Mrs. J. B. Tindale Passed Away Sunday

Mrs. James B. Tindale passed away at the home of her son, G. A. Tindale, at Cass City early Sunday morning, Nov. 13, after a serious illness of several weeks.

Hannah E. Morley was born in England, November 23, 1853. She came to America when nine years of age, her parents both having died when she was small. In 1870 she was married to James B. Tindale at Cass City and has resided here since. Mr. Tindale passed away April 10, 1915. Two children preceded the mother in death, Lula M., who was eight months old, and Alfred, who died four years ago. She leaves two sons and two daughters, Mrs. A. J. Wallace and G. A. Tindale of Cass City, Morley Tindale of Detroit, and Mrs. Ray Johnson of Traverse City.

Funeral services were held at the Tindale residence Tuesday afternoon at two o'clock. Rev. P. J. Allured officiated. Interment was made in Elkland cemetery.

Those from out of town who attended the funeral were John E. Murphy and Mrs. Wallace Evans both of Sandusky, Mr. and Mrs. Arnold Callan and Miss Catherine Wallace of Caro.

Union Thanksgiving Service of Churches

Cass City churches will unite in a Thanksgiving service which will be held on Wednesday evening at eight o'clock, at the Methodist church. Rev. Paul J. Allured, pastor of the Presbyterian church, will give the address. His subject will be "The Power for Good in a Thankful Heart."

This service is in accord with the Thanksgiving proclamation of Governor Fred W. Green, who says in that message to the people of the state that "the day is and should be looked upon with thoughtful reverence. Our forefathers celebrated the first Thanksgiving not only with a feast—there were prayers and sermons and songs of praise. These sturdy pioneers laid the foundations for our greatness as a nation and our happiness as individuals by reason of the strength of their religious convictions. We, too, will grow in greatness and happiness in proportion as we remain faithful to their ideals. It is fitting that we should, in humble recognition of the goodness of Almighty God, who has dealt so bountifully with us, celebrate this day reverently and joyfully."

RECEPTION HELD FRIDAY FOR NEWLY-WEDS

An informal reception was held in the parlors of the Evangelical church Friday evening honoring the newly-weds, Mr. and Mrs. Louis Krahling. About one hundred members of the congregation were present to express their best wishes to Mr. and Mrs. Krahling, both of whom are active workers in the society.

A program was given in the early part of the evening in which the male chorus sang a selection, Burt Elliott and Leonard Elliott played Hawaiian numbers, the Misses Laura Jaus and Catherine Joos gave a vocal duet and Rev. C. F. Smith expressed the best wishes of the company for a happy nuptial voyage on life's sea. A few games followed and the serving of refreshments closed a pleasant and happy event. Mr. and Mrs. Krahling were the recipients of a large number of beautiful and useful gifts from their friends.

MICHIGAN CORN CROP BETTER THAN EXPECTED

Dry Weather Lessened the Yield of Michigan Potatoes This Season.

Michigan's 1927 corn crop has continued to be favored, and October weather allowed the final maturing of 27 bushels per acre which is much better than was expected earlier, according to the crop report issued by Herbert E. Powell, Commissioner of Agriculture and Verne H. Church, Agricultural Statistician for Michigan. The estimated production of 39,582,000 bushels for the state is the shortest crop since 1917, and the supply for feed will be short. This year 37 per cent of Michigan corn went into silos and 11 per cent was used for forage or grazing, which leaves a net grain crop of 20,583,000 bushels, of which 57 per cent is merchantable. The United States corn estimate was increased this month by about 150,000,000 bushels with a final yield of 28.2 bushels per acre so that the present estimate is for a crop 106,000,000 bushels larger than last year.

Dry weather greatly lessened the yield of Michigan potatoes, and fall rains only helped the very late planted fields so that actual digging returns showed a yield of only 81 bushels per acre which is lower than growers expected a month ago. However, the United States crop was increased by five and one-half million bushels this month so that the yield of 114.5 bushels per acre promises a crop of 400,805,000 bushels which is 40 millions more than last year and consequently above consumption requirements. In 1920, when the United States potato crop amounted to 403,296,000 bushels, or nearly the same as this year, the average price received by Michigan farmers for their potatoes from October to June was 65 cents per bushel. Despite these conditions, Michigan farmers who are caught with the shortest crop since 1916, or only 22,599,000 bushels, are apparently storing heavily, with the result of low carlot shipments, while other states with the large crops this year are shipping heavily and filling markets ordinarily supplied by Michigan potatoes. Although there is an

Locals Won From Marlette 16-12

Cass City continued to show improved form to upset the strong Marlette high school foot ball squad in a game at Marlette Friday, Nov. 11. Score—Cass City, 16; Marlette, 12. Cass City received and carried the ball to the Marlette 20 yard line where they were held for downs. Capt. Bailey here called for a place kick that was perfectly executed by McCullough and Brown, the ball sailing squarely between the bars. It was a 40-yard kick, the ball on the 20-yard stripe necessitated Brown's dropping back to the 30 line to kick and the goal posts are set back 10 yds. this season. Score—Cass City, 3; Marlette, 0.

Marlette received and was held for downs, Cass City taking the ball in mid field. A pass, McKenzie to Edgerton, took the ball to the 10 yd. line where a fumble in the local back field cost the Maroon and Gray another score. The rest of the half was a see saw affair neither team getting within scoring distance. Score at half, 3-0.

Cass City received and marched down to the opponents' goal on a series of passes and runs. On fourth down and about two yards to go, Flint carried the ball over on a de-

layed back; Bailey to Flint. Brown kicked goal for the extra point. Score—Cass City, 10; Marlette, 0.

Marlette received and was held for downs punting to McCullough on his own 40. On third down, a reverse play followed by a pass, McKenzie to Edgerton, placed the ball on the 10 yard line again and the locals again scored on a series of four bucks, Flint taking it over for the necessary yardage on fourth down. Brown failed to kick goal, the first in his last seven trials that has not been successful. Score—Cass City, 16; Marlette, 0. Here the quarter ended.

Marlette opened up in the last Turn to page four.

D. G. Wright Died at Deckerville

Delos G. Wright, a resident of this community for 45 years, passed away at the home of his daughter, Mrs. John Delong, at Deckerville, on Saturday, Nov. 12. Mr. Wright was visiting at his daughter's home when he was taken ill two weeks before his death. Funeral services were held at the M. E. church at Cass City of which Mr. Wright was a member, on Monday afternoon. Rev. George Hill conducted the service at the church and interment was made in Elkland cemetery. Members of the Odd Fellows fraternity attended in a body and conducted the funeral service of that order at the grave.

Delos Gilbert Wright was born in Monroe county, Mich., Feb. 4, 1844. When a young man, he taught school for several terms in Texas. He was united in marriage in Monroe county, in 1882, to Miss Lucelia D. Merritt, and the same year they came to Tuscola county, settling on a farm in Novesta township. Mrs. Wright passed away last March.

Mr. Wright had lived in Cass City for the past 20 years. He was a member of Cass City Lodge, I. O. O. F., and had been a member of the Methodist church for more than 30 years.

VOLLEY BALL RESULTS.

The results of the last encounter of volley ball teams are as follows: The Sheridan Block defeated the Merchants in two games and then lost one to the opponents. Scores—21-16; 21-13; 11-21.

Bigelow's Stars were winners in three games with the Condensary—21-14; 21-3; 21-6.

The Faculty defeated the Elevator squad in two encounters and then lost the third. Scores—21-4; 21-18; 17-21.

The Bankers won the first and third games of the series and dropped the second to the Garage players. The scores read: 22-20; 18-21; 21-7.

No volley games were held this week because the auditorium was used by pupils preparing and giving the junior play, "Billy." Next Tuesday night another series of games will be played.

Lester Bailey has been named to receive the dues of one dollar each from members of the volley ball teams of business men. This money is to pay the expenses of lighting, heating and water at the gym. The club is in no way exclusive and the opportunity is open for others to join. Everyone is invited to membership.

WARNING ISSUED TO MOTORISTS OF STATE

That They Should Examine Car Titles before Buying; Records being Revised.

A warning to all motorists in the state to examine their certificates of title for their cars as issued by the state department, is given by the Detroit Automobile Club. The club states that there are hundreds of cars purchased second hand to which the present owners have no lawful titles.

The legal department of the automobile club states that every purchaser of a used car or prospective purchaser should not trust to what appears to be clear title given by the state. The club has found that in a great many cases there is a lien filed against the car in the first purchaser's home town that does not show on the title. The circuit court recently held that the purchaser of a car that had a lien against it was responsible for the lien, regardless of what the title might state.

The club has also found that in some mysterious manner professional thieves have stolen cars, later sold them as used ones and secured a perfectly good Michigan title to these cars by a juggling of engine numbers.

According to Richard Harfst, manager of the club, this condition is freely admitted at the certificate of title office in Lansing and the state authorities have been hard at work for the last ninety days revising their records to prevent thieves from getting titles to stolen cars.

This department, it is said, is also in favor of changing the mortgage law so that all chattel mortgages, collateral notes, etc., acting as liens against cars, should be filed in the secretary of state's office rather than

FARMING AND FINANCE

Babson Park, Massachusetts (Special).—Spring wheat has been going to market very rapidly this fall. The crop has been excellent, taken as a whole, and of course the Northwestern states have seen a great improvement on that account in conditions.

A point not to be forgotten, by the way, in speaking of wheat is the great jump that was seen in the value of our wheat exports from 11.9 millions of dollars in July to 33.6 millions of dollars worth of wheat exported during the month of August.

It is an old saying that lightning never strikes twice in the same place. A few months ago the farmers of the Mississippi Valley were enduring untold hardships on account of floods. Today it is the farmer of New England who is doing so.

Cattle and poultry have been drowned by the thousands and many farmers in Vermont have been forced out of employment. In many cases, farms that were mortgaged 50% before the flood have become practically lost to the farmer by reason of being rendered totally unproductive at least for some time.

It is particularly hard that this misfortune should come to the farmers of New England at this season of the year when the harvest had been gathered and plans were under way for the winter which now in many cases will probably never be realized. The railroads not having escaped has caused additional hardships in this territory and in the larger cities through the South of the flooded areas, who have been dependent at least to a very large extent upon these farmers for their milk supplies.

The price of beef cattle is now the highest in some years. The fall in corn has temporarily pushed the price still further up because of the demand for feeder cattle and the profit apparent in further feeding. Nevertheless, many feel that the high point has about been reached and would follow the market no further.

HOW TB QUARANTINE AFFECTS TUSCOLA CO.

Summary of Steps Necessary to Bring in Feeder Cattle Are Given.

At this time of the year, farmers who have the accommodations, and an extra supply of feed, are bringing in cattle for feeding purposes. Many know of the regulations governing the above practice and are giving the best of cooperation in complying with them; for the benefit of those contemplating the importation of cattle into Tuscola county and who are not sure of the proper procedure to safeguard against infection of tested cattle the following information is given:

Tuscola county is still under quarantine. The wording of the quarantine notice is sometimes confusing so a summary of the important steps in obtaining the necessary permit to bring in feeder cattle is as follows:

The present Commissioner of Agriculture is Herbert E. Powell, who may be addressed direct or permits may be obtained by requesting the same from Horace W. Norton, Jr., Director of the Bureau of Animal Industry, both of whom should be addressed at Lansing, Michigan.

Permits must be obtained before the cattle are brought into the county.

Steers constitute the only class of cattle which may be brought into the county untested, except cattle for immediate slaughter. Permits for the above must be secured prior to importation.

Untested steers must be kept in isolation according to conditions issued with the permit.

Isolation of feeder cattle means complete separation from other cattle. Separate buildings, yards, watering places, feed lots, and pastures being absolute requisites. Untested cattle must be kept out of contact not only with the owner's own cattle, but out of contact with those of his neighbor.

Single wire fences do not constitute

PLAN FOR TEACHER TRAINING SCHOOL

Committee Appointed at Institute Wednesday to Promote Such a School.

The first of a series of three Sunday School institutes held in Tuscola county this week under the auspices of the Tuscola County Council of Religious Education was held at the Presbyterian church at Cass City on Wednesday afternoon and evening.

Over 50 officers, teachers and others interested in church schools were present at the afternoon session. The district represented was the eight townships in the eastern part of Tuscola county.

The worship service was in charge of Rev. Sherk, pastor of the Baptist church at Kingston. Rev. Paul J. Allured of Cass City, president of the county council, gave an address on "New Demands in Religious Education." This was followed by a question box and discussion conducted by Bernard Coggan of Lansing, superintendent of the business and adult division of the Michigan Council of Religious Education. After a short business session, divisional conferences were held. Mrs. Arthur Tonkins of Fairgrove was in charge of the conference of teachers of children under 12 years; Rev. N. D. Braby of Caro, young people's leaders; Mr. Coggan, adults and home department; Rev. B. A. Taylor of Caro, church school officers.

The evening session was in charge of Rev. C. W. Scott of Deford, president of the Southeast District. The address of the evening was given by Mr. Coggan, who spoke on the subject, "Religious Education in the Church and in the Public Schools." Rev. Wilson of the Fairgrove Presbyterian gave the closing meditation.

At the evening session, superintendents of Sunday Schools in the Northeast District and officers of the district organization were named as a committee to make plans for the organization of a community teacher training school.

'Nother Gas Station at Caro Robbed

Two men held up Arthur Callan, attendant at the Standard Oil Station on South State St. in Caro, Monday evening and made way with approximately \$20.00. The station is one block southwest of the Montague hotel. The robbery took place about 8:30 and the bandits are described as a tall and a short man. A new Essex car was taken from a point near the court house where it had been parked by its owner the same evening. The two "jobs" were done by the same parties, it is thought. The car was later abandoned on a side street in Caro where it was found by officers.

This is the second gas station in Caro to be robbed within ten days. Kinde—After being without a hotel for several years, Kinde will again have this much needed accommodation for the traveling public, with one opened in the Majestic building there by Mrs. James Cobb. It will have 14 guest rooms.

Scientist Tells of Discovery of Bones of Biggest Mastodon on Elkland Farm

The Detroit Sunday News carried a feature article in its issue of Nov. 13 on the mastodon skeleton found on the Francis McDonald farm, four miles northeast of Cass City. Part of the article reads as follows:

New York—That the skeleton of the mastodon unearthed last August by Francis McDonald on his farm near Cass City, Mich., is the largest ever discovered is the statement of Dr. Charles C. Mook, an authority on fossils, a member of the staff of the American Museum of Natural History at Washington Square College. Because of that fact, it is the hope of Dr. Mook that, eventually, the bones found in Michigan will become a part of the collection of the American Museum of Natural History.

"Although there have been several hundred specimens of the American mastodon found in various sections of the United States and 14 specimens are on exhibition in the museums and schools of the country, the Michigan mastodon is of particular interest because of its size," said Dr. Mook. "At present, the American Museum of Natural History has a mounted American mastodon, lacking only two or three small bones from the ends of the toes and tail. It is nine feet, two inches high and is surpassed only by a specimen on exhibition in Brook-

lyn which measures nine feet three inches. "The Michigan specimen measures nine feet five inches. It probably was very old when it died. This is indicated by the condition of the grinding teeth which are still intact and which are very large for an animal of this species."

Dr. Mook was sent to Michigan by the museum at the request of Mr. McDonald. When he arrived at the McDonald farm, the skull, lower jaw, one tusk and a number of odd bones had been unearthed. All were broken badly and not in condition to be handled. During his visit, he unearthed another large tusk and instructed Mr. McDonald in the proper method of handling the bones.

Because of its condition, the skull had to be treated immediately to prevent it from crumbling.

"Mr. McDonald wanted someone to put the bones in shape for a country wide exhibit as they have created a great deal of interest since they were unearthed," said Dr. Mook. "Sometimes as many as 400 or 500 visitors come to the farm in one day. In fact, the young farmer sees Easy Street as a result of his find. He charges an admission fee of 25 cents to the small improvised cage in which he has placed the bones and the public

CASS CITY SCHOOLS

The high school opens the local debating season on Friday evening, November 18, when the Cass City negative team will oppose the Caro affirmative team on the question: "Resolved: That the Direct Primary System of Nominating Candidates for Public Office in the United States Should Be Abolished." The team is composed of Audrey Flannery, Bruce Hoadley and Claude Mitchell. The debate will be held in the Caro high school auditorium at eight o'clock, this (Friday) evening.

On this same date 240 high schools in every part of the state will meet in 120 debates, in which 720 high school pupils are participating.

This debate followed by three others on Dec. 9th, Jan. 13th, and Jan. 27th, will constitute the four debates of the preliminary series in which every high school must participate in order to qualify for the elimination series of debates.

Every high school that qualifies for the Elimination Series of debates will be presented with the University of Michigan wall plaque trophy, which is a mahogany shield eighteen inches high by fifteen inches wide, upon which is superimposed a nine-inch solid bronze medallion with embossed lettering.

Only 64 high schools can qualify for the elimination series which will culminate in the eleventh annual state championship debate to be held at Ann Arbor in Hill auditorium on Friday, April 27th.

The two schools participating in this final debate will each receive a trophy cup presented by the University of Michigan Extension Division and each of the six debaters will receive a gold watch as a testimonial of individual merit.

In the final state championship debate held in Hill auditorium at Ann Arbor on the 11th of last May, Ann Arbor high school won first honors and Albion high school won second honors. The audience assembled for this final debate numbered 3000 people, which is the largest audience that has ever attended a state championship debate in the Michigan high school debating league.

The Michigan High School Debating League was organized by the Board of Regents of the University of Michigan in 1917, and has for the past ten years conducted debates among the high schools of the state.

Home Economics.

Girls of the Home Economics Department entertained the members of the high school faculty Friday afternoon at a three-course breakfast. The meal was planned, prepared, and served, as a unit in foods and meal preparation, by first year students of the Home Economics department.

The Rev. Mr. Scott, pastor of the First Methodist church of Deford, talked to the high school and junior high school assembly Friday morning, as a part of the school's Armistice Day observance.

The seventh and eighth grades are completing their study of linen, button holes and holders, and will discuss their next problem, which they have chosen, the pajamas. The ninth grade is going to start work on the luncheon or supper. This week they will prepare egg and cheese dishes and soups suitable for a luncheon. The advanced class is studying silk and soon will start a comparison of the various textile fibers and learn how to judge them and to test them. They are still working on their dresses.

English and History.

Members of the English 9 classes are giving short oral reports on the books they have for home reading. Each pupil endeavors to characterize the book he has read, and to interest other members of the class in it. Some very excellent reviews have been given.

The American history classes have concluded the colonial period, and are now studying the formation of the union. The growth of Rome, from a small village to a world power, has been the subject for study in the World History class. Maps have been prepared showing the Roman dominions in 264 B. C., 44 B. C., and 117 A. D.

Commercial.

The eighth grade arithmetic class are conducting a bank this week and learning the use of deposit tickets and checks and other information regarding the bank account.

Economics.

Banking money, and credit have been discussed this week. The facts from the text were supplemented by an explanation of the organization and operation of the local banks by Mr. M. B. Auten. Causes for panics and crises are being investigated and analyzed. On Tuesday each member of the class presented a paper discussing the condition of the business world this fall.

Organizations.

The Lambda Sigma girls are going to sell tickets for Kathleen Norris' play, "Mother," to be shown at the Pastime theater Tuesday and Wednesday, November 29 and 30. The money which is earned will be used to buy some furnishing for the new school building. The tickets will be on sale this week and may be secured from any member of the club.

Be sure to come and to bring your friends. It's a picture well worth seeing and one which will interest all. In its regular work this year, the club is studying modern literature—poetry, short stories and drama. At the meeting held Nov. 9, modern poetry was discussed.

The A. B. C. Club will sell "hot dogs" at the Bad Axe-Cass City football game on Friday. Be sure to bring a dime with you. It will be cold enough to eat two, so bring twenty cents. The club is endeavoring by this means to get enough money for a concrete tennis court for the school.

Art.

The high school art class has recently organized with the following officers: President, Virginia Day; Sec. Treas., Doris Bliss; Adv. Mgr., Esther Caister.

The purpose of the organization is to sponsor a sale of hand tinted Christmas cards with hand lined envelopes to match. The proceeds are to be given to the art department for the purchase of tools needed in work with the different art crafts—such as leather tooling, block printing, batik, tie and dye, cement and gesso.

The class is studying the six different color harmonies this week preparatory to tinting their cards and making the envelope linings.

The Junior high art class has begun making Christmas presents already. We won't tell what they are; it might be letting a secret out.

The fourth, fifth and sixth grades have earned a vacation from poster making by designing one for each day of Education Week. They improved to a marked degree during their daily practice. Work for Christmas began this week.

The second and third grades showed very unusual talent in art last week doing free hand illustration and imaginative drawing. We find several pupils who are extraordinarily good in figure drawing. If our work continues so well, our art display later in the year will surely be worth seeing.

Music.

The boys' glee club is putting finishing touches on "The Road to Mandalay," which is to have a few orchestral additions. They are also working on two new numbers, "Come to the Fair" and "Keep on Hopin'." The club is rather small this year; but is doing a splendid quality of work.

The girls' sextette is working on three new numbers, "To a Wild Rose," McDowell; "Pale Moon," Logan; and "The Land of the Sky Blue Water," Leaurance. They are considering purchasing costumes which they believe would add to the attractiveness of their performances.

The new books for sixth grade have arrived and we are making a thorough technical study of the entire book before we begin singing from it. The songs are very tuneful and have nicely varied subject matter.

The fourth and fifth grades had a written lesson on Monday which they corrected themselves on Wednesday. It covered syllable, ear training, instrument and signature work.

The second and third grades did some music writing on Monday, and enjoyed a "listening lesson" on Wednesday.

The first grade and kindergarten are trying new music now, and are having for part time accompanist, Charlotte Warner from the Junior high.

Kindergarten.

We are having a very happy time drawing pictures of the Mayflower, and modeling ducks, turkeys, pumpkins, fruits, and vegetables from clay. We are full of enthusiasm over Thanksgiving and soon will have our Thanksgiving poster finished. The children in kindergarten this year seem to have an unusual collective instinct. Every morning some one comes in with a box filled with the most interesting pictures to illustrate whatever we are studying. Hazel Corkins has been chosen as the one to make the table cloth for the tea table. We hope to have it done in time for Thanksgiving.

First Grade.

We are continuing the study of the Indian in connection with Puritan life. To make this life more realistic, we are wearing white collars during this week. The boys and girls have written an Indian story of their own. In this are many of the new words we have added to our vocabulary.

"Fleetfoot Kills a Giant"—He was a little Indian boy. This little boy liked to play with bows and arrows. Fleetfoot could run very, very fast. One day he met a Giant. The Giant said, "Come and race with me." So he did. But the Giant ran into the branch of a tree and broke his neck.

Third Grade.

Frances Cranick is the new girl in our room. We now have an enrollment of 32. Our number contest is even, each class having 21 stars. In language, we are going to work principally on "I haven't any" and "I have no."

Fourth Grade.

We have two new pupils, Florence and Freeman Barber. We are study-

ing Hiawatha. We are making an Indian and a Pilgrim village.

Fifth Grade.

This week we are busy making maps of South America. We are aiming to have our maps tell us a story, and also to be able to "read" the story which our maps tell us. We are enjoying the story, "Little Men," by Louisa M. Alcott, which is being read to us every morning. We are sorry that Thomas Kelly is ill with the mumps and is unable to be present at school.

Sixth Grade.

The fifth and sixth grades had an interesting assembly in the music room on Friday. Patriotic songs were sung. Eunice Schell, Carlos Vader, and Howard Taylor of the fifth grade told interesting stories. Van Rench told the boys and girls the meaning of Armistice. Dorothy Boyes read the President's Proclamation. A group of sixth grade girls recited "In Flanders' Fields" by John McRae. This was replied to by Elaine Turner who recited "In Flanders' Fields" by Edwin L. Miller. The following people made the honor roll last month: Ruth Schenck, Elaine Turner, Georgene VanWinkle.

Seventh Grade.

The seventh grade arithmetic class is studying pay rolls, and will work a business problems, also.

SHABBONA.

The new barn of John Atfield was blown down by the wind Friday night. George Gotham underwent an operation at the Tweedie hospital in Sandusky Sunday.

Goldie Brown has moved onto a farm near Marlette.

Mrs. Augusta Howard, who has been visiting relatives here for the past three weeks, returned to her home in Pontiac Sunday.

Mr. and Mrs. Vern McGregory and two children visited at the home of Howard Harms near Deckerville on Sunday.

Mr. and Mrs. Artemas Hall and Mr. and Mrs. Lyle Hall of Pontiac visited their aunt, Mrs. John Chapman, Sunday.

Mr. and Mrs. T. W. Stitt spent Sunday with their daughter, Mrs. Manley Kitchen.

Harvey McGregory and family spent Sunday afternoon at Henry Phillips'.

Amos Stone has moved onto the Levi Holcomb farm.

Art Kerbyson of Flint and Eleanor and Cecil Kerbyson of Lapeer visited relatives here Sunday.

The M. B. C. prayer meeting was held at the home of T. F. Wells on Tuesday evening.

Gatun Lake Largest

Gatun lake in the Panama canal, having a surface area of 164 square miles, is the largest artificial lake in the world. It was formed by the construction of Gatun dam.

Water's Long Drop

The Kaletur falls, in British Guiana, has a vertical drop of 741 feet, says Nature Magazine, as compared with 167 feet in the American falls at Niagara.

OWENDALE.

A number from here attended the Adult Bible class at Pigeon, Tuesday afternoon and evening. Mr. Townsend spoke upon the evangelistic opportunity of the adult class.

Stanley Mellendorf of Rescue spent the week-end in town with friends.

Mrs. C. I. Ricker is visiting her sister in Hastings county for ten days, having left last Thursday.

Sun, Moon and Stars

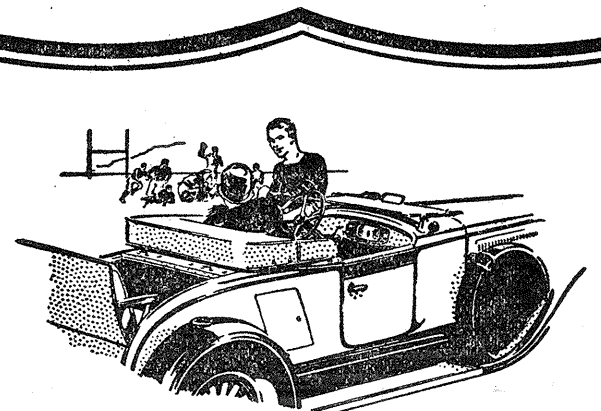

The sun lights this world from without, shines in at a window, but the moon is like a lamp within an apartment. It shines for us. The stars themselves make a more visible, and hence a nearer and more domestic, roof at night. Nature broods us and has not left our germs of thought to be hatched by the sun. We feel her heat and see her body darkening over us. Our thoughts are not dissipated but come back to us like an echo. Thoreau.

five year old son of Mr. and Mrs.
William Seale of Kinde, was instan-
tly killed Saturday afternoon while
on his way to Bad Axe with Mrs. E.
G. Black and her nine year old
brother, Thomas Foster. Mrs. Black
and Thomas were uninjured. When
the party were three and one-half
north of Bad Axe on M-53, Mrs.
Black says the car in some unac-
countable way tipped over in the
center of the road. The Seale boy's
head was crushed. He is survived by
his parents, two brothers and one
sister. Funeral services were held on
Tuesday afternoon.

WARNING ISSUED TO STATE MOTORISTS

Concluded from first page.

The club points out that a man re-
siding in Detroit might purchase a
car on the time payment basis and
the chattel mortgage be recorded
there in accordance with law. The ap-
plication for title to this car might
be made out so that no lien was
shown against it. A short time later
the purchaser might move to Flint,
sell the car there, giving a clear title
to the purchaser, who would ef-
fect a transfer through the state de-
partment. At some future date the fi-
nance company who had a lien
against it might locate it and could
recover if from the second purchaser.
This condition of affairs, according
to the automobile club, makes it
necessary for every purchaser of a
used car to either trace the ownership
of the car from the dealer who origi-
nally sold it down through every
ownership or if purchased from a
dealer, to get a written statement
from that company to the effect that
the car is free and clear of all liens.
In this connection, the club also
points out that it is extremely dan-
gerous for a private party who has
no facilities for investigating matters
of this kind to purchase a used car
from another individual unless that
person is personally known to the
purchaser, or the car is bought from
a reputable company.

Then What Did He Get?

Three-year-old James cared not a
little for the freshly baked cakes
which his mother was taking from the
oven. "The little one is yours, Jimmy,"
she said, as she hurried to answer a
telephone call. When she returned to
the kitchen her dismay was evident
when she said, "Why, James, what has
happened to my cake?" "It was too
long. I broke off the end for you,
mother," was his answer.—Indianapolis
News.

Took Name From Paint

The White House gets its name
from the fact that after the first ex-
ecutive mansion, which was of buff
freestone, was burned by the British
in 1814, the walls were covered with
white paint to hide the traces of fire,
according to Liberty.

Pilgrim Memorial

A large block of sandstone at
Deltshaven, Holland, is believed from
half-effaced inscriptions to be a
memorial of the sailing of the Pil-
grim Fathers from that port on July
22, 1620.

The Test of Man

Good fortune will elevate even
petty minds, and give them the ap-
pearance of a certain greatness and
stateliness, as from their high place
they look down upon the world, but
the truly noble and resolved spirit
raises itself and becomes more con-
spicuous in times of disaster and ill
fortune.—Plutarch

Deborah

One of the greatest judges in
Israel was a woman, and she was the
only judge who was able to keep the
peace, and that was a great thing.—
Lord Courtney in "Cornish Granite."

Can Thaw Out Snakes

The biological survey says that it is
possible for a snake that has been
frozen to come to life again. Snakes,
however, that thaw quickly do not
survive, but if the thawing process
is slow they again become quite
active.

Effect and Cause

It is said that more men than wom-
en commit suicide. This is because
the men have all the things to worry
about that the women do and then
have the women to worry about be-
sides.—Hudson Star.

How TIMBER FIRES OFTEN START

HOW TO PREVENT FIRES

1
Matches — Be sure your
match is out. Break it in two
before you throw it away.

2
Tobacco — Be sure that pipe
ashes and cigar or cigarette
stubs are dead before throw-
ing them away. Never throw
them into brush, leaves or
needles.

3
Making Camp — Before build-
ing a fire scrape away all in-
flammable material from a
spot 5 feet in diameter. Dig a
hole in the center and in it
build your camp fire. Keep
your fire small. Never build
it against trees or logs or near
brush.

4
Breaking Camp — Never
break camp until your fire is
out—dead out.

5
Brush Burning — Never burn
slash or brush in windy wea-
ther or while there is the
slightest danger that the fire
will get away.

A carelessly left campfire—a care-
lessly thrown match or spark—may
mean acres of timber destroyed in a
few hours. Only decades of slow growth
will replace the loss.

Pine forests catch fire easily. Many
travelers from states where there are
no forests, or only hardwood forests,
do not realize that our northern woods,
composed largely of highly inflam-
mable pine, will burn so easily. The
underlying bed of leaves and dry pine
needles acts like tinder in carrying fire
from a spark dropped in it. Fires creep
underneath this forest floor and ap-
pear in distant places.

Be careful! Help preserve the forest
treasures for everybody's use.

LOCALS WIN FROM MARLETTE 16-12

Concluded from first page.

Quarter with long passes and scored first on a 20 yard pass followed by a 30 yd. run. Sanford, Marlette's candidate for the All Thumb team, caught the pass on the 30 yard line and raced away from his pursuers. This was the only time all day that the highly lauded Sanford got away, the Cass City ends and tackles stopping him on the line of scrimmage time after time. With five seconds to go a Marlette end caught a pass dangerously near the sidelines and was not headed 'till he reached the goal line. The Marlette crowd was on the field of play and McCullough and Edgerton, the Cass City defensive backs, forced the pass receiver to the edge of the crowd to what they claimed was out of bounds and let the runner go, thinking him outside. The officials refused to allow their claim, however, and the score counted. Neither point after touchdown was scored. The whistle, ending the game, blew while Marlette was kicking off to Cass City after their second touchdown. Score—Cass City, 16; Marlette, 12.

The local lads played their best brand of ball of the season, displaying a stone wall defense that Marlette could never pierce. The offense had about everything one could want, lots of drive, plenty of deception, and some nifty quarter backing by Capt. Bailey. Bailey took advantage of a strong wind time after time on exchange of punts and gained lots of yards that way. Marlette was never within the locals' 30 yd. line.

Coach Lewis will devote the week to drill on pass defense and hopes to end the season with a victory over Bad Axe here today (Friday). The squad is free from injuries with the exception of Capt. Bailey, Wood and Greenleaf, all of whom probably will be in shape for the season's last encounter. The big difficulty to date has been to fill the center of the line and the present trio of Bohnsack at center and Wood and McConkey at the guards seems to be the solution. Wood has been coming along fast and showed plenty of scrap and charge at Marlette Friday. In the back field three green men are beginning to fit into the system, Brown, McCullough and Bailey, and with Flint, a veteran of last year, put on a nice offense at Marlette. Edgerton, a new man at end, is a promising comer and snags plenty of passes. McKenzie, substitute end of last year, is an invaluable member of the squad, doubling for Bennie Oosterbaan of Michigan, throwing and receiving passes. The local tackles need no introduction to local fans, Blades and Schweigler. They are playing good ball with the new pair of guards. The season ends this week with Bad Axe coming to the local stronghold.

Bulky-Las—Feeding Bulky-Las just like feeding silage from a bag. It's sweet, palatable, succulent and bulky. Bulky-Las is made of corn bran, alfalfa meal, beet pulp and molasses. Contains 53% digestible carbohydrates (body builder). For healthy cows and more milk feed Cow Chow and Bulky Las.

The nights are getting longer, but we don't seem to find any more time to sleep.

The papers yesterday told of a man who saved himself out of jail with a safety razor blade. We've got a few blades just like that.

A city chap was crossing the pasture. "I say," he shouted to the farmer in an adjoining field, "is that bull safe?" "Well," replied the farmer, "he's a danged sight safer than you are right now."

Here's how sure we are that Cow Chow will make you more milk and make it at less cost per pound!

We will lend you milk scales so you can weigh the exact amount of extra milk you get each day from Cow Chow. And what's more—we will give you some Record Blanks free, so you can see how much Cow Chow cuts your cost of producing milk each day! Isn't this a fair proposition. If you are from Missouri, let us show you.

Mrs. E. E. Fellow of Cleveland. Mrs. Stone received some very pretty and useful gifts.

You can raise those calves on Calf Chow for about one-third the cost of whole milk.

We are grinding Buckwheat now. The Buckwheat is of very good quality and also the flour. There is nothing that can take the place of those Buckwheat Pancakes for breakfast these mornings.

We clipped this from a Mich. newspaper.—"A burning shingle from the barn fell on Mrs. Anna Noonan's neck, inflicting a severe burn. The loss was only partially covered by insurance."

Cut the cost of making pork. That's what you must do these days to make money, and Putrina Pig Chow helps you do it.

"There's a fly in that milk pitcher." Said the fussy Mr. Brown. "Never mind," replied the waiter, "Serves him right—just let 'im drown."

Some people live and learn, and other people just live.

"Here is an account of a man who meant to take a short nap before his wedding and he slept right past the time for the ceremony."

"That's nothing. Lots of men don't wake up until after the marriage ceremony."

Made Music for Hebrews

A psaltery was a stringed instrument shaped like the Greek letter delta. It was used by the ancient Hebrews. In medieval times a psaltery had from 13 to 36 strings and a sounding board. It was played by plucking the strings with or without a plectrum.

MICHIGAN CORN CROP BETTER THAN EXPECTED

Concluded from first page.

unusual amount of small potatoes in Michigan this year so that the total crop quality is only 83 per cent, the Michigan U. S. No. 1 grade potatoes are excellent stock. Increases in production were general in the north-eastern and far western late potato states, while the decreases were mostly in Michigan, Wisconsin and the early late crop of Virginia. The Minnesota and North Dakota crops were only slightly down.

With harvest completed and much threshing done during October, the Michigan bean yield averages 9.0 bushels per acre. Indications show an abandonment of acreage in a number of counties due to frost damage in August and other causes amounting to six per cent, and it has also been found that in the heavier eastern sections the acreage planted was not so large as expected when the estimate was made. Consequently 666,000 acres have been deducted from the preliminary estimate, and 596,000 acres of beans were harvested in Michigan this year. The total crop is therefore 5,864,000 bushels and the net crop amounts to 4,989,000 bushels after an average pick of 7.0 per cent is deducted. Last year's net crop was 4,350,000 bushels from a total salable crop of 5,299,000 bushels. Other than Michigan, the only change

in the United States bean crop was a gain of 591,000 bushels in California during October. The U. S. crop is estimated at 18,112,000 bushels compared with 17,138,000 bushels produced in 1926.

A preliminary estimate of 7.5 tons per acre for Michigan sugar beets forecasts a crop of 742,000 tons which is 50,000 tons less than in 1926. Although the weather was rather unfavorable for buckwheat, an average yield was secured, and from 13.0 bushels per acre the total production is placed at 884,000 bushels. Clover seed acreage was large this year, and it was harvested in good shape so that Michigan produced 155,000 bushels or more than twice that of last year. There was also a large acreage of timothy seed in the state and it yielded well at 3.9 bushels per acre.

Michigan's short apple crop of 4,288,000 bushels, of which 758,000 barrels is commercial, was of poor quality, because of scab, aphids and other causes, or only 58 per cent of normal quality. The United States apple crop is likewise short, the total being less than one-half of last year and the commercial portion less than two-thirds of 1926. The pear crop in both Michigan and the United States is considerably short of last year, but the quality is much better than that of apples. The U. S. grape crop is 228,000 tons larger than in 1926, but the Michigan out-turn is 15 per cent

shorter than last year; however, the quality is slightly better.

FARMING AND FINANCE

Concluded from first page.

Prices in the wholesale market for wool have been advancing since June and the market is still firm. Imports of wool and stocks in bond are both less than a year ago. More domestic wool is being consumed.

Not a few people are to be found who now believe that the present price for wool about discounts the stronger situation and that before very long the market will be affected by the prospects of the new clip.

Sales campaigns carried on in most parts of Canada during the next month or two will probably be meeting with excellent response. Particularly will this be true if the salesmen restrict themselves to the leading centers of Alberta, Saskatchewan, Ontario or Quebec.

Agricultural communities in Alberta and Saskatchewan are benefiting from unusually favorable crops; and the large industrial centers, particularly those in Ontario, are in line for increased business as a result of gains in farm income now being received in the Western Provinces.

The world has been using over 1,000,000 more rubber than it did 20 years ago. Previous to 1910, most of the rubber came from wild sources in Central and South America and from Africa, along with a small supply from the guayule shrub of Mexico.

Today, leading concerns in the rubber industry have established their own plantations, with new areas planted each year amounting to approximately 55,000 acres.

The American rubber industry has been experimenting recently with a bud-grafting process for rapidly increasing the total yearly production. Further use of this bud-grafting process and much more extensive development of the guayule rubber plant (a growth that resembles cactus and is found in Mexico, Texas, and California) may be expected during the years immediately ahead.

Custom Is Old One

The custom of drinking to health and success to undertakings at banquets dates back to the invasion of the Romans. The word toast appears to have originated from the practice of putting bits of toast in the wine, the guest partaking of such a sip with the draught of wine as soon as the felicitation had passed the lips.

Marcelling

I desire to announce that I will do marcelling and hair dressing at my home over the Geo. Hooper Store every day in the week. Appointments at all hours.

STAROLINE Gasoline Is Better

Quality Unchanged

White Star Passes to its Patrons Benefits of Reduced Production Costs of Staroline, the "Better" Gasoline

Economies in manufacture of Staroline, made possible by installation of improved equipment, coupled with tremendous increase in demand, are responsible for this substantial reduction.

Introduced eight years ago in response to an insistent cry for "better gasoline," winning instant favor as a result of its wonderful qualities; Staroline was sold initially at a premium of seven cents per gallon. As demand increased and manufacturing economies were effected, the price was reduced to five cents per gallon premium. Today the public are given the benefit of still

further economies and are assured of the same high quality that has always characterized STAROLINE.

It is a basic policy with White Star Refining Company to make every White Star product the best of its type and sell it for the lowest possible price consistent with good business management.

In instituting the lowest price level at which STAROLINE gasoline has ever been sold White Star gives its solemn pledge to the public that quality has not been sacrificed in order to reach a low selling cost.

Gives Pep and Power

It's a tonic—this unique gasoline. Puts new life in an old car. New pep and power. Fill up the tank with Solite and see!

The engine is agile and eager. Quick to start. Away at a touch—smoothly, quietly picking up speed.

A motor fueled with Solite is ready and able to do your will. It has the nimbleness to respond on the instant. It has the power to do what you ask.

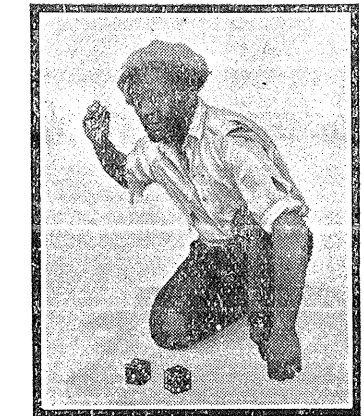

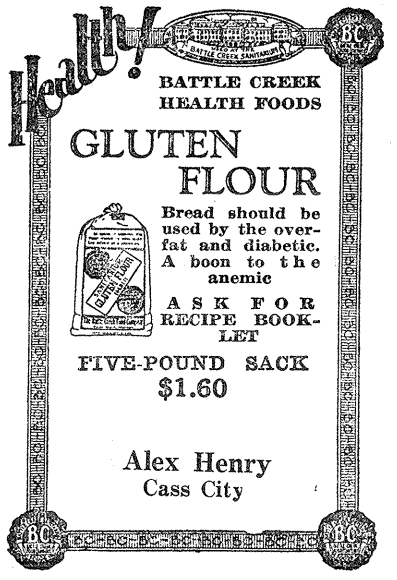

Most light gasolines sacrifice power for speed. Not Solite! It drives the piston the full stroke under power. That's why it gives such pep and power and speed! Motorists are glad to pay a few cents more to get it!

Accept no substitute for Foley's Honey and Tar Compound. Get the genuine. L. I. Wood & Co. Burke's Drug Store.—Advertisement 8.

State News in Brief

Owosso—State police have launched a drive against truck drivers whose trucks are not equipped with rear view mirrors and several ordered into police court here were fined \$6 each.

Manistee—The tail of a rainbow trout was the star witness against Raymond Macziuski, who began a 50 day jail term on a charge of violating game laws. Macziuski contended the fish sold was a whitefish, but with the tail as evidence, the court reversed him.

North Adams—Nathaniel Daniels, 95 years old, for 32 years a resident of North Adams, is dead here. Mr. Daniels' grandfather, Capt. Carl Daniels, served in Washington's army during the Revolutionary War, and his grandmother, Patience Richardson, witnessed the Boston Tea Party prior to the Revolution.

Greenville—The Greenville potato show just held was one of the best in years. Two hundred twenty-five exhibits by growers throughout the state were on display. Among the displays were those of the Michigan State Department of Markets, the Upper Peninsula experiment station and an exhibit demonstrating control of leaf hoppers by William F. Johnson, county agent of Van Buren county.

Albion—Mr. and Mrs. Roy Merwin who reside in the village of Marengo, between Albion and Marshall, were severely burned when a stove in their home blew up, setting fire to Mrs. Merwin's clothing. Merwin was burned when he rolled his wife over and over on the floor to put out the flames. The house caught fire, but neighbors who heard the blast, caused by an explosion of coal gas, extinguished the flames.

Jackson—A .22 calibre rifle in the hands of Stephen Jodis, 14-year-old boy, was used in holding at bay a drink-crazed man, who had broken into his home and whom he believed was a burglar. The man was discovered in the home by the boy's mother. The youngster, in answer to her cry, seized the weapon and covered the man, while the mother sent in the alarm. Officers took the man in custody only after a considerable struggle.

Ann Arbor—Having decided that it has gone as far as possible in opposing the complete ban on student automobiles at the university, the student council has tabled the question. The action was taken at a meeting at which a communication from the board of regents was read. The communication thanked the council for its interest in student affairs, but reiterated that the board felt that the ban had not been tried for a sufficient length of time to warrant its modification.

Ann Arbor—The annual citation given by the Erwin Prieskorn Post of the American Legion, to the citizen of Ann Arbor who has distinguished himself by peace time service to the community, has been awarded to Fielding H. Yost. The citation will be given at a dinner of the post on Lincoln's birthday, next year. Yost has been prominent in the advancement of the Boy Scout movement, of which he is leader here, and has successfully completed the greatest building project ever attempted in Ann Arbor.

Mayville—Growth of Detroit is making the Thumb of Michigan one of the most intensive potato producing sections in the United States, declared Henry C. Moore, Michigan State College potato specialist, at the annual banquet held in connection with the Thumb of Michigan Potato Show here recently. Interest in the growing of high quality potatoes among the Thumb farmers was indicated by the fact that there were 175 entries at the show as compared with less than 100 a year ago.

Lansing—Payment of approximately \$30,000 in interest on the \$1,000,000 "illegal" state fair bonds has been authorized by the administrative board. The interest is nearly a month overdue, State Treasurer Frank McKay having refused to pay it because of the questionable status of the issue. The bond question arose some time ago when Attorney General W. W. Potter issued an opinion holding them illegal because the issue is a mortgage on the state fair property. This is in violation of the constitution.

Sault Ste Marie—Improvement and beautification of the park adjoining the locks and canal at Sault Ste Marie is under consideration by the war department at Washington. The suggestion for consideration was forwarded to the district engineer in charge in this locality for recommendation and report. In accordance with the recommendations of the district engineer here, the request has now been referred to the commission of fine arts at Washington with a view to securing the commission's advice on the subject of landscaping the government property in this locality.

Port Huron—Despite the fact that he has a broken neck, William Thompson, 62 years old, retired farmer, is walking about every day. Dr. Jacob H. Burley, this city, who completed developments of X-ray pictures of Thompson's neck, said the man had a broken neck, but did not know it. One of the vertebrae in the man's neck is dislocated and it is doubtful if he will ever be able to turn his head again, but the injury is not necessarily fatal," Dr. Burley said. Thompson was injured in an automobile accident August 8.

St. Louis—After saying he would not live to witness his father's death, George Buck, 34 years old, ended his life here by taking poison shortly after being told by physicians that the parent could not recover from an illness.

Big Rapids—A. W. Nichols, 82-year-old real estate and insurance man of this city, wrote his own obituary recently and then shot himself. He died a short time later in the hospital where he was taken. At one time he possessed a moderate fortune but unwise investments are said to have depleted his finances.

Kalamazoo—Nine ribs and ten more vertebra of a prehistoric mastodon skeleton were uncovered here by workmen digging for sewer pipes in the streets of this city. A giant tusk and one vertebra was unearthed previously. Excavation under the direction of the city engineer is being continued. All of the bones have been found within 20 feet of each other.

Jackson—The Jackson Zouaves, the drill team which attended the American Legion convention in Paris and later toured Europe, has returned home. Several thousand persons met the team at the station. Under Capt. William Sparks, leader of the team, the Zouaves visited Berlin, Rome and London, after leaving Paris. Honors were paid them at each of these cities where special exhibition drills were given.

Jackson—Loss of one ounce of weight means much to the baby girl born at the Foote Hospital here and weighing at birth only a pound and 12 ounces. The baby has been fed on a diet of whisky and water. Nurses at the hospital have named the child "Faith." She is the daughter of Mr. and Mrs. Charles Warner of Grass Lake, and the eleventh child of the couple. The baby will be transferred gradually to a milk diet.

Lansing—Herbert Hoover's boom for the presidential nomination was given its first active and open start by Governor Green. Governor Green lunched with Hoover at Washington recently and said afterwards that he had told the secretary of commerce that the Michigan delegation would be for him at the national convention. Michigan has 30 delegates. So far as can be ascertained this is the first direct impetus of the kind that has been officially made known to the public.

Lansing—Deer hunters going to the Upper Peninsula this month will be provided with a 24-hour-a-day boat service in crossing the Straits of Mackinac, Frank F. Rogers, state highway commissioner, announced here. The state ferries between Mackinaw City and St. Ignace will operate as rapidly as possible, disregarding schedules. This will enable them to make almost three trips where the schedule calls for two. Crews will be on duty each night until the last car is across the straits.

East Lansing—Governor Fred W. Green, along with 13 cadets of the Michigan State college R. O. T. C. and two military officers stationed here, was initiated into Seaboard and Blade at a formal ceremony in the new demonstration hall of the college recently. The governor was made an honorary member of the college military fraternity. The other two honorary members are Major Charles Thomas Stahl and Lieutenant Kenyon P. Flagg, instructors in the artillery division of the R. O. T. C.

Mt. Clemens—That John Dawe, 48 years old, of New Haven, was burned to death in his own automobile after a collision near here because of his inexperience in driving an automobile, was the opinion expressed after statements were taken from drivers of the two trucks involved in the accident. His machine was hurled against a tree and burst into flames when he failed to judge correctly the clearance between two trucks, one laden with a concrete mixer and the other with ten 50-gallon drums of denatured alcohol.

Adrian—Smoke screens and poison gas are the latest devices borrowed by bootleggers from modern warfare to insure their safe passage over patrolled roads. State troopers reported here recently that an automobile load of liquor escaped from them when the driver laid down a thick screen of dense, acrid smoke every time they closed in on him. Twice in ten miles the officers were forced to stop and get out of their car to breathe fresh air. They gave up after they chased the pursued car several miles over the Ohio state line.

Monroe—The Dixie Highway will be rebuilt between Toledo and Monroe and a new road will be built from Monroe north to connect with the Telegraph road at Stony Creek, according to an announcement made here by Frank F. Rogers, state highway commissioner. Mr. Rogers said the rebuilding of the Dixie Highway had been held up by a "bottleneck" in Monroe which is being eliminated by the widening of Monroe street, between Front street and Elm avenue and the construction of a \$75,000 bridge over the River Raisin.

Lansing—Eight additional counties, six of them in Michigan, have been found infested by this season's spread of the corn borer, according to the Department of Agriculture. The farthest north and farthest west limits of the infested area both are located now in Michigan. The farthest north is in Cheboygan county, and the farthest west in Berrien County. The six Michigan counties in which the borer has been found recently in the 1927 survey are Alcona, Berrien, Cheboygan, Gladwin, Ogemaw and Presque Isle.

SCIENTIST TELLS OF THE DISCOVERY OF BONES OF THE BIGGEST MASTODON

Concluded from first page doesn't seem to mind paying as more visitors come all the time.

"The money he has raised so far is to go back into the farm. He even has dreams of making \$10,000 by taking his find on the road. But I advised against such a trip since the bones are in such bad condition they probably would not stand the strain of transportation."

Those bones, Dr. Mook explained, go far beyond even the dawn of history. The mastodon was the companion of the American Indian in ranging the forests, but the family tree of the mastodon has its roots in the Upper Oligocene time which some geologists estimate as 3,000,000 years ago!

The cradle of the progenitors of the mastodon—humbler and smaller in size—was Egypt. That descendants of the early elephant dynasties, the Maeritherium, the Phiomia and the Palaeomastodon, should reach Michigan, is due to the fact that the trunked animals have been second only to man as explorers. In fact, as Henry Fairfield Osborn, president of the American Museum of Natural History, points out, the proboscis in many instances proved themselves superior to man by adapting their clothing and teeth to their new environment.

Because of this curiosity, together with the desire for different surroundings, foods and cover, the elephant family wandered to the ends of the earth and thus, the mastodon reached America by way of Behring Strait, then a peninsula.

The American continent was then beginning to emerge from the ice, but the earth was still cold, so the mastodon was provided with an overcoat, thick, bristly hair, much the same as the hair of the Indian elephant of today, but far more plentiful. To dig up its food, it had two spades, the great tusks. With its trunk, it could feed itself. Thus equipped and with its great strength, it was fitted to come to grips with nature in a struggle for existence.

Contrary to general belief, the mastodon was not so tall as the Indian elephant, but it was more heavily built, having been wider across the hips with more massive, though shorter legs. It probably reached a weight of seven or eight tons, against five tons for an unusually heavy elephant. And it was this great weight that at times brought about the undoing of a mastodon and, incidentally, gave to posterity relics of the vanished monsters from which, with the infinite care and patience of science, reproductions have been made of the great beasts of the early day.

The mastodon skeletons discovered in this country usually have been brought to light as the result of the draining or excavations in old swamps or bogs.

Thus it is shown that the mastodon, in search of food or water, was borne down by its great weight into the soft earth until, held fast in the mire, it died. Then the forces of nature preserved the bones, discoloring them by the decaying vegetation, but securing them against the attacks of air. Otherwise, there might not have been any remnants of the giants that have perished since the fossilization of the remains of forest animals is extremely rare. Still, though the discovery of skeletons is made often, there is yet no light on what brought about the extinction of the mastodon.

The Warren mastodon, the most perfect specimen of the American mastodon, was found in a marl pit on the Brewster farm in Orange county, New York, in 1845. The summer had been unusually dry and the discovery came through the removal of marl to use on other parts of the farm. On the surface was two feet of peat, then three feet of red moss and finally 10 feet of mud. It was in this mud that the bones rested, the standing position indicating that the great animal had met its death through being mired.

The finding of the skeleton threw the countryside into great excitement. After being mounted, the skeleton was shown about the country for a short time and then was purchased by Dr. C. K. Warren, of Boston, and placed in his private museum where it stood for many years. When Dr. Warren's estate was settled, a half century after his death, the mastodon was purchased by J. Pierpont Morgan and presented to the American Museum of Natural History. There it was most carefully remounted after scientific studies had been made to get the correct and characteristic pose. The original tusks, which had fallen to pieces, were skillfully repaired and replaced in the skull.

Parts of mastodon skeletons have been found all over the country from Connecticut to California and from Florida to Alaska. Teeth are fairly common, but complete skulls are rare finds, with good skeletons still more rare. Several years ago, parts of a skeleton were found in an excavation in Dyckman street in this city. The first mention of the finding of mastodon remains in this country was in 1705 near Albany.

"Insofar as this Michigan find is concerned, we hope that some time the American Museum of Natural

History may be able to obtain it to add to its collection," said Dr. Mook. "At present, the Museum has no funds on hand to make such a purchase."

separation. Drainage from the feed lot must not contaminate other pastures or lots where tested cattle are kept.

Inspection from time to time is maintained on such isolated cattle and if it is deemed necessary, the owner may be requested to have the cattle tested at his own expense.

Prior to the completion of the test of the cattle in the county, the directors of the tuberculosis eradication work saw fit to instruct the Deputy State Veterinarian stationed in the county, to test all cattle as found. Since a complete test of the cattle in the county has been made at the general expense of the taxpayers, it has been decided that the owner in each case must stand the cost of testing any imported cattle which he may find he cannot keep according to his permit.

Drovers and others, importing cattle for resale, must obtain permits and notify the Bureau of Animal Industry of such resale so that permits may be issued to the new owners.

Dr. Coburn, who is now in charge of the work in Tuscola county is located at 125 Alexander St., Caro, Mich. Phone No. 152.

SCHOOL CHILDREN TO BE
IMMUNIZED FOR DIPHTHERIA

Beginning next week, I shall keep a nurse at the school house, until all children are immunized for diphtheria, who were not immunized a few years ago.

As I previously stated in these columns, this is a positive prevention, for the dreaded disease; it is safe, and does not harm whatsoever.

This time, Professor Holmes and I are looking forward to the complete co-operation of the physicians and

parents in this district. Children should be immunized after they are one year of age, and it is not necessary to take the Shick Test. It is customary, however, to give adults the test, because some adults have a natural immunity. It is rare that a child has natural immunity.

Any who wish, may of course, go

to their physician for this work, remembering to get the injections a week a part, and three complete the course. So, if you do go to your physician, will you get a certificate at the end of the series, to submit to the teacher of the respective grades.

Prepare Your Home Now for Thanksgiving and the Holidays

Next week is Thanksgiving, and as you will doubtless have guests for the holiday, you will want your home to look its very best. If you shop at Barie's you will find many things that are inexpensive, but that will make the home more comfortable for winter.

New Draperies

Curtains of net, Marquisette or voile, with Damask, cretonne or mohair drapes, will give a touch of color to any room on the dreariest day. Many new lamps, both bridge style and table lamps, in bright colors.

Silverware

New nickel silverware in a complete line of pieces. Bread plates in oval, square or round shapes, some with handles, at \$2 up. Relish dishes with colored glass at \$3.50 up. Crumb trays at \$1.75 up. Salt and pepper shakers at \$1 up. Candlesticks at \$1.50 up. Ash trays at 89c up.

You will find a complete 32-piece porcelain set of dishes, open stock pattern, as low as \$6.25 for the set.

Why not have a new Axminster rug on the living room floor? Beautiful patterns in floral, Oriental designs—decidedly worth while values at \$38.50—\$60.00.

Armstrong's Quaker felt base rugs, that can be used in every room in your house, 9x12, at \$11.75.

Complete suites of furniture or odd pieces at moderate prices, quality furniture.
