

Paving Job on M-81 Is Let to Schwaderer & Co.

Work on Project Starts Next Monday and Will Be Completed in December

It is probable that by the time Christmas arrives, automobilists will be privileged to drive the entire length of the highway on M-81 between Caro and Cass City on a cement pavement.

E. B. Schwaderer & Co. were the lowest of five bidders on the 4.86 miles of highway between the two villages which are still unpaved. This stretch of highway on M-81 and 700 feet of village pavement in Caro between W. Bush and Quinn Streets are included in the project which was let to the Schwaderer Co. for \$317,004.51.

Mr. Schwaderer says the work will be started next Monday. He expects to finish the paving job in December.

Help Prevent Farm Accidents

National Farm Safety Week is being observed this week, says Charles E. Figg, director of the state department of agriculture, and he is asking all persons and organizations concerned with agriculture and farm life to cooperate in a united campaign against farm accidents.

Many have been prone to consider farming and homemaking as beyond the realm of working conditions generally held dangerous but facts prove the contrary.

Last year agriculture had 4500 accidental work deaths in the United States—more than any other industry. Work accidents on the farm cost the nation's agriculture enough man-days of labor to produce a normal year's wheat crop. During this same period, the farm home was the scene of 6500 fatal accidents, the greatest number occurring to farm people in any one place. Falls and burns accounted for two-thirds of these. According to records, Michigan had 83 accidental farm work deaths, more than one-half of which involved machinery and livestock.

A bit more care here and there will prevent an accident. Multiply that care by thousands of farms and we will have a host of accidents prevented. It's worth it.

164 Tuscola Co. Youths Enrolled in Swim Classes

Largest Group Reported Registered in Three Classes at Cass City Pool

Beginners, as well as a few experienced swimmers, are receiving instruction in swimming and water safety in regularly scheduled classes, which are sponsored by the Tuscola County Chapter of the American Red Cross.

Mrs. Norman Wigley of Vassar, secretary of the chapter board of directors, reports a total of 164 young people of the county are now enrolled.

Thirty-three boys and 25 girls are enrolled in beginners' classes, seven boys and girls are enrolled in intermediate, swimming class, and only 2 persons are enrolled in junior and senior life saving classes at the Cass City pool. Additional enrollments are still being received for the last three classes mentioned. Many of the young people enrolled in these classes reside in the rural community about Cass City while several live in Caro.

Thirty-seven boys and girls are enrolled in the beginners' class, and 27 boys and girls are enrolled in the intermediate class at North Lake. The classes at North Lake are conducted in a specially roped in area at the Murphy Park Beach. This area has a clean gravel bottom.

While many students at the North Lake classes reside at or near North Lake, young people from the Vassar, Millington, Postoria and Mayville communities are also enrolled. Interested parents of these communities are providing transportation.

Classes at Cass City and North Lake are conducted daily except Sunday.

Thirty-one are enrolled in the beginners' class being conducted, once a week in W. J. Moore's private pool in Caro. Mrs. Wigley, stated that while Mr. Moore's kindness in permitting the Red Cross to use his pool each week is greatly appreciated, and while one class a week is a help to the class members, the Red Cross would prefer all students to have at least three lessons per week. They very much hope enough citizens of Caro will volunteer to drive their cars, so the boys and girls of Caro may receive additional instruction at Cass City. If enough transportation is volunteered additional people can be enrolled in classes. Persons wishing to aid the Red Cross in this worthwhile undertaking are asked to call the Red Cross office in Caro, 612.

All expenses related to the water safety and swimming courses, except transportation, is carried by the local Chapter of the American Red Cross.

Ton of Beef and 2,500 Buns for V-J Barbecue

Twenty-five Young Women Will Be Invited to Assist in the Serving

Free barbecue beef sandwiches will be served World War II veterans attending the first anniversary of V-J Day, at Caro, August 14. The committee in charge of arrangements completed negotiations with Rev. J. W. LeVan, Flint, to take charge of the barbecue. He will arrive in Caro Monday, August 12, to superintend setting the barbecue pit and will be in charge of the serving. The committee has placed an order for a ton of beef, and 2,500 buns.

Running a barbecue has been a hobby with Rev. LeVan, who is pastor of Trinity Methodist Church of Flint, for years, and he is making no charge for his services. He has operated barbecues at many functions throughout Michigan, and members of the committee consider it a fortunate circumstance that his services will be available. The barbecue pit will be set up at Caro fair grounds, where most of the celebration honoring Tuscola county World War II veterans will take place.

Rev. LeVan says it should be possible to serve the estimated 1,200 veterans who are expected and their ladies in 25 minutes. One serving will be made right after the parade, shortly after noon; and the other in the evening. Twenty-five young women will be invited to assist in the serving, and Judge Almon C. Pierce, treasurer of the committee, will be in charge of getting six to eight men to cut the meat. Pickles, mustard and onions will be offered with the barbecued sandwiches.

Earle Parchman, Williamston, has been secured as master of ceremonies. A letter received by Chairman Clarence R. Myers Tuesday from Mr. Parchman, reads that he is anxious to be present at the party to honor veterans. Mr. Parchman is a World War II veteran, serving as Musician First Class in the U. S. Naval Reserves for 42 months, of which 32 months were

Railroad Mileage The United States, which has more miles of railroad than all of Europe or Asia, is not in top place for railroad miles per population.

Canada has 45.4 miles of railroad for each 10,000 inhabitants. Argentina and Australasia have 38 miles each; Newfoundland has 34 miles; Bechuanaland has 27.8 miles per 10,000 inhabitants, and then comes the United States with 21.

Test Color-Fastness To test material for color fastness, fasten a scrap of the test fabric along with the colored trimming to be used, such as ric-rac or tape, to a piece of white cloth. Then carefully wash and iron the material. If the white cloth has picked up any color from the fabric or trimming, the fading will be the same when the garment is made.

Fresh Bread Hold onto bread freshness. A well-ventilated, washable box provides good storage. If you can make room in the refrigerator, cool storage is still better for delaying staleness and preventing mold. Wherever it is stored, wrap bread well in moisture-proof paper.

Oak Bluff Breezes

The Oak Bluff colony has been entertained for the past two weeks by a pair of cardinals, particularly by the male bird. He uses the highest limbs of the tallest pines for his perch and with his bright red plumage and prominent crest is a beautiful bird. His shrill call and musical song is far superior to any other native birds. He is noble in carriage, amiable in disposition and is an excellent songster. They are really southern birds, not too common in the north, yet are hardy and occasionally spent the entire winter in the north under favorable conditions and when food is available. They frequent gardens, plantations and open woods and subsist principally on seeds, berries, fruits and insects, and if food is left at feeding stations, will return daily in cold weather. We suggest you encourage and invite these feathered friends to your door. The effort will pay friendly dividends which you will enjoy many times over. Be generous to them.

INTERPRETING THE NEWS

By Gene Alleman

Living symbol of the power of an idea is Mary Jane Hayden, 18-year-old daughter of Perry and Elizabeth Hayden of Tecumseh.

The Haydens founded the "Biblical Wheat" demonstration of tithing whereby farmers have agreed to donate one-tenth of the annual yield of grains, starting with one bushel of grain donated by their choice. The sixth and final planting of dynamic kernels has produced approximately 50,000 bushels of wheat, valued currently at about \$100,000.

Sown this year by 267 Michigan farmers, the tithed wheat will benefit 30 religious denominations and about 175 individual churches. Much of the wheat will be donated to famine relief.

Mary Jane has dedicated her life to the cause of Christ. She will be a foreign missionary, planting the seed of Christianity and the spirit of the Golden Rule in the hearts of people in far-off lands.

Labor unrest in the city, not the revolutionary threat of the atomic bomb, is prompting industry to decentralize production in favor of small towns.

While on a brief swing of West Michigan last week, we ran into several cases of this post-war trend.

It was built about 1900 by the Belding Brothers Silk company and operated steadily until 1931 when it became a victim of the depression and remained idle for nearly nine years.

The Belding mill plant is the new home of a division of the

MISS GRZEBSKI MARRIED IN DETROIT CHURCH

Concluded from page 1.

of white net and her flowers were a bouquet of Talisman roses.

The bridesmaids were Miss Mary Stachura, sister of the groom, Miss Julia Lagos of Cass City, a very close friend of the bride, Miss Delphine Grzebski, sister of the groom, Mrs. Ann Rutka, an aunt of the bride, and Mrs. Helen Stevens, a sister of the groom. They wore matching gowns of white satin and net, with sweetheart necklines and three-quarter length sleeves. Their headresses were the same as that of the matron of honor, and their flowers were yellow Talisman roses tied with blue ribbons.

Frank Teporowski, a very close friend of the groom, was best man and ushers were Louis and Stanley Stachura, brothers of the groom, Chester Rutka, uncle of the bride, and Gus Stevens, a brother-in-law of the groom. They wore tuxedos with white carnations as boutonnieres.

For her daughter's marriage, Mrs. Grzebski chose a navy blue ensemble with white accessories, and Mrs. Stachura wore a green costume with white accessories. They both wore corsages of yellow Talisman roses and white carnations, trimmed with blue ribbon.

Following the ceremony, a breakfast was served to 50 couples at the Sawicki Hall. At seven o'clock a reception was held for 300 at the same hall. The table was centered with a three-tiered wedding cake.

After a week's honeymoon in northern Michigan, Mr. and Mrs. Stachura, Jr., will make their home in Detroit.

Mr. Stachura is employed at the Peter Dalton factory. He was discharged from the Army last October after four and a half years of service.

Pre-nuptial parties were given by the bride's mother, Mrs. Louise Grzebski, the employees of the Hair Experts, and by Mrs. Stella Zalke, a sister-in-law of the bride.

Cotton Easy on Land

Cotton removes less fertility from the soil than other major crops. Experiment station authorities say that cotton is the easiest crop on the land from the standpoint of using soil nutrients. Grown in rotation with soil improving crops, and with cottonseed feed products fed on the farm, cotton fits ideally into a soil conservation program.

Drug From Buckwheat

Rutin, a drug effective in treatment of high blood pressure, is now being made from buckwheat, as a result of studies made at the department of agriculture eastern research laboratory. Estimated acreage needed to supply required amounts of the drug is 50,000 acres. For production of rutin, the buckwheat is harvested five weeks after the seed is sprouted instead of when the grain has ripened.

How to Make False Onyx
An interesting method of making a false onyx is by soaking a banded chalcedony in dilute honey or sugar syrup. The stone is then placed in hot concentrated sulphuric acid which chars the sugary material in the porous bands, leaving the white bands as they were originally. This dyeing is practiced mostly in Germany.

Murray Corporation of America which employs 550 persons to make springs for Oldsmobiles. Another new industry is the Extruded Metal Corp., employing 300 persons to make airplane parts. Gibson has a stove factory also at Belding. Belding is now back on the map. Things are booming.

North of Belding is another enterprising small city, Greenville, with plants making Gibson refrigerators and Federal Mogul trucks. Don Smith, newspaper publisher, reported that Greenville has a labor shortage; that local industries hope to double payrolls in the next five years.

Cedar Springs, the red flannel home, was selected recently for a branch of the Keeler Brass company of Grand Rapids. Its big industry is the Interstate Creamery which employs 80 persons, pays them \$3,500 a week, and puts \$30,000 into the bank accounts of dairy farmers every six days.

Through the courtesy of Cy Johnson, plant superintendent, we witnessed the assembly line production of sweetened condensed milk, of which 250,000 cans are being turned out daily for shipment overseas. Interstate recently opened up branches at Edmore and Reed City.

Sparta, also in Kent county, brags of a "million dollar peach belt," but it has several prosperous industries including a branch of the Muskegon Piston Ring company and a plant of the Carnation Milk company, only one of its kind in Michigan. Nearby at Kent City is the Larsen canning plant.

Growers near Sparta are in clover this summer. Cherries are bringing \$300 a ton, or around 21 cents a quart. Pickers earn \$1 an hour, compared with \$1.50 a day pre-war. One Sparta grower, a graduate of Michigan State College, netted \$2,000 an acre from strawberries on a three and one-half-acre tract.

Up in Newaygo county at Grant is an up-and-coming agricultural center. Nine new buildings are under construction in the business district, thanks to high prices for onions, celery and carrots.

Grant is proud of its fine community building, the gift of heirs of a leading West Michigan lumberman, the late D. W. Squier, who left property in 88 states.

The town of Newaygo on the Muskegon river is the home of a new industry, the Robey Tackle company, making fishing tackle and tennis shoes. It was started by L. L. Robey, former salesman for Shakespeare at Kalamazoo. Newaygo also has the newly organized Post Frozen Products company and the Newaygo Milk Products company, both financed by Grand Rapids and Fremont people.

At White Cloud, county seat of Newaygo county, is a lumber company which is "going to town" with prefabricated houses. Three rooms and bath for \$1,300, so we were told.

Scottville is the home of the world's largest canning plant for string beans. It is operated by the Stokely company of Indianapolis. When we were there, the company was advertising for 2,000 women to work five or six weeks.

Traveling northward along the sandy west coast with its succession of lakes, most of them connected to Lake Michigan, we visited Manistee, Frankfort, Beulah and

Conceived by the American Legion and legalized as a holiday by the state legislature with an official proclamation by Governor Harry, "Victory Day" will be celebrated in Michigan Wednesday, August 14. A number of Michigan towns will hold rousing receptions for World War II veterans. State employees now have ten legal holidays with pay; "Victory Day" will be No. 11.

An eye-witness true story: Recently we were week-end guests of Richard "Dick" Fletcher of Bay City at his Rosecommon summer place. On a day's canoe trip down the South Branch, AuSable, we went by four fishermen, each of whom was eager to get the daily limit of 15 trout. At the Smith bridge the four men caught up with us. Much to our surprise they returned 42 live trout to the stream—the day's creel. How many sportsmen would do the same?

The House That Jack Built

This is the house that Jack built.

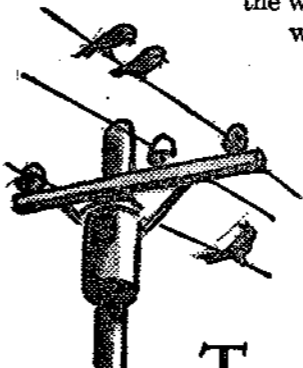

This is the wife that keeps house in the house that Jack built.

This is the washer that does the wash that helps the wife keep house in the house that Jack built.

This is the iron that irons the wash the washer washed, that helps the wife keep house in the house that Jack built.

This is the wire that carries the power that heats the iron, and turns the washer that does the wash, that helps the wife keep house in the house that Jack built.

THIS is the story of better living—of electric living—in Jack's house. The tale could go on endlessly. For electricity is a servant of many talents, of which washing and ironing are but two.

The electric power that helps Jack's wife is always ready, dependable, available in any quantity at any time. And Jack doesn't need much jack to pay the bill.

This is the company that strings the wires and makes the power that gives the Jacks—and countless families like them—all the comforts and convenience of electric living.
