COMMERCIAL CROP IN STATE IS ESTIMATED AT 4,121,000 BUSHELS.

Potato and Fruit Prices Low, So Large Crop Does Not Represent Large Income.

As in the case of the early-harvested crops, the late fall crops are generally above the ten-year average. The only exceptions are buckwheat and sugar beets which are slightly below. The price of potatoes, most of the grain crops, and of fruits are relatively low so that the large volume harvested this fall does not represent as large an income for farmers as the production would normally indicate, is pointed out in the November crop report released by John A. Doelle, Commissioner of Agriculture, and Verne H. Church, Agricultural Statistician, U. S. Bureau of Agricultural Economics. Ideal weather prevailed during October and a large amount of harvest work was accomplished. The portion of last year's crop still on farms November 1 is estimated at 5.5 per cent. The corn crop is of excellent quality and the yields are mostly up to expectations. Drought shortened the crop in a few southern counties and in local areas elsewhere, but on good soils in the other counties the yield is good. About 35 per cent went into silos, six per cent was cut for forage, and three per cent was grazed or hogged down. The estimated average yield per acre is reported by correspondents to be 34.8 bushels as compared with 39 bushels last year, and 32.8 the ten-year average. Computing the entire acreage as grain, the total crop would aggregate 60,448,000 bushels.

The potato crop, based on reports of yields, is placed at 37,856,000 bushels or about one and one-half per cent more than the estimate derived from last month's condition figure. The

OVER \$700 RAISED HERE SUNDAY FOR NEAR EAST

Miss Satenik Hatchadourian's Talk in Churches Revealed Terrible Conditions in Near East.

Miss Satenik Hatchadourian, who spoke to audiences here Sunday opened the eyes of Cass City people to the terrible conditions in the Near East. All have read of the bloody inhuman cruelty of the Turks over the Armenian race but never realized its import so much as when this young lady told her own story simply and appealingly.

She showed unmistakable evidence of being a scholar in her perfect grammar and in her talk before the high school wrote a phrase in the Turkish language and then in Armenian.

It has seemed exceedingly difficult to grasp the facts of this terrible situation but Miss Hatchadourian made it plain for cash and subscriptions amounting to over \$700 were secured from Cass City for the Near East Relief the first of this week.

MICHIGAN GROWERS WIN AT POTATO SHOW

Potato growers of Michigan, exhibiting at the International Potato Show held at Duluth, Minnesota, last week, won unusually high honors, according to word just received from J. W. Weston, potato specialist at the Michigan Agricultural College who attended the big show.

Competing against entries from the leading potato growing sections of the entire continent, Michigan men managed to make a clean sweep of prizes in the Russet Rural class, and to score notable victories in other classes as well.

CANCER WEEK IS OBSERVED IN MICHIGAN

Cancer Is Second in the Cause of Deaths in the State This Year.

Cancer, which killed 3,304 persons in Michigan in 1921 and which, up to October 1, this year, had claimed 2,538 victims is second in the cause of deaths in this state according to figures given out by Dr. R. M. Olin, state health commissioner for use during National Cancer week which opened Monday, Nov. 13 and will continue throughout the week.

The number of deaths from cancer in 1921 exceeded 1920 by 195 and is equivalent to a rate of 86.5 per 100,000 population, the highest in the history of the state. Figures show that cancer is not confined to any particular portion of the state but the rural district show more deaths than the cities. Of the total cancer deaths 41.9 per cent occurred in rural districts, and the census shows that only 38 per cent of the population of the state is termed as "rural."

"Any disease that causes 3,304 deaths in a year and sets up a death rate of 86.5 is exceedingly serious," says Dr. Olin. "During the great War the United States lost about 80,000 soldiers. During the same two years 180,000 people died of cancer in this country. Cancer is now killing one out of every ten persons over 40 years of age."

"Many of these deaths are preventable" says Dr. Olin, "since cancer is frequently curable, if recognized and properly treated in its early stages." Dr. Reuben A. Peterson, professor at the University of Michigan is state chairman of the Michigan branch of the American Society for the Control of Cancer. Dr. Peterson has outlined a series of lectures all over the state for cancer week. District chairman appointed by Dr. Peterson, are Dr. B. H. Vanouven, Petoskey; Dr. James Bruce, Saginaw; Dr. G. W. Fralick, Maple City; Dr. Wm. J. Kay, Lapeer; Dr. Max Burnell, Flint; Dr. Francis Penoyer, So. Haven; Dr. Theodore Squire, Battle Creek; Dr. W. K. West, Painsdale; Dr. Walter Vaughan, Detroit; Dr. Frank C. Kinsey, Grand Rapids, and Dr. John Wessinger, Ann Arbor, Michigan.

After-Care Needed to Bring Permanent T.B. Recoveries

"Rest and good food, fresh air and freedom from worry," the sanatorium superintendent told John Reilly, when he gave him his final chest examination.

John was not cured, of course, but he was so much improved that the superintendent believed that he might complete the cure in his own home.

But at home John Reilly had three children and a frail wife, and rest, on which the doctor had laid so much emphasis, was a prescription he could not follow except at their expense. Ten days after he left the sanatorium he went to work at his old job on the section.

Last week, in answer to a letter of inquiry, he wrote this account of himself to the Michigan Tuberculosis Association.

"We were laying rails this summer and the boss put me to flagging or I couldn't have stood it. I haven't had any examination since I left the sanatorium. I have

lost some in weight and I have been having some pleurisy pains in my right lung for the last month."

Pitifully little is the Michigan Tuberculosis Association able to do for him. He is not a pauper; he told with pride that he had a house and lot on which he had paid six hundred dollars. Given a chance to take proper care of himself for a few months longer, he might reasonably look forward to a normal life-span. But if he must struggle through days of pain and weakness now, in the hopeless effort to do the work of a well man, the end of John Reilly's story is certain and near at hand.

After-care of consumptives should be provided in Michigan. Tuberculosis Christmas seals will help to meet the need.

THANKSGIVING DAY PROCLAMATION

By the Governor "Enter into His gates with Thanksgiving, and into His courts with praise: be thankful unto Him and bless His name."

We have come again to the season of the year when, in accordance with the devout custom established by our fathers more than three centuries ago, we formally set apart a day of Thanksgiving and praise to Almighty God for all His mercies and blessings.

We have every reason for thankfulness. Our fields and orchards and vineyards have yielded richly of their products. Our people have been sober, industrious and steadfast. Industry and enterprise have translated the varied and unlimited resources of our commonwealth into wealth and happiness for all who have had the initiative and the capacity to do and achieve. While we face a new day big with many perplexing problems, may our faith in the integrity of American institutions be rededicated to the government which has always symbolized the best that has been achieved since the struggle for representative government began.

Therefore, by virtue of the authority vested in me as Governor of the State of Michigan, I hereby join the President of the United States in designating Thursday, November 30th, 1922, as a day of Thanksgiving and prayer.

Given under my hand and the Great Seal of the State this tenth day of November, in the year of our Lord one thousand nine hundred and twenty-two, and of the Commonwealth the eighty-sixth. ALEX J. GROESBECK, Gov. By the Governor: Charles J. DeLang, Secretary of State.

WAR SAVINGS STAMPS EXCHANGE OFFER

Although 1918 War Savings Stamps do not mature until January 1st, 1923, Postmaster Dodge announces that he will accept them on and after November 15th in exchange for the new 4 per cent Treasury Savings Certificates.

Every 1918 Stamp presented now will be accepted at its maturity value of five dollars if used as part payment for one or more new certificates, dated January 1, 1923.

This opportunity should appeal to everyone who holds War Savings Stamps bought in 1918—whether he holds one stamp or two hundred.

Postmaster Dodge is anxious to handle the bulk of these exchanges before the usual Christmas rush begins at the postoffice. All owners of 1918 War Savings Stamps should take notice and govern themselves accordingly.

MICHIGAN COW NEARS WORLD'S RECORD MARK

Holstein-Friesian Owned by Loeb Farms of Charlevoix Produces 35,339 Lbs. Milk in Year.

Producing 35,339.5 pounds of milk in one year, a Michigan cow has just broken all previous state records and is said to have taken rank as the second highest producer in the world.

The new record holder is Kolrain Marion Findeine, a Holstein-Friesian owned and developed by the Loeb Farms of Charlevoix. She was seven years old last September, a month before completing her great record, Marion had already made very creditable figures at an earlier age, the recently announced yearly record mark being the culmination of her outstanding production achievements.

Supervision of the record made by the Charlevoix cow was handled by inspectors under the staff of the dairy division at the Michigan Agricultural College, and the official figures on her record were released this week by M. H. Gardner, of Delavan, Wisconsin, Superintendent of Advanced Registry for the United States.

Fat contained in the 35,339.5 pounds of milk produced in 365 days ending on October 26, 1922, totals 1,022.85 pounds. She freshened at the age of six years, one month, and eight days, at the beginning of the test. Twelve supervisors were employed in the conduct of the test, 275 days of which were "strictly official," with a supervisor constantly in attendance.

The record of Kolrain Marion Findeine ranks her as one of the greatest milk cows of all time, and is considered as a distinct achievement for Michigan dairy interests.

Students Invite Farmers to View Display of 35 Varieties Now on Exhibition.

The agriculture class of the Cass City high school will have a large display of apples on exhibition at the T & M store today and tomorrow, Nov. 17 and 18, to which they invite all farmers and others interested in the products of the orchard.

Local students are planning to enter a team at the M. A. C. to compete for honors with horticulture teams of other high schools of the state.

DO YOU GET YOUR CHRONICLE REGULARLY?

The Chronicle almost weekly receives complaint from slighted subscribers of their failure to receive their paper inquiring reason for same. Our only answer is that said paper has been mailed them and must have been lost in transit.

Now the publisher does not wish any subscriber to miss a single issue, even though print paper is again on the up-grade in price, and, in fact, would much prefer a patron would receive two copies than miss one. However, you must remember the paper goes through several hands after leaving the publication office before reaching the subscriber, and that possibly some one else may be at fault.

Michigan Happenings

Erwin Eveleth, 80, former postmaster, and former mayor of Corunna, died at his home there after a long illness. As a young man, Eveleth was a timber looker and mining prospector, and is said to have discovered the ore deposits where most of the mines are now located in the upper peninsula. In the late eighties, while he was prospecting in Minnesota, he accidentally discovered an iron deposit, and on that spot now stands Eveleth, Minn., a mining town of 10,000, named for him. He is survived by nine children.

Grant Ide, of Grand Rapids, escaped death only by leaping from his coupe, just before it was hit by a locomotive. Ide had stopped before the crossing to permit the passing of a train, but his machine was struck in the rear by an automobile driven by John McCormick, and was shunted directly into the path of the engine. The coupe was demolished. McCormick, in police court, pleaded not guilty to a charge of driving his automobile while intoxicated.

Orville J. Smith, Jackson, six feet and six inches tall, largest inmate of Kalamazoo State hospital, who escaped by tearing out a heavy screen from a window, was captured at Decatur. A nightwatchman found Smith whittling out a panel of the Bye Clothing store door. Earlier in the night he had broken into and looted the general store at Glenwood of a suit of clothes and arctics, officers say.

An unidentified woman motorist ran down 7-year-old Albert Eckler, son of Lewis G. Eckler, of Flint, inflicting injuries which resulted in the lad's death. Police are seeking some clue that may lead to the identity of the driver. The boy was on his way to school and stepped from a bus in which he had been riding at Penton road and Major streets, where he was knocked to the pavement.

"She had lost her job and I had lost mine. We didn't have anything else to do, so we got married." That is the way William Harding, 40 years old, of Lansing, explained how he and Mrs. Alta Beers, also of Lansing, came to be married in Bancroft last August while Harding had one wife. Harding waived examination and was bound over to Circuit Court on a big-amy charge.

Death from blows on the head, administered by a person or persons unknown, was the verdict of the coroner's jury which held an inquest at Traverse City over the skeleton of Mrs. John Mattice, 84 years old, who disappeared from her farm near Cedar Run in June, 1920, and whose skeleton was found a few days ago in the woods two miles from the farm by hunters.

Silas S. Main, president of the Lansing city council and junior alderman from the Eighth Ward, will serve as acting mayor of Lansing as a result of the sudden death of Mayor Jacob W. Ferle, according to John McClellan, city attorney. A mayor will be elected at the regular election next spring. Alderman Main promises to carry out the policies of Mayor Ferle.

Fenton's new waterworks plant has been completed and a try-out of the pumping system demonstrated that the centrifugal pump has a capacity of 800 gallons per minute. Operations will soon be shifted from the old plant, which has done service for 25 years, and it is alleged the new plant will result in an inconsiderable saving to the village.

About 785,000 tons of iron ore were shipped from the Escanaba docks in October. More than two and a half million tons have been shipped this season up to Nov. 1, which is greater than double the tonnage shipped in 1921, the smallest season ever experienced on the Menominee range. The shipments thus far for 1922, are far below normal.

Edward Van Ysseldyke, 17, has started to serve 60 days in the Kent county jail for firing seven shots into a Catechism class in a west side church of Grand Rapids, and which caused a panic among the girls and boys. The police were told the youth did the shooting in a fit of jealousy. Van Ysseldyke told the judge it was just in fun.

The Democrats elected George Rapin sheriff over Thomas Taylor, Republican, the only contest for county offices in Mackinac county, by 200 majority. Democrats holding the offices of prosecuting attorney, treasurer and register of deeds were re-elected without opposition.

A big black bear that weighed 400 pounds has been trapped and shot by Harry Chapman, of Norway. The bear had been making frequent visits to Bert Chapman's farm for a month. Finally it stepped into a trap and was then shot.

Could Do Without Her.
Jane's uncle was just married, and the child's mother was attempting to explain to her that Ruth, the young bride, was no longer just Ruth, but was now to be called "Auntie Ruth." The child was perplexed and seemed unable to grasp the change in family relationship. After a long pause she sighed and said: "Never mind, mother, I have enough aunts now. I don't need her."

TWICE-TOLD TESTIMONY

Cass City People Are Doing All They Can for Fellow Sufferers.

Cass City testimony has been published to prove the merit of Doan's Kidney Pills to others in Cass City who suffer from bad backs and kidney ills. Let any sufferer doubt this evidence of merit, we produce confirmed proof—statements from Cass City people who again endorse Doan's Kidney Pills—confirm their former testimony. Here's a Cass City case:
Mrs. J. Walmsley, S. Pine St., Cass City, says: "I have taken Doan's Kidney Pills off and on whenever necessary during the past years and they have never failed to do me good. For backache and other trouble I couldn't recommend anything their equal. I get Doan's at Burke & Co.'s Drug Store."

Doan's Always Helped Her
Three years later, Mrs. Walmsley added: "I have used Doan's Kidney Pills now and then since recommending them and I have always received the same good results."

Price 60c, at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mrs. Walmsley had. Foster-Milburn Co., Mfrs., Buffalo, N. Y.—Advertisement 6

The following lines were written in 1898 and printed in the Cass City Enterprise for a broken-hearted mother who had lost her seven year old son. They are again offered for publication for the comfort of another sorrowing mother by her friends, in memory of little Carl Henry, who died one year ago, Nov. 11. Thy mother's heart may almost break, Yet distant joy Is dawning with a brighter, better life On thee, my boy. For thee, my precious, little son, light dawned; This breaking heart Already knows that children are forever safe There where thou art. The world now calls thee all in vain; Sin, pain and woe Reach for thee nevermore! 'Twas best For thee to go.

THE ELECTIONS AND BUSINESS

R. W. BABSON PREDICTS NEW ALIGNMENT OF POLITICAL PARTIES.

Industries That Are Heavily Good Investments Are Able to Fight Their Own Way.

Wellesley Hills, Mass., Nov. 4—In an interview this week with Roger W. Babson, the question of what effect the congressional elections will have upon business, brought from him the following statement:

"I see one interesting issue in the congressional elections, namely, the number of new radical members sent to congress. Those of us in the East do not understand the viewpoint of our western people, hence few are awake to the great change which is coming about in our political line up. Throughout the present generation, the contest has been between the Republicans and Democrats. The days of this alignment, are numbered. Both of the old parties have suffered extensive changes. At least by 1928, and perhaps in 1924, a real contest may be waged between the so-called Conservatives on the one side, and the so-called Radicals on the other.

"By 'Radical' I do not refer to the I. W. W.'s or any group commonly known as Bolsheviks. The new Radical party will be more like the Bull Moose party of 1916. The Conservative group will represent a combination of both Republicans and Democrats who are opposed to the extreme measures of the other group.

"After all," continued Mr. Babson, "most of us business men worry a great deal more over politics than we should. Everybody today is looking to Washington for a present. Nine tenths of all the important bills before congress this year were designed to help some one group—usually at the expense of the others, Farmer and labor demands, railroad financing, state roads, soldiers' bonus and the tariff fight are a few examples. This stampede to the government for assistance is one of the pestilences which always follow a war. The same mania developed after the Civil War. From 1865 to 1870 bankers and business men spent more energy lobbying in congress than developing their own business. The government must mix into business in war time; it is hard to get out of it after the war is over. Eventually people will realize that you can't take out of the government more than you put into it. For the present, however, the situation presents a serious danger—not to those who fail to get assistance, but to those who succeed!

"Any growth founded upon so fickle a basis as government favor must be precarious. The industries and the individual companies which are really good investments will be able to fight their way thru without having to depend upon exorbitant tariffs or government capital. They may have hard sledding for a while, but when the depression is over they will control the field. While others are building up influence at Washington, they are building organizations at home. At the time it may seem as if the concerns which get the most protection or assistance from Washington are the winners, but their advantage is only temporary. Instead of trying to pick the companies which get the most assistance from the government, investors should look for the companies which can get along with the least!

"This factor marks a sharp distinction between the railroads today. Under the Esch-Cummins law the roads have the privilege of calling upon the government for assistance in their financing. Many investors have looked upon this as a favorable argument. You will notice, however, that the railroads which stand best on the quotation board have very few 'government obligations' in their balance sheets. The only kind of a keg to put your money into is one that will stand on its own bottom. Perhaps the others will come out all right, but the railroads in which I am interested are now adopting efficient business methods instead of depending upon government aid. In choosing railroad securities, my advice is to let someone else speculate as to what the government will or won't do.

"The same applies to industrial securities. At the moment every one is much exercised over the new tariff rates. Some industries have secured greater protection than others. In the long run, however, the business which receives the greatest tariff protection may not be the best investment. If its operating costs and overhead charges are increased on no safer basis than legislation, it is not a business in which to risk your money. Business concerns, like individuals, get their strength from fighting their own battles. Too much protection is far more dangerous than too little.

"Remember that congress is governed by the law of action and reaction. At present, legislation is running toward government subsidies and support. The further this movement goes, however, the more drastic will be the subsequent reaction. The more congress does for individual business interests today, the more some other congress will take away from these interests later! Hence, when looking for an industry in which to invest your money, pick the one which will have least to fear from the caprice of

politics. Legislation may give a temporary boost to securities, but the long swing upward must be based upon something more substantial. "Any concern which is prospering mainly by the grace of congress is an unsafe risk. The wisest concerns today are devoting their energy to building up their own organizations!"

WAR SAVINGS STAMPS BECOME PAYABLE JAN. 1

War Savings Stamps of the series of 1918 become due and payable on January 1, 1923. The people who bought these stamps will receive their full face value upon redemption and will find that the money they saved five years ago has earned every year about four per cent compounded interest. In order to afford holders of war savings stamps an opportunity to continue their investment in a safe government security the Treasury

Department is offering an exchange of War Savings Stamps for Treasury Savings Certificates. The certificates are issued in denominations of \$25, \$100 and \$1,000, maturity value, and sold for \$20.50, \$82 and \$820, respectively. Holders of War Savings Stamps can get them at these prices upon application through their own banks or their post offices. Exchanges will be made as of January 1, 1923, upon applications presented between November 15, 1922, and January 15, 1923. Immediate payment will be made in cash of any difference due the holder of War Savings Stamps if he takes the largest possible amount of Treasury Savings Certificates on the exchange.

The growing inclination of the people to save and their desire to find a safe reinvestment for their money leads Treasury officials to believe that a large part of the six hundred million dollars in War Savings Stamps soon to become due will be exchanged for Treasury Savings Certificates.

Suppose You Were the Merchant

You would be alert at all times to offer for sale only the highest quality merchandise obtainable. You would be prompt in caring for your customers' needs.

You would pay your employees and creditors on time and you would run your business in a punctual, orderly manner.

But what would you expect of your customers in return for this superior service? You

would, at least, expect that they show their appreciation by paying their bills on time.

If you have unconsciously developed a habit of neglecting to pay your merchants when bills fall due, you are "breaking ground" for a poor rating in every merchant's books. It is just as easy to pay your bills on time. You will have more enjoyment from everything you buy when you know that you are paying fair.

Start on the right road today. Get out all your unpaid bills and show your merchants that you intend to uphold your part of the bargain. They will be able to give you better service, and you will profit in many ways.

DEFORD.

Mr. and Mrs. Emory Cones have just returned from the north seeing their new farm.

Merchant Patterson is at Imlay City today (Monday, the 13th) on business.

The Orr family near Caro visited with R. D. Lewis Sunday.

The minister and his wife went to their farm Monday to put matters in shipshape for their renter.

Amos Webster has double doors on stairway of his hall so that cold stormy winds cannot enter in.

By time this is in print all sugar beets except the Quick collection will be at this station.

Parties from Kingston are here buying spuds—30c per bushel.

Miss Lola Mathew is recovering from a severe case of diphtheria.

Mrs. Mary Parks is living in her own house in town again.

Your favorite doctor is the one that will cure you. Don't care for ability.

Chas. Kreiner was home from Detroit over Sunday.

Jas. Mathews still in Lapeer county on John Sugden dredge.

By car and without extra effort we are just 30 minutes from the Hub. We remember the time it required a good half day's labor to get there.

Because of diphtheria four homes are closed from the outside through. Children sick in Charles Tedford home keep them in. Daughter Lola's sickness keeps the James Mathews home secluded. Sickness of Mrs. Benjamin Gage closes them in and sore throat of Howard Silverthorn keeps their domicile hushed and congregated. The cases are of mild type, but two of them have been passed upon by Ann Arbor medics and objections quashed.

Don Nutt says poor health weighs him down.

At our school pupils throats are examined and if not proper color they are sent home to see what time will tell.

Three years last July parties indebted to Lester Day went to Detroit to labor. The debtor sent \$50.00 to Day by postoffice order—and has the voucher to show. The order failed to reach Deford. All this time they have tried to solve the mystery but failed. With the aid of our postmistress, Mrs. R. D. Lewis, the government paid Mr.

Day his money on the 11th.

Mr. and Mrs. Shaw returned last Thursday after a two weeks' visit in Oakland and adjoining counties.

Sim Pratt of Pontiac came up here Saturday and will stay with us for a time.

The writer was born in a land where peasant laborers lived under the same roof of a long building divided into apartments by an unbroken wall, and at back part of their dwelling each family had a strip of garden land just the width of the domicile. Mark you, only a path divided the pieces of soil. Each family kept from one to six hens, and when two families lived a lifetime side by side without a jar, they were called Christians. Now "honor bright," would not that be a good test to apply to the people in any part of the civilized world?

Robert Jacoby has a new garage built on North street. 'Tis 14x24—Bro. Barthell was headcarpenter.

There is a dearth of candor that makes the world rotten.

The one-year-old boy of R. D. Lewis is recovering from his sick attack.

A. D. McIntyre, the man who controls the bank, has friends who remember him in his boyhood locality. Hence on the night of the 8th they came over about forty strong. Danced for a time in Webster Hall, had grub with Mac and went home rejoicing.

Young People's S. S. class made well with their party on evening of the 10th. Gathered a little over \$66.00. When oysters are paid and other driblets will have a good heel left.

On the farm known as Russell place, a sugar beet grown this season weighs 14 lbs. It is fully trimmed and a large part of the root was broken off by plow in lifting. If all had been gathered complete, we say, speaking after the manner of men, it would have tipped the beam at 16 lbs.

Our townsman, Bro. Stewart regaled himself on fresh strawberries from the garden vines Nov. 6.

Wm. and Joseph McCracken have built a hen house for the Pratt boys, Fred and Sim, 1 1/4 miles east of here. 'Tis a large henery and will give the boys a chance to swing themselves on fowl farming when they get aged.

We see bills out for a school entertainment at village of Kingston. One attraction is a mimic prize fight between two men. Perhaps such amusement would not be considered out of

place in Mexico, but in Michigan it seems a coarse way to train up youth.

News item from Dearborn Independent—Short skirts, short sleeves, low necks and high heels in feminine apparel have caused Swiss insurance companies to raise their premiums 15 per cent for women.

Mrs. Samuel Sherk has improved in health in a hopeful manner since her return from hospital.

Through the kindness of a neighbor Mrs. Alice Curtis was privileged to see Vassar and Caro and intervening country Sunday.

Eldon Bruce is at Ann Arbor working for a time but we have not learned his kind of labor.

Clinton Bruce went north to Bentley past week. "Bently" is a new town near which Deford citizens have holdings and perhaps 'tis named after our own William B. who miraculously escaped destruction a short time since by the powerful hand of Ivanho.

Farmers are now near the middle of November in search of shuckers to harvest the maize. The season cannot be long enough to please all.

Warren Sherk and L. N. Stinger were at Saginaw Tuesday.

E. A. Cones and Sam Sherk accompanied by E. N. Hartt of Wilmot were in Bay City Tuesday.

NOKO.

Quite a few from here attended the Red Cross services held Sunday morning in the M. E. church at Decker and report a very interesting and patriotic sermon delivered by Rev. Mr. Lowery. The church was beautifully decorated with flags and flowers. The music selected by the choir was very appropriate for the occasion. The male quartet also gave a fine selection well rendered.

Miss Vera Shaw, who is attending school in Marlette, spent Saturday and Sunday at her home here.

Mrs. Noor, formerly Miss Nellie Chard, is spending a few days at her old home here.

Special services commenced here Monday evening and will continue the remainder of the week.

E. A. Livingston was surprised one morning on going to the barn to find a pair of twin calves.

Miss Bell Anker is employed in Detroit.

Mr. and Mrs. Wm. Simmons and Mrs. George Purdy were callers in Bad Axe one day last week.

Mrs. E. A. Livingston, who was a patient at Bad Axe hospital for two weeks, returned home Friday.

Miss Beatrice Conger of Bay Port spent from Friday until Sunday at the home of her uncle, J. F. Evans. N. Harrington of Ellington is also visiting at the J. F. Evans home.

Howard Evans started working for Mr. Carpenter near Bethel church Monday morning.

Mr. and Mrs. Arthur Frost visited at the Elmer Chapman home on Sunday.

Mr. and Mrs. I. Agar and children of Cass City were Sunday visitors at the home of Mr. and Mrs. A. H. Henderson.

Mr. and Mrs. L. N. Churchill and Mr. and Mrs. Glen Churchill and daughter went to Capac on Saturday afternoon to visit relatives, returning home on Sunday.

Dan Waxell has the prize sugar beet of our neck-o-woods, so far as is known. The specimen weighs 23 lbs.

Mrs. Loren Churchill was called Sunday night at the home of Henry Phillips, south of Shabbona, because of the serious illness of her mother, Mrs. Travis. Reports on Monday and Tuesday are that the lady is much improved.

The Ferguson school in Dist. No. 6 is closed because of the illness of their teacher, Miss Veda Bixby.

Diphtheria at the Clayton Crawford home is well under control. There are no indications of further spread.

We were pleased to receive a letter recently from Stanley Osburn, who last winter underwent an operation for amputation of limb at Pleasant Home hospital, and remained for some months at that place. He went to Owosso on Sept. 1st and now has a position as bookkeeper for the Owosso Machine and Auto Repairing Co. He likes his job and enjoys the independence of making his own way. Congratulations, Stanley.

We surely enjoyed the talk by Rev. Cummings of Flint at the Church of Christ on Sunday morning. He is a very able speaker and brought out some fine thoughts. Hope he may come often.

BEANS AVERAGE 10.5 BUSHEL PER ACRE

Continued from first page. crop is very spotted, there being some poor yields in southern counties and occasional places elsewhere.

A special report furnished by bean growers throughout the state indicates that the average pick is 8.5 per cent, and also confirms the estimated yield of 10.5 bushels per acre published last month.

The reported yield of 1.6 bushels per acre of clover seed is less than the figure based on condition last month, but considerably better than the yields in most of the other important clover seed states.

Ideal weather for harvesting sugar beets prevailed during the greater part of October. The yields are variable being poor in some sections because of blight, and very good where conditions were favorable.

The final report on apple production shows a total of 75 per cent of a full crop as compared with 40 per cent in 1921. There was considerable scab and much inferior fruit, also much fruit of good quality in orchards that have received proper care.

The grape crop proved to be a full one. While there was some loss and the quality lowered by rot, mildew and the berry moth, the healthy vines made a large growth and produced a crop that was only limited by the capacity of the vines and the system of pruning used.

Pears are estimated to have been 96 per cent of a full crop. The quality was better than usual being rated at 95 per cent as compared with a ten-year average of 88 per cent.

RULES FOR FEEDING DAIRY CATTLE

Suggestions for Increasing Production of Cows Sent Out by Tuscola Farm Bureau.

The average cow in Michigan produces less than 4000 pounds of milk per year. This, of course, is not a profitable production. The general rules for feeding dairy cattle as suggested by John W. Sims, agricultural agent of Tuscola county, are as follows:

Feed one pound of feed per day for each three or four pounds of milk produced per day or one pound of grain per day for each pound of butter-fat produced per week.

These rules, of course, are only general and the amount of grain fed depends largely upon the quality of roughage, the quality of milk and the kind of grain used.

Perhaps a more definite outline is given by the following sample rations made up for a 1000 lb. cow giving about 80 lbs. of 4 per cent milk. Should weight of cow or quality of milk vary, the ration should be varied accordingly.

No. 1—With about 35 lbs. of corn silage and 10 lbs. of mixed hay or cornstalks per day make up a grain mixture of 100 lbs. oats; 200 lbs. middlings, and 100 lbs. bran and feed about 11 lbs. per day or 100 lbs. cornmeal or barley; 200 lbs. oats and 125 lbs. of cottonseed meal and feed about 8 1/2 lbs. of the mixture per day.

No. 2—If no silage is used and roughage consists of mixed hay or cornstalks alone, use the following grain mixture: 150 lbs. oats, 250 lbs. middlings, 100 lbs. bran and 100 lbs. oil meal and feed about 12 lbs. per day, or 200 lbs. of corn and cob meal or barley, 350 lbs. oats, 250 lbs. bran, 200 lbs. oil meal, 100 lbs. cotton seed meal and feed about 11 lbs. of this mixture per day.

ALFALFA SEED CROP LIGHT.

Prof. J. F. Cox of the Michigan Agricultural College and J. W. Nicolson of the Michigan State Farm Bureau have just returned from a trip thru the alfalfa seed producing states of the west.

They report very light crops in Idaho, Montana, North and South Dakota. Utah has produced some seed in the higher altitudes that is adapted to Michigan conditions.

The Brimm alfalfa seed crop is not as good as last year while the sweet clover has a great deal of mustard seed in it.

Prof. Cox collected many samples which he will use in test plots at the Michigan Agricultural College in order to determine more carefully the places where Michigan farmers can get seed that will do best.

The Crops Department of the Michigan Agricultural College recommends that farmers who purchase alfalfa or clover seed this year be very careful to purchase it from reliable sources and be sure to get adaptable seed as there will probably be an unusual amount of imported and southern grown seed offered for sale that will not do well in our climate.
