You'll Want This Combination It is the Case 10-18 kerosene tractor and a two-bottom Grand Detour plow. It is an ideal plowing outfit for either small or large farms. The tractor weighs about 3,500 lbs., just a trifle more than a big team of horses. It burns kerosene economically, developing full power on the same. The Tractor has a four-cylinder valve-in-head motor, mounted crosswise on a one-piece frame. A Case Siphon Thermostat controls the cooling system and insures complete combustion. The all-spur gears, with teeth cut and hardened, are enclosed and run in oil. The Grand Detour 2-bottom Automatic Lift Rigid Beam Plow will fill the plowing requirements of the most particular farmer. Grand Detour plows are strictly quality plows. They are light in draft, yet so well constructed that they will give years of faithful service at a low cost of upkeep. We would greatly appreciate the opportunity of telling you more about Case tractors. Drop in and let's talk it over. J. A. COLE CASE KEROSENE TRACTORS

Feel Old? Overwork, worry, anxiety or sorrow undermines strength and health. These causes contribute to kidney trouble, and weak or diseased kidneys make one feel old in middle age. Foley Kidney Pills help weak, overworked or diseased kidneys and bladder so that the system is free from waste and poisonous matter that causes one to feel old, tired, languid. They banish backache, rheumatic pains, sore muscles, stiff joints. Mrs. J. D. Miller, Syracuse, N. Y., writes: "For many years I suffered with kidney trouble and rheumatism. I had a severe backache and felt miserable and all played out. I got to a place where I had to do something. After taking two bottles of Foley Kidney Pills I can say my backache is gone, and where I used to lay awake at night with rheumatic pains I can now sleep in comfort and enjoy a good night's rest." Ford THE UNIVERSAL CAR Surest Thing In the World Two and two have always made four. There would not be more than three million five hundred thousand Ford cars in daily service—which is just about one-half of all the automobiles in America—if the Ford, as a reliable motor car, did not meet the demands of all classes of people everywhere and under all circumstances. Two and two have always made four. If the material, the iron and the marvelous Vanadium steel used in the construction of the Ford chassis, were not of the highest quality known to the science of Metallurgy, then the Ford car could not have won its world-wide reputation for reliability. Two and two have always made four. When replacements and repairs are required on Ford cars, the Ford owner will be wise in bringing his car to our place, because we use only the Genuine Ford Parts, and we have the Ford skilled mechanics, and all the Ford knowledge that goes to maintain the high standard of quality which is original in the Ford car. When you want a Ford car or a Ford truck, and when you want repairs or replacements for the same, we earnestly solicit your business, assuring you of prompt attention, real Ford service, and economical Ford prices. **THUMB NOTES.**

John Cole, a veteran newspaper man formerly located at Kinde, now of Bad Axe, bought the Carsonville Journal Monday and plans to assume management of the sheet at an early date.

A suit has been commenced in circuit to dissolve the Lexington Milling Co., so that the property can be disposed of. The mill was built many years ago and occupies a fine lake front site, and the past few years has been idle.

Crosswell has free mail delivery. Peter McClellan has been engaged to act as carrier on the east side and three blocks over on the west side. John Straffon has taken charge of the remaining west side. Business places are to receive their mail four times daily and residents twice a day.

Falling on a hot air register, the eight months old daughter of Mr. and Mrs. Leland Phelps of Brown City was painfully burned Wednesday. The infant was standing up, hanging to a chair when an older child pulled the chair away, causing the girl to fall face downward against the register. While the burns are not thought to be serious, the child suffered a great deal from them.

Tuscola County Farm Bureau now has a membership of 1816 with the follow up work still going on in Elmwood township. The follow up work will be carried on in Columbia, Almer, Indianfields, Denmark and Watertown since the roads were in such bad condition that the work could not be properly done the first time over. It is hoped that the finish will show 2,000 members.

After a deliberation of eight hours, the jury in the case of Chas. Ellsworth vs. Albert Massacar in circuit court in Sanilac county brought in a verdict awarding Ellsworth \$2,000.00 damages. Eight ballots were taken among the jury before the agreement was reached. The defense will probably carry the case to the supreme court. The case drew a great deal of interest and the court room was crowded at the hearing. Ellsworth sued Massacar for \$5,000 damages in an alleged assault and battery case. His claims were based on actions of a mob of about 50 men who visited his home in Fremont township on the night of May 5, 1918.

Carl Shepan, 28 years old, held at the county jail at Bad Axe on the double charge of perjury, attempt to commit suicide by drinking a large quantity of medicine containing poison. The medicine had been prescribed by a physician and Shepan had been using it regularly while at the jail. He knew it contained a quantity of poison and when Sheriff McAuley came to take him to the

court room to be arraigned he grabbed the bottle and drank most of the contents. For about an hour it was thought the attempt was successful but three physicians worked over him and he was reported all right Tuesday morning. He has been serving a thirty day sentence in the jail for contempt of court.

As to the Number "Forty."

Forty may not be a "magic number," like three, or seven, and it has not the extraordinary properties which mathematicians have discovered in the number nine, about which a whole volume might be written without exhausting the subject. But the manner in which it figures in both fact and fiction is certainly calculated to pique curiosity. It is impossible to discern any mathematical reason for such use of it, wherefore the natural assumption is that it had its origin in some striking incident.
