Brooker, was appointed to arrange for school clubs.

KORNILOFF LEADS SLAV REBELS

Russian General Reported to Be at Head of New Revolt.

Petrograd—Hostilities have been renewed between the troops of General Korniloff and those of the Soviets. Rostof-on-Don is in the hands of the anarchists. At Kherson, after the Germans left, massacres of officers and bourgeois by soldiers occurred. The Germans have since reoccupied the town.

Sense of Relief.

"How did the shortage of gasoline affect you?" "Well," replied Mr. Chuggins, "it was a kind of comfort to know offhand exactly why the old machine wouldn't run."

Bulgarian Carpets Prized.

While carpets have been woven in Bulgaria for nearly 150 years the production of the finer qualities dates from the "liberation" in 1878. Before that time Bulgaria was a Turkish province and the product of the looms was for domestic use, little or no regard being had for the requirements of modern taste. Since then, and especially during the last ten years, progress in the industry has been so marked that Bulgarian carpets in design, texture, finish and style have surpassed those of Turkish, Roumanian, Serbian or Grecian manufacture.

You are asked to spend wisely—to buy only the things honestly needed to maintain your health and efficiency. This is intelligent thrift. The Government asks it of you as a war measure :

Bonds Are Not A Burden, But A Blessing

Thrift requires the exercise of restraint and self-denial—qualities without which you cannot achieve the success in life which it is your ambition to achieve and for the lack of which you are likely to suffer in later years.

The money you acquire by thrift you are asked to loan—not give—to your country. It will come back to you when you may need it far more than you do now, and you will be paid interest for its use.

This war is a frightful thing, but it may prove of inestimable benefit to you, if it teaches you the good habit of thrift.

Your Bond May Bring Him Home in Safety

The supreme tragedies of war are not enacted on the battlefield, but in the home.

Above the shouts of command and encouragement, the roar and shock of the great guns, and all the swelling tumult of battle which bear the husband and father to a hero's grave and a martyr's glory, there rise the weeping of the bereaved wife and the cries of little children deprived of a father's love and care.

American fathers are now on the battlefronts of France. Many must fall; how many depends upon us who remain safely at home.

A single Liberty Bond will help to save a soldier's life, your soldier's life, and bring him home in safety to those who hold his life far more precious than their own.

THEDA BARA IN CLEOPATRA

Immortal stories have been written of Cleopatra, the Siren of the Nile—the queen who, aided only by her personal charm and scheming mind, conquered Caesar, "the greatest Roman of them all," and who brought Marc Antony bowing to her feet. William Fox's version of Cleopatra will present her as the best authorities of modern times have come to know her. The Fox screening of "Cleopatra", with Theda Bara in the title role, will deal with the most dramatic periods of her life—the time when she was fighting to retain her power and her crown.

The forthcoming production will be a gorgeous spectacle, made magnificent by the beautiful detail of Ancient Egyptian settings with those of the Roman Empire, the costuming being sumptuous.

Then came the terrific battle between the troops of Caesar, and those of the Egyptian Queen's, in which daring horsemen, Roman foot soldiers and swarthy Egyptian soldiers fought the Roman invaders step by step, fighting up into the Queen's palace, until Caesar, victorious, scattered his troops throughout the captured palace of Cleopatra, who has been forced to flee to her tented city on the desert.

Meaning of "Bosporus."

The correct spelling of the strait which connects the Black sea with the Sea of Marmora and separates Europe from Asia is Bosporus, not Bosphorus. The word is pure Greek composed of two words bos, a cow, and porus, a ford, corresponding to the English Oxford.

Beginning of Postal Systems.

The complete organization of a system of postal communication in England did not take place till the reign of James I (1606). Doctor Franklin was the father of the present gigantic postal system in the United States.

Buy Liberty Bonds

To have withheld money from Washington might have prevented the founding of this nation upon the cornerstone of Liberty.

To have withheld money from Lincoln might have dashed the Republic upon the rocks and lost the Liberty so dearly bought.

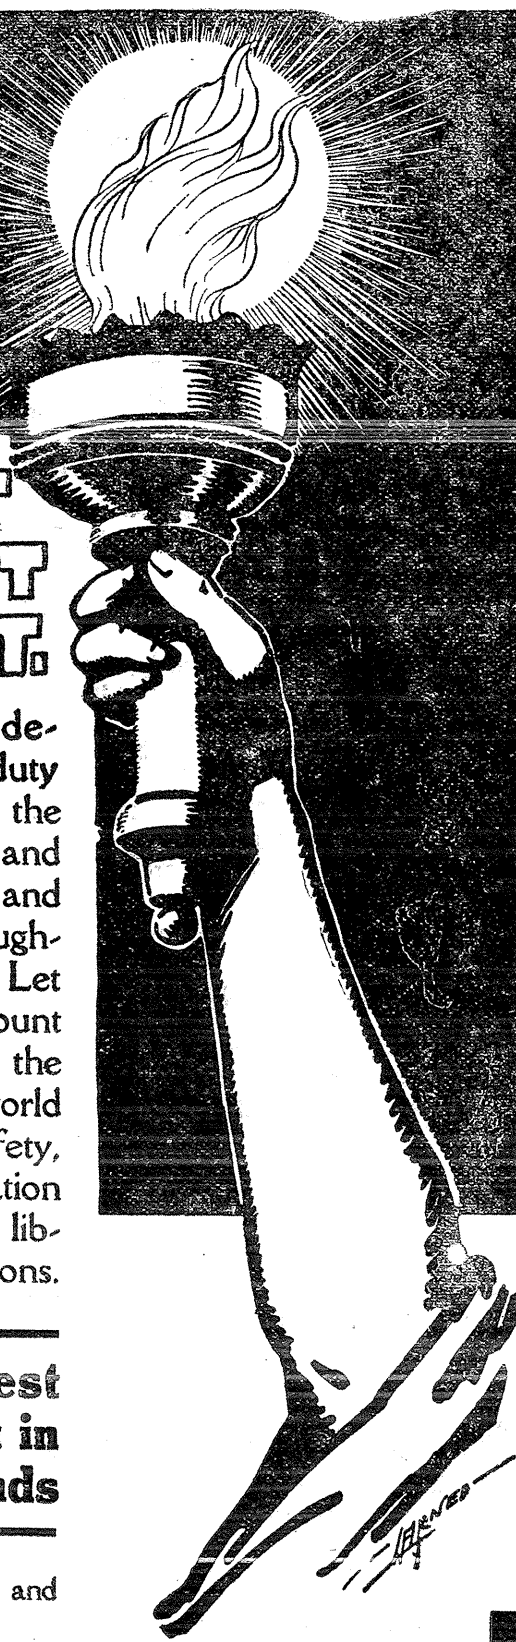

To withhold money now would not only endanger this great, glorious country but might lose liberty for a whole world.

CALIFORNIA HIT BY EARTHQUAKES

COAST ROCKED BY REPEATED SHOCKS—TWO TOWNS ARE COMPLETELY RAZED.

PROPERTY DAMAGE, \$500,000

Hemet and San Jacinto Reported to Be Levelled, 2 Persons Killed—One Dead in Los Angeles.

Hemet, Cal.—This town and San Jacinto, which lies north of here about two miles, both seriously damaged by a severe earthquake shock Sunday afternoon, April 21.

Every business house in Hemet and in San Jacinto was laid flat, but only two lives were lost.

The property damage here is estimated at \$250,000 by merchants and property owners who suffered the most loss. At San Jacinto damage was estimated at a like sum.

The quake, which came with such warning as was afforded by a brief light shock lasting perhaps 10 seconds, was the most severe ever experienced here. For 30 seconds the buildings rocked and swayed and the ground heaved so that persons standing in the streets and fleeing from their homes were thrown from their feet.

One Killed At Los Angeles.

Los Angeles—A general earthquake shock, felt throughout southern California Sunday afternoon, cost one life at a nearby resort, caused the serious injury of one woman in a mad rush from a downtown theatre, broke large plate glass windows, shook down cornices and cut off communication with at least two small towns.

At San Bernardino the quake was said by old residents to be the worst of years. Scores of plate glass windows were broken, a hundred feet of brick wall from one low building fell into the street, and cracks were broken in several other walls.

BERLIN-VIENNA BREAK LOOMS

Political Upheavals in Austria Being Felt in Kaiser's Domain.

Amsterdam—The storm clouds that gathered upon the political horizon of the Central powers with the revelations by the French premier, M. Clemenceau, of Emperor Charles' peace intrigue, are becoming more threatening daily.

Danger signals are flashing fast and wide in the two empires. The Austrian "home front" is manifestly cracking and the vibration is making itself felt upon political unity in Germany, already badly shaken by Prince Lichnowsky's revelations.

All is not well between the two Kaisers. That much is known positively, despite the bombastic, if somewhat forced, verbiage of the mutual telegraph professions of "unshakable faith in your loyalty."

AUTO DITCHES, TWO KILLED

Third Member of Party Fatally Hurt, All Employees of Buick Factory.

Bay City, Mich.—Herbert Foss, 34 years old, and Charles McDermitt, 36 years old, are dead, and Hugh McGrane, aged 35, was fatally injured, as a result of an accident about 8 o'clock Saturday night, when the automobile in which they were riding ran into a ditch eight miles south of this city, on the Saginaw road.

All three resided in Flint and held responsible positions in the Buick factory.

Army Officer Tarded and Feathered.

Santa Fe, N. M.—Four hundred convicts in the state penitentiary tarred and feathered and led around with a rope about his neck Maj. John M. Birkner, a United States army officer, held in the penitentiary as a federal prisoner. He is charged with violation of the espionage act. Birkner was born in Nuremberg, Germany, but had been in the American military forces for more than 30 years. He was arrested at Camp Cody, where he was an artillery officer.

WOMEN ALIENS MUST REGISTER

Female Subjects of Germany and Austria to Be Listed.

Washington—German and Austrian women in the United States were placed under the same restrictions as have prevailed for enemy aliens, by proclamation issued April 20, by President Wilson, under the recently enacted law including women in the definition of enemy aliens.

These restrictions are applicable only to women above 14 who have not been naturalized by their own or their male relatives' declarations of citizenship.

The operation of the regulations prohibiting enemy aliens from entering prohibited areas without permit will not apply to German women until a date to be fixed by the attorney general Crowder, are exclusive of between ment made by the attorney general's office, is so that arrangements may be made by women to apply for permits and a careful investigation may be made before issuance of permits.

Which Snake Was Swallowed?

The Zion City snakes, of which there is an abundance on the lake front property, had a fight. One was a garter snake and the other a bull-head. Each was 3 feet long and in their ferocity they seized each other by the tail and proceeded to swallow each other whole. They both started at the same time and at the same rate of speed. Now the question is, which of these two snakes survived or, rather, which one was on the outside by the time the other was swallowed, the garter snake or the bull head? It took five minutes for the two snakes to swallow each other and they both swallowed each other to the tip of the fangs. Which one was on the outside when they were finished, or were they both inside?

The Way to Success.

Nervous energy is back of that quality of enthusiasm which puts life and ginger into one's efforts. Energy is chiefly the basis of that spirit of ambition without which one is not impelled to strive for heights above the common level. It is inevitable that the man lacking in ambition and enthusiasm will remain where he is. He cannot and will not climb because he lacks the internal incentive, the spur and the driving power, by means of which energetic men push their way upward.—Physical Culture.

Play Cheerfully.

Only the trained hand can bring music out of an instrument. Life will jangle unless you learn how to play it.

Catarrah Deafness Cannot Be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure catarrah deafness, and that is by a constitutional remedy. Catarrah Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result. Unless the inflammation can be reduced and this tube restored to its normal condition, hearing will be destroyed forever. Many cases of deafness are caused by catarrah, which is an inflamed condition of the mucous surfaces. Hall's Catarrah Medicine acts thru the blood on the mucous surfaces of the system.

We will give One Hundred Dollars for any case of Catarrah Deafness that cannot be cured by Hall's Catarrah Medicine. Circulars free. All Druggists, etc.

"The one best thing to set you right—When you start to cough at night."

FOLEY'S HONEY AND TAR

COUGHING during the day is bad enough. The racking and straining weakens and debilitates the system. When you add the loss of sleep, the nervous drain, the irritation and annoyance of wakeful nights, a cold quickly wears out the sufferer, and he or she is in no condition to ward off attacks of more serious sickness.

Prompt steps should be taken to check coughing at night—not only for the sake of the afflicted one, but for the comfort and health of the other members of the family.

How to Check Coughs and Colds

Foley's Honey and Tar Compound brings relief from day or night coughs, whether the result of cold or la grippe, bronchial affection, spasmodic croup or whooping cough.

It is a lozenge to young and old—prompt, efficient, safe. Contains no opiates. Foley's Honey and Tar clears the throat of phlegm and mucus, stops the tickling in the throat, eases the hoarseness, opens the air passages for easier breathing, and coats the raw, inflamed surfaces with a healing, soothing medicine. One or two doses in the early evening usually frees the sufferer from attacks of coughing and enables him to enjoy a refreshing night's sleep. The genuine Foley's Honey and Tar Compound comes in three sizes—25c, 50c and \$1.00.

Any maker may claim for his product all the qualities there are. That is his privilege. He may even think his claims are justified.

You read the advertisements, so you know that makers, as a rule, are not over modest in that regard.

If you believe them all, they all make super-cars.

In your experience, that theory doesn't hold.

Maxwell is different.

We never claim anything we cannot prove.

As a matter of fact we never have claimed anything for this Maxwell that has not already been proved in public test and under official observation.

Maxwell claims are not therefore claims in the ordinary sense—they are statements of fact—proven facts.

They are, in every case, matters of official record attested under oath.

For example: The famous 22,000-mile Non-Stop run was made with the Maxwell every minute under observation of the A. A. A. officials.

That still remains a world's record—the world's record of reliability.

That particular test proved about all that anyone could ask or desire of a motor car.

Among other things it still stands the world's long distance speed record.

Just consider—44 days and nights without a stop, at an average speed of 25 miles per hour!

And that, not by a \$2,000 car, but by a stock model Maxwell listing at \$825.

You will recall perhaps that a famous high powered, high priced six in a trans-continental trip made 28 miles average over a period of five days and eleven hours.

Now compare those two feats—one of less than six days, the other of 44 days. You know automobiles—which was the greater test?

Is there any comparison on grounds either of speed or endurance?

Proves you don't need to pay more than \$825 to obtain all the qualities you can desire in a motor car—if you select a Maxwell.

For that Maxwell Non-Stop run was made, not on a track but over rough country roads and through city traffic—average of all kinds of going.

And—listen to this.

So certain were we of the condition of the Maxwell at the end of that great feat, we announced that at the stroke of eleven on a certain morning, the car would stop in front of the City Hall, Los Angeles, for the Mayor to break the seal.

Five seconds after he had pulled the switch plug and stopped the motor after the 44 days and nights continuous running, she was started again and off on a thousand mile jaunt to visit various Maxwell dealers.

How is that for precision—certainty of action? That incident brought a storm of applause from the assembled thousands.

Hill climbing?—this Maxwell holds practically every record worth mentioning—especially in the West where the real hills are.

The Mount Wilson record—nine and one-half miles, 6,000 feet elevation!—was taken by a stock Maxwell.

Two months ago a 12-cylinder car beat that record by two minutes.

Then—three days later—a stock Maxwell went out and beat that 12-cylinder record by thirty seconds! Pretty close going for such a distance and such a climb—wasn't it?

So Maxwell still holds the Mount Wilson honors.

Ready to defend it against all comers too, at any time—a stock Maxwell against any stock or special chassis.

Economy—also a matter of official record.

Others may claim—Maxwell proves.

Thousands of Maxwell owners throughout the United States on the same day averaged 29.4 miles per gallon of gasoline.

Not dealers or factory experts, mind you, but owners—thousands of them—driving their own Maxwells.

Nor were they new Maxwells—the contest was made by 1915, 16, and 17 models, many of which had seen tens of thousands miles of service—three years' use.

Nor could they choose their own road or weather conditions—all kinds were encountered in the various sections of the country.

Good roads and bad—level country and mountainous regions—heat and cold—sunshine and rain—aspalt and mud.

And the average was 29.4 miles per gallon!

There's economy for you. And under actual average driving conditions—not laboratory test.

But that isn't all.

The greatest achievement of this Maxwell was in its showing of speed and reliability and economy all in the same run.

In that 44 days-and-nights Non-Stop run, though no thought was given to either speed or economy, it still remains a fact of official record that the Maxwell averaged 22 miles per gallon and 25 miles per hour.

Now you know that speed costs—and that economy tests are usually made at slow-speed—closed-throttle, thin-mixture conditions.

You know too that you can obtain economy of fuel by building and adjusting for that one condition.

Speed you can get by building for speed. Any engineer can do that.

But to obtain that combination of speed and economy with the wonderful reliability shown in that 44-days Non-Stop run—that car must be a Maxwell.
