A large crowd from here attended the picnic given by several schools at Forest Home. After returning home from church Friday evening, Mr. and Mrs. Gus Zapfe found her father, Mr. Christian, lying dead on the floor. Heart trouble was the cause. About a year ago he came to make his home with her. Previous to that he resided west of Wickware. The funeral was held Sunday in the L. D. S. church and interment made in Elkland cemetery. Scared Into Sound Health. Mr. B. F. Kelley, Springfield, Ill., writes: "A year ago I began to be troubled with my kidneys and bladder which grew worse until I became alarmed at my condition. I suffered also with dull heavy headaches and the action of my bladder was annoying and painful. Cold and wet here Monday. Miss Anderson of Argyle spent a few days with Miss Jennie Chard this week. Clyde Collier has secured the position as mail clerk on the Polly Ann and started on his new work Monday. The meeting of the Cheerful Workers which was to be held at the home of Mr. and Mrs. Geo. Mr. and Mrs. R. W. Fox are rejoicing over the arrival of another son, born May 17. A meeting of the building committee was held at Chas. Shaw's Saturday concerning the church here. Our young people with a wagon decorated with evergreens attended the school picnic near Shabbona Friday and appeared to have enjoyed the day judging from the merry mood they returned home in. Marvelous Discoveries mark the wonderful progress of the age. Air flights on heavy machines, telegrams without wires, terrible war inventions to kill men, and that wonder of wonders—Dr. King's New Discovery—to save life when threatened by coughs, colds, lagrippe, asthma, croup, bronchitis, hemorrhages, hay fever and whooping cough or lung trouble. For all bronchial affections it has no equal. It relieves instantly. Its the surest cure. James M. Black of Asheville, N. C., R. R. No. 4, writes it cured him of an obstinate cough after all other remedies failed. 50c and \$1.00. A trial bottle free. Guaranteed by L. I. Wood & Co.

To dress your hair in the latest fashion: Procure a cocoanut, cut it in two and remove the meat from one of the halves. Fasten a number of fish hooks on the inside and place it in position on the back of your head; the fish hooks will hold it in place. If you have no fish hooks handy, use a piece of barbed wire—it will answer the purpose and is cheaper. Then do up the loose hair in the usual manner and there you are.

Customers, who buy milk of Frank Lenzner, have reported that sneak thieves have stolen milk from their doorsteps. Mr. Lenzner says that he would gladly let the "long-fingered" person test the milk at his residence and thereby save his customers the annoyance they have been obliged to submit to.

A. T. Overman has been awarded the contract for building the two miles of state road in Elkland township for \$2,970. Mr. Overman has started work on the first mile, east of town. Highway Commissioner Koepfgen has served notice on Mr. McIntyre, the contractor on the state road job of last year, for him to complete the job at once. If this work is not commenced by Mr. McIntyre before the ten days mentioned in the notice, the commissioner says the job will be re-let.

D. Losey cannot find enough words of praise for the many pleasures he and his fellow grocers enjoyed at the convention of the retail grocers at Detroit last week. One of the features of the entertainment was a trip on the Steamer Tashmo. This boat was chartered for their exclusive use. Bands and quartettes furnished lots of music and the wants of the "inner man" were amply supplied. A fire boat drill and a beautiful sunset on the waters of the lake were particularly delightful scenes for Mr. Losey.

Didn't Care to Try.

A woman in a railroad station the other day had a great deal of trouble with one of her children, a boy of seven or eight, and a man who sat near her stood it as long as possible and then observed:

"Madam, that boy of yours needs the strong hand of a father."

"Yes, I know it," she replied, "but he can't help it. His father died when he was six years of age, and I've done my best to get another and failed. He can't have what I can't get. Would you care to try yourself?"

The listener had fled.

Armor In War.

Waterloo was the last great battle in which bodily armor was used, Napoleon's cavalry using it, and up to that time with some success, but in the charges there made his iron sheathed cuirassiers went down like rows of pins before the quick moving English horse dashing in upon them with only naked swords and naked arms. Pavia (1525) was the first fight in which troops in large numbers were armed with the more efficient musket, while artillery had already been employed at Crecy (1346), and it was only a matter of time for the new agent, gunpowder, to knock out the man at arms. The "mailed barons" had no show before the new and terrible invention of firearms.—New York American

The First Delmonico's.

Restaurants were unknown in the United States before 1830. The first one established in America was at Park row, New York city, by Edward Windust, whose place became the resort of all the famous persons of the early part of the nineteenth century who resided in that city. Delmonico I. started the second cafe on William street. The furniture consisted of six tables and a dozen chairs, all made of pine. Cups and saucers of earthenware, two tined forks, buck bone handled knives and an imposing coffeepot completed the outfit. Delmonico himself, arrayed in white cap and apron, waited upon his customers.—Detroit Free Press.

The Trimming.

Harry, aged three, was playing about the sewing machine one day and when asked what he was doing said in a growny tone, "Oh, making my baby a dress."

"What are you trimming it with?"

"Oh, the scissors."—Delinicator.

His Great Need.

A new pastor was met by one of his parishioners who was fat and of many years and who said to the pastor, "You must feed the sheep."

Whereupon the pastor replied, "My dear old man, you do not need food; you need exercise."

How Savages Came to Use Knives.

The first men, armed with the simplest weapons or with none at all, pursued in the chase the animals that served them as food and, being generally in a state of starvation, tore them to pieces with their fingers and devoured on the spot the flesh, raw and bloody. In time they domesticated animals that assisted them in hunting and invented the bow and spear that enabled them to kill their prey at a greater distance. The knife was invented as an instrument of attack or defense or for rough cutting and carving and, being commonly worn on the person, was found convenient in eating and became in time an accessory of the table for reasons so obvious that they require no explanation.
