Progress

Reports for Small Grains and Hay Are Higher than Previously Indicated

Growing crops made good progress in Michigan during August and harvesting reports for small grains and hay were higher than previously indicated, according to the report released today by the Michigan Co-operative Crop Reporting and Muskegon Soil Conservation Service. The September report showed the yield for each of the 11 principal field crops to be above average. The report also indicated a larger than average production of commercial apples, total peaches, pears and cherries. Grape production is very slightly below average higher than a year ago and 16 per cent above the 10-year (1929-38)

Streamliner Chef Advises Against Streamline Methods in Bean Cooking

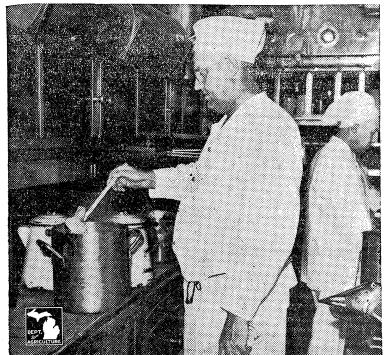

Photo shows Tony Bungart, chef aboard the Mercury, crack streamliner, preparing beans for old-fashioned bean soup, being featured by railroads in commemoration of the 47th anniversary of the Michigan Bean Shippers' Association. The chef pointed out that beans do not lend themselves to streamlining, that the best methods of cooking are old-fashioned. Bungart serves 15 different bean dishes and every one is based on soaking of beans overnight and cooking at least four hours.

WEEKLY NEWS ANALYSIS BY JOSEPH W. LaBINE

Special Congressional Session Expected to Halt War Profits; Housewife Feels Price Boost

(EDITOR'S NOTE-When opinions are expressed in these columns, they are those of the news analyst and not necessarily of this newspaper.)

NEW YORK STOCK EXCHANGE ON RAMPAGE The President's "moral" obligation was forgotten.

BUSINESS:

War Babies

"No American has the moral right to profiteer at the expense of either his fellow citizens or of the men, women and children who are living and dying in the midst of war in Europe." The U.S. had two days to ponder this Presidential warning before the markets opened after a Labor day

week-end. If pondering means forgetting, the nation did it well. Tickers ran three minutes behind as "war babies" zoomed 5 to 15 or more points. When it was over, 5.930.000 shares had changed hands and the value of listings at New York alone had upped some \$3,000,-000,000. Next day the market straightened out.

Grains were no exception, jumping to their pegged limits each day. So stagnated was the futures market that milling business practically came to a stop when processors refused to sell flour without being able to buy in their hedges against the cash wheat they needed. Finally the Chicago board of trade doubled the daily price limits and upped initial margin requirements. Meat followed the trend. Hogs

soared from 50 to 75 cents as the the next day.

The net result soon sifted down to Mrs. Housewife, whose meat, butter, eggs and flour went skyrocketing despite government-held surpluses of most commodities. Off to the White House with this news went Attorney-General Frank Murphy, gunning for the well-remembered devil of World war days, "High Costa Living." He went back to his office with the President's blessing and an order to find ways of outsmarting the speculators, but Frank Murphy's job was not easy. A search of his statutes would show the attorney-general he had

few laws to fall back on. Hence the wiseacres thought Mr. Murphy would spend the next few weeks drafting legislation which the President could offer

a special congression-FRANK MURPHY al session.
That would ... found no laws. be smart politics, because Secretary of Agriculture Henry A. Wallace is doing his best to keep farmers from speculating with larger crops next year.

If the glove fits agriculture, it also

fits business. Though ambitious profiteers thought the President had left a loophole in neutrality by exempting Canada (which has not gone to war), Secretary of State Cordell Hull soon bashed this hope in the head. The U. S. might sell arms to Canada for transhipment to the allies, except for one sentence in the neutrality act: "It shall be unlawful to export . . . arms, ammunition or implements of war . . . to any neutral state for transhipment to, or for the use of, any . . . belligerent nation." Next question: How can this ruling be enforced?

THE WAR:

Speculation As the War of 1939 got well under-

way, censorship's lid clamped itself over everything save the vague official communiques from London, Paris, Berlin and Warsaw. Conversely, the propaganda mills ground faster than ever. By adding to communiques and subtracting from propaganda, observers could ascertain a few things. The gist: France, Britain and Poland were in a tough spot.

The key to this problem lay somewhere in Poland. Defending troops rivers (See Map) where they hoped

to dig in permanently. Though Generalissimo Smigly-Rydz called the retreat "strategic," there was every indication Poland's position was desperate. Off to London seeking aid went Foreign Minister Josef Beck, knowing full well there was no way Britain and France could send it.

To a certain point Der Fuehrer's scheme was obvious. The Reich

POLAND'S WAR

Heavy shaded area shows German territory. Light shade shows territory Poles say they are willing to surrender to establish permanent front lines along the Vistula and Bug rivers, in strategic

made no offensive on the western front, where British-French forces found the lightly manned Siegfried line a stone wall. But when he has can decide on one of two courses, war or peace. If he makes war, the combined armies of Britain and in 1936. France will have tough sledding against a Nazi juggernaut which has no problem of back-door vulnerability. From over its new common border with Russia could come all the economic help Germany

But observers saw another possible reason for Hitler's apparent lack of interest in the western front. Having no military objectives there, having failed to declare war against Britain and France, he might turn about and sue for immediate peace on the stipulation that Poland shall be incorporated .nto the Reich.

Actuality

Aside from Poland's retreat, aside from German apathy on the western front, the War of 1939 followed tradition. On the propaganda front, Berlin issued a "white book" replying to Britain's "white paper," recounting pre-war Anglo-German relations and placing responsibility on England. Faced with continued merchant marine warfare, both France and Britain established import control systems to conserve foreign exchange and provide shipping space for war necessities.

Most vital, however, was the time tested plan whereby the United Kingdom hopes to starve Germany into submission. Thrown around western exits of the Baltic sea was the impregnable naval blockade which only Britain could muster. Meanwhile the unique ministry of economic warfare hoped to make British pounds, shillings and pence an equally potent weapon.

Question Mark

Most observers agree that Italy's current non-participation resulted not because Hitler waived his treaty, but from deliberate intention. Though Rome declared its neutrality, removed air raid shelters and resumed oceanic shipping, there was method in this madness for both Hitler and Mussolini. For Hitler, Italy was not only a threat against democracies, but also a potent source of supplies should all other paths be cut off. For Mussolini, it was smart to watch developments: Seeing in Der Fuehrer a potential threat to his Mediterran-ean domination, Il Duce is willing rushed back to the Vistula and Bug to join whichever side he thinks will

Aside From War

While war and its repercussions reld U.S. interest 100 per cent, the following newsworthy events drew little attention:

IN BALTIMORE - Twenty-sixyear-old Mrs. Harold Ickes, wife of the 65-year-old interior secretary, presented her husband with a baby boy.

IN CLEVELAND-Col. Rosco Turner, veteran aviator, sped 282 miles per hour to win the Thompson trophy the third successive time, thus winning \$16,000. Then he announced retirement from the air racing business.

IN NEWARK - Elisha Waterman, executive vice president of the fountain pen company, was beaten by C. I. O. pickets as he tried to enter the plant.

IN NEW YORK-Willys-Overland claimed it was dropping a "bombshell" into the automobile field with an unprecedented new low price car for 1940.

PAN AMERICA:

Solidarity

Hemispherically, the Americas constitute an economic unity which can operate independently of warcrazy Europe. But in peacetime the Old world's rich nations dangle tempting trade offers before the tiny lands of Central and South America, wooing them away from the more logical north-and-south commercial channels. When war again engulfs Europe, the rich suitors forget their temporary New world friends, who invariably turn once more to the U. S. for leadership.

No exception to this rule is the War of 1939, which finds Argentina cut off from her German-Italian trade sources by a British blockade, and finds Mexico's expropriated oil program at a standstill because Germany can no longer cross the

Not unexpected, therefore, was the call which went forth from tinv Panama republic a few days after war was declared. Would the 21 American nations attend a conference to preserve western hemisphere peace?

Plainly visible behind scenes was the fast-moving hand of the U.S., which could use Pan-American solidarity to good advantage. Europe can no longer supply the needs of South America, nor can America supply the needs of Europe under neutrality restrictions. But everyone-including newly handcuffed American exporters—would be happy to open up new markets in the other Americas and thus keep U.S. production at normal.

DOMESTIC: Un-Americanism

Fully stolen by Europe's war is the news spotlight which Washington's election-bound investigation committees hoped to enjoy this summer. But early September brought one witness before Rep. Martin Dies' un-Americanism committee who broke through the barrage from abroad to win prominent place in the week's press. The secretary of the U.S. Communist party and its presidential candidate

Interesting to committeemen were the revelations that (1) Communist Browder has traveled abroad the past two years on a false passport; (2) his assertion that Communists work with every group seeking to improve U. S. economic conditions; (3) his apparently contradictory admission that if the present economic system worked ef-

COMMUNIST BROWDER "I only indorsed his policies."

fectively there would be no place for the Communist party.

Biggest news, however, was something which might-if substantiated -make the Republican party blush. In 1936, said the witness, a man named "Davidson" had approached him as representing seven wealthy Republicans who were willing to give the Communist party \$250,000 to nominate President Roosevelt as its presidential candidate. When "Davidson" heard that information about the offer had been passed on to the Democratic national committee, the offer was withdrawn and "Davidson" disappeared.

If this embarrassed Republicans, their Democratic opponents were also reddened. Communist Browder denied he had endorsed President Roosevelt in 1936. Then he explained why: "I carefully refrained because I knew the Republicans wanted me to do it. I only indorsed his (Roosevelt's)

policies.'

Noodles, Macaroni Always Tempting

Valuable Contributions Toward a Quick Meal

By EDITH M. BARBER

SPECIAL thanks to the Chinese for the invention of noodles, macaroni and spaghetti, if the honor of inventing these "pastes" belongs to them, as tradition tells us; and fully as much to the Italians and the Germans, whichever race introduced them to Europe.

The Italians certainly have been faithful to them for many centuries as Japan claims to have manufactured a rice product as thin as vermicelli, throughout the ages.

Today we believe that our own pastes, made by machinery in modern factories, can compete with them in so large a variety of sizes and shapes but we have them in p. m., young people's service. various thicknesses. The business woman housekeeper finds all of them useful for the quick meal because the best of them cook in such a short time. She uses one or the other, dressed with butter or cheese, with meat and with certain types of fish. Shrimps, for instance, with either a thin spaghetti or noodles and a Creole sauce make a particularly savory dish.

A noodle ring may be filled with creamed meat, fish or vegetables. Macaroni or noodles may be used as a basis for dishes of this sort. Fried noodles, by the way, are particularly good with a cream sauce.

Shrimp Creole With Noodles.

- 1 package noodles
- 2 tablespoons butter 2 tablespoons onion
- ½ cup sliced mushrooms 1 green pepper, minced
- 2 tablespoons flour
- ½ cup stock 2 cups canned tomatoes
- 1 large can shrimps Salt, pepper

Cook noodles in boiling salted water until tender. Melt butter and cook onion, mushrooms, green pepper, five minutes. Stir in flour and add stock and tomatoes. Stir over low fire until thick. Add shrimps and pepper. Arrange noodles in a ring around chop plate. Pour shrimp Creole in center and serve.

Macaroni With Tuna Fish and Corn.

- 1 package macaroni 2 tablespoons butter
- 2 tablespoons flour
- 2 cups milk 1 7-ounce can tuna fish
- 1 cup whole kernel corn
- Salt, pepper, paprika 1 cup grated cheese

Cook macaroni in boiling salted water until tender and drain. Melt butter, stir in flour. Gradually add the milk and stir over low fire until | in the church. smooth and thick. Stir in tuna fish, corn and seasonings to taste and half the cheese. Arrange fish mixture in alternate layers with maca- | September 17: roni in a baking dish. Sprinkle re maining cheese on top and bake in a moderate oven (375 degrees Fahrenheit) until cheese is melted.

OTHER GOOD ONES

Deviled Eggs. 6 hard-cooked eggs

- 1/4 cup mayonnaise
- 1 teaspoon mixed mustard ¼ teaspoon onion juice
- 1/2 teaspoon Worcestershire sauce ½ teaspoon salt

Pepper Shell eggs, cut in halves and re-

move yolks carefully. Mash yolks thoroughly, add mayonnaise and seasonings. Mix well and refill egg whites with this mixture. Serve with lettuce or other green.

Old-Fashioned Rabbit. 1 nound American cheese

- 1 tablespoon butter 2 teaspoons salt
- 2 teaspoons dry mustard
- 1 teaspoon paprika
- 1/2 bottle beer Toast

Shred cheese with a fork. Melt butter, stir in seasonings, add cheese and stir over low fire until melted. Stir in beer gradually and cook, stirring over fire until the mixture is smooth. Pour at once over hot toast. at 12:00. A dash of cayenne pepper may be added if desired.

Shadroe Omelet.

- 3 cup butter 4 minced scallions
- 1 tablespoon minced parsley 2 tablespoons minced chives
- 8 eggs 1 parboiled shadroe

Melt the butter in frying pan; add scallions, parsley and chives and cook two minutes over a low fire. Beat eggs until very foamy. Add shadroe cut in pieces. Pour into frving pan, stir once and cook slowly over a low fire. Tip pan occasionally to let liquid run underneath. Fold and serve on hot platter.

Hot Cheese Balls. 2 teaspoons flour

Cayenne

½ teaspoon salt

- 1 cup grated cheese
- 1 egg white

Fine bread crumbs Mix flour and seasonings with grated cheese and fold into the stiffly beaten egg white. Mix well, roll into small balls and roll in crumbs. Fry in deep fat, (375 degrees Fahrenheit) until golden brown. Serve hot on toothpicks as an appetizer.

TRUTH about ADVERTISING

By CHARLES B. ROTH

STOOD for an hour watching a pitch man coining money. He was

selling a useless gadget worth a dime at the ten cent store. By clothing it with mystery and high-power sales talk he sold this

cakes—at a dollar. And the crowd pressed around for I thought it must be wonderful to have a business like that -if only it would last, if only the cus-

tomers would come back for more. But I knew they wouldn't.

Two days later I Charles Roth passed the doorway where the pitch man had been operating but he had decamped. Where was he? In some other city, prob-

ably miles away, going through the same tricks. These pitch men, almost without exception, die broke. Inspired salesmen, really with a talent for persuading people that amounts to genius, they nevertheless fill pauper's graves, and spend their old

ages in cheap rooming-houses. What's the trouble with them? It isn't hard to find: They do not give value. They depend upon talk to replace quality, tricks to do away with honesty. They lose as every dishonest man must.

You have never seen an advertisement of one of these gyps. You never will. There are two reasons

why. One is that no reputable newspaper will accept their advertising, because a newspaper takes its obligation to its readers so seriously that it investigates advertisers and rejects those that do not give honest value.

The second reason is that advertising is an investment, and not a gamble. And these pitch men are gamblers

The man who advertises says in effect to you: "I am operating a business in your service. I will offer goods you want. My prices will be reasonable. I have become a definite part of this community. My money is invested here. Here I intend to remain, a part of your community life. I sell good goods, and in my advertising I tell the truth about them."

Because you have been "gypped" by buying wild cat brands and by patronizing itinerant peddlers and door-to-door solicitors without a responsible place in the community, you now buy advertised goods from merchants who advertise.

This is the course which is followed by the shrewdest buyers. It is the course they have discovered which pays them the best.

It will also pay you best. @ Charles B. Roth.

Tests of Heart May Be Made By Individual

By DR. JAMES W. BARTON

ONE of the tests to find condition of the heart in recruits for the air service 9-15-1 healthy young

man can usu-TODAY'S ally hold his HEALTH breath for 45 seconds and COLUMN many 60 or

more seconds. If the examiner is not careful, the recruit, unknown to himself, may be allowing small amounts of air to come out by way of his nose, although the mouth is kept tightly closed. By closing the nostrils with the fingers, no air can come out and the correct measurement is thus made.

Another test is to have the recruit breathe in and out in a natural manner, and after his breath is out he is told to hold his breath and not breathe in. A normal healthy adult can keep from breathing in for as long as 25 to 30 seconds.

Now this is very simple and anybody can make this test on himself

by the aid of a watch. The one drawback in this test is that it should taken under "normal" circumstances. It should not be made following a large meal or after any hard exercise. If a large meal is in the stomach there is not room for the lungs to open up

completely at the

Dr. Barton

bottom. Thus some athletes (wrestlers) eat nothing after 2 p. m. with their bout at 9 p. m. If hard exercise has been taken, there is a lack of deficiency of oxygen in the blood (the system has gone into debt for oxygen for minutes or hours) and so oxygen will be needed in a shorter time than if the blood contained its usual amount of oxygen.

Of course, practice enables one to hold the breath for longer periods; some swimmers are able to hold their breath under water for minutes

The thought then is that if you are young and healthy and try these simple tests when you are rested and have not recently eaten, you should be able to hold your breath 40 to 45 seconds after a "deep" breath inward, and 20 to 25 seconds after an ordinary breath outward.

When one has been without food for many hours, an acid condition arises which lessens the oxygen in the blood and breathing must be done more often.

Peptic Ulcer Tendency Found

A few years ago there was much controversy between physicians and surgeons as to which was the best treatment for ulcer of the small intestine-peptic ulcer. Physicians were able to show that by resting the stomach as much as possible. by use of soft foods and preventing formation of too much acid digestive juice, many cures were obtained. Surgeons, on the other hand, advised a new opening from stomach

to small intestine. Recently a physician discussing peptic ulcer with a prominent surgeon, head of a surgical service in a large hospital, was surprised to hear the surgeon say: "I don't operate on as many cases of peptic ulcer as I did some years ago, as you medical men are curing and preventing this condition. Of course when medical treatment fails, I still operate and also have to operate Fair to good steers when an ulcer has healed but has left a mass of scar tissue blocking Best grass cattle..... 7.90 @ 8.50 the passage of food from the stom- |Fair to good grass

ach to small intestine." The reason that more cures are being obtained by medicine, and fewer operations are being per formed, is that both physicians and surgeons now realize that it is no the ulcer that needs to be treated but the patient himself.

No Treatment All-Inclusive. Dr. Joseph Daly, Toronto, in the Canadian Medical Association Journal, states that it is now admitted that no treatment is suitable for al peptic ulcers. "The physician no longer aims to treat the ulcer but to direct the management of the patient who has an ulcer diathesis (predisposition or tendency to ulcer) and the surgeon confines his efforts to correcting the complications that arise during the course of the disease."

That there is a tendency to peptic ulcer in some individuals and families who are of the very nervous or emotional type is shown by the fol lowing:

"1. Ulcer patients have a tendency to excessive worry. "2. The symptoms disappear or become less when there is a pro longed period of relief from the

wear and tear of life. "3. A return to usual work, worry or mistakes in diet brings a return of ulcer symptoms.' of ulcer symptoms.

Clipped Comment

Highly Competitive.

Schools and churches for many years were supposed to be more or less philanthropic institutions, but the school system has emerged as a highly competitive business. No politician ever sought votes more diligently than high school organizations are trying to secure tuition pupils. But like many other things, the day will come when this will be is holding the breath. A adjusted satisfactorily to all the schools concerned.—Peck Times.

No Reason for Our Fighting. From the Bay City Times.

Those who have been wondering whether the United States can remain out of the war if it continues for a year or more could ask themselves a more pertinent question: Is there any reason why we should be drawn in?

There is only one answer. There

s no reason.

It is up to the government and less prejudices and passion sway us we undoubtedly will remain at the same in 1916 in all probability had we the experience we gained by that adventure and as sensible laws as since have been enacted.

In spite of frequent allegations pacities. that the United States was drawn into the last war inexorably and in- camp will be of a demonstrational evitably, some historians maintain nature on open ditches and tile that we could have remained neu-drains in need of rehabilitation tral if President Wilson had not within a limited area near the preferred an Allied to a German camp, Sackrider said.

These historians point out that the Allies violated American neutral rights in enforcing an illegal blockade; in blacklisting certain "unfriendly" American firms; in flying the American flag over their ships; in classifying practically every commodity as contraband of vator. war. Yet President Wilson omit- Wheat, No. 2, mixed, ted to back with threats of force his protests against these violations.

These same historians maintain also that the Gore-McLemore reso- Six-row Barley, cwt....... 1.02 1.05 lution of 1916 would have passed Buckwheat, cwt. congress if President Wilson had Shelled Corn, bushel... not made the vote on it a test of the United States might well have Dark Cranberries, cwt...... 3.00 found neutrality easier to maintain. Light Red Kidney Beans, cwt. 3.50 The resolution warned all American Dark Red Kidney Beans, cwt. 3.50 citizens that they travelled on armed ships only at their own risk. Butterfat, pound Today the neutrality act forbids Butter, pound Americans to travel on any belligerent ship. That bars one danger of being involved.

Whether the Allied loans and orders in the United States in the Hogs, pound last World War were a major or a minor factor in aligning American public opinion against Germany is Hens, pound son act now forbids loan flotations in this country by any country in default on its debt payments to the government of the United States. That covers all the great powers of Europe on both sides. It lessens our danger of being involved by nancial considerations

Also, the neutrality act forbids loans and credits to any belligerent. The president wants the act's mandatory ban on munitions shipments repealed, but also he wants the "cash-and-carry" provisions restored. Those would not allow goods for a belligerent to leave American shores until fully paid for, not to be carried in American ships. The president wants also the right to order American vessels (whatever their cargoes) and American citizens to stay out of war zones.

Another deterrent to entering a European war—When the United States entered the last war, the national debt was only around one billion dollars and the treasury had no trouble borrowing 25 billions more. But now the debt is over

Vicar Wars on Idolatry The Rev. John Ray, vicar of Cerne Abbas, England, has started

a war to stop the "idolatry" of the young women of the parish who pray to Cerne's giant love god cut out of the hillside in pagan times. He has questioned many girls and is urging that the Cerne giant be removed. Girls kneel at the foot of the image at night and pray him to send them a sweetheart. Young wives plead for children. The origin of the practice is lost in a centuries-old legend. Marriages in the district now average less than one a year, and many blame the giant.

Springs Heat Alaskan Homes The Yukon river mining camp of Circle, Alaska, is only half a degree below the Arctic circle, and its winter temperature runs to 30 and 50 degrees below zero, but its householders keep warm. Virtually every house is heated by natural hot water springs.

Hot Oven Needed For Custard Pie

450 Degrees Throughout Baking Is About Right

By EDITH M. BARBER

HOT oven for custard pies and throughout the baking? That seems rather radical, but even standard recipes can sometimes be improved. Like most of you, I have been accustomed to putting the pie in a hot oven and then reducing the temperature. I am now converted, however, to using 450 degrees Fahrenheit throughout the 40-minute period. The undercrust then remains tender and unsoaked.

Of course this depends upon having good pastry to begin with, and nothing is easier. The flour should be sifted with the salt and then the shortening which may be lard or a hardened vegetable fat should be cut in with two knives or a pastry blender, which comes especially for this purpose. When the flour and fat are blended until you have particles about the size of peas, the water may be added one tablespoon at a time. The water should be added to different parts of the mixture, and then these balls of dough should be pressed together with the fingers. A few more drops of water may be added if necessary, but the pastry must not be damp, as it is sure to be tough if more flour is added.

It is a little easier to roll, if it is chilled a short time beforehand.

Custard Pie.

Pastry 4 eggs

34 cup sugar ½ teaspoon salt 3 cups milk

1 teaspoon vanilla

Line nine-inch pie plate with pastry. Beat eggs slightly, stir in remaining ingredients and mix well. Pour mixture into unbaked pie shell. Bake in a hot oven, (450 degrees Fahrenheit) 30 to 40 minutes, until knife inserted into custard has a jellylike mixture clinging to it.

Date Pecan Pie.

1 cup dates 1 cup milk

2 eggs 1 tablespoon flour

2 tablespoons sugar

1 tablespoon butter ½ cup chopped pecans

Chop dates, cover with water and cook in double boiler until soft. Rub through a coarse strainer. Add milk, well beaten egg yolks, flour, sugar, melted butter and pecans. Pour into an unbaked pie shell and bake in a moderate oven, (325 degrees Fahrenheit), for about 25 minutes. Cover with a meringue made from egg whites and four tablespoons of sugar. Place in oven for about 15 minutes, until meringue is browned.

Chocolate Custard Pie.

6 tablespoons sugar 1/4 teaspoon salt

3 cups milk 4 eggs, slightly beaten

2 squares chocolate ½ teaspoon vanilla

Add sugar, salt and milk to eggs. Melt chocolate and stir into the custard mixture. Add vanilla. the plate with plain pastry dough, building up a fluted rim. Strain in the mixture. Bake in a hot oven (450 degrees Fahrenheit) for 15 minutes, then reduce the temperature to 325 degrees for 25 minutes.

Pastry. 1½ cups flour

1/2 teaspoon salt 1/2 cup fat Cold water

Sift together the flour and salt. Cut in the fat with two case knives. For a large quantity a wooden bowl and chopping knife may be used. When fine, add at one side of the bowl one tablespoon of cold water and stir in as much of the flour and fat as the water will take up. Continue this until you have four or five balls of dough and some dry flour left in the bowl. Press together

flour is not taken up add a little more water. Chill and roll. Lemon Meringue Pie.

with your fingers. If all the dry

½ cup flour 1 cup sugar 1½ cups boiling water

2 eggs 1 tablespoon butter

3 tablespoons lemon juice Grated rind of 1 lemon Pastry

6 tablespoons powdered sugar Mix the flour and sugar, add the boiling water slowly and boil five minutes, stirring constantly. Cook over boiling water 10 minutes, stirring occasionally. Beat the yolks of the eggs and add to them the cooked mixture. Return to boiler and add the butter, lemon juice and rind, and cook until the mixture thickens Cool and fill the baked crust. Cover with a meringue made by beating the whites of the eggs and adding the powdered sugar. Brown in a slow oven (325 degrees Fahrenheit) about 15 minutes.

Snow Pudding.

1/4 tablespoons gelatin 1/4 cup cold water

THINKING TEAKETTLES!

Here is a teakettle with a mind of its own ... one which acts with positive decision if negligence allows it to boil dry. This new kettle takes matters into its own hands if you go off and forget it. The connection plug pops out automatically when the water boils too low, shutting off the electricity at once. You'll enjoy the cleanliness of this spic-andspan kettle: Made of highly polished aluminum and connecting to any electric outlet, it can be used anywhere in the house. It has so many uses that you may want TWO teakettles—one for the laundry and one for the kitchen. The kettle holds nearly four quarts of water and is equipped with a special high-speed element. It is the fastest teakettle you can buy.

Miss College Girl Is Engaging Attention of Fashion Designers

By CHERIE NICHOLAS

tant personage all fashiondom is paying homage at the present moment. On every side you are rea gay campus career. Its cunning minded that the idea is motivattunic bustleback and its full circuing to cater to the whims and wardlar-cut skirt gives it swank and disrobe needs of the girl who is going tinction such as collegiate fashionaway to school.

The style program arranged for Miss College Girl and her younger schoolgirl sister fairly teems with excitement. For instance, there is the new bustle dress. The idea has taken the collegiate set by storm. The quaint bustle dresses that grandmothers galavanted in as girls in the '80s are actually proving inspiration for frocks that the modern girl will wear this fall.

The highpoints of these oldtime silhouettes are being revived such as waistlines of vanishing inches, slim corseted midriffs and wide back-swirling skirts interpreted in novel bustle treatments but modified so cleverly they are made thoroughly practical and wearable for this day and age. Then there is the new vogue that calls for a velvet or velveteen jacket worn with a gay plaided wool skirt or a contrasting or matched solid color as fancy dicthe new fashions take on is also a big factor in the new mode and most outstanding of all is the importance attached to fine materials.

These and other significant style trends were revealed at their glamorous best in an advance fall fashion revue staged by the Style Creators of Chicago. The three models pictured were especially applauded by the audience of visiting merchants as fashions that are representative of what the up-to-date fashion-alert girl will be selecting for her going-away-to-school ward-

The clever little date frock of shepherd check velveteen shown to the left in the group is sure to enjoy

Offers Solution For One Problem

For many women, the most trying coat length of recent inspiration is the rather popular just-below-the-waist length that nips in at the midriff and hugs the hips.

It is a good style for a slender woman with a streamlined figure and is being shown in any number of varieties, of which one of the most popular is a monotone wool jacket worn over a gay print dress. But the problem is not so simple for those who border on plumpness.

One suggestion is that the slightly swallow-tail version deals more kindly with the heavy woman.

Two-Skirt Outfit Real Money-Saver

A money-saver for the bride consists of a two-skirt suit of very sheer wool or crepe, designed with a snave fitted jacket. The street-length skirt can be worn with the jacket and printed crepe or organdy blouses to make a smart runabout costume by

A floor-length skirt of the same material, combined with the jacket and a sheer chiffon blouse make a chic dinner costume for boat and hotel wear in the evening.

New Coat Silhouettes

Coats are no longer a simple matter of straight boxy lines or fitted and flared effects, for Parisian designers are showing intricate details of cut and design in their most recent collections.

ables demand. Its red suede belt supplies a fetching dash of color. Approval for the new bustle-back dresses is assured for being interpreted in simple words, bustle-back is merely a way of saying "back fullness" achieved in ingenious ways that are conservative and wearable without being overdone. The suit to the right is very style-

revealing, stressing as it does the continued triumph in the mode of richly colorful striped woolens. The stripes, the plaids and the marvelous artistry with which designers combine them with monotones in related tone simply hold one spellbound. The gorgeous striped wool that fashions the costume suit keys to the smartest fall colors, harmonizing vibrant greens with luscious blackberry tones. The skirt is allaround pleated. The boxy jacket tops an emerald green velvet blouse closing with novel key-and-keyhole ornaments. An oversize quill tons the moss green sailor hat.

You may expect to see gay little velvet jackets dotted all over the college campus. The girl centered in the picture wears a snug black velveteen jacket quite military looking as so many of the newer fashions are, with a plaid pleated skirt that introduces an artful blend of grape, pink and yellow tones, climaxed with a sweater in warm yellow hues. Juniors, likewise college sophisticates, simply dote on the new plaids and stripes. A Scotch cap of black velvet with satin ribbon streamer, together with the plaid carries the message that fashions for young folks have gone very Scotch this season. (Released by Western Newspaper Union.)

High Color Tweed

Here is a smart version of the costume suit that combines plain woolen with gay tweed. The fitted jacket is of yellow and black tweed in a diagonal weave. Yellow and gold tones are held in high favor according to what is showing in advance Paris collections. The costume includes a jacket, swagger coat and skirt. This idea of both jacket and topcoat done in matching color scheme is very practical. The saucer brim hat is of black felt.

GAGETOWN

McKinnon-Hunter Nuptials-

At St. Charles Church in Detroit on Saturday, September 9, at 10:00 a. m. occurred the marriage of Miss Kathryn McKinnon, youngest daughter of Mr. and Mrs. Neil Mc-Kinnon, and Francis V. Hunter, son of Mrs. C. P. Hunter. The ceremony was performed by Rev. Fr.

The bride was gowned in a street-length dress of slate blue with mulberry wine accessories and carried a prayer book. She was attended by her sister, Miss Florence Mc-Kinnon, who wore a steel-blue street-length dress with black accessories. Paul C. Hunter of Gagetown attended the groom.

Following the ceremony a wedding breakfast was served to the immediate families in the Wardell

Yoohoo!

Echo was a mountain nymph who fell in love with Narcissus, according to Greek mythology. When Narcissus failed to return her affections, she pined away until there was nothing left of her but her voice. She then took to the mountains where she mimicked every vocal sound she heard.

Mr. Farmer

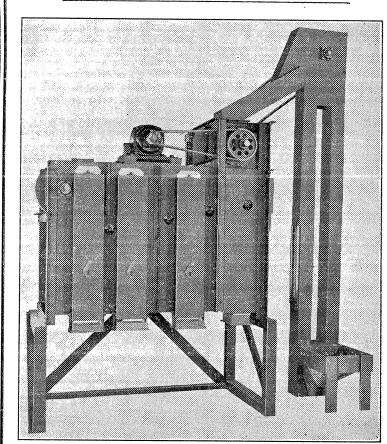

We are pleased to announce that we have recently installed in our CASS CITY plant the following new machin-

99 D BB Clipper Cleaner

This new machine is the last word in BEAN CLEANING MACHINERY.

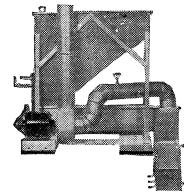

It is modern in every detail and will REDUCE your BEAN PICK to a minimum.

Dreadnaught Corn Cutter

This new machine is a self-contained rotary CORN CUTTER, GRADER and CLEANER.

We can now supply you with A-1 steel cut corn as well as do custom work for you.

Gustafson Seed Grain Treater

It is very important that seed grain be treated for smut.

Bring in your wheat, have it thoroughly cleaned and treated with NEW IMPROVED CE-RESAN at a minimum charge.

We earnestly solict your patronage.

Frutchey Bean Co.

Cass City, Michigan
