Soil Plans Should Cover Several Years

Fertilize to Replace Lost Organic Matter

Stressing that there are no "short cuts" to producing high yields on poor, run-down, overcropped land, Prof. A. L. Lang of the agronomy department, University of Illinois, advised farmers to let soil tests guide their soil improvement and fertilizer program.

"When soil tests show strong acidity and a need for limestone, they also indicate a low state of organic matter," he pointed out. "When soils are low in organic matter, they are usually in a state of poor tilth, lack nitrogen and have insufficient water holding capacity. Any amount of mineral fertilizers cannot be expected to economically raise corn and other grain crops yields until the lime, organic matter and nitrogen requirements of the soil are met."

Lang urged farmers to apply limestone, phosphorus and potash fertilizers for the legime sod crops in accordance with the needs of the land as indicated by chemical tests.

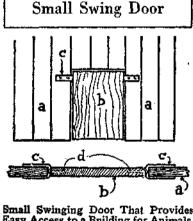

Phosphate being mined for inclusion in mixed fertilizer.

Then, he added, grow maximum legume hay crops, either plowing them back into the soil green or äs animal manure. "The best method is to plan a

business-like, systematic program or action on the farm that will over a period of years return the land to its native state of high and permanent productivity," Lang stated. On highly productive soil, mixed fertilizer of the proper grade and properly applied may supply economically a portion of the main-

tenance rations and in addition give that extra "umph" so often needed during the early stages of growth, he said. Quickly available plant foods applied near the seed of crops at planting time help overcome many external handicaps such as and unfavorable weather conditions, he concluded.

Small Swinging Door That Provides Easy Access to a Building for Animals.

This swing door provides easy access to any building for small animals. The hinges are bolted to the wall or fence as shown with two bolts each. But before bolting hinges to the wall, they are fastened with two large nails to the door as shown. The type of door would be satisfactory on hog houses during winter months.

Clipping Dairy Cows

Insures Milk Quality A few minutes spent clipping the cow's belly, udder, flanks and tail will not only save

time of brushing and washing them but will greatly reduce the bacteria count, according to tests conducted at Michigan State col-It was found that

the count was two to four times higher in the case of milk from unclipped cows than from those which had been properly clipped.

Farm Doors Opened

By Automatic Control Many automatic controls are being applied to reduce the man-hours of labor on the farm. One of the newest is an adaption of the proximity control, so sensitive to any object which comes near, it automatically throws a switch to open gates when cows gather before milking time. The Minneapolis-Honeywell device is worked in conjunction with an automatic timer, thus preventing gate opening too soon.

Plans for Return Of War Dead Told

Expect to Begin in Spring If Army Approves.

SAN FRANCISCO. - The army has detailed plans for bringing home America's World War II dead, beginning this spring, if congressional authorization is granted, the

The Ladies' Aid Society of the Novesta Church of Christ will hold source of its information, except to documents now being submitted to high war department officials.

A bill dealing with return of war spent the week end at the home dead has passed the house and now of his parents, Mr. and Mrs. Peter is before the senate military affairs

committee. Other points included in the

Chronicle story: The dead will be returned from 454 sites in 86 countries and islands. New York will be the major receiving point for dead from Europe

The first burial ship is scheduled to leave San Francisco April 1 and thereafter one ship a month will leave both San Francisco and New

York. The project is expected to take at least 18 months. Cost has been estimated unof-

ficially at \$500,000,000. If next of kin desire, the dead will be left where they are now buried. Liberty ships, painted white with a purple band around the hull, will

The coffins will be walnut stained, each covered with an American

Each burial ship will carry from ,500 to 7,000 bodies.

Specially converted trains will earry the dead to distribution points. Because present plans call for no military cemeteries in isolated areas, all dead will be arbitrarily returned from China, Burma, India, the Malay States and the Dutch East Indies: from Central and South America, except the Canal Zone; from Africa, except in the North American theater; the Middle East. nd from all islands in both the Atlantic and Pacific, except Hawaii, the Philippines and Puerto Rico.

Ten-Year-Old Gunman

Robs Restaurant Cashier NEW YORK .- A 10-year-old boy, small for his age, was held by po-lice as a juvenile delinquent after attempting to rob a hotel dining room, wild west style, with two toy

Blond and dirty-faced, he stalked into the 16-story hotel with a toy pistol in either hand. When he approached the desk of Miss Rennie Diamond, who had been cashier in the dining room only a week, he slammed one pistol on the desk and shouted: "This is a stick-up."

The cashier jumped back in astonishment and as she did so the boy grabbed \$22 out of the cash drawer and stuck it in his pockets. Just then a waitress. Miss Mona

Smith, came over to the desk, patted the boy on the head and asked the cashier: "This your little boy, "Cut that out!" cried the boy, fu-

riously. ''This is a stick-up.'' He jammed a pistol into Miss Smith's side. She shook him by the shoulders until both pistols dropped to the floor, one breaking into four pieces. When police came they recovered

the \$22 and sent the boy to the city youth center as a delinquent.

Air Age Here, Figures of **Aeronautics Board Show** WASHINGTON, - The air age is

This was revealed recently with announcement by the civil aeronautics board that some 50,000 additional pilots have been granted civilian flying permits during the last

The board announced at the same time that the number of licensed civilian planes has increased during the year from 21,893 to 36,583,

Approximately 182,000 civilians now are registered pilots, the board said, compared with 132,432 on January 1, 1945. In 1939 only 31,264 pilots had certificates.

Army's 'Old Gray Mare'

Turned Out to Pasture SAN FRANCISCO. - Belle, the plump "old gray mare" who lured more than 2,000 mules from boxcars to corrais during the war, was turned out to pasture recently with a "well done" from port of embarkation officials.

Col. George J. Rife, chief of the port animal depot, said Belle gave her bit for victory, but added that he wasn't quite sure whether it was Belle, herself, or the bell he hung on Belle that really turned the trick.

Finds Way to Beat Shortage of Rooms FREMONT, OHIO.-Sgt. M. F. Baler came here to start army

a room. He talked with Jack Horner, 18, a West Virginian, convinced him the army was the place for him, enrolled him and then rented his

recruiting work but couldn't find

Dog Breeds

"Pinscher," German for fox-terrier or English terrier, is the German breed which corresponds to the English terrier. The German boxer, believed to have originated in Germany back in the 16th century, is a fighter with a bulldog expression but the muscular body and long legs of a mastiff. It is said that when used as fighting dogs decades ago, two boxers would fight standing on hind legs and sparring with front legs. No doubt the term "boxer" grew out of this,

MUST LEARN TO LIVE WITH AND

Concluded from page 4. Joe Castello, 15, Black School, appliances, was stressed. Dr. Geo. Gilford 4, Mrs. Joanne Bradley, A. Buttrick was quoted in the sentence, "Our gadgets will blow us

> purified". (2) "Meakness is greatness" was the second axiom based on the word of the Master "Blessed are the earth" Animals, nations, races that serve one another will survive. Those that live selfishly will greatest achievement in the contri- form. bution one can make, was stressed as the way of real greatness. Greatness is no end in itself, but arises out of noble and unselfish living. Jesus Christ proved this by his own living, as he proved all axioms that pertain to moral

and spiritual success. (3) The third axiom suggested was that "Losing is Finding", a truth generally denied in the pracnently true in the realm of spiritual 4, Teetzel School, Evelyn M. Poor, to a great cause, the greatest possible loyalty, is the redemption of mankind, through the agency of the Kingdom of God. In this all youth may have a part by the surrender of their best selves. Livingstone who buried his life in Africa and died in most obscure circumstances, yet stands today among the greatest of the figures of history was mentioned. The knight, who faces life with a deep desire to serve a great cause, say- fuses are not of the correct size.

Robt. T. Craig, 14, Almer 6, Beverly School, Viola Beardslee, ing, "Man am I grown. A man's work must I do. Follow the deer. Follow the Christ! Follow the King. Live pure, speak true, right wrong, follow the King, else wherefore born?" was one who had sensed the truth that "Losing is Finding".

Again Jesus was held up as the pattern for a truly abundant life, as he found strength through purity of heart and purpose, greatness in a self-effecting spirit of humble service to others, losing his life for mankind, to find it in the power of his resurrection and in his moral and spiritual leadership which is the hope of our modern

SERVCE MEN TO PARADE ON MEMORIAL DAY

7000 Tons Of Coal — Diet For A Day

Only enough for one day's electricity for the 3½ million people we serve...

Pictured above is one normal day's diet for the giant furnaces of the Detroit Edison Company. We're using less than 7000 tons now, thanks to your help in conserving electricity. But our coal reserve is low. It may be two or three weeks before enough coal reaches us to permit unrestricted use of electricity.

You will be notified as soon as the emergency is over. Meanwhile it's urgent that ALL citizens in Southeastern Michigan continue to observe brownout measures.

THE DETROIT EDISON COMPANY

Ernest Croft; sec.-treas., Guy W. Landon; directors, Raymond Mc-Cullough, Frederick Pinney, Meredith Auten, Cameron Wallace.

Guy W. Landon, Secretary.

Smoke Appliances

The army's mechanical smoke generators come in two sizes. The largest, truck or trailer mounted, can blanket a square mile within 10 minutes. The smaller model, of footlocker proportions, can blot out an area five or six miles long by 200 yards wide. The smoke pots vary from the II pound not which burns for 6 minutes to the 30 pounder which smokes for 20 minutes.

TOO REALISTIC

Little Lucy was something of a fraidy cat, but most ingenious in her efforts to conceal the fact. One night. at the movies, her dad occupied a seat near the middle of the theatre. while Lucy went down front to join some of her little friends.

Suddenly, in the news reel, a raging forest fire leaped upon the screen. In mortal fear, Lucy leaped from her seat and scooted back to daddy.

iously inquired. "Did the fire frighten you?' "Oh, no!" protested the sly young

coward. "The smoke got in my

You can't always be sure of picking a winner in a horse race. BUT PLANT BEANS this spring and be sure of a winner. HERE ARE THE REASONS WHY:

- 1. The paying price to the grower for 1946 Navy Beans is \$7.00—a 75c increase over the 1945 price.
- The market is eager for 1946 Michigan Beans The carry-over from the 1945 crop is the lightest on record.
- The demand for Michigan Beans is at its greatest peak. Everyone wants beans Grocers, wholesalers, shippers, canners, and most of all, your best customer, the HOUSEWIFE.

The goal for Michigan is 700,000 acres. So, PICK A WINNER-PLANT BEANS IN 1946.

"Cook 'em any way, Michigan Beans are finer"

PROTECT YOUR FUTURE BEAN MARKET BY FILLING THE PRESENT DEMAND FOR BEANS.

Protect your crop and income by using tested, high germinating seed beans.

Woman's World Flour Sacks Aid Seamstress **As Fabric Shortage Continues**

By Ertta Haley

IF YOU'VE tried to do any sewing lately and have scoured the stores in a vain attempt to find suitable material for yourself, then you will welcome any suggestion that gives material easily. Long before we had the wealth of fabrics found in prewar times, many homemakers were making good use of those large, clean, readily available flour or sugar sacks.

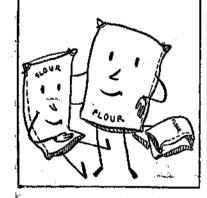

Some of the department and notions goods stores still carry them, and you might well look to them as material for a cheerful morning dress or cover-all apron. Cheerful? Why yes, of course. Just get out the package of dyes and dyeing kettle and go to work. Since these sacks are cotton, they take dye very easily, and of course you do not have to bleach them first. You can have any color you desire-a bright kelly green, rose pink, aqua or robin's egg blue.

Depending on your size, it will take from two to four of the large size flour or sugar sacks to give you the material you want. Take out the seams first, and make certain the sacks are clean. Use the directions for the particular dye you have on hand and go to work. After the fabric has been dyed, dried and ironed. lay it out for the pattern, making sure that no materials will

Checking Measurements Considered Essential

Some of you may say, "Well, it's not so important that my house dress fits so perfectly." Why shouldn't the dress you do your work in, the one you spend most of the daylight hours in, be well fitted? Actually, good fit is important here as in a dress-up dress. Then too, these dresses are relatively simple, and you can learn good fitting from making them-a thing of importance when you begin sewing on the "more important" articles of clothing.

Select or make a pattern that comes exactly to your own bust size. Adjustments of an inch or so can be made easily, but remember it is easier to make a pattern one size larger-a little smaller, than to cut

If you have some flour sacks. . . .

slits in a pattern that is too small to make it fit.

A good way to get this fitting problem in hand is to take your own measurements and pencil them down side by side with the pattern measurements. Then you will know exactly the amount of adjustment needed, and can allow accordingly.

In cutting a dress from a flour sack, bear in mind the grain of the material and place the pattern correctly on the lengthwise grain. Mark all sewing guides either with stitching, tailor's tacks or chalk. This makes the work move along much

Here Are Tips For Sewing

There are usually some parts of dressmaking that are more tricky than others. Take the sleeves, for

Convert them into a morning dress.

example. Just how are they to be eased into the garment without ugly gathers where they should not be? The best way I know is to take small basting stitches around the fullest

Cool Crepe

Here's a newsworthy print inspired by a newspaper girl's bright idea. This cool attractive dress from Herbert Sondheim's collection has brief sleeves and simple lines that keep you cool and well dressed at the same

part of the sleeve that fits to the dress, and draw these gently until the sleeve fits the armhole. Unless you are experienced, do not try to sew the sleeves on the machine before basting.

After the sleeve has been basted, try the dress on and see how the

fortable. You can determine the natural waistline by putting a tape measure around the waist and bending to see that it is exactly in place. Then mark the natural waistline on the garment with chalk.

Even in morning dresses, the fit over the bust is important. You might try underarm darts, even if they are not marked on the pattern. These darts, you know, are found on the most expensive clothes just for the sake of fitting.

Sheer Materials

Now that warmer weather is here and you are sewing on the lighter weight materials, keep in mind these pointers to make the

1. When sewing on sheer fabrics, use tissue paper or obsolete patterns to place underneath the garment when sewing with the machine. The tissue paper comes off almost by itself and insures

a seam that is not too tight. 2. A double stitched seam is the simplest type to use for finishing sheer fabrics. The first row of stitching is on the seam line. and the second an eighth of an inch outside it.

3. A lapped seam is often used on bulky net or closely patterned lace material. The surplus edges of the seam are trimmed after the edges are overlapped.

4. Overcasting is another neat method for finishing seams on sheer fabrics. In this case, make a plain seam first and then press it open. Overcast both edges.

5. The fabric which you use determines the type of hem. For chiffons, organdies and georgettes, use a rolled or picot hem,

Spring Fashion Notes

Cotton achieves new importance this season by being handled not as cotton, an inexpensive fabric, but like silk or rayon.

Open-crowned bonnets, rather like the old-fashioned poke bonnets, are new, too. You'll notice that lots of we haven't seen for a long time, and they are flirtatiously trimmed with embroidered pique or the like. | brown or navy.

Border prints offer an attractive suggestion for your play clothes. The gay colored bands may appear in the skirt, in the bodice or on the
