## "The Wonder Car"

This is the car that 38,000 happy owners have given the "rough and tumble" acid test of real automobile owners' wear

An automobile on the road for 18 months in constant, every-day use by an owner ceases to be a designer's theory.

It becomes—either a great automobile success; Or it becomes—a great automobile failure.

Multiply one model by 38,000 and give each one of these 38,000 automobiles day in and day out rough and tumble road wear, and if this car stands up and delivers, it has become one of the rare great automobile successes.

And that is the Maxwell success

today—that is exactly the "Acid Test" that the Maxwell has passed through, and that is why the Maxwell is the most talked about automobile that is built today.

The Maxwell automobile is today one of the very few great automobile successes the world has ever known.

And this is the car we urge you to see. This is the car that you owe it to yourself to see. We want to tell you about its hill climbing triumphs. We want to tell you about its speed and endurance records. We want to show you and add up for you every one of its new features.

Read This List of Expensive Features. The 1915 Maxwell Has These Features And Many Others.

**PURE STREAMLINE BODY**

A large, roomy, beautiful body, fitted with deep, comfortable upholstery, ample leg room, adjustable front seat and the best fourteen-coat, hand-painted and striped finish. All Maxwell bodies are constructed of pressed steel, mounted on a steel-channel sectioned frame, offering the greatest possible strength with minimum weight.

**SPRING SUSPENSION**

Without a doubt you will find the Maxwell the easiest riding, light car made. With its amply sufficient wheel base, and semi-elliptic front springs and three-quarter elliptic rear

springs, built of the very best of spring steels, the Maxwell cushions its passengers from all the jars and bumps of rough roads. It is so comfortable and easy riding that you will remark the difference on your first ride.

**THE POWERFUL MAXWELL MOTOR**

The most powerful, durable motor of its size made. Ample power to negotiate any road, mud, sand or hill—always at your command. Almost troubleproof, every part accessible, and what is more, it is a motor of genuine economy. More miles per gallon, day in and day out, than you would believe possi-

ble if one were to tell you. The Maxwell motor stands to-day one of the very best in dependable efficiency.

**DOUBLE SHELL RADIATOR**

A beautiful, troubleproof, highly efficient radiator. Every part but the shell constructed of high-grade copper. It will not corrode and leak. Protected against breakage by a heavy pressed steel shell and special shock-absorbing devices on each side of the frame that protects it against the many strains and twists of the car.

**THE STEERING GEAR**

Irreversible worm and gear, the only safe steering device. Maxwell uses a gear instead

of a sector. This makes adjustment very simple, as you have merely to turn the gear one-quarter way and you have a new surface, just as good as a complete new steering unit.

**BRAKES THAT HOLD AND LAST**

One square inch of braking surface to every twelve pounds of weight. That's more than most any other car gives to-day. Maxwell brakes are thoroughly dependable, enclosed and protected from dust and dirt, and have special anti-rattling devices. Maxwell brakes are very easy to handle. The slightest pressure of the foot and your car comes to a dead stop.

### The Maxwell Company's Guarantee of Service to Maxwell Owners

No other automobile is backed by a more reliable service than that guaranteed every Maxwell owner. More than 2,000 Maxwell dealers—in every part of this country—are always ready to give expert advice, to make adjustments, and to supply new parts at reasonable prices.
