ANCIENT HISTORY

"Have you ever studied the history of ancient Rome?" "I have," answered Senator Sorghum. "And I am impressed by the disadvantage under which that classical old government labored, through lack of modern improvements. If ancient Rome had enjoyed conveniences of radio and gas filling stations, and other methods of quick communication, results might have been different."—Washington Star.

Great Liberty "You deny that republics are ungrateful?" "Emphatically," answered Senator Sorghum. "If anything, republics are too liberal. Every once in awhile some republic has made some historic personage a present of the entire country simply because he put up an able oration at the psychological moment."—Washington Star.

World's Largest Stones

In the ruins of the famous temple of the sun god, built by the Roman emperor, Antonius Pius, at Baalbeck, Syria, are the largest stones ever used. Some of the great stone blocks are more than sixty feet long and nearly twenty feet square on the end. The ruins still can be seen a few miles east of the modern city of Beirut.

Obeys Life's Rules

I do not bring many serious indictments against life; I have found it a rather kindly master. If I violate its rules, it is harsh with me, but when I obey them it is generous. WHY

Persistent Hiccups Should Be Treated

Everybody has a diaphragm. It is a great muscular structure between the chest and the abdomen. In breathing the diaphragm contracts and helps the lungs to expand. These contractions are controlled by a nerve which passes from the upper part of the spinal cord in the neck. If this nerve is irritated at any spot, says Dr. Morris Fishbein, editor of the Journal of the American Medical Association, it becomes stimulated and the stimulation causes a sudden spasmodic contraction of the diaphragm which we call hiccup. Among the many known causes of hiccups are overeating, bolting food, swallowing air which distends the stomach, etc. In babies the trouble is usually due to swallowing air and may be relieved by holding the baby over the shoulder and patting its back, causing it to expel the air. Slight attacks of the trouble (it is not a disease) may be relieved by sipping a little bit of cold water, swallowing a bit of ice, holding the breath for a few moments or sneezing a couple of times, the latter being induced by tickling the nose. Persistent hiccup, however, is dangerous and may lead to other serious troubles. In some cases the stimulation of the nerve is due to poisons from infections such as infantile paralysis and sleeping sickness. These cases may be severe and exist for long periods. Their treatment consists of treating the underlying cause.—Exchange.

Why Near-Sightedness Is Common Affliction

Near-sightedness, or myopia, a common eye complaint, is said to be due to the fact that man has not yet completely ceased being a fish. Many cases of myopia are said to be due to the fact that the eyes naturally diverge to the right and to the left instead of looking straight ahead. In trying to correct this and restore the parallelism of the vision of the two eyes, the muscles of the eye are subjected to a strain that produces near-sightedness. Many lower animals, such as insects and birds, have far keener sight than man. To the mosquito, a man appears to glow like a burning coal.

In our development from the lower species the eyes have gradually come to the front from their position at the side of the head, as in the fish, and with this has come a great improvement—parallel vision of both eyes. This gives us a triangulating mechanism by which we can judge distances.

Why Cats Have Nine Lives

The saying that a cat has nine lives is very old. It was proverbial long before Shakespeare's time. The idea was probably suggested by the fact that a cat is more tenacious of life than most other animals. Those who have undertaken to kill cats appreciate that fact. Attempts have been made to trace the origin of the common expression back to ancient Egypt. It is often said that Pasht, or Bastet, the cat-headed goddess of Egypt, had nine lives, and that this circumstance gave rise to the old saying about a cat having nine lives. But Egyptologists find no evidence for the statement. In fact, Bastet, being a goddess, would be regarded as immortal. Nine, however, was a favorite number in Egypt, as well as with other orientals, and it may have somehow been associated with the cat-headed goddess.—Exchange.

Why Banana Is Good Food

The banana has been found to lead all other food crops in the total production per acre and in fuel value per acre. A fair yield of wheat is estimated at 1,620 pounds per acre. In the banana it is 32,000 pounds per acre. And the comparative fuel values from an acre are 2,673,000 calories for wheat and 8,320,000 for bananas. Of rice, corn, white and sweet potatoes, the acre yield of sweet potatoes, with 6,160,000 calories, approaches closest to the banana. Of the fruits, the banana is much the richest in protein, having approximately four and one-half times as large a proportion as the apple and nearly five times the pineapple.

Why Frost Degrees Vary

The weather bureau says that frost forms only when the temperature of the object on which it occurs, and the immediately adjacent air, is at or below the freezing point, 32 degrees Fahrenheit. The temperature of the grass, for instance, especially in low spots, and on still, clear nights, may be 32 degrees Fahrenheit, or lower, while that of the air a little distance away, and 20 to 30 feet higher, may be 40 degrees Fahrenheit, or over. This explains the anomaly of frost at 40 degrees Fahrenheit. It was 40 degrees Fahrenheit, say, where the thermometer was, but not where the frost was.

Why Wheels Are Varied

The development of the practice of making the front wheels of a coach or wagon smaller than the rear wheels is due to the fact that a wagon so constructed is easier to steer or guide. Such a wagon will turn corners much more readily than if all the wheels are of equal size.

Why "Yellowstone" Park

The Yellowstone National park takes its name from the Yellowstone river. The river was originally so called because of the yellowish appearance of the rock strata along its course.

UNION MEMORIAL SERVICE HELD SUNDAY

Concluded from first page. fail to outlaw and abolish it henceforth.

"This is the first Memorial Sunday since the end of the World War on which we can say to our dead that the greatest goal for which they died has hopes of being realized. The Paris Pact for the Renunciation of war, signed last August by fifteen nations, has now been ratified by nearly every other country in the world. By condemning recourse to war for the solution of international controversies and agreeing to use only pacific means for the settlement of all disputes, whatever their nature or origin may be, a revolutionary step has been taken. Henceforth, militarism which clings to the method of force to preserve peace, is disloyal and out-of-date, while Christian pacifism is the finest patriotism. The recent assistance rendered the disabled German airship by the French government shows how much more effective is a little friendly service and neighborly spirit of helpfulness for the preservation of peace than all the billions spent in war preparedness.

"It is amazing how many influential Americans are still blind to this fact. This includes professional militarists and their proteges—the few surviving isolationists in the Senate, the officers of most of the so-called patriotic organizations, and those conducting the citizen's military training camps and military courses in colleges and universities. They justify their activities on the ground that war is inevitable and cannot be abolished.

"But the spirit of Christ assures us that war is not inevitable. It is only a man-made evil like slavery, polygamy and idolatry. And what man has made under the spell of the devil, man can abolish by the power of God! To this end they died. Are we keeping faith with them?"

UPPER THUMB MEET AT BAD AXE JUNE 14

The second annual Upper Thumb Association track and field meet will be held at Bad Axe on Friday, June 14, with the following events on the program: 100 yard dash, 220 yard dash, 440 yard dash, 880 yard dash, mile run, 1/2 mile relay, 120 yard low hurdles, pole vault, shot put, high jump, discus throw, broad jump and javelin.

The two teams having the highest percentage will play for the Upper Thumb championship in baseball.

Wallace Parker, coach at Central State Teachers College at Mt. Pleasant, will handle the meet.

Maybe He Never Saw It

What a liar that man was! He said in his youth, innocence and ignorance, that if he ever lived to see the day of this and so he would die content. And here he is still hanging on and grimly, and that day is far in the past.

Feeling the Pulse

The pulse a doctor feels is not the actual bloodflow in the veins, but the wave sent along by the beat of the heart when fresh supplies are pumped into it. There are pulses at the wrists, ankles and temples.

Years of service in MODEL T FORDS

THE Model T was so strongly and sturdily built that it is still rendering reliable, economical service to motorists in every section of the country. Millions of these cars can be put in shape for two, three and five more years of use at very small cost.

So that you may have this work done economically and satisfactorily, the Ford Motor Company is still devoting a considerable section of its plants to the manufacture of Model T parts. It will continue to do so as long as they are needed by Model T owners. The following list gives the approximate labor charges for reconditioning the Model T Ford:—

Engine	
Tune motor (including replacement of commutator case, brush and vibrator points if necessary)	\$1.00
Grind valves and clean carbon	\$3.75 to 4.00
Overhaul carburetor	1.50
Reline detachable car transmission bands	1.50
Install new pistons or connecting rods	6.00
Tighten all main bearings	6.00
Overhaul motor and transmission	\$20.00 to 25.00
Rear System	
Replace rear axle assembly	2.50
Install universal joint	3.00
Reline brake shoes	1.50
Replace rear axle shaft, drive shaft pinion, or drive gear	5.00
Overhaul complete rear axle assembly	\$5.75 to 7.00
Rebush spring and perches	1.75
Oil and graphite springs	3.00
Front System	
Overhaul front axle	\$4.00 to 5.00
Rebush spindle bodies and arms (both sides)	2.50
Replace or straighten spindle connecting rod	.75
Tighten radius rod or steering ball cap	.60
Tighten all sockets and joints of front end	1.50
Replace front spring tie bolt or new leaf	2.50
Straighten front axle	3.00
Chassis	
Replace rear fender	1.75
Overhaul steering gear	3.50
Repair muffler	1.00
Overhaul radiator	7.50
Repair Coupe	25.00
Repair Sedan	25.00
Repair Touring Car	20.00
Reupholster Runabout	8.00
Reupholster Touring Car	15.00
Replace top deck (Coupe or Sedan)	4.00
Overhaul starting motor	3.00
Overhaul generator	2.60

These prices are approximate and are for labor only, because the need and number of new parts depend on the condition of each car. The charge for these parts is low, however, because of the established Ford policy of manufacturing and selling at a small margin of profit.

The DAIRY

GARLIC FLAVORED MILK NOT WANTED

Precautions Needed to Keep Cows Away From Plant.

Garlic may have its place in the dietary, but that place does not include the milk supply. Most consumers, in fact, object seriously to milk tainted with its noisome odor and, ordinarily, only a few bottles of it need be left at their door to cause them to change dealers.

Because of this, the dairy department of the New Jersey agricultural experiment station, New Brunswick, has suggested that dairymen take special pains to keep their cattle from indulging in the pernicious weed which causes the trouble. It has been found that even a very little partaking of this member of the onion family will become evident in the milk given by the cow shortly afterwards. Where milk purifiers are available to the milk distributor it is possible to remove much of the garlic aroma, but since such devices are not in universal use, various precautions are needed to keep the cows from the garlic plant. This is especially difficult in the spring just after the herds are turned out to pasture.

One method of circumventing the difficulty is to turn the young stock out on pasture at least two weeks ahead of the milking herd. In this way the young animals eat off the weeds. When the milking herd does finally go to pasture it should be returned to the barn about noon every day for a few days and given a liberal feeding of hay. Several days may pass before it is safe to turn the herd out at night. After that the garlic has become more or less stunted in growth and the animals have lost their first tendency to eat everything that is green. In other words, they seem to become more particular in their eating.

Milk Powder for Calves

Tried in Various Ways

Many dairymen have tried in various ways to make use of skim-milk powder in calf feeding. Maurice Baird, connected with Ohio State university, who has charge of a number of dairy calves now on feed, outlines this method:

Use whole milk until the calf is two months old. This should be followed by a dry feed mixture, 300 pounds each, corn and cob meal, and ground oats bran, and 100 pounds oil meal. Two to three pounds of this mixture is fed daily. Skim-milk powder is added to the feed so the calf will receive one and one-half pounds of the mixture. Feeding is made at morning and evening periods. The skim-milk powder is omitted when the calf reaches nine months. Mixed hay and a pound of dried beet pulp are used, and plenty of water is available at all times. Silage may be used, replacing the beet pulp. Plenty of salt is supplied. Clean stalls at all times, and these stalls when cleaned should be sprinkled with lime, after which a plentiful supply of bedding is applied.

"The eye of the master fatteneth his flock," is always a part of the scheme of animal feeding. Experiments with skim-milk powder diluted in water have caused calves to get off feed, and have affected digestion. Skim-milk powder is well supplied with minerals needed by the calves. The cost of feeding and raising a heifer is so great that only good stock should be considered. Stock from disease-free herds, kept and raised under sanitary conditions, is the most desirable.

Supplement Grass With Efficient Grain Feeds

The dairy farmer loses a great deal of money through turning milk cows out on pasture during the spring and summer months and not supplementing the grass with grain. True, the milk flow is very often stimulated to a marked degree as soon as the animals are turned out, but at a loss of body weight. Spring pasture is relatively high in protein and consequently we are interested in feeding a grain mixture that will keep the cows in good flesh and at the same time maintain their production. In this case a ration testing about 12 per cent protein should be used.

During the late summer when the pastures are poor the protein of the grain mixture should be raised to about 16 per cent and silage can be added to supply the cow with succulence.

It is practically impossible to bring a cow back to high production in the fall when she has not been grazed during the summer months.

Feed for Calves

Give the calves access to the hay and fodder, allowing them to eat as much as they want. A grain mixture of half-ground corn and oats would be satisfactory. Oats and barley give a little too much crude fiber for the young calf. Feed the grain dry and until about four months old give them as much as they will eat up clean. From that age on limit the amount to not over three pounds per calf daily. Give water as soon as they seem to want it.

In 5 MILLION HOMES TONIGHT

A host of babies will enjoy sound sleep tonight. And their parents will have unbroken rest. Castoria is the cause of this contentment in a multitude of homes.

Good old Castoria! Children cry for it. Mothers swear by it. Not a household where there is an infant should ever be without it.

Now you know why trained nurses give Castoria as often as an infant is ailing, or even restless. And why doctors tell mothers it is the first and only home remedy when Baby has constipation, colic, diarrhea, or other upset.

Fletcher's Castoria is "old-fashioned" if you count its fifty years, but it's an old-fashioned mother, nowadays, who worries along without it.

Children Cry for Fletcher's CASTORIA

DR. CALDWELL'S THREE RULES

Dr. Caldwell watched the results of constipation for 47 years, and believed that no matter how careful people are of their health, diet and exercise, constipation will occur from time to time.

DR. CALDWELL'S THREE RULES

The Doctor never did approve of drastic physics and purges. He did not believe they were good for human beings to put into their system. Use Syrup Pepsin for yourself and members of the family in constipation, biliousness, sour and crampy stomach, bad breath, no appetite, headaches, and to break up fevers and colds.

Get a bottle today, at any drugstore and observe these three rules of health: Keep the head cool, the feet warm, the bowels open. For a free trial bottle, just write "Syrup Pepsin," Dept. BB, Monticello, Illinois.

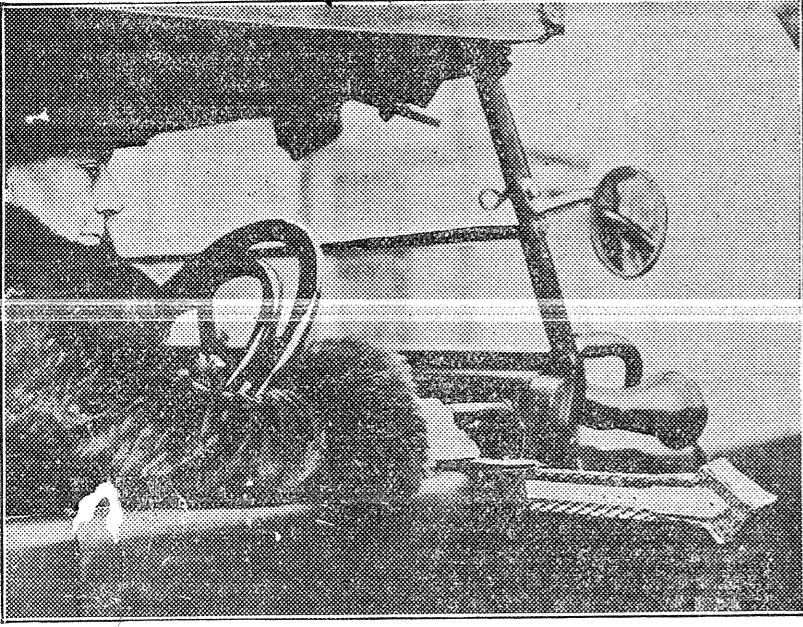

Roy Rolston is working for Sam Soule at Tyre at present. Mrs. Bert Girmus spent Saturday with her mother at New Greenleaf. Stanley Jackson drives a new car. Arthur Ballard is reported on the sick list, but is improving. The scarlet fever patients have been released from quarantine. Dan Powell of Argyle is the new Raleigh man who will represent four townships, Greenleaf being one of the number. Rev. and Mrs. Roberts called on friends Wednesday and making the acquaintance of their parishioners here. Mr. and Mrs. Klinkman moved last week to their farm south of town. Wm. Wilkinson was a business caller at Port Huron last week. Geo. Patrick is visiting relatives in town for a few weeks. A nice time was enjoyed by pupils and parents the last day of school in the Tanner District.

MANY KILLED IN AUTO ACCIDENTS

Total of 27,500 Fatalities Reported in Various States of Union.

Approximately 27,500 persons were killed in motor vehicle accidents in the United States during 1928, it is indicated by a nation-wide survey which includes figures from all but three states.

This toll of life is more than 7 per cent greater than the number who met death in motor vehicle accidents in 1927. If a similar increase should be reported this year, it would mean the death of almost 30,000 persons.

With approximately 25,000,000 motor vehicles registered in the country at the close of last year, a fatality toll of approximately 27,500 means the death of one person for approximately every 900 cars. On an average, also, 75 persons were killed in motor vehicle accidents during each day of last year, or about 530 each week.

In 1927, according to the United States Department of Commerce, the total number of persons killed in motor vehicle accidents, including deaths caused by collision of motor vehicles with trains and street cars, was 25,533. Applying the 1928 increase of 7.36 per cent, as shown by the figures in 45 states and the District of Columbia, it is seen that the fatality record for 1928 is approximately 27,500.

The complete tabulation as reported follows:

Table with columns: State, 1927, 1928, Percent Change. Lists states from Arizona to Wyoming with corresponding fatality counts and percentage changes.

Footnotes: * Excludes collision of all heavier vehicles, including trains and street cars. (-) Excludes collision of motor vehicles with trains and street cars.

In addition to the states where motorcycles are involved, all other figures, except where otherwise specified, include collision with all heavier vehicles.

Proper Care of Filter Results in Big Saving

Statistics show that the oil filter saves the motorist \$29 a year in oil alone, besides reducing wear on the car, according to W. S. Isherwood of Flint, Mich., an authority on the subject.

In the old days before the oil filter he says, oil had to be changed every 500 miles. Now the manufacturers recommend changing oil from 1,000 to 3,000 miles. This recommendation is based upon the use of the oil filter and that it be renewed every 10,000 miles, because after this mileage the filtering unit becomes filled with the foreign matter taken from the oil and needs to be renewed.

CITES SUPERIORITY OF S. E. MICHIGAN

Concluded from first page. Its limitless transportation facilities both by water and rail; its proximity to the population center of the United States; its close juxtaposition to the rich natural resources of Canada; assure it of incomparable superiority as a tourist mecca, industrial center and one of the nation's beauty spots.

Mr. Barrett was introduced by Louis A. Weil of Port Huron, who served as toastmaster at the banquet. Mr. Weil complimented Cass City on its new high school, stating that the building and its equipment compared favorably with the high schools in many of the cities of the state.

Robt. Warner, president of the Cass City Community Club, welcomed the Thumb of Michigan Association to Cass City, and Thos. N. Graham of Peck responded. Rev. C. E. Carpenter of Bad Axe delivered the invocation.

Lester G. Albertson of Port Hope, president of the association, in opening the banquet session, introduced well known guests. Among these were Chas. E. Wagner, Thos. King and J. L. Bickley, Grand Trunk Railway officials; Frank Kinch of Port Austin, Huron county master farmer; N. K. P'Sachos, Detroit real estate man; Gus A. Braun of Elkton, Huron county representative; S. A. Graham, a Port Huron bank president; John A. Anderson, manager of the Hotel Harrington at Port Huron; Paul Woodworth and C. D. Thompson, Bad Axe attorneys.

Mr. Albertson presented Mrs. Robert W. Ryan of Brown City with \$10.00, the prize for writing the best Thumb of Michigan song. This selection was sung by the audience under the leadership of Rev. Wm. Curtis of Cass City.

Cass City furnished three groups of musical numbers which added much excellence to the evening's program. The high school orchestra, directed by Miss Esther Tarnoski, played selections during the dinner.

The high school girls' sextet with Miss Eleanor Bigelow as director sang three numbers, "The World is Waiting for the Sunrise," "Around a Gypsy Fire," and "Avalon Town." Guy W. Landon gave two bass solos, "The Bedouin Love Song" and "Give a Man a Horse He Can Ride." Mrs. I. D. McCoy played his piano accompaniments.

Ed. Charlevoix presented the report of the resolutions committee, thanking M. B. Auten, chairman of the preparations committee, Cass City musicians for their part in the program, the ladies who prepared the meal and the men who served it, and Mrs. Robert W. Ryan, author of the Thumb of Michigan song.

The banquet tables neatly arranged in the large auditorium of the high school building made an attractive scene with the beautiful bouquets of tulips and apple blossoms. Members of the Ladies' Aid Societies of the M. E., Presbyterian, Baptist and Evangelical churches combined forces and prepared one of the most excellent banquets ever supplied in Cass City. It was served by 25 members of the Cass City Community Club under the direction of Walter Mann.

While the banquet and program of the evening fulfilled the wish and anticipation of its audience, the small attendance from outside points was a great disappointment. The ladies were told to prepare for a company of three hundred, 250 of whom were to come from out of town. Only 119 were present at the banquet, nearly half of this number being from Cass City.

About 40 persons attended the business session in the afternoon. Towns represented included Bad Axe, Yale, Minden City, Port Huron, Port Austin, Port Hope and Cass City. Road construction in the Thumb was discussed and the question of employing an executive director to handle and have charge of obtaining memberships was referred to the executive committee. Ross L. Mahon, publicity committee chairman, stated that a new 12-page pamphlet will soon be ready for distribution. This will include considerable agricultural and industrial information as well as resort enlightenment regarding the Thumb of Michigan. A balance of \$1,648.05 was reported in the treasury of the association.

FAREWELL FOR REV. AND MRS. SMITH

Concluded from first page by large congregations and the work of the church has been carried on successfully under his direction. During the past few years, he has conducted classes of Bible study, as prepared by the state department, in the public school here and his effort in this has been greatly appreciated by his pupils.

New Pastor Here.

Rev. Chas. W. Lyman, the new pastor, arrived here Tuesday with Mrs. Lyman. Mr. Lyman has been in the ministry for 35 years, 20 of which have been in the Evangelical church. Previous to his entry into ministerial work, he was engaged in editorial work, being employed as a special writer for the Chicago Inter-Ocean in southern states.

For the past year, Mr. Lyman has served as pastor at Brown City. In its last number, the Brown City Banner says:

"In Rev. Lyman, the Brown City Evangelical church has had a scholarly, eloquent preacher and the town

has had the privilege of knowing a distinguished man. He and Mrs. Lyman have made many friends in their brief sojourn here, who will bid them good bye with a deep feeling of regret."

POTATO CLUB REORGANIZES.

The Watertown Potato Club met Tuesday evening, May 21, at the Tubbs school, to reorganize for the coming year. Last year was the first year in club work for this club and the club won the cup at the Thumb of Michigan Potato Show, also third as a club at the State Show at Michigan State College during Farmers' Week, and Josephine Fowler was junior state champion in potato club work.

The club unanimously elected Lee Fowler as local leader for the coming year. Tasks to be performed by the club were given to the club by D. B. Jewell, county agricultural agent, and by Willis Campbell, the leader of the Cass City Livestock Club.—Contributed.

GAGETOWN.

Due to an unintentional error, the names of two Gageton high school juniors, Clayton Beach and Kenneth Butler, were omitted from the cast of the junior play, "A College Town." The former "Sand R" or "Strength and Resistance" typifies an engineering student, while the latter nicknamed "The Judge" represents the dignity of the law department.

Scaling Down the Overhead

It used to be said that whenever a Scotsman got to London he never went back home—except to fetch his brother. That notion is 'out of date, according to Lord Dewar, who remarked recently, "There are not nearly so many Scotsmen traveling down to London as there used to be. They get born in London nowadays to save the fare."

Lure of Gold

Twice as many married women work in the United States now as 35 years ago.

Elephantine Personality

Personality has its place in the animal kingdom just as in the human family. The hyena is a sneak. The lion is a slugger, a poser. The leopard is a cat. The monkeys and apes are buffoons. The elephant is every-thing.—Farm and Fireside.

Suspicious Change

"You can't slight a man twenty-five years," says a philosopher in the American Magazine, "and then decide to turn over a new leaf and greet him like a brother. You may mean to be friendly but the other man will suspect your motives."
