Largest of Bear Species

The great Kodiak bear, native of Kodiak island, Alaska, is the largest in the world.

RATION COW NEEDS DURING MILK PERIOD

Matter of High Importance in Milk Production.

It has been demonstrated repeatedly that it does not pay to have a cairy cow freshen in low condition. She may produce less than 70 per cent as much milk as she would produce had she freshened in good condition. This fact has led dairymen to say that their most profitable feeding is done during the dry period.

The cow's own physical condition dry period. If in good flesh, she will carry along all right on legume hay and silage or pasture and a small amount of feed. The ration should Cass City, Thursday evening at eight be light and laxative. If you have a good quality of legume hay, a ration made up targely of corn and oats or barley and oats will be satisfactory. A mixture for a ration might contain 400 pounds of corn or corn and cob-10:30. Meditation on the importance meal, 200 pounds of oats, 100 pounds of wheat, 100 pounds of wheat bran, 100 pounds of linseed meal, oilmeal or soybean oilmeal. Where only poor roughage such as timothy hay, oat straw or corn fodder is available it is advisable to increase the oilmeal or soybean oilmeal by 50 per

It is especially important to take good care of the cow at calving time. Confine her to a good clean box stall about a week before freshening. change the ration so that it is very light and laxative. This may mean withholding corn and feeding only oats, wheat bran and oilmeal, Per mit the cow to take exercise in a pasture or in the yard. Soon after the calf is dropped the cow should be tied up. In this way the dairyman will observe whether or not the afterbirth is delivered. If the afterbirth is not delivered normally and within twelve or twenty-four hours, the cow may need some medical attention .-Wisconsin Farmer.

Doesn't Pay to Neglect

Early-Freshening Cow

The cow that freshens in the early fall is apt to have a hard time of it She comes into production at a time when the farmer is rushing around with silo filling and late threshings followed by fall plow and root harvest. There is a very natural tendency to get through with as little chores as possible and cows are usually bred to come in after the rush is over. If a cow does freshen, she takes the same treatment as the rest of the herd. As a matter of fact, she is usually considered a nuisance. But this is the time when milk comes easiest and a feed and care. The fresh cow now should get a proper grain ration, fed in proportion to production. She should get frosty. If she is milking in excess of 50 lbs. milk daily she will respond profitable to three-times-a-day milking. If she is not properly fed and regularly milked, she will be a poorer cow right through the lactation period.

Wheat in Dairy Ration

Wheat proved a better grain than corn in a ration for milk cows in an experiment conducted recently at the Ohio experiment station. In view of the bumper crop of this grain in Ohio this year these results are of interest to Ohio dairymen who are looking to feeding wheat this winter. The grain ration for these cows consisted of three parts wheat, three parts oats and one part each of corn, bran and linseed meal, which was fed along with silage and hay. In comparison with cows fed this ration except that corn replaced wheat these cows produced more milk and butterfat but the cows on corn gained a little more in weight. Four cows on the wheat ration averaged 50 pounds of butterfat a month while those on corn averaged 48 pounds .- Ohio Farmer.

DAIRY HINTS

A milk house is a great aid to effi-

The national dairy exposition will be held October 10 to 18 at St. Louis.

If whole milk is sold, it should be strained as soon as drawn and then

Accredited herd work has grown in California. Last year a total of 25,-074 animals in 341 herds were tuberculin tested for accreditation in that

Cream should be separated at once, if it is the product sold, and then cooled promptly.

In Wisconsin and Minnesota, 54 and 49 per cent, respectively, of cows in herd improvement associations are fed grain with pasture.

That churning butter is still a farming occupation in the United States is shown by the fact that 500.000.000 pounds of butter was made on farms last year.

OUTWARD WHIRLPOOL LATEST SEA ODDITY

Many Mysteries of Ocean Are Still Unexplained.

Washington.-Discovery of an outward spinning whirlpool in the Atlanthe coast and geodetic survey. While charting the Georges banks, 150 miles east Cape Cod, the survey vessel Hydrographer encountered the strange whirlpool, which was strong enough to throw the vessel off its course. The cause of the phenomenon is unknown, but further investigation will be made. If differs from other whirlpools known to navigators in that it spins outward instead of toward its

Constantly Playing Tricks. "An outward spinning whirlpool is another oddity added to the long list of unexplained mysteries of the sea,' says a bulletin from the National Geographic society. "It is half in jest and half in awe that old tars refer to the bounding main as 'that old devil sea.' In olden days the sea was be lieved to be peopled with strange monsters which devoured both ships and men. Even today, with all the safeguards and comforts of modern travel, a ship voyage is not without its hazards. Mother ocean constantly plays new and unexpected tricks because man's knowledge of the sea, for all his centuries of study and experience, is extremely meager.

"Explorers and geographers who have been sighing for new lands to conquer may find their best field, paradoxically, in the sea. When it is realized that nearly three-quarters of the surface of the globe consists of water, it is rather remarkable how little we know of the vast surface of the solid sphere which lies under this screen of liquid.

"Little wonder, then that man marvels at how much has been learned about the seas, the while he realizes that what he knows is much less than the proverbial drop in the bucket as compared with what remains a mys-

"The most impressive thing about the set is its shallowness as compared with the size of the earth, and its depth as compared with the height of the land. If one were to take a globe six feet in diameter and excavate the deepest trench of the ocean thereon, it would be a bare pin-scratch deepabout one-twentieth of an inch.

Storm's "Advance Agents." "Among the sea's unexplained mysteries are the origin and actions of storm waves, commonest of nautical phenomena. Often storm waves travel much faster than the storm itself, meaning the storm as a whole, and sometimes they break with great force on a short-line where conditions othwise are very quiet and serene.

"There is a curious superstition, varying in various parts of the world, that every seventh, or every ninth, or every tenth wave is larger than the ones that precede it. Writers often take advantage of this belief, not supported by scientists, to illustrate definite periods or sequences in ideas or

"Much is still to be learned about the vagaries of ocean currents. Vessels and debris caught in these natural sea lanes often play uncanny tricks."

Monument Cleaning

Begun Again in Rome

Rome, Italy.—The municipality of Rome has started the customary annual cleaning of the monuments and antiquities of the city from the plague of weeds which infests them. Weeds grow with extraordinary fertility in the cracks and crannies of the obelisks, statues and church facades here. As soon as the wind deposits a little dust into a likely crevice of some ancient monument, weeds begin to grow. The work of keeping the monuments clean from these growths costs the municipality many thousand lire a

Carried a Souvenir

of 1899 Tornado Tulsa, Okla.-For thirty-two years

Pat Malloy unknowingly carried a souvenir of a tornado that swept Iowa back in 1899.

Malloy, then a fourteen-year-old youth, escaped from the Salix (Iowa) tornado with a fractured collar bone and two small scars on his back. He had forgotten the scars until

one of them became sore and a small lump formed on it. Physicians opened the lump and found a wedge of plate glass between the ribs.

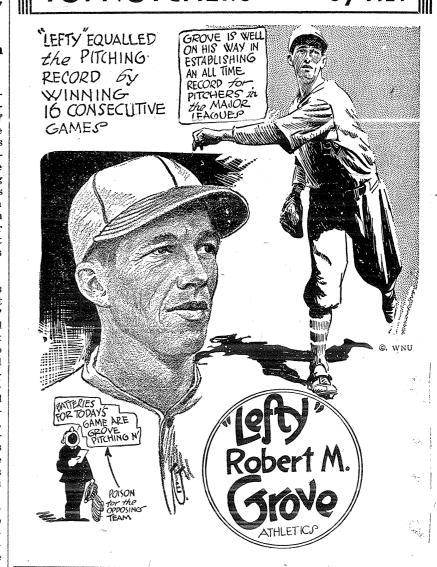

Birkenhead, England.-Frank

Ship Steams Away With a Bridegroom

Davies was married at two o'clock in the afternoon. At five his comrades invited him to a good-by party on board the steamship Nasmyth, which was docked here. The party was so lively that at eight o'clock in the evening "Mr. Newlywed" fell asleep. At 10 p. m. the Nasmyth lifted anchor, bound for the River Platte, South America. Next morning Mr. Davies sent a radiogram to his bride saying that the ship's first call was Montevideo and that he would not be home for three months.

All Sales Strictly Cash

Effective October 1, 1931.

Farmers expect, and rightly so, to receive cash for their crops when delivered to our elevator.

We must also pay cash for all other merchandise we buy.

The credit situation throughout the country is tight and therefore, to assure the farmers of a market where they can at all times sell their beans or grain for cash, we must now sell merchandise for cash only.

Retail prices will be made as low as possible consistent with the market and quality of the merchandise. Customers will thereby receive the benefit of lowest cash prices.

We are confident that our many friends and customers will see the wisdom of taking this measure at this time.

Michigan Bean Co.

You don't rip off the old roof to lay 3-in-1 strips of the famous Winthrop Tapered Asphalt Shingles. The thick butts lie flat and snug-proof against rain, wind, sun and snow.

No other shingle has the taper—a feature that doubles the wearing thickness of the roof where exposure comes and that casts an attractive shadow line.

Winthrops do not curl, rust, rot, split, crack nor saw through their nails. They are fire-resisting and their colors are non-fading-crushed slate in natural colors.

Come in and get a price on a new and better roof. MICHIGAN BEAN CO.

Twenty-Five Years Ago Oct. 12, 1906

In spite of the rainy weather, the Cass City Fair held last week was a successful one and the large number people in attendance expressed themselves as well pleased with the exhibits in the different departments. Governor Warner was present on Wednesday. He came on the noon train and was accompanied by Congressman Smith of Pontiac. Both gentlemen took dinner with the fair officials at the dining hall and afterwards gave short addresses to a large audience on the race track. In the automobile race, F. H. Fenner of Bay City with his model K Winton won from W. J. Moore of Caro, who drove

a four-cylinder Olds. Mr. and Mrs. L. H. Huffman of Elmwood township celebrated the fiftieth anniversary of their marriage Tuesday Oct. 2, by inviting a number of their friends to spend the day at their home.

America's most economical truck

is now available in 25 different models priced as low as \$440-complete with body

ance, week after week,

11/2-ton 157-inch Stake Truck \$810*

By actual road perform-

month after month—the six-cylinder Chevrolet has proved its right to be called America's most economical truck. Owners have found that on a ton-mile basis Chevrolet costs less for gas and oil, less for upkeep and less for service than any other truckregardless of the number of cylinders. And price-comparison will show that this big, sturdy Chevrolet Six is one of the lowest-priced trucks you can buy.

Today, any truck user can apply this economy to his own particular work. The current Chevrolet commercial car

line covers practically every delivery and hauling need. Twenty-five different models. Half-ton and 11/2-ton pay-load capacities. Three wheelbase lengths. A wide variety of Chevroletdesigned and Chevrolet-built bodies. Just name the type of truck you need-and you will very likely find it in Chevrolet's all-inclusive line.

THE STORY

CHAPTER I—Six bandits come aboard the steamer, Midnight Sun, while she is tied to the bank of the Mackenzie. Father Claverly and the other passengers on the boat are amazed at the sight of banditry in this Great Waterways country, a thousand miles north of Edmonton. Jimmy Montgomery, who had spent years with the Canadian Mounted, draws hisgun in the face of the covering rifles and fires upon the ruffians. He is shot through the heart by a half-breed. The bandits get away with gold dust and choice peltry.

CHAPTER II.—Corporal Bill Hardsock brings the news of the crime to Sergeant Alan Baker at the Mounted Police post at Fort Endurance. After a brief dispute over plans with his incompetent superior, Inspector Haskell, Alan starts out after the bandits in the big police launch with the corporal and four constables.

CHAPTER III.—Reaching the Midnight Sun, they stop long enough for Alan to board her and consult witnesses of the crime. Alan asks the skipper to put Jimmy Montgomery's orphaned four-year-old daughter off at Fort Endurance and leave her in the care of Alan's fiancee, Elizabeth Spaulding. At the MacMillan trading post on the Big Alosska, Joyce MacMillan is alone, awaiting the return of Dave, her father, from a fur-buying trip. She is thrilled when the police launch ties up there for the night, as she has not seen Alan Baker for months. Secretly she had hoped to marry him; then she was stunned by the news of his engagement to Elizabeth. She is happy now to perceive from his halting talk that the planned marriage is not definitely certain.

CHAPTER IV.—Larry Younge, one of Alan's men, discovers in MacMillan's fur shed a bale of pelts stolen from the Midnight Sun. The evidence incriminates Dave so strongly that Alan is compelled to tell Joyce. She hotly defends her father Alan leads his expedition up the Big Alooska. Compelled by Haskell's foolish orders to divide the party, Alan fails to capture the bandits. The police expedition returns to Fort Endurance with Larry badly wounded.

CHAPTER V

The Broken Sword

By the light of an electric torch Alan cut away Larry's clothing and examined his wounds. Larry had been shot twice, and both wounds were fearsome. One bullet, a ricocheting slug. had struck him squarely in the knee. cruelly shattering the bones. The second had pierced his chest high up. just beneath the shoulder, and had passed entirely through his body. Steeling himself to the ordeal, Alan worked desperately with tourniquet and tiny medicine kit till he had stanched the bleeding. Before he finished. Larry was rousing faintly from the bullet shock.

Half an hour later, when Alan had done all he could and Bill had managed to patch the canoe, they turned their faces toward home, in defeat, in sorrow, in an anguish over Larry.

Alan picked him up in his arms, gently and tenderly, trying to keep that fatal bleeding from starting afresh. With Bill following him, staggering under the weight of canoe, guns and pack, he headed back toward the Alooska branch.

For an hour they stumbled along. plowed through bog and mire, groped through the tall impending flags. It was an hour of darkness, of blind heroic struggle. But they reached the Alooska branch at last and set the canoe to water; and making Larry a soft bed of flags, they began their sorrowful journey.

With no sleep in more than fifty hours, with all that long hard chase behind them, they were on the verge of exhaustion, and could make no time. Their hands were raw with blisters from paddle work; their faces were bleeding from insect bites; their whole bodies ached intolerably. They were muddied, wet, gaunt with hunger, heart-sick from the disgraceful failure

of their patrol. But they refused to stop or rest; Larry had to be taken home quickly; the hours were a matter of life or death to him. With dogged courage they drove them-

With his spirits at so low an ebb. the picture of that fur pack in Dave MacMillan's shed rose before Alan's eyes, and ne foresaw the inevitable consequences to flow from that discovery. In his exhaustion, with all the buoyancy of hope drained out of him, he no longer could feel that somehow he was going to get Joyce's father off lightly. He must take Dave into Endurance and enter charge; and now, with these bandits escaped. Dave would bear the whole brunt of the law's retribution. He felt that all the rest of his life he would be haunted by the memory of Joyce's pale face, frightened and anguished, in the cold gray dawn of yesterday.

In this whole miserable business-Jimmy Montgomery dead, Larry in the shadow of death, that tragedy hovering over innocent Joyce MacMillan, the bandits escaped and the patrol disgraced-in all this evil-starred affair, only one thought held any comfort for Alan. It was a vengeful thought, born of a savage and vengeful mood. He held a sword now over Inspector Haskell. Haskell had ordered this patrol to be split. Out of his ignorance and

jealous anger, he had issued that crazy order, and it had wrecked the patrol. His gross incompetence, which heretofore had been only a vague charge hard to prove, now stood out glaringly, in all its inescapable guilt.

Alan swore to wield this sword in

By mid-afternoon of that interminable day they came to the first straggling trees at the Thal-Azzah edge. At deep twilight they reached the Alooska Forks and the anchored

Pedneault had just returned from his useless trip up the south branch. In a few words he understood all that had happened. With one glance at his spent and staggering partners, he took their heavy burden from their shoul-

Alan flung himself down beside Bill, driven to the limit of human endurance. His last waking thought was the grim satisfaction of knowing that he held a sword over his guilty arrogant officer and could bring him to account at last.

In his cabin Inspector Haskell sat behind his desk, waiting for Alan Baker to come in and report. He was thinking, thinking hard; and for all his self-control his nerves were jumpy.

Over in a corner Whipple sat at the table, pretending to write but in reality waiting there, as Haskell had bidden him. Something cold had gripped Haskell half an hour ago when he saw the patrol returning without the six bandits and with Constable Younge desperately wounded. He knew the details of that patrol al-

ready; Whipple had come up and privately told him. How the bandits had headed for the Thal-Azzah, as Baker had warned. How Baker had run those six to earth and cornered them. How Pedneault and the other two constables had been a hundred and forty miles away during that crucial hour.

As he knew, this crime was the most spectacular in years along the Three Rivers. The defeat administered to the police was the most stinging in a decade. This incident would have reverberations at headquarters. Superintendent Williamson would investigate. The very first question of that

veteran old officer would be: "Why in h-l did you order to divide that patrol? Splitting up his detail that way-didn't you realize that neither party would be able to handle those criminals?"

Not deluding himself, Haskell knew he was caught. He knew he had made a capital mistake in a Force where a man's first mistake is usually his last. In these thirty minutes all his prospects of promotion in service. of smashing Alan Baker, of swinging Elizabeth Spaulding to himself, had come tumbling down like a house of cards, and he was thoroughly frightened.

It would spell finis to his career if the facts of the patrol became known. The blame of this shameful defeat lav squarely at his door. Baker surely realized that; Baker surely was going to use that sword against him. It was war now, open and avowed war between them.

Step by step, logic led him to the one and only recourse he had. If Williamson ever found out he had ordered that patrol split, he was sunk. Therefore Williamson must not find out. There was a way to keep him from knowing the facts.

Haskell tried to still his conscience by thinking that Baker had wanted the patrol to fail. If that was so, then this measure was exactly what the sergeant had coming to him. He ought to be smashed, and smashed hard.

Still in his muddled and torn unibludgeon some hard and fast terms out of the guilty inspector or shoot a complaint over his head to Superintendent Williamson. If Haskell did not give in to his demands, he meant to send a half-breed runner to the Royal Signal corps station at Resolution and flash a message to the division commander that would start an

Over at Mrs. Drummond's house where Joyce had gone, candles were gleaming in the windows. Across at Father Claverly's tiny hospital, Larry Younge lay fighting for his life. Up the slope at barracks Dave MacMillan was locked in the police "butter-tub," charged with being accomplice to rob-

bery and murder. Joyce had reported secretly: "Alan, these bandits, till I told him. He open water.

couldn't have deceived me!' That same impression had been

those damning circumstances.

It was his conviction that Dave Mac-Millan was not guilty at all.

He meant to put up a fight for Dave. It was easy to resolve that, but the actual job was the hardest thing he had attempted in his whole life. The only way under heaven of clearing Dave was to capture the guilty men and either wring a confession out of them or hold out king's evidence as a lure and get them started talking against each other.

Which way would they try to escape? They'd go east when they left the Thal-Azzah. They'd go across the Great Barrens to Hudson's bay and try to pick up passage on a fishing smack, or go east and south toward The Pas in Manitoba. There was only one route leading east out of the Thal-Azzah, and thev'd have to take it. It was an old Tinneh trade route, the Inconnu river.

Alan meant to lead a patrol to the

As he strode into the cabin, he saw Haskell waiting for him, coolly smoking a cigarette. It seemed to Alan that the man actually did not realize that his ignorant orders had wrecked the patrol and that the whole blame and shame of it lay at his door.

When he finished his report, Haskell made no comment. Wondering at his cool air, Alan was silent a few moments. He could not understand the man's nonchalance. This was war between them; each knew it; and yet Haskell showed no fear, no concern, no conciliatory spirit whatsoever.

Keeping back his heavy weapon, Alan took up his defense of Joyce's

"About Dave MacMillan. My opinion is, he's entirely innocent. There's no call to send him outside to Edmonton. A traveling court is coming down the Three Rivers in August, and his case can wait for that. He can be kept here, or released on bail. Drummond will put up bail; I'll be personally responsible for him. There's another reason: he's got some good friends among the Dogribs; if he's released he'll get busy and stir them up to help hunt these bandits-"

Haskell interposed. "What was he doing last week? Where was he? Can he put up any alibi?"

"He was in the Candle-Ice lake country, trying to locate Little Otter's band. He'd fed them all winter, and they owed him their spring peltry; but they'd sneaked away and taken their peltry in to the L. & H. He saw no one; he has no alibi."

"That trader won't be released," Haskell said flatly. "I'll decide whether to keep him here or send him outside to Edmonton.'

Dismissing Dave MacMillan's plight with a curt gesture, he demanded: "What made you leave Constable Burgoon there at the trading post, shorthanded as we are?'

"To watch after the furs and trade goods."

"That's MacMillan's lookout. I'll have to instruct Pedneault to get Burgoon tomorrow.' "But Miss Joyce expects to return

protection do you intend to give her?" "If she insists on returning, I don't feel any responsibility. This isn't an orphanage; it's a Mounted Police

Alan entered that remark in his account against the inspector. Haskell's callous attitude toward a defenseless, grief-stricken girl seemed to him an index to the man's real man-

Still keeping his sword hidden from Haskell, he broached the matter of that patrol to the Inconnu. As he sketched his plan briefly, he saw that Haskell, listening to him coldly, was 'not even interested. An uneasiness came over him. What was Haskell thinking? Didn't the man realize he had made a fatal mistake?

Alan summed up his plan: "In three weeks I want to have a patrol lying low on the Inconnu. I'll take Hardsock and Pedneault, and enlist three good 'breeds as special con-

Haskell stopped him. "I'm not interested in your plan, sergeant. You're merely making a long guess about what they'd do. It sounds thin-"

"About as thin as my guess that they'd take the north branch into the Thal-Azzah!" Alan flung back at him. "I know this country. I know what I'm talking about. Now, get this straight, inspector: I'm going to make You've got to fight fire with that trip. I didn't come in here to ask your permission. You've wrecked one patrol. If Superintendent Williamson hears about that, you won't form, Alan came down the slope have a chance to wreck any more. toward Haskell's cabin, intending to You'll keep Dave MacMillan here, you'll keep your hands off this Inconnu trip, or Williamson is going to

hear d-d quick!" The threat daunted Haskell not at all. He scarcely seemed to have heard. With that faint sardonic smile on his face, he intoned coldly:

"Besides the flimsiness of your plan, sergeant, there's another absurdity about it. You just came back from a patrol that started out with every chance in the world of succeeding. You yourself admit you met the bandits and even had them cornered. But by your weak vacillating fight you allowed them to escape-'

"What's that?" Alan cut in. "A weak vacillating fight? . . . Good Lord!" His memory whipped back to Bill and himself bellying up behind I talked with him. He isn't guilty! the muskrat house, and to Larry He never had heard a whisper about | Younge coming out against six men on

"You failed dismally," Haskell proceeded, in knife-edge voice. "You Alan's-"He couldn't have deceived probably wanted to fail, so you could me." There was something behind try to hang something onto me. Those that pack of furs which hadn't come to light yet and which would explain your men was badly shot. After such a performance, don't you think it's a 🕏 bit ridiculous of you to stand there and baldly ask me to let you lead a thousand-mile, all-summer patrol with five men? Instead . . . Well, you've been in the Mounted long enough to know what the consequences are of a failure like yours.

Alan stood dazed. Haskell was actually blaming that disaster upon him! Did the man still fail to realize that the patrol had been wrecked by his own crazy orders?

"Consequences?" he repeated. "Consequences for me? I warned you we shouldn't split our party. That was the cause of us failing. I predicted just what happened."

Haskell brushed the words aside. "The consequences of a blundering, botched-up patrol such as you led are usually demotion to the ranks. That's what you'll have to take. In an important matter like this I haven't any choice but to make you a constable. Whipple, write out the papers for this demotion."

For moments Alan stared at him. Then he laughed. It was incredible, a travesty. Busted! Busted because of this man's orders. Busted because he had been sent out, tied hand and foot, on a patrol doomed to disaster before it started.

He snapped. "You can quit that scratching, Whipple; I'm not a constable yet. And you, inspector, if you haven't got sense enough to know you're hanging onto your command by a couple of fingers, I'll tell you about it. When Williamson finds out about you ordering me to split my party, he'll either ask for your resignation or fan you down to the Border where you belong. You're going to give Dave MacMillan a decent chance, and I'm going to make that patrol to
