairy Month." A time when milk-and the foods made from milk-are at the peak of flavor and goodness. A time, too, when the Nation's dairy farmers make a special effort to remind you of the many different ways to enjoy the many different products made from milk.

Today-in the face of rising food costs-Dairy Products take on special significance. For milk and milk products are among the few foods that have not increased in price. Penny for penny you get more real food value from milk than any other product you can buy.

Look for the "June Dairy Month" display in your store. Try several of the many products. Take advantage of the many outstanding values supplied by the dairy farmers in your area.

Michigan Mirror News Brief

By Elmer E. White Michigan Press Association

Michigan is running out of land.

No one expects a panic in the lifetime of people now on the premises, but early signs of a space shortage have brought new wrinkles to the brows of farm experts and highway builders, \smallsetminus Experts report the problem is fanning out from southeastern Michigan which has developed from one large city, Detroit, into

ling the problem.

Agriculturalists wince every time a new industry or residential subdivision takes over chunks of rich farm land. State officials are worried that

industry, which now provides more leisure for the working man, will create problems by using land that should be devoted to state parks. With the development of the

St. Lawrence Seaway, fears are expressed that the resultant development of commerce and industry will crowd out major re-

creational and farm areas. "Then, we might as well pave the entire state," said one state official. *****
