The traces and breeching straps should be unfastened and the vehicle rolled back from the fallen animal. If the horse is in double hitch, the traces and yoke strap should be unfastened and the pole, vehicle, and working mate moved a short distance away. An injured horse will then regain his feet readily if he has suitable footing. In case the ground is icy, scatter some fine sand, sawdust, or straw under and in front of him. Injuries to horses are common during the winter months in cities where snow becomes packed and forms an icy coating on the pavement. In most cities above the frost belt there are times when pavements are slippery.

Asphalt is especially troublesome and when covered by a very light sleet or snow makes a very treacherous footing for horses. The milkman or baker, who drove upon a clean pavement the night before, may find the streets at 4 a. m. so nearly impassable from a coat of smooth ice as to delay his deliveries very greatly or even prevent them entirely.

In country districts horses remain sharp or rough shod for a considerable time. But if they are driven much or city streets paved with stone, cement. or asphalt, from which the snow has been removed, their shoes quickly become smooth and it is difficult for the horses to keep their feet.

When the front feet slip backward a horse is likely to fall and injure his knees, while side slipping generally causes him to come down broadside. Shoeing with rubber pads, or the use of emergency appliances may lessen the chance of slipping, but as there is always the possibility of a horse falling, even when well shod, careful driving and precautions against overload-Mr. and Mrs. Fred Stine and ing are important additional means for

TO OUR CUSTOMERS

Warning!

In these days of attempted reconstruction since the war ceased, unusual activity is manifest along financial lines. Numerous and divers schemes are springing up everywhere to entice money from the public. The Thumb of Michigan is being canvassed by swarms of clever stock salesmen. If you have the reputation of owning a dollar it will be indeed strange if you are long overlooked in this eager solicitation.

Some of these concerns may be worthy (we surely would not condemn offhand all as bad) but no matter how good a proposition looks, or how strongly it appeals to you when first presented, it certainly will keep until you can thoroughly investigate it before

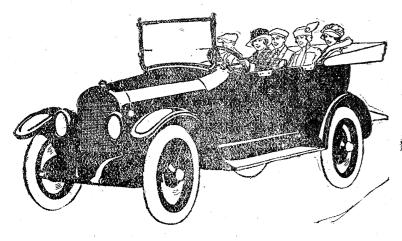

While banks as a rule, and this bank particularly, do not invest their funds in stocks, if they should it would be only in well established concerns paying regular dividends; yet we do have connections and facilities for securing information about new flotations and you are welcome to consult us at any time about investment matters.

We will be glad to have you open a checking account with us. If you are buying a farm and need part of the money to complete your deal we will be glad to consider such a loan. We pay 4 per cent on time certificates of deposit.

One Hundred Per Cent "Pep"

When your Ford car or your Ford truck doesn't display its usual quantity or quality of "pep" and dash, it's time to have a repairman who understands the Ford mechanism give it the "once over"—then make the necessary adjustments or repairs. And return it to you full of its old time power, "pep," energy, pull, and service. You'll notice the difference.

We employ only skilled Ford mechanics-men who know how Ford cars are made, and how they should be kept, in order to give the most efficient and economical service. And our shop equipment boasts a great many specially designed Ford tools and time-saving devices and machinery. In our stockroom is a complete assortment of repair parts—genuine Ford parts—that are exactly the same as their tough, sinewy originals in the

HOW DESIRE FOR "SOFT SNAP" MAY INJURE

MAN IN BEGINNING LIFE. -In "As You Like It," Shakespeare, speaking through Jacques, tells of the "seven ages of man." Of course, says the Ohio State Journal, the category is complete and truthful, but we think that more modern times have suggested an eighth age, that might be inserted between the whining schoolboy and the soldier, bearded like a pard, and that is the "Age of the Soft Snap," when the whole of the life is to get as much as possible for nothing. A boy generally reaches that stage when he is just out of school, with a smattering of Latin and algebra and imagines that the world owes him a living, and all he has to do is to pick it off when the world swings around his way. Nothing will do him but a soft snap, an easy job, with big pay and infinite leisure for society, with motor rides and dressing for dinner. There are many such young men, or rather boys, just stepping on the stage of life, to whom the soft snap seems to be the blossom of their years. They spend the beauty and strength of their lives trying to get hold of it. How many a noble youth is utterly spoiled by waiting for a soft snap; and the longer they wait, the less fitted they are for any kind of real business. They are today the chief apostles of the high cost of living and are looked upon as such by the people. No person can be a soft snapper if he possesses any real pride. He will take the first work that comes to hand and depend upon his merit and worth for his promotion and success. And now to the sweet damsels, let us say a word—steer clear of the snappers, until they show some disposition to work out their own salvation.

On arriving home, however, he was amazed to find that a gold piece had vanished from his purse, and in its place was substituted a silver piece. The lightning had, in fact, penetrated the leather of the purse and covered the gold piece with a coating of silver taken from two other coins.

MANIFESTED IN P. T.

"Our constitution pleads for a closer study of child life. This must come almost wholly from the parent. The teacher from the superintendent to the lowest grade teacher devotes much time, thot, and an everlasting lot of patience to the study of child life. More study and a better co-operation must be given by the patron. It should not be essential for you to Farmer's be a high brow or a classically educated person to understand what is being taught your children. The daily result will tell. SMALL Y. W. C. A. IS COMMUNITY CENTER

Recreation for Girls Is Important Feature of Work. Fifty-two young women in the Unit-

ed States are known as Y. W. C. A. "town secretaries." All of which means that the fifty-two are organizing recreation work for girls and for the ommunity at large in towns of less than 10,000 inhabitants.

The Y. W. C. A. may be in one rented room or more. It may be a whole building, but at any rate there is a recreation room and if possible a kitchen, reading and writing rooms. If the Y. W. C. A. has a building of its own it becomes a community center, where all women's organizations may meet.

"Every available seat was occupied, in fact, the church was literally packed last Sunday night when Dr. and Mrs. A. T. Robinson began their wonderful course of addresses and travelogue lectures at the First Baptist church, under whose auspices these people have been engaged for six nights. It is the verdict of all who have heard the first two or three of these lectures, that for genuine meat in the skill, instructive, education, inspiration and real spiritual uplift, they have never been excelled and seldom equaled from any platform in Brown City. From the moment Dr. Robinson or his wife begin their addresses, the large audiences, crowded as they are in every part of the church, are completely captivated and much of the time are held spell bound by the speakers, especially Mrs. Robinson, with her marvelous descriptive powers, her vivid impersonations and forceful arguments for or against world conditions as they exist in these foreign lands today."
