New Fall Suits for the Fair at 10% Off Regular Price

The styles have never been any better than they are this year, nor have prices been so low for some time. If you are not ready to take your suit home, we will gladly hang it away for you, but be sure to pick it out during the fair week at the 10 per cent discount.

A Full Line of Fall and Winter Coats

are here to select from. And for the benefit of early buying we are going to offer a 10 per cent discount on every coat you buy during the week of the fair. With the prices so much lower than last year and with this extra 10 per cent discount, coats will be brought down far below your expectation.

Notice the Extra Specials for the Week of the Fair!

The Largest Assortment of Waists

ever shown in this town. These waists are made by the largest and best waist manufacturers in this country, and priced not any higher and in many instances even much lower than inferior grades.

Spring Coats to Close Out

Two lots of Spring Coats left to close out at \$7.48 and \$10.98. These coats formerly sold from \$18.50 to \$30.00. These will make wonderful coats for the early fall wear.

Children's and Infants' Coats and Sweaters

We have a large assortment of new fall sweaters and coats in for your approval.

Dry Goods Department

This department equal to the others is overflowing with the new season's merchandise. Come in while attending the fair and see the many new materials.

New Furs for Early Fall and Winter

We are just in receipt of a large shipment of Furs. Do not fail to see these while attending the fair. These furs are priced very low, yet we are going to offer them at 10 per cent off for the week.

New Skirts for the Fair at 10% Off

Just the class of skirts you have been looking for is here and during this special you can buy them at 10 per cent off, which will mean a great saving, and besides have the opportunity to select from a new full stock.

New Sweaters for the Fair at 10% Off

We have just received a large shipment of Sweaters—just what you need while attending the evening fair, for the evenings are quite cool and the long drives make it very uncomfortable without a wrap of some kind, and a sweater is the handiest garment to carry while attending the fair.

New Fall Dresses

A most wonderful collection of dresses to select from. These dresses are very smartly trimmed with either braids, ribbon or fancy embroidery, priced very low, from \$15.00 and up. And for our fair week special, we are offering them at 10 per cent off. Be sure to get in on this.

While at the fair grounds, any information you wish to get in regard to the ready-to-wear on the grounds or at the store, our lady in charge of the booth will gladly give it.

Get your season fair tickets at Zemke's.

THE TECKTONIUS SILO

The Silo with Superior Silo Fixtures so Infinitely Better That They Have Set a New Silo Construction and Service Standard

Advantages of Silage

If weather conditions are unfavorable in haying time and the owner of a silo finds it will be impossible for him to cure his crop, every particle of it can be picked up dripping wet, run thru his cutter, placed in the silo and saved.

In a general way it may be stated that regardless of what the crop is, it can be made into silage and its feeding value as silage will be in exact proportion to what its feeding value at that time would have been under any other method of curing.

The value of a crop preserved by the use of a Wood Stave "Tecktonius" Silo is increased about 40 per cent over that of a crop harvested in the usual way.

At a conservative estimate, two cows can be kept by feeding silage at the cost of one cow from the same acreage, fed on hay or other rufage.

Another important advantage of Silage is convenience in feeding and economy of storage room. Ten tons of silage can be stored in the same space as one ton of hay.

When properly taken care of, there is absolutely no waste to any part of the corn crop.

By providing a succulent forage, winter dairying is made profitable and no reduction of stock is caused by a dry season.

Still another advantage of silage is the reduction of the acreage needed for pasture; consequently more land can be brought under cultivation.

Silage is the cheapest feed that can be produced, as well as the best. It is a certain supply, notwithstanding the drought or the flood.

9 inch spring with approximately 2 inch take up. Requires 2500 pounds pressure to make taut. Gives each hoop from 6 inches to 10 inches take up according to size of silo.

Only one nut to tighten; being at highest point of contact, insures hoop easily drawn taut. Gives 3/4 turn of wrench.

SPRING made of best open hearth spring steel, oil tempered, with all permanent set removed.

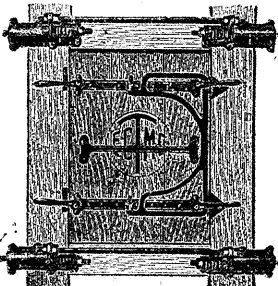

Malleable iron casting has 11 inch bearing surface, against about 4 inches on others.

Absolutely STRAIGHT PULL ON ROD. No bending, twisting, kinking, or binding of hoop.

ARE YOU NEEDING REPAIRS FOR YOUR SILO?

We are prepared to furnish you with Fir Staves, Hoop Supports, Lugs, Anchors, Cable, etc. Get your repairs as early as possible to avoid an unlooked for delay.

Tecktonius Perfect Fitting "Hinged" Silo Door

Door LOCKS at each of Four corners. Wedge-shaped door jamb causes hand lever to grip and hold each of the four corners tightly against door frame.

MALLEABLE-IRON DOOR HANGER, with four points of suspension. Double braced. Prevents door sagging or binding. Door lifts from Hanger—also Hanger from Casing Bearing.

"Hinged" door easily swings inside silo, clear of door opening. As easily handled and tightly locked as refrigerator door.

Stave Base Anchors, (6 in number) serve to hold staves firmly in place and, at the same time, provide an adjustment for contraction and expansion. The base of the average silo does not provide for contraction and expansion in unison with the balance of the silo. This serious defect is entirely overcome in the TECKTONIUS.

4, 5 or 6 cable anchors used according to size of silo.

Place your order early for Base Forms

Silos can be erected in one or two days after foundation is completed.

DEFORD.

They called us in a few days since their new babe to behold, To them a diadem more precious than fine gold, And then we mused how wise the law of great Omniscience, That gives us love to freely care for for helpless innocence.

A gypsy band passed through here Monday.

Lorenzo Gage is leveling up his dwelling.

A. Webster has his office ceiled and it looks fine.

Samuel Sherk was a business caller in Caro Monday.

R. E. Johnson and family spent Sunday at Hemans.

B. Sharp, who has been "off his feed" for some time, improves.

Wm. Courliss is having the finishing touches put on his front stoop.

First farmer oil came to Deford Aug. 6 when dividends began to grow.

Mrs. Charles Osburn of Owosso visits in Deford and vicinity for a week.

"Boney" Daugherty closed last week by calling on the hen fruit dealers of Pontiac.

Don Nutt went to Oxford last week to see if they were really dipping up good road gravel fifteen feet below the surface.

Ben Gage met with loss of a car tire while on road north of Deford last Friday night. Nothing serious happened.

Boys, don't crawl under the canvas when a show is here. We remember crawlers of more than 50 years ago and they all developed into second-rate politicians.

All plants in dry season start by putting the roots down deep. Late potatoes show not tubers on top roots, but pull up a hill and will find them down at bottom enough to insure a good crop.

Farmers tell us that middle of Aug. will find them cutting the maize. If any old heads remember an earlier in these parts, let him speak out in meeting.

Mrs. Caroline McArthur, John and Mrs. John McArthur and children and Duncan McArthur and his sister, Mrs. McGillis, were the Maes that visited with Mrs. Alice Curtis on Sunday.

The Irish will suffer for the potato is short. The Scot will wait for his oatmeal. The Johnny Bull can't eat sauerkraut, but we have a people that will be with us another year.

Our town is divided by a section line and well balanced by numbers on each side. But this is what licks me. We take a mental census and find five births on south in past six months and nary an addition on north side. Isn't that a staggerer?

If another oil tank should be established across the way from the one already located we will be forced to change the name of our city.

Never—never tell your wife that your mother could beat her cooking. Don't care how gentle she is, she will feel hurt, and if not gentle, she may feel fight.

We notice the two year old beans come to the elevator now—for who does not know that it takes hickory wood to cook the "talkers" when they have entered into the third year of their age.

The gifted Riley mused of the season of the year, "When the frost was on the pumpkin and the corn was in the shock." This year we see corn in the shock Aug. 15, but we invite Mr. Jack Frost to delay his call for at least one month after the date.

On the morning of the 9th, the families of Elder Baynon, Elmer Bruce, Howard Malcolm, Roland Bruce and Arthur VanBlaricom will point eastward and swing round the circle for a day's outing—keeping near enough Lake Huron to catch the balmy breeze.

In our younger days we read of the man who jumped the Niagara and swam the Mississippi. Did not expect to ever touch his noted palm but he was in our town with his show last Saturday night demonstrating that age cuts no figure with truly great men.

Athens and Rome had her great and gifted ones noted in history. The world refers to them at times as if they should be admired. They should be classed as barbarians that lived in a cruel age. Find record, if you can, of their almshouses and hospitals for the aged and helpless. Yes, we are growing better, even with all our hypocrisy.

Youth and age met on the public highway. Age was a son of Erin's Isle who manipulated a trailing horse—a lover of peace and willing to fight for it if he considered he was joshed.

Youth was a sprig of America running a tin Lizzie—had just started a mustache with three hairs on one side and two on the other of his upper lip. Each quoted law reinforced by strong language and threats of crucifixion if damage accrued but at last they passed by, each feeling their time had been well spent.

Notice the difference in sealed bids on the Caro-Deford road builders. On the one-mile piece, difference \$5,000. On 6 1/2 mile job, \$18,000. Can any think that road builders differ so much in judgment and figures? We must look further for the reason.

Our landlord is placing a cellar under the domicile—not large but commodious—room for all kinds of vegetables and a corner for a keg of liquor when the medicine comes down to a reasonable price.

The GREAT DAY AND NIGHT

CASS CITY FAIR, AUG. 15-20

Thousands of Dollars in Free Act Features

WRIGHT DUO

EQUILIBRISTS EXTRAORDINARY
PERFORMING SENSATIONAL BALANCING FEATS ON THE END OF A REVOLVING LADDER

A presentation abounding in novelty of the most daring description, full of courageous feats, startling in their conception, gracious and audacious in their execution.

The Wrights have been featured with the leading circuses for the past five years.

Although accustomed to thrills, Cass City Fair patrons will view this remarkably difficult feat with bated breath. Such wonderful equilibrium and absolute precision were acquired only after twenty years of incessant practice. So wonderfully perfect is this feature act that the Wrights last season held the position of honor—the center ring—with the Great Sells-Floto circus, and so prominent was their act that all other action in the circus stopped while they were in action.

A Genuine Sensation—An Original Novelty

Free to Cass City Fair Visitors Every Afternoon and Night—August 16 to 20 inclusive.

Jazz Rags—Grotesque Mule

The most Irrational, Bucking and Unridable beast on record.

Jazz Rags will provoke convulsive laughter, affording more genuine and hearty merriment than anything you have ever seen.

AERIAL PATTS

TRAPEZISTS SUPREME

An Artistic Presentation Eclipsing for Rapidity of Action Any Similar Offering Ever Witnessed. Unquestionably the Greatest Achievement of its Kind in the World.

FLYING PATTS—Lady and Gentleman doing without a doubt the fastest Double Trapeze Act that has ever been shown. To give you an idea of their speed, they do a full routine consisting of 11 different positions in less than one minute. Regaining their Aerial Bars, they start another routine of different and as many stunts in less than another minute. They perform with wonderful ease every known difficult feat that has ever been devised to thrill the spectator. Their breakaways, revolves and iron jaw holds are absolutely the acme of perilous hazard. The Patts are high class in every sense of the word and are the acknowledged leaders among Trapeze Performers throughout the entire circus world. There is a certain fascination in watching Aerial Performances as the least little miss or miscalculation might result in a disastrous fall, and the careless disregard of all danger displayed by the Patts throughout their performance stamps them as the most perfect of performers.

A bewildering array of feats of the hair-raising kind in the most rapid succession—every second crowded with action. FREE to Cass City Fair visitors Every Afternoon and Night—August 16 to 20 inclusive.

Roman Chariot Races

Standing Races of Ben Hur Fame

Depicting the amorous and pompous pastime of the jocund Romans—an undaunted and congruous assemblage of Hippodrome performances.

WHITE BROS.

GLEEFUL STUNTS AND MERRY PRANKS

Whose sole mission is to make you laugh, and laugh some more and then laugh until your fairly scream.

WHITE BROS.—Two young and exceedingly clever chaps who present a Comedy Acrobatic Offering full of original travesties, funny falls, droll situations and delectable pantomime. Do not imagine for a moment that their efforts are devoid of danger. The skill required in accomplishing intricate tricks and at the same time injecting good laughable comedy into them requires unusual skill in their execution, in fact more skill than if they were doing straight acrobatics. Every move must be calculated to a degree of nicety, perfection, daring and nerve must be displayed and an unusual degree of excellency must be attained. This may be new to the uninitiated but is nevertheless true as can be vouched for by every acrobat. Therefore, when looking at this comedy acrobatic number you are really witnessing a double number, for they combine the skill of the gymnast with the antics of the comedian as well. They have a clever act that is immensely entertaining.

A JUBILEE OF HILARITY

Funnyisms that are new and irresistible. Superior skill displayed in their difficult bumps and rough-house and still artistic tumbling.

Free to Cass City Fair visitors Every Afternoon and Night, August 16 to 20 inclusive.

Denver—High Jumping Horse

The horse holding the record for high jumping. Depicting the highest element in equine skill and judgment—a feat bordering on the miraculous and accomplished with the ease and precision of the most finished human performers.

Leach-Wallin Trio

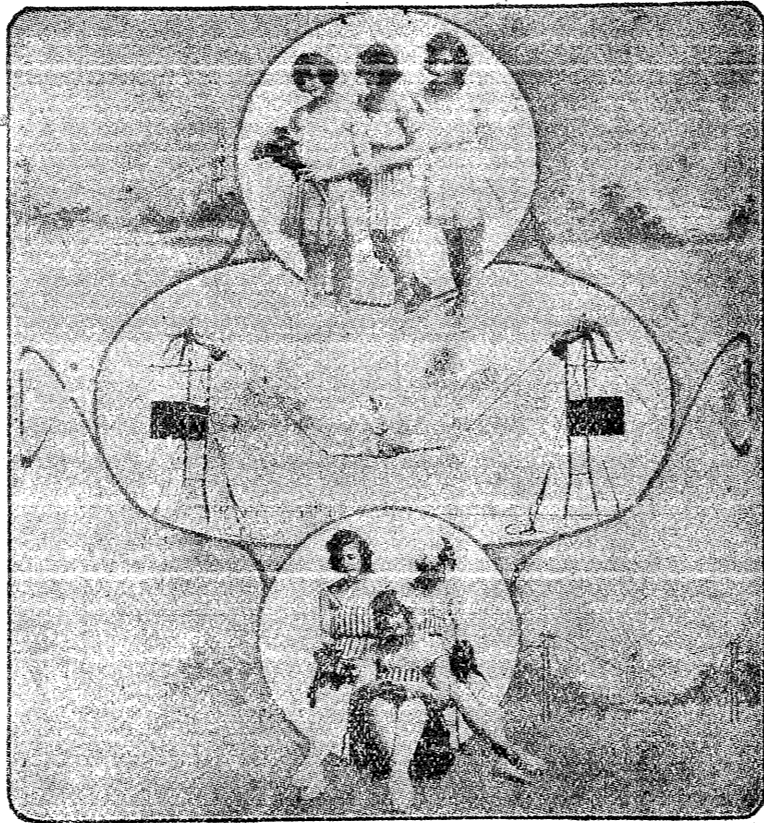

**Originators of Daring Dental Feats—
The Greatest of All Iron Jaw and Wire Exploits.**

Three wonderfully talented young ladies in a combination Iron Jaw and Wire Act. The paraphernalia used in giving this performance presents a very magnificent appearance as it is all nickelplated and consists of two standards projecting high in the air on top of which are two small pedestals. One of the ladies stands on each pedestal holding a wire in her teeth while the third one goes through a series of varied evolutions on the wire.

With each different trick performed on this slender thread, the ladies holding the wire change their positions. They do backbends, headstands, splits and assume numerous other positions. The effect is startling and their bodies thrill and sway with the movement of the wire, sometimes to such an extent that spectators gasp as it looks as if these women will be jerked from their slender foothold at any moment. The tricks performed on the wire are really out of the ordinary and the final one wherein countless revolutions are performed with such amazing rapidity that it seems almost impossible to count them, is an outstanding feature that leaves a genuine thrill behind after the act has finished.

Too much cannot be said of their splendid appearance and the smart looking wardrobe which is changed with each performance during their engagement. Everything about this act stamps it as one of the classiest offerings in the Circus World.

Famous Exposition Band of Mr. Earl Fraser Newberry

Mr. Newberry's Band has been specially organized and perfected for the peculiar requirements of extensive out-door entertainment programs. This is particularly true with reference to platform feature acts, such as appear in large numbers at Cass City Fair this season. In addition this band also features a number of soloists on various instruments, making the organization one of the very highest order and perfection for concert purposes. Then, too, all of these in ensemble, form what is nationally recognized as the finest, most versatile general musical organization in this country.

The various soloists, having individual national reputations of the highest rank, will delight fair visitors daily with classic as well as popular selections, a feature never enjoyed by fair patrons of this section.

Newberry's Famous Exposition Band has only recently closed a most satisfactory and delightful engagement at the magnificent Zoological Gardens at Cincinnati, and after the Cass City engagement, it is scheduled for many of the largest state fairs and expositions throughout the middle west and southern states.

CLIPPINGS IN OUR NEIGHBORING VILLAGES

Sebewaing Liked Chautauqua.

Arrangements have been made for the return of the Radcliffe chautauqua to Sebewaing in 1922, 34 business and professional men and other citizens interested in the success of the movement having signed a contract to that effect. The same chautauqua presented a series of entertainments at Vassar last week and guarantors have arranged for another chautauqua next summer.

Suckers Were Ripe.

Some two or three months ago a plausible stranger drifted into Crosswell and one of the first easy marks he struck was the editor of the Jeffersonian. He was selling a map that was not yet issued but when it did come out it was to be one of the best ever, showing all the good roads, all the state highways, all the railroads, all the best melon patches, in fact, it was such a good map that no family could be happy without one, and we bit. There were others in Crosswell who also took a bite and gave their orders. The maps were delivered last week and say, they are just maps and nothing more. A better map could be secured from the state for fifty cents yet we easy marks coughed up \$3.95 to get something that was just a little better than anything yet issued. We did not mourn too hard over the loss of those 395 pennies until this week Wednesday when a circular was received offering a map of the state, a fac simile of the high priced article, and they can be bought for about 25c in quantities. It was ever thus, the smooth tongued guy gets the suckers, and this is written just because an honest confession is good for the soul.—Jeff.

County Normal Abandoned.

Owing to the fact that there are only five prospective students for the county normal, that branch of the school work will be abandoned in Crosswell, at least for a year. The new law that requires that all teachers have a life certificate after 1929 may have a bearing on the question of attending county normals, anyway, there seems to be little interest manifested in the department by would-be teachers of the county, hence the situation.

Charged as Incendiary.

Frank Quell, 42, married, of Elmwood township, was arrested, Tuesday by Deputy Sheriff Hutchinson, charged with arson, by Monroe county officials, who allege he set fire to his brother's large barn near Monroe, Sunday night. Contents, stock and tools, were destroyed. Quell claims that he worked on his father's farm until aged 28 with the understanding that the old homestead was to be left to him, but that his brother beat him out of it. For the past three years Quell as resided on the farm west of the Wild schoolhouse south of Gagetown.

Firestone

30x3½

STANDARD NON-SKID

The Fastest Selling Tire In America

The increasing popular demand for the Firestone Standard 30x3½ inch tire over a period of years has given us big volume. Our Plant No. 2 devoted wholly to this size tire with a capacity of 16,000 tires and 20,000 tubes per day cuts costs on every operation. On May 2, we dropped our price to \$13.95 passing on to the car owner the full benefits of this big sales volume and this labor-saving plant. This tire has been our standard for years—four plies long staple fabric—extra gum between plies—heavy non-skid tread. The greatest value ever offered car owners. Insist on Firestone.

Our Cord Tire Values

Firestone Cord tires are made exclusively in Plant No. 1. Our process of double gum-dipping each ply of cord gives thicker insulation. The massive non-skid tread, with extra thickness where wear is most severe, gives real effectiveness in holding the car against slipping and adds many extra miles of service.

Firestone Cord tires are sold at the lowest prices in cord tire history: 30x3½, \$24.50; 32x4, \$46.30; 34x4½, \$54.90.

PLENTY OF LIGHT AND AIR

Two-Story, Seven-Room House With Attractive Stucco Exterior Over Hollow Tile—Large, Broad Front Porch Screened In.

By WILLIAM A. RADFORD.

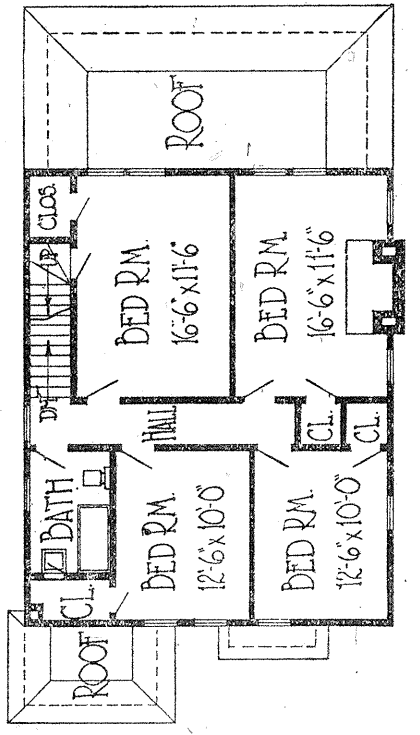

Mr. William A. Radford will answer questions and give advice FREE OF COST on all subjects pertaining to the subject of building, for the readers of this paper. On account of his wide experience as Editor, Author and Manufacturer, he is, without doubt, the highest authority on all these subjects. Address all inquiries to William A. Radford, No. 1827 Prairie avenue, Chicago, Ill., and only inclose two-cent stamp for reply.

In building a home today the prospective owner has to take two important factors into consideration, cost and comfort. We all have different ideas of what these should be and that is why houses are built along such a wide variety of lines. To some the western bungalow, petite and individual, is very appealing; to others, the story-and-a-half dwelling is just the thing, but there are still a great many who prefer the conservative roomy, unpretentious type that personifies solid and substantial comfort.

To them the two-story house is an absolute necessity with its customary four bedrooms on the second floor. This house is very often built rec-

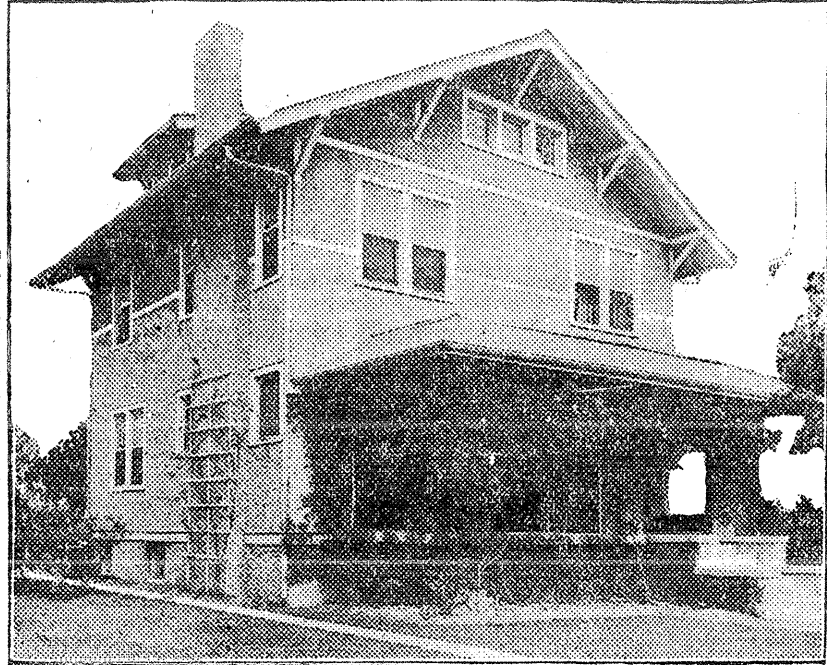

living room and connected with it by another double open doorway, is about the same size. It has windows on two sides and a built-in buffet at the rear. The kitchen is located at one side. It is small in comparison to the other rooms, but contains all that the housewife needs to carry on her work efficiently and quickly.

Going upstairs we find the sleeping rooms and bath. Four bedrooms are grouped about a central hall. Of these

Second Floor Plan.

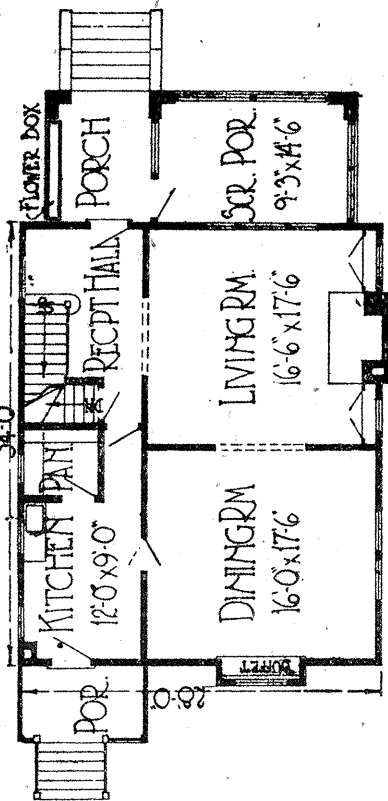

rooms the two front bedrooms are the largest, being 16 feet 6 inches by 11 feet 6 inches each. In one of the front bedrooms the fireplace has been built just above the main fireplace in the living room below. This makes this room a very cozy retreat. It can

angular shaped with either hip or gable roof. Inside the floor-plan arrangement is practically the same. For those who prefer the gable roof type, the house shown here will possess considerable interest. It is one of those substantial, solid buildings that radiate a feeling of roominess and complete comfort. While giving an external impression of bigness it is by no means very large as the dimensions reveal. It is 28 feet wide and 34 feet long.

The exterior treatment is quite attractive, being a rough finish stucco over hollow tile walls. The basement foundation is solid concrete as are the front steps and porch platform. Stucco lends itself very readily to garden decorations such as vines and flowers and an artistic piece of lattice or trellis work at advantageous points adds considerably to the charming appearance of the home.

The front porch, broad and spacious as it is, is most inviting. Part of it

First Floor Plan.

has been screened in to serve as a sun porch or sleeping porch. The other part is open and leads the way to the front door and reception hall. At the left of the reception hall is a wide open doorway into the living room which is 16 feet 6 inches by 17 feet 6 inches. It has a triple window on the porch side and two small windows on the outside wall to furnish light. There is also a large brick fireplace with supplemental wall bookcases on each side.

The dining room, just in back of the

be converted into a library or den without much trouble.

The two rear bedrooms are not as large as those just described, but are ample for the needs of a family and well lighted and ventilated. It is important to build in enough window space in the modern home. The old idea was to keep as much air out as possible, in sleeping rooms. Consequently very little window space was provided for in these rooms. However medical science has shown that the healthiest home is the one that affords the most fresh air. For that reason bedrooms should be thoroughly ventilated.

There is also a high attic in this house. In case extra room is needed for sleeping quarters or the children want a large and pleasant play room this attic space can be used. All that is needed is a few yards of wall-board and a few hours' work. Side dormers and windows in front and rear afford plenty of light.

This is the type of home that will appeal to the majority of families. It is devoid of freak and frill and for that reason more or less economical in cost, for special designs always call for extra expense. At the same time it is pleasing in appearance and built to last.

It is adopted for use in the large city, suburb or small town.

All on One Bait.

A fish story that wins for Saranac Lake the gold-rimmed earmuffs for the first and the "biggest" to appear with the warm days and the turning of thoughts to rod and tackle. The scene of the story is placed on Lake Champlain, near Westport. "A chap who must be the owner of the original gold horseshoe got a bite that made his back teeth rattle and shook the jewels out of his watch. After a knockdown and drag-out fight he landed a big pickerel. Upon dressing it, he found the pickerel contained a pike. The pike had surrounded a good-sized perch, which in turn, was found to contain an ice fish. All this on one bait."

His Version.

One of the banks richest clients had died and the employees were discussing him. "He began to amass his fortune when he was a young man," sagely remarked the young clerk who was inclined to be very thrifty. "I often have heard him say that he lived on a farm and that while the other young fellows in his neighborhood were out having a good time he stayed at home and hunted eggs."

"Yes," agreed the one who was inclined to be a spendthrift, "and because he hunted so diligently for those eggs all his boys ever have to do now is just to go out away from home and chase the chickens."

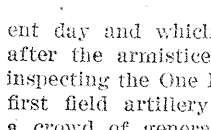

THE AMERICAN LEGION

LEGION MEN LIKE HIS TYPE

State Adjutant of Minnesota Made Numerous Efforts Before Accepted for War Service.

Horace G. Whitmore began serving under Pershing early. He was holding down a pivot in the cadet battalion at the University of Nebraska in 1895 when the future general was a commandant there. Incidentally Mr. Whitmore and General Pershing formed a friendship on the campus which endures to the present day and which found expression after the armistice, when the C-in-C, inspecting the One Hundred and Fifty-first field artillery in Germany, left a crowd of generals, walked over to a stubby little first sergeant, thrust out his hand and said:

"Whitmore, I am glad to see you."

Whitmore was born in Dayton, O., in 1873; was brought up on a farm in Nebraska, and graduated from the state university there in 1895.

He was a contractor in Minneapolis in 1917, when he presented himself for admission to the first series of officers' training camps. He was rejected as being overweight. Back to the farm went Whitmore. In four weeks he took off 20 pounds and asked to be admitted to the second series of training camps, but the surgeon said: "Too fat to fight." Another examiner said: "Too old."

Whitmore went from recruiting office to recruiting office until he became a private in Battery B, One Hundred and Fifty-first field artillery, Forty-second division. He went overseas with the outfit and served with it through the war, participating in every engagement in which the Rhinobows took part.

When discharged he was induced to become state adjutant of the American Legion for Minnesota. He has done much for the development of the Legion in the Northwest. Mr. Whitmore recently resigned from that position to accept the directorship of a company formed for the manufacture of an automobile accessory device which he invented.

WAS BORN UNDER LUCKY STAR

Indianapolis Legion Man Sustained Twenty-Six Wounds During His Service in War.

Wounded 26 times and glad it wasn't 27, William N. Evans, Indianapolis, Ind., still believes he was born under a lucky star.

He walked into national headquarters of the American Legion the other day seeking "just any kind of work that will keep my mind occupied." He said he was an overseas veteran. "I'm still a bit weak," he explained. "I was wounded."

When pressed for details he owned up to 26 wounds in four major offensives. A job was made for him, clerical work that would "keep his mind occupied" but which would be consistent with 26 wounds.

Evans was a private in the Twenty-eighth Infantry, First division. A machine gun got him at Cantigny, a bayonet came next at Soissons; he was struck by shrapnel in the St. Mihiel push and in the Argonne a one-pounder shell hit him a glancing blow on the chin before it exploded. When it went off almost under him 22 pieces of shrapnel peppered his body. He remained on the battlefield 36 hours before he was picked up.

"But I'm happy just the same," Evans says. "This job keeps me from being a loafer and pays just enough with my government compensation for me to get married. I guess I was born lucky."

Benefit Performance.

For some time the benign old gentleman sat watching the novice in his vain attempts to land a fish. Finally the angler was reduced to his last worm and still no catch.

"Cheer up, son," said the old gentleman. "They're biting well for you at any rate."

"No, they ain't," retorted the other aggrievedly. "They're bitin' for their own personal benefit, that's what they are."—American Legion Weekly.

The Latest Atlib.

The Boss—Well, what excuse this time? Grandmother dead again, I suppose?

The O. B.—No sir! Grandmother wants me to take her to the game and point out all the best-known players.—American Legion Weekly.

NOVESTA.

The cool weather is quite a relief. Threshing is well under way but the yield is very unsatisfactory.

Mr. and Mrs. Omar Glaspie and son visited the Barnards on Sunday last. Mrs. Emmet Holcomb, who has been sick since Friday last, is somewhat improved.

Mr. and Mrs. Arthur Frost and Mr. and Mrs. Elmer Chapman motored to Aynada on Saturday, returning Monday.

Mr. and Mrs. Sheriff Holcomb were in Snover on Sunday.

Mr. and Mrs. Earl Watch and family of Royal Oak spent the week-end among relatives here, returning Sunday. Mrs. Watch was formerly Miss Lillian Churchill of this place.

The League of Neighbors to the number of about 50 persons, met with Mr. and Mrs. Emmet Holcomb on Friday night. A good visit and short program were enjoyed. Owing to Mrs. Holcomb's poor health, the meeting was adjourned early and a vote taken to meet next with Mr. and Mrs. A. H. Henderson on the first Friday evening in September.

CHURCH NOTES.

Wm. Richards, Pastor.

Baptist—The Des Moines convention, at which 1,500,000 Baptists were represented, passed the following resolution, without opposition, calling upon the federal government to enact a uniform divorce law applicable to all states. The resolution follows: "The Baptists lament the number of divorces in this country as a national scandal and disgrace. The divorce evil is a national menace striking at the sanctity of marriage and the stability of the home; setting up before our young people false ideals of life and thus corrupting the fountains of righteousness. The present system of state regulation has been productive

of a vicious diversity of legal standards as to the status of divorced persons. Therefore, the convention requests the national government to take such steps as are necessary to secure uniform marriage and divorce laws which will be national in their scope."

10:30 a. m., morning worship; subject, "A Surprised Crowd." 12 m., Bible school. 5 p. m., B. Y. P. U. Jr. 7:30, Union service.
You are heartily invited to attend.

Another favorite expression of many women is: "I guess I'll let these dishes go 'till in the morning."
