They took the stitches out over a week ago and my head and hand are about healed. I am still on crutches. I'll be as good as ever in a few weeks, so don't worry. This Friday afternoon, the Health Board convenes again to decide what course to pursue further.

The work of the valuation train crews which are busy on the Grand Trunk are gathering facts and figures which place information to a surprising minuteness for railroad officials and the government. The J. Armitt Crew of the Grand Trunk Engineering Department are now engaged in getting the valuation of the roadbed of the P. O. & N. branch and the J. McCurdy Crew of Durand are securing valuations of culverts. Each crew has from 10 to 12 men and each uses a train from four to six cars for their accommodation and equipment. A few months ago another crew was at Cass City securing valuations of buildings on the railroad properties along the line. Blue prints were made of all buildings and the rooms in each, the details taking in all seats, lights, clocks and reporting minutely and distinctly other contents of the places. The local station has a pump in the rear of the baggage room. Not only was the size of the pump entered into the valuation crew's book, but also the size and length of the pipe attached thereto.

WHEN PEACE IS REACHED.

There need be no apprehension of materially lower prices for live stock when Europe goes on a peace basis. In the case of grains, the situation is somewhat different. An immense wheat acreage and an accumulation of grain in the southern hemisphere, which will automatically become available, are likely to be reflected in the future scale of prices.

However, there is no meat surplus in sight anywhere, not even during the next half decade. Only in the case of hogs is a bare sufficiency likely.

The bare shelves of European larders must at least be replenished and this task will naturally devolve on the United States.

The mission of the International Live Stock Exposition at this crisis is to stimulate production of beef, pork and mutton on the most economical basis, to instruct breeders and feeders in recent development to inspire ambition to excel and demonstrate that live stock raising is profitable, otherwise, it could not prosper.

Europe after the war will need American stock cattle. It must come to this market for cows for breeding purposes and for seed stock of all the species and breeds.

There never has been a more opportune moment for renewed endeavor in the sphere of animal husbandry and the International Live Stock Exposition, which will this year be held from November 30th to December 7th, is the chief exponent of the industry.

CAMPAIGN AGAINST FEAR IS ADVOCATED

The Chronicle has been requested to print the following article, taken from the Christian Science Monitor:

Des Moines, Ia.—A course in common sense and the basic ideas of Christian Science, and an editorial policy for newspapers directed against fear, was urged at a meeting here recently of a committee of business and professional men which have virtually been in charge of the city during the so-called Spanish influenza epidemic.

The fact that soldiers and officers at Camp Dodge who are Christian Scientists have not been affected by the epi-

demic, was called to the committee's attention at the meeting by Mr. Miller.

"There is no question," said Dr. Witte, "that by a right attitude of mind these people have kept themselves from illness. I have no doubt that many persons have contracted the disease through fear."

"People can deceive themselves into thinking they have any disease on the calendar, and doubtless many of them have thought themselves into their graves."

"Fear is the first thing to be overcome, the first step in conquering this epidemic," said Dr. Witte. "I am not a Christian Scientist, but I believe an application of their principles will materially aid in preserving the health of this community. They did not originate with the Scientists, but are to be found by anyone who will take the trouble to read his Bible."

"In my work in infected communities, I have always found Scientists the first to respond to the slightest suggestion of unsanitary conditions, and the first to comply with fundamental health measures."

Save Heat and the Coal Will Save Itself

EVERY householder is wondering how he is going to get through the winter. It is apparent that everybody must get along with less coal than last winter. Coal dealers are permitted to deliver only two-thirds of the amount used last year. The other third is uncertain.

And two-thirds would be enough if every householder would save heat by fitting his house with

Storm Windows and Storm Doors

They keep out the cold and keep in the heat. They keep the house comfortable and healthful by permitting perfect ventilation at all temperatures, by eliminating cold drafts—and they make it possible to keep the house warm in the severest weather.

Storm windows and storm doors stop the heat leaks so effectively that a house equipped with them actually requires from one-third to one-half less coal—a saving that pays for them in one or two seasons. If every house were equipped with storm windows and storm doors, the fifty million tons of coal that must be saved would not be missed. Here, then, is the practical man's way of saving coal—without sacrificing the health and comfort of his family.

We'll gladly go into particulars with you. See or phone us now and be ready for the winter.

TERMS OF ARMISTICE WITH GERMANY

Continued from first page.

the associated governments may occupy the Heligoland fortress as an advanced base to secure possession of it.

And now, having clipped the military autonomy of its fangs the associated governments will wait for the next 30 days, while terms of the armistice are being carried out to see what sort of a government in Germany they will have to deal with.

In his address to congress the president sounded a note of warning that unless the German people are fed, unless their distress is relieved, there is danger of bolshevism. The question of what sort of government might arise to make peace, he declared, was a matter of no small anxiety and mis-giving.

An assemblage of senators and representatives, with cabinet officers, diplomatic supreme court justices and crowded galleries, heard the president read the terms of the armistice and deliver his address in the hall of the house, where 19 months ago they heard him ask for the declaration of war.

Wilson's Speech in Full.

The president spoke as follows: "Gentlemen of the congress: "In these anxious times of rapid and stupendous change it will in some degree lighten my sense of responsibility to perform in person the duty of communicating to you some of the larger circumstances of the situation with which it is necessary to deal. "The German authorities, who have, at the invitation of the supreme war council, been in communication with Marshal Foch, have accepted and signed the terms of armistice which he was authorized and instructed to communicate to them.

I. Military Clauses On Western Front.

One: Cessation of operations by land and in the air six hours after the signature of the armistice.
Two: Immediate evacuation of invaded countries: Belgium, France, Alsace-Lorraine, Luxemburg, so ordered as to be completed within 14 days from the signature of the armistice. German troops which have not left the above-mentioned territories within the period fixed will become prisoners of war. Occupation by Allied and United States forces jointly will keep pace with evacuation in these areas. All movements of evacuation and occupation will be regulated in accordance with a note annexed to the stated terms.
Three: Repatriation beginning at once and to be completed within 14 days of all inhabitants of the countries above mentioned, including hostages and persons under trial or convicted.

The above to be delivered in situ to Allied and United States troops in accordance with details down in the annexed note.
Five: Evacuation by German armies of countries on the left bank of the Rhine. These countries on the left bank of the Rhine shall be administered by local authorities under control of Allied and United States armies of occupation. Occupation of these territories will be determined by Allied and United States garrisons holding principal crossing of the Rhine, Mayence, Coblenz, Cologne, together with bridgeheads at these points in 18.60 miles radius on the right bank and by garrisons similarly holding strategic points of the regions.

A neutral zone shall be reserved on the right of the Rhine, between the stream and a line drawn parallel to it 24.80 miles to the east from the frontier of Holland to the parallel of Gernshelm and as far as practicable a distance of 18.60 miles from the east of stream from this parallel up on Swiss frontier. Evacuation by the enemy of the Rhine lands shall be so ordered as to be complete within a further period of 11 days, in all 19 days after the signature of the armistice. Further material necessary for working of the railways in the country on left bank of the Rhine shall be left in situ. All stores of coal and material for upkeep of permanent ways, signals and repair shops left entire in situ and kept in an efficient state by Germany during the whole period of armistice. All barges taken from the Allies shall be restored to them. A note appended regulates detail of these measures.

Eight: The German command shall be responsible for revealing all mines or delay acting fuses disposed on territory evacuated by German troops and shall assist in their discovery and destruction. The German command also shall reveal all destructive measures that may have been taken (such as poisoning or polluting of springs, wells, etc.) under penalty of reprisals.
Nine: The right of requisition shall be exercised by the Allies and the United States armies in all occupied territory. The upkeep of the troops of occupation in the Rhine land (excluding Alsace-Lorraine) shall be charged to the German government.

Who Chief Men Are.

Four principal men are forging the destinies of the new Germany:
1. D. Ebert, head of what is virtually a provisional government.
2. Philip Scheidemann, majority socialist leader, who is mingling with the masses, exhorting them not to follow in the path of the Russian Bolsheviki. But the main plan and execution of the revolt are strikingly along Bolshevist lines. Everywhere councils of soldiers, workmen and peasants are set up.
3. Dr. Karl Liebknecht, Independent socialist leader, with anarchistic tendencies. He is the main motive power behind the executive end of the rebellion.
4. Field Marshal von Hindenburg, who appears to retain the good will of the bulk of the population and to have the main fighting forces still in hand. (Hindenburg is reported in other dispatches to have fled with the Kaiser.)

Red Flag On Kaiser's Palace.

Amsterdam—News has been received in Berlin and forwarded here that the garrisons at Doberitz and Potsdam are in the hands of the soldiers' and workers' council.
Armed workers and soldiers stormed the prison in the Alt-Meabit street in Berlin, but at the request of Deputy Baechner, they released only those incarcerated as "war victims," including former Captain Von Beerfeldt, who was concerned in the distribution of the memorandum of Prince Lichnowsky, which accused Germany of starting the war.
Describing the situation in Berlin late Saturday the correspondent there of The Handelsblad says:
"Since morning the aspect of Berlin has changed completely. Carriages filled with soldiers and civilians, moved slowly through streets crowded with sightseers, who are not yet able fully to comprehend the new situation. "Soldiers carrying red flags shout: 'Long live the republic!' and sing the Marsellaise. There are no police but soldiers are maintaining order. Railway trains are running.
"On the imperial palace, the palace of the crown prince and the government buildings red flags were waving. There were hundreds of processions throughout the city in which civilians and soldiers joined."
Copenhagen—The Grand Duke of Oldenburg has been dethroned and the Grand Duke of Mecklenburg-Schwerin has abdicated, according to dispatches from Hamburg.

Three of the four kingdoms within the once German empire have fallen. King Wilhelm II. of Wuertemberg has abdicated and a republic has been proclaimed. King Leopold of Bavaria's abdication was announced two days ago. Wilhelm, king of Prussia (former emperor of Germany), also abdicated. The situation in Saxony is obscure.

U. S. TAKES INITIAL PEACE PLAN STEPS

Overtime On War Contracts Eliminated—Building Ban to Go.

Washington—The government initial steps in the program for the country after the peace treaty is signed. These were phases touched on in reports of chiefs:

Secretary of War Baker has ordered, all overtime and Sunday work on war priorities commission will order an immediate relaxation on percentage of material available for building purposes, municipal and private. There is a possibility it may be lifted altogether.

The food administration will be continued until the senate ratifies any treaty of peace. In this connection, Administrator Hoover warns against expectation that prices will drop.
The fuel administration will be continued the same length of time. There will be no slackening of the conservation program however.

The war industry and war trade boards also will be continued.
Control of wires and railways will continue for the full period of one year contracted for when they were taken over. The railways will be retained in order to insure that "reconstruction freight" will be hauled promptly through the pooling plan.
Convoicing of ships to Europe will cease at once.
Censorship of news will be discontinued soon, as well as the Creel bureau.

The government's policy of canceling war contracts will be elastic and will permit to a certain extent, regulation by the government of private industries through its war work program so that men will not be thrown out of work.

KINGSTON-NOVESTA TOWN LINE.

M. Wentworth was a business caller in Cass City last Friday. Mason Leek of Caro was at the Leek farm on business last week Tuesday.

"Keep the Bridge Open"

A dangerous condition exists among the American people today. We are an easy-going people, quick to feel that what we want to happen is about to come to pass.

Remember, the war has never touched German soil, and it must touch a lot of it if the war spirit is to be taken out of Germany.

The shipyards need men badly. "No person now engaged in shipyard work need apply," but other men looking for a place where red-blooded, real men are needed, and who want to get good wages for the winter's work, will do their country and themselves a good turn by writing or calling at the Great Lakes Engineering Works, River Rouge, Detroit, Mich.
