CASS CITY CHRONICLE

VOL. 24, NO. 6.

CASS CITY, MICHIGAN, FRIDAY, AUGUST 31, 1928.

EIGHT PAGES.

SCHOOL OPENS HERE TUESDAY, SEPT. 4

Five of the 19 Members of Faculty Are New Instructors at Cass City.

Vacation days are nearly over for the faculty and students of the Cass City schools for regular sessions will begin next Tuesday morning, Sept. 4. Pupils entering high school are urged to visit the office of Supt. H. W. Holmes or Principal J. Ivan Niergarth on Saturday, Sept. 1, or Monday, Sept. 3, and choose a course of study and arrange their work.

The high school offers four courses: agricultural, academic, commercial and home economics. The faculty of the school and the

subjects taught are: H. W. Holmes, superintendent, mathematics; J. Ivan Niergarth, principal, science; Amy Boone, mathematics; Louise Watrous, foreign languages; James Lewis, junior high and coaching; Bertha Van-Eldik, English and junior high; Geraldine Dykhuizen, public speaking and English; Esther Tarnoski, home economics; Grace Beach, commercial; Willis Campbell, agriculture; Elynore Bigelow, music and art; Trena Ellenbaas, sixth grade; Goldie Wilson, fifth grade; Mary Holcomb, fourth grade; Margaret Wallace, third grade; Dorothy Lewis, second grade; Lulu Barton, first grade; Zora Day, kindergarten.

Miss Alison Spence has found it structor in public speaking and junior nigh because of ill health and another teacher has been secured to fill this vacancy.

For several years the Cass City high school has been on the University list, and in March this school was placed on the approved list of secondary schools at a meeting of the North Central Association of Colleges and Secondary Schools. This will permit graduates from the local high school to enter all universities and colleges of the North Central states (about 22 states in the group) without examination. The standards required for high schools to qualify for and David Knight; Sr. bull calf, the North Central list are quite rigid regarding the school building and its equipment, libraries and laboratories, school records, requirements for graduation and efficiency of instruction. All teachers of academic subjects in the high school must hold degrees.

SLEEPER HEADS WOODWORTH CLUB

In response to the call issued from Pigeon about 50 republicans of note Alex Ross; males, Claude Mitchell and influence in their townships and and Clarence Bullock. in the courth - 21 Bad Axe to organize a Fred Woodworth club for Lieut. Governor. Every section of the county was pretty Reagh well represented.

Mexico is practically powerless as the Agricultural Department at Cass City High School Where military rule and a troop is gar-Youths Are Taught Art of Farming and Rearing Live Stock risoned in each town. The band here is certainly a fin-

company numbering about thirty. All of course are mounted, being in reality a branch of the 12th Cavalry. We have rehearsals every morning and two concerts a week (open air) and we also play for retreat each evening and for guard mount and special drills and parades.

The weather here is ideal as there is a steady gulf breeze blowing. We are twenty miles from the gulf. The horse coral here is a grand sight. Even the medical men have their horses. All of them are finely built and young as a horse for parade must be flawless because the musician must concentrate on his music and not stop to spur his horse on. If one horse lags or gains step the formation is spoiled. All of the band horses are ared for by the Headquarters Troop. Will close at it is time for retreat.

After a resolution was passed to start a Woodworth club the organization was completed by the election of Hon. A. E. Sleeper as county FIRST MEETING OF YEAR president, J. J. Campbell, vice presi dent, Hon. Bela W. Jenks, treasurer, and S. H. Cochran as secretary manager.

Chas. Kercher in Army Band in Texas

Charles Kercher is in Fort Brown, Texas, where he is stationed as a Pinney. member of the 12th Cavalry Band of which he became a member just recently. Under date of Aug. 21, he suggestion or pay a fine. wrote his parents, Mr. and Mrs. E. W. Kercher, at Cass City, as follows:

Arrived here yesterday at 11:00 a. m. We left Chicago Friday at 4:00 p. m. and certainly had a fine trip. Most of the cotton here is ready to pick and it surely is a beautiful sight. The fort is located directly on the Rio Grande. The band hall is about two blocks from the International Bridge. Our town here of Brownsville is a short distance from the fort and about the size of Cass City. The fort is a beautiful sight in itself. The walks are all lined with large palms and orange trees.

Last night, I went across to Mexico (the town of Metamorous). From an agricultural standpoint, Mexico is fine. The cotton is nearly waist-high

and all crops are in abundance. over and no further plans to be in connection with it, the meeting was devoted entirely to matters of more direct interest to the farmers and merchants of interior towns-markets, roads, publicity for farm products and kindred subjects.

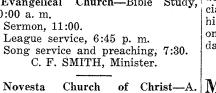

The report of the publicity commit-Pastor Returned | tee related in some detail the work that has already been done in securing publicity for farm products and urging the continuance of similar publicity. According to the committee, the Thumb Products banquet at Sandusky last winter was worth in publicity for our products more than \$100,000. The committee admits that this is only a guess as the actual value could not possibly be estimated. The publicity committee laid a great deal of stress on following up the Association's trunk line road program persistently and forcibly, claiming that the Thumb has not been getting its share of the funds. Quoting from the publicity committee's report, "A comparison of what has been done in the Thumb with what has been done on the West side of the state shows forcibly that we are not getting our share." It was also shown by this committee that they are now having pictures taken of farms, farm buildings and blooded stock in the Thumb. A number of herds have been photographed in Sanilac county. This week some of the Huron county herds are to be taken.

By unanimous vote of the meeting the road committee was instructed to prepare a telegram to Governor Green calling attention to roads that have been promised the Thumb this season and have not been let.

The telegram to the Governor was lispatched later in the day, calling attention to definite promises of the State Road Commission and requesting that these promises be kept.

The farm agents of all three counties, Huron, Sanilac and St. Clair, were at the meeting and took an ac-Turn to page 5.

Fall Home Furnishings

Now is the time to begin planning the furnishings for your home for Fall. Everything will be found here to please both your taste and your pocketbook.

For Your Windows

Tontine—the Washable Shade Cloth

Washable Tontine, the most beautiful and durable shade cloth now made, is as cleanable as your window. It is the only shade cloth that can be washed with plain soap and water whenever necessary. Tontine is not an experiment. It's complete superiority has been proven by years of service in many fine hotels, hospitals, business buildings and private homes. It is endorsed by leading architects everywhere. Dupont methods give it exceptional strength and lasting vitality. Exposure does not harm. Its finish does not crack or flake off. Tontine comes in a pleasant variety of cool and warm tones. Ask to see it.—Third Floor.

Millions of Families Depend on Dr. Caldwell's Prescription

When Dr. Caldwell started to practice medicine, back in 1875, the needs for a laxative were not as great as they are today. People lived normal, quiet lives, ate plain, wholesome food, and got plenty of fresh air and sunshine. But even that early there were drastic physics and purges for the relief of constipation which Dr. Caldwell did not believe were good for human bengs to put into their system. So he wrote a prescription for a laxa-tive to be used by his patients.

The prescription for constipation that he used early in his practice, and which he put in drug stores in 1892 under the name of Dr. Caldwell's Syrup Pepsin, is a liquid vegetable remedy, intended- for women, children and elderly people, and they need just such a mild, safe, gentle bowel stimulant as Syrup Pepsin.

Under successful management this prescription has proven its worth and is now the largest selling liquid laxative in the world. The fact that millions of bottles are used a year proves that it has won the confidence of people who needed it to get re-lief from headaches, biliousness, flatulence, indigestion, loss of appe-tite and sleep, had breath, dyspepsia, colds out formation colds and fevers.

Millions of families are now never without Dr. Caldwell's Syrup Pepsin, and if you will once start using it you will also always have a bottle handy for emergencies.

Calawille mo AT AGE 83

It is particularly pleasing to know that the most of it is bought by mothers for themselves and the chil-dren, though Syrup Pepsin is just as valuable for elderly people. All drug stores have the generous he drug stores have the generous bob-

New high pressure fueling ··· and New high speed carburetion

Supplementing the amazing abilities of Buick's improved Valve-in-Head engine -providing brilliant new efficiency and effectiveness at all engine speeds - are two wonderful new Silver Anniversary Buick features.

A new high-pressure gas pump-completely eliminating the old-fashioned vacuum tank-assures a steady flow of fuel under all driving conditions; and a new high-speed carburetor-the most expensive employed on any motor carproduces unrivaled ease of starting, smooth operation and maximum economy.

The world-famous Buick Valve-in-Head engine-with these two engineering advancements-attains the highest degree of efficiency of any automobile engine of the day . . . and attains that peak efficiency with any grade of fuellow-test, high-test or in-between!

Hair-trigger acceleration! Dazzling new swiftness! Matchless hill-climbing-unrivaled ability to maintain a high pace hour after hour and day after day-these are not mere phrases but definite, authentic abilities of the Silver Anniversary Buick.

Take this new Buick out on the highway. Test it to the limit. Learn at the wheel the whole wonderful story of its new engine - new high-pressure fueling and new high-speed carburetion. Prove to yourself-it's the great car of the world!

LABOR DAY IDEALS.

Nearly half a century has passed since Labor Day was first observed. In the days when this holiday was first celebrated, the wage-earners occupied a very inferior position. They could not obtain what was fairiv due them. They worked for very low pay, they toiled long and exhausting hours. Their working places were often unhealthy, they lived largely in poverty.

Today their situation has been greatly improved. Their hours of labor have become normal in most instances, working places have been vastly improved, their homes are very much better, they commonly have comforts that were never dreamed of in the days of our grandfathers.

Back in the old days it seemed to need a good deal of aggressiveness to obtain what could fairly be considered their rights. Many bitter labor conflicts were inevitable. But today the situation has changed. For every dollar they gain by fighting their employers, they usually lose many dollars through lack of co-operation.

Prosperity is obtained today by a harmonious union of all forces to make production efficient and economical, so that prices can be kept down, and so that prosperous employers can afford to pay good wages. There still may be extreme cases where labor troubles are inevitable. Where either party is unreasonable, trouble will develop.

But strikes are in the field of industry, about the same as wars in international relations. Wars may sometimes be necessary, yet the

Otto Klinkman, S. G. Benkelman, W. R. Kaiser and Andrew Seeger returned Wednesday from a week's visit at Lancaster, New Yerk. They attended a home coming while there.

> Jewish Lamentation There are various lamentations made at the wailing walls in Jerusalem. Many prayers were arranged by R. Samuel in the Eighteenth century appropriate for use on entering Jerusalem. A devout alien Jew is accus tomed to rend his garment, reciting

> the tenth verse of the forty-fourth chapter of Isaiah. Favorite lamenta tions are those of the fourth and fifth chapters of Jeremiah, also the sev enteenth verse of the first chapter.

Hearing in Adult Life The startling statement has been made by medical authorities that the majority of adults over thirty-five years of age go through the rest of

their lives with impaired hearing.

Cosmopolitan Colony During the Eighteenth century, Pennsylvania was a refuge for European immigrants. No other colony had so many different races and religions:

BAD AUTO ACCIDENT WEST OF GREENLEAF

(Minden Herald)

Thursday afternoon, Aug. 23, about two o'clock as Mr. and Mrs. James Thompson and two sons were driving west of New Greenleaf, their car was struck by a new Buick roaster. They were on their way to the Caro fair and a few rods east of M-53 when a car driven by Guy Flannery

of Bad Axe attempted to pass them going' in the same direction. The Buick was travelling at a fast rate of speed, and the driver seemed to lose

world has about reached the conclu sion that all parties in a war lose. It is much the same in the industrial field. People who discuss Labor Day should consider how the ideals of cooperation can be realized, and how employers and employes can work together for prosperity for all.

THE "KITCHEN VOTE"

One of the Republican slogans, is "a picture of Hoover in every kit-They are after the "kitchen chen. vote." The Democrats will be after it too. Any political party or candidate that gets the kitchen vote will be likely to win.

The women will do a lot of thinking in their kitchens, as they dress up the meats and cook the pies. Those hours are a good time for thinking about politics.

The kitchen vote will come nearer settling this election than the parlor vote. The women who spend too much time in society life, will have their political influence, and many of them are very intelligent. But the great majority of American married women are workers in their kitchens, and they spend a great deal of money to provide the supplies that are used in those kitchens. If the economic conditions in the country interfere with the activities of the kitchen, the ballot boxes will feel the reaction on November 6.

Valuable Lichens

Several species of lichens are of economic importance, yielding dyes and foodstuffs. Iceland moss is edible, yielding a nutritious jelly. Reindeer moss is the principal food of the Lapland reindeer in the winter. Archil, a violet dye, is obtained from Roccella tinctoria, Roccella fucifornis and Lecanora tartarea. Litmus, also a dyestuff, is obtained from these lichens by exposure to the air in the presence of ammonia, potassium carbonate, etc.

Wires and Lightning

The bureau of standards says that the presence of overhead wires at the usual heights from the ground are not known to affect the severity of a lightning storm, or to alter the point at which a stroke takes place; but such wires may receive a discharge which in their absence would strike some other object in the vicinity.

Caruso Cat Cured Mary had a Thomas cat That warbled like Caruso. A neighbor hit him with a baseball

PAGE EIGHT.

These two groups included 45 per cent of all the cows in the association herds. For the 300-pound group the feed cost was \$80.86 for the year, the total cost of upkeep was \$150.11, the value of the product was \$194.33.

In all groups the cost of feed and the total upkeep cost rose with the increased production, but the value of noise may be present before the listhe product rose more rapidly than these factors, with the result that the more money spent on feed and upkeep returned a greater proportional net profit at the end of the year.

Ten Feeding Hints

1. Good roughages lower the cost of producing milk-feed all the cow will clean up, part of it being legume hay. 2. Include silage, beets, or beet pulp. The cows need the succulence and will produce milk cheaper on account of it. 3. Feed a balanced ration with plen-

tv of variety. 4. Feed grain according to produc-

tion: 1 pound of grain to 3 pounds of milk for Jerseys and Guernseys; 1 pound to 4 for Holsteins and Ayshires. 5. When pastures are short, feed grain; a 12 to 16 per cent protein mix will be satisfactory.

6. Soilage crops or silage helps fill the pail during short pastures.

7. Milk is 87 per cent water-see that the cows have plenty of it at all times.

8. Cows need salt-one or two pounds per hundredweight in the ration is sufficient.

- 9. Study your cows' likes and dislikes and cater to them when possible.

10. Know your feeds-the cheapest are not always the most economical.---C. B. Bender, in Farm Life.

Too Rich Cream

There are no advantages in producing a cream testing higher than 45 per cent. Too rich cream is undesirable because it tends to clog the separator; it increases the loss in handling due to sticking to the receptacles; it makes difficult accurate sampling and thereby tends to yield incorrect tests. It is desirable to produce somewhat richer cream in summer than in winter to prevent excessive souring in summer and difficult handling in winter.

3. It is well to be content with reasonable volume. While it is true that the volume control of the radio set increases or decreases everything issuing from the loudspeaker-static as well as signal-proportionately, it is a matter of how much background tener becomes fully conscious and even irritated by its presence. By being satisfied with reasonable volume during the days of high static, we may reduce the background noise to a minimum. The power of transmitters is not reduced during the summer months. Hence in most localities there is ample signal strength from leading stations to ride well above the usual summer static, with the exception of the occasional thunderstorm in the immediate neighborhood. Yet who

expects idea: radio conditions every night? Try driving your automobile through a thunderstorm at night, with the dazzling flashes of lightning, the torrential downpour of rain, with the ignition system in difficulties due to moisture, and other troubles! Still, we do not speak of summertime automobile handicaps. We are willing to forego motoring during the occasional

storm of winter or summer.

Quality Programs Programs are maintained at the highest standards, although in keeping with seasonable moods and activities of outdoor weather, they may be pleasantly different from those of indoor, weather. The skilled program director, in fact, pays close attention to the demands of his summertime audience.

As to the radio listener, there is just as much reason to listen in during the summer as during the winter. Music, enlightenment, contact with the world, the thrill of sporting events, participation in history in the making, and other program features form a rich mental background for our summer life.

If anything, radio may truly be enoyed to better advantage amid the outdoor setting made possible in warm weather. The acoustics are frequently better when windows can be thrown open. Radio is at its best outdoors, on the porch or even on the lawn. Indeed, too little attention has been paid to the stage setting for the radio presentation, and summertime offers us many an opportunity in this direction.

sulted from taking advantage of these ter hall. The bathroom is conveniently located. In addition to the floor The house is rather large, containing eight rooms, five of which are bedrooms on the second floor. Besides the three usual rooms on the first floor there is a large washroom, a good sized stair hall, a pantry, a breakfast nook off the kitchen and a back porch. The size of the home is 24 feet by 43 feet, exclusive of the porch pro-

jection. The porch is 10 feet deep and 20 feet long with a balcony built on a portion of the roof. It is a fourgable home of frame construction set on a concrete foundation. The floor plans show the arrangement of the rooms and their sizes. The living room is especially attractive, being 23 feet long and 13 feet wide with an open fireplace at one end. Each of the bedrooms is provided

Rigid Asbestos Roofing

conditions.

Durable and Fireproof Building authorities agree that the roofing material that gives permanent satisfaction in service year after year without costing one cent for maintenance is a cheaper roof, when figured on a cost-per-year basis, than one whose initial cost is considerably lower but which requires periodical painting or replacement. For a roof that demands attention and costly repairs quickly runs up maintenance bills that more than overshadow the cost of a first-cost-last-cost roof.

The first cost of rigid asbestos shingles is the last cost, for they never need paint or repairs and they actual-

ly toughen with age. Rigid asbestos shingles are a combination of asbestos rock fiber and portland cement formed under great hydraulic pressure. They can be easily applied by any carpenter or builder. The holes are already punched in each

Adequate Lighting

shingle.

The first essential in room comfort nowadays is the provision for a sufficient amount of light for all occasions and enough outlets to permit the attachment of occasional electric applithe modern dwelling.

plans an architect's cross-section of this home is reproduced which shows some of the details of construction and also specifes some of the materials that are to be used. This brief description, together with the floor plans, the cross-section and the exterior view of the home will give an idea of the several good feature, of this design. The house is not too large, yet exceptionally good use has been made of the room in it. The layout of the rooms on the first floor is such that the housekeeper can do her work without unnecessary labor. At the same time the rooms are of a size which will accommodate a good-sized family. The exterior of the house is one of which the owner will be proud. Metal Lath Facilitates Good Tile Work in Bath The decorative wonders of modern gladly. tile work are made possible at moderate cost today by the strength and workability of metal lath, which give a secure base for the cement tile bed

in any type of construction. Coves, arches and the soffits of dormers may be lined with tile by this means, as metal lath will conform itself to any interior surface, no matter how involved its angles and curves.

Built-in bath accessories are easily installed in the wall backed with metal lath, the cement bed holding them securely in place.

A new note in bathroom decoration, the placing of tub and lavatory partly or wholly in recesses of the correct size, is made much more easy of accomplishment with metal lath, since the recesses may easily be formed with great economy of space. Leftover space may be given to small closets, for cabinets, for bath linen. and other accessories.

Copper Nails

Nails made of hand-wrought copper, used in the construction of the old filtration plant of the Ludlow reservoir in Massachusetts in 1874, were ances at points desired. This is only discovered recently by workmen there. achieved in a home with adequate A press dispatch from Springfield wiring installation, more and more states that "the nails were almost coming to be accepted as standard in like new despite their half century of use."
