## COME FROM THREE COUNTIES TO PICNIC

NESTLE'S FOOD COMPANY PICNIC AT CASS CITY WELL ATTENDED.

Addresses, Band Music, Field Events and Ball Game Had Place on Afternoon's Program.

Patrons, friends and employees of the Cass City plant of the Nestle's Food Company came in from three counties to attend the picnic at Cass City, August 4. The success of the event was due in a large measure to Superintendent W. L. Mann and Assistant Superintendent R. J. Rogers, who were in charge of the local arrangements.

The picnic was characterized by a spirit of good will, basket lunches, band music, addresses by local and outside speakers, male quartette selections, ball game, field events, awarding of prizes, and ice cream and lemonade supplied in abundance by the company.

The weather man furnished an ideal day and there was an immense crowd who enjoyed every number on the day's program. Automobiles driven from long and short distances were lined in all the available parking space around the race track, in some places two and three deep. In nearly all the field events, there were many participants. The names of the winners are printed in another column.

J. D. Brooker of Cass City, as one of the speakers on the afternoon program, emphasized the value of the Cass City condensary to the community and the prosperity which this section has enjoyed through its establishment at this point. He called particular attention to the great benefit accruing to lands which held small value for tillage purposes for general crops, but which were suited for dairying and which had their usefulness facilitated by the establishment of a near-by market which could be reached by the milk route.

H. M. Rowe, personal representative of the executive department of the Nestle's Food Company at New York, brought a special message to the patrons of the company, in which he pledged the best efforts of the company to find a market for the farmers' milk at the best returns to the farmers.

A. B. Pike, dairy extension agent of the Nestle's Food Company and other officials were present at the picnic and participated in the activities of the day.

"The consumer does not care where the milk is produced. It is immaterial to him whether the milk comes from Oregon, Michigan, or New York, or as we have observed lately, whether his butter comes from Denmark," declared H. M. Rowe, personal representative of the Nestle's Food Company at New York City, in speaking to the patrons, employees and friends of the local plant at its annual picnic Aug. 4.

"Tinned milk is a world commodity," he said. "It is put up in the United States and then sold in India and China. Surely it can be put up in the United States and reach all our domestic markets. And after the milk produced on your farms is manufactured and carried to market, it must be sold, if sold at all, in competition with similar milk products, produced elsewhere but offered for sale in the same market with your own milk."

"It should be well understood that the dairy industry is composed not only of those who produce milk, but as well of those who market it. Both are essential. Some one must produce the milk and some one must take it to the market, either in its fluid state or after manufacture, and there sell it in competition, standing the losses, collecting the price, and out of that paying all the costs."

"This is a day of specialists. Successful dairymen are specialists and so must be every one engaged in the business of marketing milk. Some one has well said, 'A man thoroughly can master only one business and only an able man can do that.'"

"The consumer of tinned milk, and for that matter, of most any other product, is not particularly interested in anything except quality and price. He does not care what it cost the manufacturer for labor or cans or freight or selling expenses, nor does he particularly care what it cost the farmer to produce the raw milk. This may seem to be a cold, heartless condition of affairs, but you know it to be true, for you yourselves are very glad to be able to buy sugar and cotton goods at present lowered prices, even though, as you have read, the Cuban planter is getting only two cents per pound for sugar that costs him four, and the cotton planter likewise is not getting his costs back."

"During the past few years these

## TO HAVE BAD AXE POWER

Pigeon Council Closes Deal with Central Power Co. for Power.

After a delay of months the management of the Central Power Co., of Bad Axe, and the Pigeon village council have arrived at an agreement which insures current from the county seat plant for Pigeon. The contract which was rescinded by the Pigeon council in April has again been put in force and the Bad Axe company will start the work of placing poles and stringing wires at once. They agree to be furnishing current by October 1st.

## 30-MILE STRETCH OF TRUNK LINE

WILL BE COMPLETED WHEN 3 1/2 MILES ARE BUILT NEXT YEAR.

Road Runs in Straight Line from Greenleaf Twp. Thru Gagetown to Bay Park.

The Tuscola county board of road commissioners held the first meeting Tuesday for hearing objections to the construction of 3 1/2 miles of county trunk line road between Bay Park and Unionville. The road is to be constructed next year and when completed will be a part of a 30-mile stretch of trunk line running from a point four miles east of New Greenleaf through Gagetown and Unionville to Bay Park.

J. D. Brooker, a member of the board, was in Detroit Monday where he placed an order for three Ford trucks with cabs and steel dump bodies and hoists which will be used for maintenance work on the highways of the county.

George Hall of Caro, former county drain commissioner, and L. H. Stafford of Cass City, were the successful bidders on the 7 1/2 mile Caro-Deford road which is to be improved starting at the Almer cemetery and extending through Deford.

The road commissioners accepted separate bids for the two sections. Mr. Hall's bid for the first mile was \$7,807.84, while Mr. Stafford's estimate for the last 6 1/2 miles was \$45,350.30, an average cost per mile of \$7,087.75. The bids given are the lowest received and the bids ran as high as \$11,358.74 for the first mile, and \$63,261.94 for the remainder of the road.

The specifications call for a road with a roadbed of 24 feet from slope to slope, with a nine foot crown of gravel. The first mile must be finished by December 31 of this year, and the last section must be completed by October 1, 1922. The road is being built under the Covert act.

## AUTO RACES AT CASS CITY AUG. 20

The Cass City fair ground is to be the scene of big automobile races on the afternoon of Saturday, August 20, as a climax to the big fair held here the third week in August. Secretary H. T. Crandell has arranged for the Michigan championships to be run off on the half mile track with Bob Wilson and other stars of the state participating. The prizes will aggregate \$2,500 and there will be three hours of racing.

The track will be carefully guarded to prevent any accidents as auto races are very dangerous and spectators must stand way back from the zones where the cars are liable to crash through the fence.

## BUSINESS MEN TO SELL SEASON FAIR TICKETS

Local business men will conduct an advance sale of season tickets for the Cass City Fair at their business places. These tickets are good for five days and nights, Aug. 15-19 inclusive, and sell for \$1.50 each. The ticket has all the advantages of a membership ticket. Buy now.

## ADDS FAST DRYER.

C. L. Robinson has added many improvements to his laundry equipment the past two years in the line of rapid and labor-saving machinery. The latest device which was installed last week is a Hurricane clothes dryer. This is equipped with a multitude of steam pipes which heated to a high temperature dries hundreds of collars and small articles of clothing in half an hour. The articles are hung on movable racks and while one rack is being dried another may be loaded to take its place in the "hot place."

Never judge the merit of a joke by the laugh of a woman who has a pretty dimple or pretty teeth.

## THUMB FARM TENANTS INCREASING

VALUES OF FARMS INCREASE 63 PER CENT IN 10-YEAR PERIOD.

Number of Tuscola Co. Farmers and Managers Shrink from 4,544 in 1910 to 3,840 in 1920.

Tuscola county has less farms in 1920 than in 1910, less farmers, less farm owners and managers and more tenant farmers, according to a report recently issued by the Bureau of Census. The same conditions prevail in Sanilac and Huron counties.

Farm lands and buildings in Tuscola were valued at \$20,796,821 in 1910 and in 1920 at \$35,754,464, an increase of 71.9 per cent. In Sanilac county, the increase in values showed \$12,908,534, a gain of 57.9 per cent, while in Huron county, the increase in values in the ten-year period amounted to \$12,604,875, an increase of 60 per cent.

Sanilac county had 5,112 farms in 1920 and 5,659 in 1910; Huron county, 4,604 in 1920 and 4,728 in 1910; Tuscola county, 4,658 in 1920 and 5,244 in 1910.

Tuscola county farms in 1920 were operated by 3,840 owners and managers, and 818 tenants. Ten years earlier there were 4,544 owners and managers and 700 tenants.

In Sanilac county in 1920, there were 4,222 owners and managers and 890 tenants, while in 1910 the number of owners and managers were 4,962 and 697 tenants.

In Huron county, the number of tenants increased from 350 in 1910 to 548 ten years later. The number of owners and managers decreased from 4,378 in 1910 to 4,056 in 1920.

## NIGHT THIEVES TOUR HURON COUNTY

Enter Stores at Bad Axe and Sebawaing; Take Car at Kilmanagh; Hotel Cash Drawer Robbed.

Bold and bad thieves and bandits were touring Huron county, Monday night. At Bad Axe they entered Arthur Dundas' hardware store, thru a basement window, and stole a \$275 cash register and three revolvers. The register contained \$21 and was locked. Next day the cash register was found in the ditch near Grassmere badly smashed up and minus the cash.

On the same night some one stole a new Patterson car from Wm. Haist at Kilmanagh and about four o'clock that morning a jewelry store in Sebawaing was broken into. The supposed parties were later seen near Sebawaing, where they had two cars but abandoned one, a Dord, which had a flat tire and no numbers.

At about three o'clock Tuesday morning a light is reported to have been seen in Slack Bros. store, but no goods were missed.

The Morrow House reports that on Wednesday afternoon \$60 were taken from the office cash register while clerk Howard Thorulby was temporarily out of the room.

Sheriff McAulay is working on the Monday night robberies but as yet has no clues.—Tribune.

## PARSONS IS COMING.

Parsons, the eye man, will make his next regular trip to Cass City Friday, Aug. 12, and can be consulted at Dr. Morris' office where he will test eyes and fit glasses from 9 a. m. to 5 p. m.

Dr. Parsons will be at Gagetown Monday afternoon, Aug. 8.—Adv. 1

## 3 TO RULE EACH COUNTY, IS PLAN

COMMISSION FORM OF GOVT. IS AIM IN RE-ORGANIZATION MOVEMENT.

Proposition to Come before People at Election in the Fall of 1922.

The establishment of a straight commission form of government for the counties of Michigan is the aim of the leaders of the county movement, the first step of which will be the circulation of petitions to place a constitutional amendment before the voters at the fall election in 1922.

While Michigan and one or two other states are the only ones which still retain the old supervisor form of county government, there is no state in the union, even those that have county commissioners where the pure commission form of government, prevails.

In nearly all these states the sheriffs, prosecutors and several other officials, including in some cases county clerks, are elected directly by the people.

What the Michigan county re-organization committee has in mind, if the amendment to the constitution permitting a change in the present form of government is adopted, is to frame a county government law under which counties which so elect by referendum may establish a charter form of government consisting of three elected commissioners, with the rest of the county officials appointed by the commission.

Active circulation of the petitions will begin in August. Committees have been named in each county in the state to handle the work under the direction of W. P. Lovett, of Detroit, as campaign manager, and Russell F. Griffin, of Grand Rapids as secretary.

"The amendment leaves to the legislature the question of choosing county commissioners at large or by districts. In deference to the feelings of the citizens living in the rural areas of urban counties, we believe the question of district representation should be left open for the present," Mr. Lovett said.

"The amount of sentiment in the entire state favorable to this program is so great that we have entire confidence that we shall succeed in obtaining the necessary signatures by July 1, 1922."

## COLWELL-MORGAN NUPTIALS

Marriage of Cass City Lady at Flint on July 10.

Announcements have been received of the marriage of Miss Edna Colwell daughter of Mr. and Mrs. Thos. Colwell of Cass City, to Mr. R. J. Morgan of Flint. The wedding occurred on Sunday afternoon, July 10, at the home of Mr. and Mrs. Donald Stevens, the latter being a college chum of the bride.

The ceremony was performed by Rev. Dutweiler, pastor of the Court St. M. E. church, and Mr. and Mrs. Stevens were the attendants. The bride was married in a beautiful gown of imported white organdie. The wedding supper was served in the Stevens home. Cass City friends of the bride did not learn of her marriage until a few days ago.

Mrs. Morgan is well and favorably known in this community. She has taught in the Cass City and Akron schools and is now employed as bookkeeper at the Cass City Grain Co.'s Kingston plant. During the war, she served for 16 months in the Navy Dept. at Washington. While in that city, she met Mr. Morgan, whose home was then in Texas. Mr. Morgan was in his country's service two years.

## LOCAL PASTOR DECLINES PROFFERED D. D. DEGREE

Under date of July 28, Rev. Wm. W. Edwards, pastor of the Presbyterian church at Cass City, writes the Chronicle from East St. Louis, Ill.:

"I decline to accept the proffered degree of D. D., recently extended to me by the Centennial University of Denver. I find that the institution is not included in the best of colleges and universities in the world almanac—although the college may be everything it should be, but I do not care for the degree."

"The doctorate in all lines of study is usually awarded only as the result of specified study, or in recognition of very notable scholarship or public service."

## MOONSHINERS TO GO ON TRIAL

County Officials Set Record for Running Down Prohibition Law Violators.

Prosecuting Attorney R. J. West and Sheriff McGuiness are making a record for enforcement of the prohibition laws in Sanilac county and as a result 24 individuals who have been caught in the drag net within the past few months will be up for trial at the next term of circuit court which convenes at Sandusky on the first Monday in September.

This number will probably exceed the whole number brought before the court during the whole term of former officials and shows that our present officials are determined to put the rum runner and the illicit still operator out of business in Sanilac county.—Decker's Recorder.

## WARNS OF FRAUD IN ALFALFA SEED

Much Yellow Trefoil Being Mixed with Other, Says Prof. Cox of M. A. C.

Much alfalfa seed sold in Michigan is being adulterated with yellow trefoil, according to Prof. J. F. Cox, head of the farm crops department at M. A. C., who is receiving a large number of samples of this plant. Consequently he has warned farmers of the state to plant none but native grown seed from the northwest.

"Trefoil seed is very similar in appearance to alfalfa," says Prof. Cox, "but the yellow trefoil plant has very small value compared to alfalfa for forage, hence the farmer buying seed adulterated with trefoil is directly injured, the loss caused him being in proportion to the trefoil carried."

"Great care should be taken in purchasing alfalfa seed to be sure that the native grown seed from the Dakotas, Montana, Idaho or Utah is planted in Michigan. The Grimm, Baltic and Cossack varieties are the hardest. Next to them good northern grown common alfalfa should be selected for Michigan planting."

## INFANT MORTALITY HIGH IN TUSCOLA

Caro Rate Is One of the Highest Reported in the State of Michigan.

High general death rates and infant mortality rates prevailed in Tuscola county during the first six months of 1921, according to semi-annual compilations of the division of vital statistics of the state department of health.

Rural sections of the county reported 373 births and 247 deaths from Jan. 1 to July 1, corresponding to a birth rate of 23.4 and a general death rate of 16.0 per 1,000 population; Deaths of 51 children under 1 year of age gave rural communities an infant mortality rate of 136.7 per 1,000 living births.

Caro reported 34 births and 21 deaths. This is equivalent to a birth rate of 24.5 and a general death rate of 15.1. Five infant deaths reported gave Caro an infant mortality rate of 147.1 per 1,000 babies born—one of the highest rates reported in the state.

## ENTERTAINING READING.

(From Pt. Austin News). The news items written by correspondents of country weeklies are not often read except by those interested in that particular locality but when gotten up in the way of the Deford correspondent of the Cass City Chronicle they make entertaining reading. He should have been a newspaper writer.

## SEVEN GREAT FEATURE ACTS

THIS MONTH'S FAIR TO FAR OUTSTRIP ANY FORMER EVENT.

Circus Carnival of 155 Cars to Bring Whip, Venetian Swings, Ferris Wheel, Etc.

With the golden harvest days of August comes that national institution, the county fair, and only a few days distant is the opening of a series of those purely agricultural events covering a period of practically two months. And what a wonderful revelation these county and district fairs are. Most of us take it for granted that the products of the Michigan farmer excel those of any other, or that this year's crop is superior to that of others; it is so easy to believe these things because we have become accustomed to it, but what a wonderful revelation it is when we visit the county fair and actually see these superior grains and products. Truly few farmers beyond the Thumb territory and practically none in other counties can fully realize what a "bumper" crop in the Thumb country actually means. And this year, above all others, we have bumper crops.

But two fairs are scheduled to be held in Michigan during the opening week, beginning August 15; Cass City and Ionia. And while Cass City has always given its patrons a good fair from every point of view, Secretary H. T. Crandell gives out the information that this season's event will far outstrip any of the former, not only in the exhibits of horses, stock, etc., but also from an entertainment view.

Seven great vaudeville feature acts will be presented free daily, both afternoon and evening to visitors. Added to this will be the popular Exposition Band of Earl Fraser Newberry, and magnificent displays of fireworks nightly. Then, too, a huge circus carnival of fifteen cars, carrying a merry-go-round, whip, ferris wheel and Venetian swings, together with some eight or ten sideshows. And still another feature will be the daily harness and running races for liberal purses. This will be the first meeting of what is known as the Thumb Racing Circuit.

## WEST TUSCOLA CROPS BADLY DAMAGED BY HAIL

Worst Storm in Years Visited Gilford, Denmark and Fairgrove Friday Afternoon.

A big hailstorm damaging crops of corn, beans and beets passed through portions of Gilford, Denmark and Fairgrove townships Friday afternoon. The storm started west of Reese, crossed the northern part of Gilford township and passed eastward into Fairgrove township. It was the worst hailstorm that has visited that section.

Roofs were torn from farm buildings and trees were uprooted while the hail stripped the leaves from beans and beets. Some corn crops are practically ruined.

## H. S. TUITION FIXED AT \$55

Local Rate Is Considerably Less than Expense of Education.

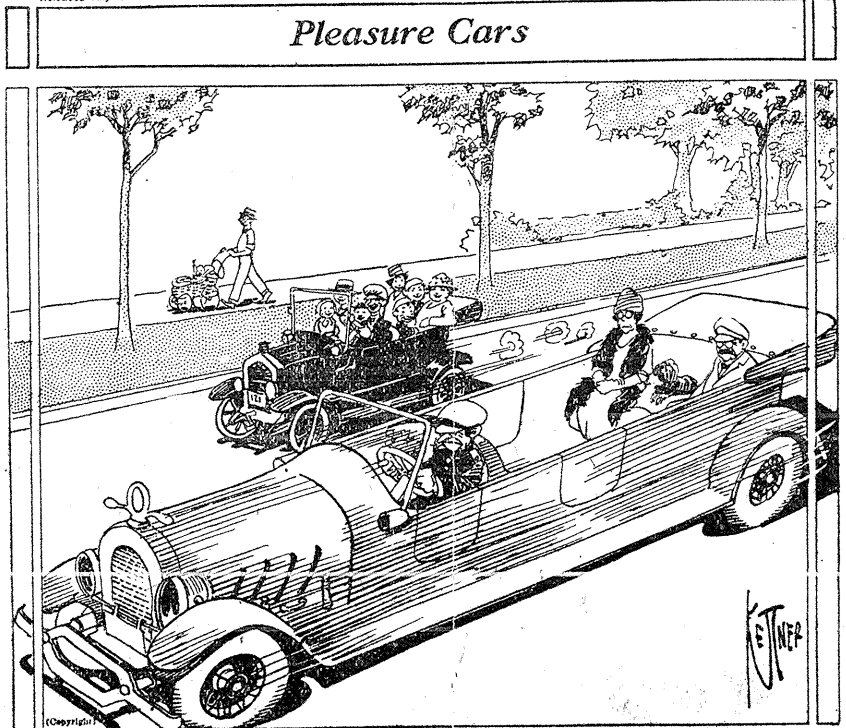

Tuition in the Cass City high school for non-resident pupils has been fixed by the board of education at \$55.00, one-half to be paid on Dec. 1 by the district of which the pupil is a resident and the remainder on April 1. This is considerably less than the cost of education per pupil as compiled by figures covering the expense of conducting the local high school.

The law allows the high school to ask districts from which non-resident pupils come an amount equal to the cost of education, providing that amount does not exceed \$60 a year. Many high schools in the state are making the maximum charge.

Tuition for non-resident pupils in the grades up to and including the 8th, has been fixed at \$20 per annum in the local school.

## SACK POOLED WOOL FOR MARKET MILLS

Sacking of wool for market has started at 130 local grading warehouses of the state farm bureau wool pool. Pooling continues and between 2 1/2 and 3 million pounds have been pooled and graded to date. Cash advances amounting to \$200,000 have been made to growers. No other state has pooled and graded locally and made cash advances on wool and no other state rivals Michigan in having all wool pooled to date ready for market and mill.

## FARMING BY WIRELESS.

We want the Cass City man who contends that "there's nothing new under the sun" to read this. We want him to see how easy it is to be mistaken.

The Department of Agriculture has just announced that it proposes to use wireless telegraphy to help the farmers of this country carry on their work. And to that end a daily marketgram service is going to be available to every farmer who will install a simple wireless receiving set at a cost of about \$550. The postoffice department will send weather reports, market reports, storm warnings and other valuable information broadcast to wireless stations which it will establish. Then it will be, in turn, flashed to every farmer who has a radio receiving outfit.

But whether you are a farmer or not, this news reaches into your every-day life, because it suggests some of the startling changes that may soon be brought about by wireless. The time may not be far off when a business man will have a wireless receiving apparatus in his office, keeping him posted on trade events and market changes almost the very instant they occur, whether he is in a city, a town, or a thousand miles away from either. The time may come, within your lifetime, when every housewife will receive daily, through wireless telephones, such things as food prices, weather forecasts, or even fashion tips. You can bet there are a lot of new things under the sun—and there are going to be a whole lot more.

## TIME TO WATCH OUT.

Crops are now commencing to move all over the country, and we may expect financial conditions to improve rapidly. Farmers of this entire country are disposing of a tremendous crop, which means more money will be put in circulation during the next few months than at any time this year. We are all going to benefit by this, for when the nation's crops commence to move the dollars go in all directions. No one knows this better than the fake stock salesmen. The post offices in the Thumb of Michigan will commence to handle a big lot of these tempting offers now, and they will come in a flood on through the fall and winter months. It seems hardly necessary to advise against dropping the big end of these in the waste basket or the fire, yet there will always be a certain element willing to take chances on getting something for next to nothing. So we use up this bit of otherwise valuable space to say to those who get these tempting offers in the mail—it's still as true as gospel that "a fool and his money are quickly parted."

## PUT OUT THE FIRE.

Several parts of the state have recently reported serious conflagrations traced directly to the carelessness of campers, and we feel sure that a few words of caution to people who may have occasion to build a camp-fire in the woods or along a highway will not be out of place here. No one objects to the fire—so long as you are careful. No farmer cares particularly for the few pieces of waste wood required to keep the fire going while you cook your out-door meal or make a pot of coffee. But in return for the favor use enough good judgment to see that every particle of fire is extinguished before you leave the place. If there is water handy, throw a few buckets of it on the fire before you drive away. It requires but a few minutes to do this, and besides preventing a possible conflagration in that neighborhood you are fixing it so you will be welcome to stop and cook a roadside meal in that locality any time you care to.

A Detroit man returned home from marching in a parade and shot himself. Somebody must have told him how he looked.

Sleeping sickness may be contagious, but it doesn't seem to have gotten around yet to the roosters of this neighborhood.

If you think the average Cass City housewife isn't notionate, try helping her with the house-cleaning and see how many different ways she wants the dining room curtains hung.

Still another advantage of being a bachelor is your razor is used for shaving only, and not for trimming corns.

Mr. and Mrs. Harris visited with the Pattersons Sunday.

R. E. Johnson's family were Fostoria callers Sunday.

The Jacoby family took in Bad Axe Sunday.

'Tis expected the oil pump will stand erect tomorrow (Aug. 1)—an emblem and guarantee of more prosperous times.

Don Nutt seems pleased to be with us again.

Thos. O'Rourke was here part of past week. He reports the old Drumm ranch, west of Detroit, in fine shape.

Our Good fellows all went to Lapeer on the 29th to help the Odd Fellows to do work peculiar to themselves and eat fat beef.

Mr. and Mrs. Elmer Bruce came home on the 29th from Richmond where they had 10 days visiting.

The R. D. Lewis family spent Sunday with kindred northeast of Cass City, feasting on wheat bread and hen.

The "cupes" come in free when 'tis considered a dry season with us. Clarence Chadwick has completed a well for the man on the old Geo. Walker farm and is now drilling one for Henry Cure.

New potatoes as scarce in Deford as cool water in "hades."

Our state road has been let to Geo. Hall and Mr. Stafford at a total cost of \$53,000.00. 'Tis expected it will be completed so Caroiters can come to Deford to get goodies for Christmas.

Pete Daugherty is "commander-in-chief" of the pickle factory.

They come from the mountains and the plains to have the autos put in order.

Ladies' Aid met on Wednesday, the 27th.

The first house in what we now call Deford was built by Hiram Daugherty 39 years ago.

Morley Palmateer of Imlay City was here last of past week.

Henry Cure is scattering wealth. Has a man bringing a rock well into existence and another building a chimney on the domicile.

Howard Malcolm conducts the water from the old condensary building to his wood's pasture. The water looks right, but I would fear a curse on that piece of soil and all it contains.

Although the writer was born in the land first called "Imisfail", he this day writes on the inner bark of the tree of the forest. Paper may rise in price, paper employees may strike, but we will send the news from Deford while grass grows geese and water runs.

Joseph McCracken spent Friday and Saturday in Pontiac. He found it Pontiac, but living Pontiac no more.

Mr. and Mrs. A. Shaw have returned from a ten days' trip in the south part of the state.

Mr. and Mrs. Stinger and Mr. and Mrs. Parker of Owendale spent Friday afternoon with Mr. and Mrs. Wm. McCartney.

Mr. and Mrs. Glen Mokes of Fairgrove were visitors at the Howard Malcolm home Friday last. Mrs. Mokes will be remembered as Mrs. Alice Powell.

When you find a woman that passes by flowers and sees them not, remember the words of the great Napoleon, "A woman that does not love children and flowers is unfit for a mother in any land."

Wm. Courliss has much improved in health during the hot weather of the season.

Talk of power in office. The devil seems to have that commodity in fullness now. For instance, he prompted me to a ball of Sunday decoration, then asks me for "a quarter" that I may have the privilege of obeying his majesty.

'Tis a rare case when fall plowing can be done. We need a three day rain.

It is of small consequence what the speaker may say over the remains of him that has passed on, but 'tis of great consequence what each thinks to himself what manner of man has gone out from among us. What were his merits and demerits while an actor on the world's stage? Those that knew him best can think and judge most correctly.

Mrs. Chas. Kreiner has recovered the use of one hand. The boil on the other hand is yet in the severe stage.

Come all ye canine lovers wherever you may be, if you sigh for pointers on the breed called on aged Mr. G. who rears a "pup" great in worth and high dexterity. He surely is the smartest pup "that ever spoke for scraps of meat or chewed a liver up."

Howard Malcolm is cutting down his evergreen hedge that it may out and grow as portly as a lager beer Teuton.

Mr. and Mrs. E. R. Bruce made an extensive trip when they went to A. L. Bruce's at Richmond. All things being favorable, they thought to see the whole eastern country. Went to Avoca and had grub with Elder Thompson; went to Imlay City and visited Elder Meredith, formerly of this place; spent Sunday at Memphis with Perry Spencer that sold nails and gimblets to us in an early day; hiked over to Pontiac and saw the Kilgore family; wheeled over to Orion resort and found the Frank Drace family that once lumbered among us; back to Richmond after seeing Detroit and suburbs—and no where saw a better prospect for plenty to eat this winter than right here in Novesta.

We have had some strife in hen fruit by our merchants, great and small, and the man with least experience seemed to scoop them all; for if the extra penny was gently put on, they were as promptly taken by one McCaughney called Don.

### HOOTCH "PIZEN" THEY SAY

One prohibition officer who got friendly with the bootleggers of his city and learned some of their secrets reports the booze they hand out contains 20 to 30 per cent of pure ether, or enough to eat away the linings of the stomach. Ten men in that community recently died from booze poisoning. In Chicago most of the bootleg stuff consists of diluted tobacco with a large percentage of nicotine. Nicotine in concentrated form has a "kick" sufficient to wreck if not kill the drinker. Then there is a mixture of wood alcohol, ether and prune juice that is as deadly as prussic acid. Give the bootleggers time and they'll make the prohibitory law easy, says an observer.

### THUMB NOTES.

#### Fell Sixty Feet.

When he lost control of the man-lift and fell from the top of the elevator of the Decker Grain Co., to the bottom a distance of 60 feet Jud Wood, an employee of the company narrowly escaped death. Mr. Wood started up in the lift and not being familiar with the mechanism of the machine lost control and the lift shot to the top of the elevator. The force of the lift when it reached the top was so great that it broke the cable and it reversed and came down with great speed. Manager VanConant heard the weights strike the basement and rushed in to see what the trouble was. He lifted Jud from the elevator and carried him outside, where he was found to have his leg and several ribs broken.—Sandusky Republican.

#### Community Church.

G. S. Farrar has been elected chairman and Chas. J. Kappler secretary of the Community church board. Neither are members of any church. The organization is being conducted on such broad lines that those of all beliefs and those of none at all may work together in harmony in making this a better world. With this one object in view, it is the idea that each may pursue his own course, unhampered by rules, beliefs, creeds and dogmas. If one man holds the opinion that his neighbor is steering his ship into dangerous waters, he is expected to advise him, to show him kindly his mistake, but not to dictate his course for one human being is as likely to be in error as another. If kindness will hold sway over the tongues of all, both in and out of this church, and each will tend to his "own knitting," rather than his neighbor's, the Community church should be a big success.—Pt. Austin News.

#### INCREASE BEAN PROTECTION.

The proposed protective tariff on beans was raised recently from 1 1/4 to 1 1/2 cents by the House Ways and Means committee, upon action of Congressman Woodruff of Michigan, following receipt of a resolution from the state farm bureau executive committee, declaring in behalf of 100,000 Michigan farmers that the cent and one quarter protection was not enough to enable Michigan farmers to meet Oriental competition.

#### LOSSES LARGELY DUE TO CIGARETTE SMOKERS

An underwriter who watches losses closely says that his company is getting a large number of small claims due to fires in awnings on fireproof buildings. He states that these are particularly numerous in mercantile, office and hotel buildings. Most of them are attributed to burning cigarettes thrown out of windows of higher stories and their number has increased since the war, with the increase in the use of cigarettes.

In the opinion of this underwriter this hazard is not considered sufficient when the buildings are rated. By reason of the low fire hazard of the structure itself a very low rate is made. Then awnings are put on, and the losses on them often consume the entire premium received. While these losses usually run from \$5 to \$50, there are so many of them that in the aggregate they become noticeable in volume.

#### MUSINGS OF A RURAL MAIL MAN

##### Upper Sandusky—

There's a man in this land whom you're all glad to meet,  
Though he visits your home every day.  
He brings the late news from the populous street,  
And greetings from friends far away.

Though the mud be hub deep and you're far from the pike,  
And you fear that today he may fail,  
It's a safe bet that somewhere he's hitting the hike,  
Just to be there on time with your mail.

He is out with the dawn and gets in late at night,  
Though he hurries the whole long day through;  
He pauses at noon for a cold, frozen bite,  
While you, perhaps, dine on beef stew.

In all kinds of weather he's out on the job,  
No matter what perils assail,  
His heart may be breaking; you'll never hear a sob  
From the man who delivers your mail.

Have a tear for his sorrows, a smile for his joys;  
He surely deserves the glad hand.  
Though one of the humblest of Uncle Sam's boys,  
There's something about him that's grand.

When his last trip is finished and he is called higher,  
Having bidden farewell to this vale,  
St. Peter will say: "Here's a seat in the choir  
For the man who delivered the mail."

—L. G. Walberry, R. F. D. Carrier.

### BAD AXE WATER RATES TO ADVANCE

At the last Bad Axe council meeting it was voted to make an increase of 50 per cent in city water rates. Returns from present water taxes do not pay half of the pumping expenses. These latter, however, it is expected will be materially reduced as soon as the new electric pumps are installed.

The council also decided to make a complete water survey of the city and the same is now under way. By this will be determined the condition of all inside taps and pipes and the exact number in use, and also the number of people who are not paying for bath tubs, wash tubs, lawn sprinkling, horses, cows, stores, etc., which come under special rates.

Every water user not now on a meter can have one installed and the cost remitted from their future water tax. The cost will be about \$12.00. Under the new rates many will not doubt be able to save the cost of having a meter installed at once.—Tribune.

### OTHER STATES ASK FOR MICHIGAN HAY

An unprecedented demand has come from outside the state for information about possible sources of supplies of clover, alfalfa, mixed hay, and hay in general, says the farm crops department at M. A. C. The hay crop is short in Michigan, but apparently even more disappointing in these districts. The dairy trade of eastern states and of Ohio in particular, desires alfalfa, clover and mixed hay. In spite of the great increase in the alfalfa acreage in Michigan there will be very little of this valuable hay for export from the state, it is said.

#### Thinness of Spider's Thread.

A scientist once compared a hair of his beard with a spider's thread under a microscope and estimated that it would take 10,000 threads to equal one hair in substance.

#### Character Tags.

A professor says that a man's character is shown in little things, such as by the way he carries his umbrella. Also, we may add, by the way he carries off your umbrella.—Boston Transcript.

#### Patching Holes.

Sifted coal ashes, sand and wheat flour, mixed with water, make an excellent mortar for patching holes when the plaster is broken. Use two parts ashes and sand to one of flour.

## DANDY THE DAIRY

### TO GROW SUFFICIENT SILAGE

Experts Assert It Is Better to Carefully Figure on Silo to Fit Herd of Cows.

(Prepared by the United States Department of Agriculture.)

The planting season is the time when the dairy farmer should arrange to see that he has crops enough to fill his silo. As a case in point, a Mississippi farmer failed to take this matter into consideration when he bought a silo of 60 tons' capacity, for he found that he had corn and sorghum for only 20 tons of silage; and since, moreover, he had only 8 cows, he decided he had made a mistake, and tried to sell his new silo instead of setting it up. A field man from the dairy division of the United States Department of Agriculture, however, persuaded him to keep it until the next year, and to put up a small stove silo for immediate use. He did so, and found it such a help in feeding his cows cheaply that he bought more land and resolved to enlarge his herd to 50 cows, and thus make good use of his larger silo.

Both the height and the diameter of the silo must be considered. The proper diameter of the silo depends upon the quantity of silage to be fed daily; and this quantity will vary with the size of the herd. The silage should be fed out fast enough to remove it from the top of the silo at the rate of 1 1/2 to 3 inches a day, depending upon climatic conditions. The warmer the weather the more silage must be removed from the surface daily in order to prevent spoiling. For the winter feeding season it is safer to figure upon removing 2 inches daily than any smaller amount.

A common error in building is to make the diameter too large for the size of the herd. The weight of a cubic foot of silage varies according to the pressure to which it is subjected, but in a silo 30 feet high the weight per cubic foot averages about 40 pounds. So, by knowing the quantity of silage to be fed daily, it is possible to estimate what the diameter of the silo should be to permit the removal of a certain number of inches each day. The table below shows the proper diameter of the silo, on a basis of 40 pounds of silage per cubic foot.

### Laying the Foundation of a New Silo.

for herds of different sizes to be fed different quantities for winter feeding, when 2 inches of silage are removed daily:

### Relation of Size of Herd to Diameter of Silo For Winter Feeding.

Quantity of silage removed daily, in depth of 2 inches.	Number of animals that may be fed, allowing—				
	40 pounds per head.	30 pounds per head.	20 pounds per head.	15 pounds per head.	10 pounds per head.
10.....	524	13	17	26	35
11.....	624	16	21	31	42
12.....	764	19	26	37	50
13.....	886	22	29	44	59
14.....	1,026	26	34	51	68
15.....	1,178	29	39	59	78
16.....	1,340	32	44	67	89
17.....	1,513	38	50	75	101
18.....	1,696	42	56	86	113
20.....	2,094	52	70	104	139

A 900-pound cow ordinarily consumes 30 pounds of silage a day, and a 1,200-pound one about 40 pounds. Yearlings eat about one-half as much as mature animals; fattening cattle, 25 to 35 pounds for each 1,000 pounds live weight.

It happens, sometimes, that a silo is not wholly filled, because there is not enough corn planted for silage, and there are not enough of other crops make up the deficiency. The amount of silage that may be obtained from an acre of corn varies from 4 to 20 tons. A fair allowance on average land is 8 tons per acre. Hence for a 60-ton silo it might be well to plant 8 or 10 acres of corn. It is by all means best to lay out land enough in silage crops to fill the silo to the very top; and if there is any doubt about how much will be needed, to allow a margin of safety, remembering that the season may cut down the yield of this as well as of other crops. On the other hand, if there is too much corn or sorghum to go into the silo, the excess can be cut as dry fodder, and other crops can be made into hay.

Two bulletins issued by the Department of Agriculture are useful in this connection; one is Farmers' Bulletin 835, Homemade Silos; and the other is Farmers' Bulletin 578, The Making and Feeding of Silage.

**Sleeping Sickness.**  
Medical experts disagree in their conclusions as to the exact nature of sleeping sickness. Some forms of "sleeping sickness" are not unlike brain fever, while others indicate symptoms much similar to spinal meningitis. Physicians advise caution against undue exposure to the disease until more exact knowledge of its cause is ascertained.

## CLAMPINGS IN OUR NEIGHBORING VILLAGES

**Ladies on School Board.**  
Marlette and Port Hope elected two ladies as members of the school board at the recent annual meetings. Why not? They are more interested in the welfare of the children than are most of the men and should make good school officers.

**Evangelical Assembly.**  
The eleventh assembly of the Flint district of the Evangelical association starts Wednesday, August 10, at Bay Shore park at Sebawaing. The first five days will be given over to the state convention of the Young People's Alliance. On Monday, August 15, the campmeeting and christian workers section starts, continuing to the close of the assembly on August 21.

**Two Bills to Pay.**  
Judge Beach decided a point of law recently, that is of interest to all communities. The clerk of Decker-ville had printed out of town a pamphlet of the financial statement of the village. The local editor contended that it should have been printed in the home paper, and the judge agreed with him. The village will have two bills to pay instead of one.

**Lost Valuable Team.**  
During the extreme heat of the past month, many farmers have had horses drop dead while working. Wm. Molesworth lost one of the team that captured all the first prizes in the hauling matches held at Peck and other points last winter. The team was worth \$500, in fact, it is reported that Mr. Molesworth was offered more than this for the team.

**Had a Narrow Escape.**  
Monday afternoon about four o'clock an accident occurred which might have been much worse in results than it proved. A young man named Anderson, employed on Jos. Smith's farm, was driving into Bad Axe for some farm machine repairs and had neared the long bridge just west of the city limits, when a front wheel of his Ford car broke and the car ran into the ditch and striking a tree turned turtle. Mr. Anderson was buried underneath the car and unable to escape until the car was raised by other autoists who happened along. That he was not killed outright seems almost a miracle, as the top was down. The seat evidently kept him from being crushed and except for some bruises to one leg, he was uninjured. The car was badly wrecked.—Tribune.

## SHABBONA.

Fine showers in this locality Monday afternoon.

John Chapman of Cass City was a caller at H. McGregory's Monday.

Albert Meredith and family of Caro spent the first of the week with his mother here.

Edna Agar of Flint is visiting relatives here.

Madelyn Phillips of Owendale is spending the week with her sister and brother, Carol and Hugh Phillips.

Mr. and Mrs. Henry Phillips and Mr. and Mrs. Avon Boagg spent a few days at Lexington last week.

Mr. and Mrs. Wm. Parrott of Detroit are visiting relatives here.

It is reported that "Dub" has purchased the M. E. parsonage for "Pat."

Florence and Burtie Loucks returned to Lapeer Saturday after spending the past week at their home here.

Mrs. Paul Leinhart and daughter, Iris, of Detroit are visiting at the homes of J. A. Cook and Thos. Brown.

The Oriole Circle will enjoy a hike and half day's outing in Jones' grove Friday afternoon.

Mr. and Mrs. Harvey Fleming of Detroit are visiting at the home of the latter's parents, Mr. and Mrs. D. R. Leslie.

Harold, three year old son of Mr. and Mrs. Owen Smith, passed away Monday morning after an illness of nine days from pneumonia. Funeral services were held Wednesday at the M. E. church. Burial at Elkland cemetery.

## Hairs in A Violin Bow.

The number of hairs in a violin bow was formerly from 80 to 100 in France; but now it is customary to have the hair ribbon broader, and this, therefore, requires 175 to 250 single hairs. These must be at least 26 inches long. Tourte bestowed great care on the selection of bow-hair, preferring the French horse-hair. A great deal of bow-hair comes from Russian horses.

## Ancient "Chapman."

In olden days there was a merchant who would buy his stores in the cheapest market, load them into a wagon, and drive about the country, selling where he could. He was known as a chapman and the modern name is derived from that word. As the merchant's chief stock in trade was a jovial personality the word chap has long meant a jolly fellow.

## RESCUE.

William and Arnold McCallum were on the sick list the first of the week.

A number from around here attended the ice cream social at Beasley Friday evening.

Mr. and Mrs. Martin McKenzie are living at Fargo now where Mr. McKenzie is helping build roads.

Grant Coad and Joseph Mellendorf took their first cucumbers to Owendale Saturday.

Ivan Rockwood of the Bay Port quarries visited a few days last week at the home of his uncle, Joseph Mellendorf.

Emanuel Duffield sold his farm, live stock and implements recently to Mr. Day of Detroit. Mr. Day and family have taken possession.

Bert Smith accompanied by Mrs. Harry Coad and Mrs. Lydia Ashmore were business callers in Cass City Saturday.

Mr. and Mrs. Joseph Mellendorf and son, Stanley, and Ivan Rockwood were callers in Elkton Saturday evening.

Mr. and Mrs. William W. Parker, jr., and daughters from here and Mr. and Mrs. Lawson Stinger of Owendale autoed near Deford last Thursday afternoon.

STOP and talk to the next man you see with U. S. Tires on his car. Ask him why.

Most likely you'll hear an interesting story about his tire experiments—before the answer was found. Money wasted. Promises unkept. Trouble on the road—humorous to every one except the man who went through it.

Finally U. S. Tires. And U. S. Tires ever since.

Perhaps it's the experience of U. S. Tire buyers that makes them more emphatic in their preference than ever this year.

When these men have tried most

everything by the way of "staggering bargains", "hurrah discounts", "discontinued lines at less" and so forth they know what not to get.

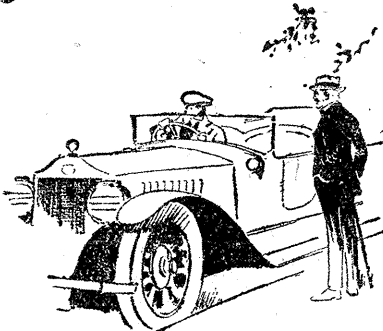

They want a fresh, live tire. With a good reputation. That's everything it says it is. With the people behind it who back it up.

There are 92 U. S. Factory Branches.

Your local U. S. Dealer is drawing upon them continually to keep his stocks sized up, complete—to give you service.

Whenever he gets one or a hundred tires from a U. S. Factory Branch, they are newly made this season's tires.

Sold to you at a net price. Full values. Square-dealing. A reputable maker. A reputable dealer. The whole transaction as befits the leadership of the oldest and largest rubber organization in the world.

### Every Person Should Save, Says Bosworth

Wm. B. Bosworth.

William B. Bosworth, director of sales for the government loan organization of the Seventh Federal Reserve district, is a veteran of the government's savings campaigns. Following a season in the offices of the savings division at Washington, Mr. Bosworth came to Chicago and linked up with the big work that is being carried on in the five states of the Seventh district—Illinois, Indiana, Wisconsin, Iowa and Michigan.

Mr. Bosworth seeks distribution as well as total of sales of the savings securities, for he believes that every man, woman and child in the populous district should own one or more of these securities.

"There is no better investment than the savings securities," said Mr. Bosworth recently, "and the various denominations make it possible for all the people to be practical partners with Uncle Sam, at the same time helping themselves. The government savings contests arranged by many states—all the states in the Seventh district are 'booked up'—should result in much good to the great savings movement conducted by the United States government. Postmasters who are leading these contests may feel sure that whatever the savings division can do to help them win their fights will be done gladly and earnestly. All they have to do is to write to the Treasury Department Savings Division, 25 East Jackson boulevard, Chicago, Illinois."

### SAVINGS CLUB ON BOOM

#### Dollar-a-Week Plan for Buying Uncle Sam's Securities Gains Big Headway.

The Dollar-a-Week Government Savings club has become the most universal organization in the United States. Its members range from Maine to California and every day brings new strength to it. The Seventh Federal Reserve district was one of the first of the twelve Federal Reserve districts to get off to a flying start in the organization of Dollar-a-Week clubs, and now it ranks high in the list of districts.

The Dollar-a-Week club is taking firm root in industrial plants and stores. Workers group themselves together and make regular purchases every week of the new \$1 Treasury Savings Stamps. Membership requirement in a club calls only for the purchase of one of the stamps every week. Four of these \$1 Stamps, with a few additional cents, can be exchanged for a \$5 Government Savings Stamp, or twenty of them for a \$25 Treasury Savings Certificate, which bears the rate of 4 per cent interest compounded quarterly, if held till maturity. These \$25 Certificates are short-term, rock-bound, absolutely safe, virtually tax-free, easily redeemable in case of need, and they never depreciate, but always are worth more than was paid for them.

No applicant for membership in a Dollar-a-Week club is ever "black-balled." Every member becomes richer for joining. Any postmaster can "initiate" a new member, and anyone can join at any organization or industry where government savings securities are sold.

In the last year, according to the Savings Division of the U. S. Treasury Department, half a billion dollars has been lost to Americans through fraudulent stock and oil deals. Think of it! If this money had been diverted to government savings securities, it would have gone into the channels of legitimate trade and industry and helped the population as a whole.

The Dollar-a-Week Club, composed of purchasers of Government \$1 Savings Stamps is growing apace, until now it extends to all parts of the country. It is particularly strong in industrial communities, stores and offices. Members agree to buy one of the stamps each week. Any postmaster can "initiate" a member by putting him on the roll.

No umbrella ever manufactured can measure up to Treasury Savings Certificates as a "rainy day" safeguard.

### CEDAR RUN.

Mrs. Cocker of Buffalo, N. Y., spent the first of the week at the Spaven home.

Mrs. S. M. Delling is spending the week in Caro.

Mr. and Mrs. Chas. Hammond of Caro spent Sunday at the A. Beutler and J. J. Hayes homes here.

### LOCAL ITEMS.

Miss Josephine McDonald entertained Mrs. Ben Ritter and Mrs. Wm. Martus at tea Wednesday in honor of Miss Evalene Linck of Detroit.

James Nesbitt, J. A. Cole, Ward Benkelman, Jas. Hamilton, Wm. Day, Frank McCauley, John Doerr, Floyd Reid, Morton Orr and G. W. Seed were among the local Odd Fellows who motored to Lapeer Friday and witnessed the conferring of the first degree upon 150 members of the Cramton class by Diamond Lodge of Detroit.

Mr. and Mrs. Wm. Martus and Wm. Martus, Jr., and their guests, Sylvester and Catherine Elsey, attended a reunion of the Linck family at Lake Pleasant Sunday. The two Elsey children, who have spent several weeks at the Martus farm home, met their parents at Lake Pleasant and returned to their home in Detroit. Miss Evalene Linck of Detroit came to Cass City with Mr. and Mrs. Martus and was their guest until Thursday.

### HOSPITAL NOTES.

Miss Irene Bardwell, who underwent an operation for appendicitis last Friday, is getting along nicely. Mable Friedberger of Deckerville underwent a serious operation Monday and is doing nicely. Mrs. M. M. Moore is still a patient and is improving rapidly.

### Nothing Known of Its Value.

Cleopatra had a warranted preventive of baldness, or a sure cure. Possibly she intended to employ it to wheedle Caesar or buy off rebellious Pothinus. Perhaps she planned to present it to Antony as a surprise at Tarsus. Possibly she held up the gift in a mode of feminine fickleness, and had it in her reticule at Actium, and through the power of that talisman drew Antony after her in frenzied pursuit, and in ignominious retreat. There is nothing in the discoveries of Egyptologists to warrant belief that Cleopatra's hair restorer had any actual value.—Exchange.

### COME FROM THREE COUNTIES TO PICNIC

Continued from first page.

fundamental principles of economics or common sense have been more or less lost sight of because of the prevailing conditions when all the world seemed to demand all of everything that could be produced. The milk industry in common with most other industries, came to be organized on a tremendous production. The country was exporting a vast quantity of milk and consuming an unusual amount. Now conditions are changed. The exports of condensed milk in May 1921 totaled less than one-fifth of the amount exported in May 1920.

"If a can of milk selling for 15 cents in the United States were exported, the money exchange rates alone, no charge being added for freight, insurance, storage, selling expenses, etc., would make it cost the consumer in England over 19 cents, in Spain over 21 cents, in Italy over 59 cents and in Germany over \$2.50. "The cold facts are that there has been for some time an over production resulting in a scramble for business and in price reductions. In every line of industry plants are either closed or running on part time. Some have already gone out of business and others will have to go. Those will survive which excel in efficiency of service and quality of product. These things are as true of individuals in business as of corporations and as true of farmers as of merchants and manufacturers."

Referring to the Marketing Association, Mr. Rowe said: "We have no quarrel with the Chicago Milk Producers Marketing Association any more than we have with any other competing buyer and manufacturer of milk. That association has gone into business, as it had a perfect right to do. We have continued in business, as we had a perfect right to do.

"In these times of keen competition and scrambling for markets no man, company or association is likely to continue long in business unless he or it delivers a service—a worth while service—to his patrons and the consumers of his product.

"If the marketing association can succeed in paying to the farmers in the territory where it operates plants, as much as other buyers of milk pay their patrons in the same locality, the marketing association will survive. On the other hand, should the marketing association be unable to return to its patrons as much as they could obtain for their milk if sold through other channels, there would then be no justification for the longer existence of the association.

"The Nestle's Food Company certainly has no quarrel with the association or with the farmers, and dairymen, who are now marketing their milk through it."

Continuing Mr. Rowe said: "When will conditions improve? What is going to happen in the meantime?"

"To predict would be rash. As Patrick Henry said, 'I have but one light to guide my feet and that is the light of experience.'

"When have there been conditions like those of the present day, with so much of the world in turmoil? he asks again. "Where is the light of experience to guide our present day feet?"

And to this he replies: "We have no predictions to make, nor panaceas to suggest. The utmost that we can offer our patrons is to pledge our best efforts to serve them well, sincerely and honestly, bringing back to them the best returns we can obtain for their milk in the market places of the world.

"With that pledge of service to you, our patrons, and with confidence in the soundness and permanence of our national institutions," Mr. Rowe concluded, "and thanking every patron for his generous co-operation, support and interest in our effort to produce efficiently a milk product of high quality, and with abiding faith in the guiding hand of Providence in all matters, I bid you au revoir, good luck, and God bless you!"

### The Mark Shows.

"You can often mend broken dishes and broken friendships, mend 'em pretty good," said a wise woman; "but they're never just the same again—the place where the break was is sure to show. Anybody that cares as much for chiny and friendships as I do, will be careful in handlin' both of 'em."

### STATE TO INSPECT ALL HEAVY SCALES

Department of Agriculture Purchases  
Two Trucks to Carry out Systematic Survey.

Recognizing that reliable weighing and measuring devices are as necessary to good business as dependable currency, and that 75 per cent of the products of Michigan Agriculture passes over heavy platform scales each year, the Bureau of Weights and Measures of the State Department of Agriculture will add two enclosed trucks for inspection purposes to its heavy scale equipment. Funds for the purchase of the trucks were allowed in the budget by the 1921 legislature.

Each truck will be equipped with measures to test gasoline pumps used at filling stations, and one ton of test weights for heavy scales. Correction of errors detected in scales will be made by the inspectors whenever possible. Frequently, it is said, the faults may be corrected by minor adjustments which the inspectors can easily make, obviating the necessity of merchants sending for scale experts.

"In the past," says H. H. Halladay, commissioner of agriculture, "the Bureau of Weights and Measures has not been able to look after any scale work except complaints on individual scales. Under the old system the test weights had to be shipped by freight, often taking weeks before the scales were examined. Systematic examinations can now be carried out by the department which will in time bring the scales of every county in the state to a higher degree of accuracy."

"The only parts of the state heretofore that have been getting scale inspection have been the more progressive communities having local sealers of weights. The new truck equipment will be at the disposal of the local officials wherever it is needed."

### LOSE TO FAIRGROVE

Rain Stopped Cass City-Caro Game  
Monday Afternoon.

Overconfident and lacking their usual ability in placing hits, Cass City was defeated by Fairgrove on the latter's grounds Friday afternoon. Woodhull, who started the pitching for the locals, fanned seven men in the first three innings. The score:

Fairgrove . . . 0 0 0 1 0 0 1 1 3—6  
Cass City . . . 1 0 1 0 1 0 1 0 0—4

Strike-outs—By Powers 8, by Woodhull 7, by Graham 1. Bases on balls—Off Woodhull 2, off Graham 3. Wild pitches—Woodhull 3, Power 4. Sacrifice hit, Culbut.

Rain stopped the Cass City-Caro game at Caro Monday afternoon after one inning had been played in which neither team scored.

Cass City is still in first place in the Tuscola league.
