CLEARANCE SALE

Beginning Saturday, Jan. 15, Ending Saturday, January 29

Two Weeks of Special Bargain Offerings. Our Greatest Clearance Sale. Profits Forgotten. Costs Disregarded.

Reductions so radical that all Gagetown and vicinity will sit up and take notice.

Two good reasons for putting on this big sale at this time. First--We desire to convert a good share of stock into cash. Secondly--People in general are waiting, expecting lower prices later on, so we have decided that it would be better to take our medicine now, rather than at a later date, for every retailer throughout the land is bound to play a losing game sooner or later in disposing of certain lines of goods. Our prices here quoted are from 25 per cent to 50 per cent lower than any prices named a few months ago. And we believe they are as low, if not lower than any future prices will be made during 1921. Come and see.

Back in the early 50's Horace Greeley said, "We must train up the rising generations to despise the institution of slavery." The world knows the result. 'Tis our duty now to train the rising generations that war is a disgrace to any civilized peoples; that war unhinges society; that a wave of crime follows war; that war leaves a burden of debt that holds back the progress of the world. The Savior taught that war was sinful under any circumstances; that no people can be classed as civilized while they are concocting implements and plans to kill each other scientifically.

Cletrac

*Wheels on a track—fit
Cletrac way—take less power*

The Cletrac Way Makes Farming Pay

The Cletrac replaces four to eight work animals, saves their care and feed bills—does more kinds of work, more days a year.

It speeds up every farm job—plowing, harrowing, fitting, harvesting, threshing, silo filling, road building, shelling corn and sawing wood. Puts more acres under cultivation and helps produce bigger crops.

Nothing stops the Cletrac. It travels easily on its broad metal tracks over soft, rough or hilly ground—*goes anywhere, any time.* Burns kerosene or distillate perfectly—and a boy can run it.

Come in and look the Cletrac over. See for yourself its sturdy construction. Let us show you what it will do for you on your own farm.

FARM BUREAU.

Representative wool growers from fifty counties met at Lansing Friday to discuss the wool situation. Most of them came instructed by their county farm bureaus.

The delegates passed a motion that the meeting go on record commending the State Farm Bureau in the management of the wool pool and that there be another pool of the 1921 clip.

The conference went on record in a resolution favoring the passage of the national "Truth-in-Fabrics" bill.

The State Farm Bureau has already begun the preparation of this report but it will be at least two weeks before it can be issued.

None of the representatives reported that they had come with instructions to sell. Some had been instructed to hold their wool for a year; most of them said they had been told to leave the matter entirely to the management of the wool pool and the final action of the meeting included this provision.

The State Farm Bureau reported its experiments to date in the manufacturing of low grade wool into blankets. It was the sense of the meeting that the State Farm Bureau proceed with the manufacture and sale of wool to any extent thought advisable.
