At the Rotary Club luncheon on Tuesday, Charles Welsh of the educational division of the Michigan Department of Conservation presented two reels of technicolor movies on "Wild Wings" which illustrated bird life in the state and a reel on "Canoeing on Michigan Streams" which depicted beautiful scenery in the Upper Peninsula and the northern part of the Lower Peninsula.

Ray Fleenor, chairman of the Boy Scout committee, explained the drive in which a goal of \$700 is set for both Boy and Girl Scout programs in the Cass City community in 1947. Mr. Fleenor presented to the Rotarians, sponsors of the Boy Scouts in Cass City, the Scout charter.

M. B. Auter, as secretary-treasurer of the Community Hospital fund, announced an auction sale which will be held Thursday, Nov. 7, the proceeds of which will go to the fund. He said great interest has been taken in the project and that farmers had already offered several steers and cows as their contribution for the event. The sale will be held at the city park, and if the weather is unfavorable, in the warehouse of Ryan & Cooklin on East Main street.

Luncheon guests Tuesday included Howard C. Conover and Howard J. Burgess of Lansing, R. F. Maycen of Chicago and Eric Clare of Jamaica, B. W. I.

## Rayl Sugar Trees Near Deford Burn

From Deford correspondent. Mr. and Mrs. Earl Rayl attended the funeral of one of Mrs. Rayl's uncles in Bay City last Tuesday and upon arriving home found that their woods had been afire, with one section quite seriously burned. On Wednesday night the fire broke out again with the result that many of their maple sugar trees were completely ruined. All the arch wood and sugar shanty were also consumed by the fire as well as four cords of wood which had been piled for use next spring.

The woods was the source of maple syrup which the Rayls made each spring and is a heavy loss to them.

They are grateful to their neighbors for their help in fighting the flames.

It is thought that hunters may have caused the fire.

The occasion was a fall missionary rally of the society to which the men and women of the church were invited. The meeting was held in the dining room in the basement of the church which was prettily decorated with bouquets and baskets of autumn flowers and colored foliage.

Kim in her usual efficient and capable manner. She spoke of economical and political conditions in that large country, besides giving many other interesting facts.

## Michigan Mirror

Public schools of Michigan will gain on November 5, regardless of how voters decide the fate of ballot proposal No. 2.

This proposal would amend the state constitution whereby 76 per cent of all sales tax revenues would be earmarked for local governments. Schools would get approximately \$100,000,000 a year compared with \$60,000,000 in 1945-46. Cities, villages, and townships would get \$47,000,000 instead of \$20,000,000.

If the ballot proposal carries — and the Michigan Education Association believes it has a 50-50 chance of so doing — then school teachers will rejoice. No more legislative lobbying for funds! The state constitution will guarantee in perpetuity — as long as the amendment stands — a big boost in money for payment of salaries and other expenses.

School teachers are underpaid in this postwar inflation period, as compared with the rest of our wage-earners. Property owners balk at lifting the 15-mill limitation on property taxes. The amendment would offer a happy solution for public education. No doubt about that.

If the ballot proposal is defeated by voters who fear it would lead to additional taxes in 1947, then the schools still stand an excellent chance.

## Light Response

October 22, 1946

Dear Fellow Citizens: There are around one hundred boys and girls in this community already registered in scouting. There are many adult leaders donating their time to the supervision of these scouts. However up until Tuesday morning of this week there were only three citizens of this community who thought enough of this program and of our youth to join in its work by giving to its 1947 drive.

The scouting committees do not intend to make a canvass of the homes of Cass City. However they need and appreciate the support of the community as shown by your contributions. They are still confident that as their 1947 drive winds up its final week, you will show your appreciation of their efforts by stopping at either local bank or with Ray Fleenor or Howard Ellis and join in the program. There is a need for scouting and a need for each of you to be behind this activity. Won't you stop this week, now, and do your part?

Yours,  
HORACE PINNEY,  
Neighborhood Commissioner

## Detroit Edison Asks Permission to Reduce Charges

The Detroit Edison Co. has filed with the Michigan Public Service Commission a formal request for permission to reduce charges to all classes of electrical customers.

The request is contained in two petitions receipt of which has been announced by Wm. J. McBrearty, chairman of the commission, who fixed Oct. 29 for a hearing in Lansing.

The first proposal would reduce by \$1,500,000 bills to be sent to farm, residence and commercial customers during the remainder of 1946. The second would effect a rate reduction of three per cent for service to industrial customers effective Jan. 1, 1947. The estimated savings to industrial customers for the year 1947 is \$927,000.

The immediate reduction to the first class of consumers would amount to 30 per cent of one month's commercial bill and 15 per cent on the two months' residential bill. Commercial customers are billed monthly, so the entire 30 per cent would be deducted from their November bills. Since farm and residence customers are billed bi-monthly, 15 per cent would be deducted from their November and December bills.

In a third petition the Edison company proposes to strengthen its Employees Retirement Fund by transferring to that fund from a reserve account the sum of \$5,804,500.

EASY ON THE EYES...

MODERN schoolroom lighting is carefully planned to provide the best possible aid to study. Every effort is made to keep that lighting at top efficiency, because educators know that good marks and good eyesight depend on it.

But lighting at home is not always so easy on young eyes. A light may glare because the bulb is too large or because it's improperly shaded. Your child may not complain, because he's grown accustomed to it—but that deceptive glare can tire his eyes and brain, give him B's where he should get A's. It may even cause headaches or harmful eyestrain.

There's no difference between the electricity in your son's school and that in his home. No difference in the quantity used. As far as the quality of lighting goes—well, that's up to you. And the safest way to really know that your youngster's homework is easy on the eyes is to arrange for an Edison Home Service Advisor to call on you and check your lamps and fixtures. She can do this in a very few minutes... if necessary, show how you can bring

your lighting up to schoolroom standards. There's no charge for her visit—no obligation to you. And it's a real "ounce of protection" for your family's eyesight!

### FOUR WAYS TO GET THE MOST FROM YOUR LIGHTS

1 Dust steals light! Keep bulbs, shades and reflector bowls clean.

2 Replace dark-colored shades with light shades with white lining. Flaring sides are better than straight-sided ones.

3 Use correct-sized lamp bulbs and shades. Too large a size may cause fascinating glare.

4 Have your lamps and fixtures scientifically tested for quantity and quality of illumination. Your Home Service Advisor does this with a light-meter.

## McCallum-Herein

A pretty autumn wedding was solemnized at the Grant Methodist Church Saturday, Oct. 19, at one o'clock before a lovely arch of fall flowers consisting of asters, gladioli, dahlias and chrysanthemums, when Miss Veta Louise McCallum, daughter of Mr. and Mrs. Frank McCallum, of Grant, became the bride of William Hereim of Bimidi, Minn., son of Mrs. Pearl Hereim of the same city. Rev. Cle-tus Parker of Pontiac performed the ceremony in the presence of 150 guests of relatives and friends.

Miss Elva Marie Blair, wearing a blue formal gown, played the introduction and wedding march.

The bride was given in marriage by her father and wore a brocade, white satin dress, with long train, and three-quarter length veil, which fell from a small white cap. Her only jewelry was a string of pearls, which her mother wore when she was married. She carried a bouquet of yellow Johanna Hill roses and white mums.

Miss Yvonne Burrows of Detroit as maid of honor wore a pink net over satin, floor length dress. Her bridesmaid was Miss Jean McCreey of Detroit, who wore a blue net over satin, floor length dress. They both had headaddresses of flowers and shoulder tip veils and carried bouquets of flowers.

Little Sharon Sowden was flower girl and wore a floor length dress of blue and white. Gerald MacCallum, cousin of the bride, carried the ring on a white pillow.

Mrs. MacCallum, mother of the bride, was dressed in a grayish blue wool dress and wore a corsage of white mums and pink carnations. Mrs. Pauline MacCallum, grandmother of the bride, wore a royal blue dress and a corsage of white mums and carnations.

Olson MacCallum, brother of the bride, and Edgar Trebideau of Detroit acted as best men, and ushers were Donald McCallum, brother of the bride, and Lyle Diller, cousin of the bride. The groom and best men all wore dark brown suits.

A reception was held immediately following the ceremony in the dining room of the church basement. After the many gifts were opened, a buffet lunch was served consisting of ice cream, cake, cookies and a lovely wedding cake was enjoyed by all. The happy couple treated to candy bars and cigars.

Out-of-town guests came from Pontiac, Detroit, Bay Port, Bach, Owendale, Cass City, and several other places.

The bride is a graduate of the 1945 class from Owendale High School and the past year has worked at Chrysler's in Detroit.

The groom served several months in the army. They left Sunday for Pontiac and will leave soon to make their home in Bimidi, Minn.

Their many friends wish them a long and happy and prosperous wedded life.

Ten High Average Bowlers

McCullough 178, Ludlow 176,

Parsch 175, Larkin 173, F. Novak, sub., 172, Gross 172, DeFrain 171, Retherford, sub., 171, Reid, 170, Landon 169.

McCullough's team is still in the No. 1 spot but only by the scant margin of one point. Mac's squad encountered plenty of opposition in their series against the Larkin five and they were lucky to emerge with a single point as the Larkin-ites came up with their best brand of bowling and were able to hold the league leaders in check, even though the McCullough squad registered their highest totals for the season also. Capt. Mac's contribution to his team was 599 pins and this grand total was high for the week and elevated him personally from sixth place to the No. 1 bowler of the league. He displaced Herb Ludlow who has held down the hot spot for three consecutive weeks. Mac's games were 230-159-210 but the Larkin team had two members that turned in sizeable counts. Curt Hunt hit for 579 on games of 224-163-192 and Capt. Larkin followed closely with 568 pins.

Ludlow's team served notice that their bowling power should not be taken lightly, when they smothered the Parsch team and walked away with the four point win of the week. This slid their team into second place and but one point away from the leaders. "Ike" Parsch did what he could to hold his team together by setting the pace on games of 148-209-214 for 571 pins but it was not enough, yet it did jump him from seventh place to third on the high ten. In speaking of the individuals whose names are to be found on the high ten list, there appears for the first time this week a certain name that has been conspicuous by its absence. The season has gone along now for six weeks and this bowler has finally accumulated enough wood to silently slip into tenth place, whether he has dropped in on the keggers ahead of him to serve notice that an old expression (it takes a lean dog for a long race) might be true, remains to be seen but whatever happens it's a good bet that he will be making life bowling-ly miserable for a number of the present hotshots before the season closes next spring.

An even dozen keggers managed to throw in games over the 200 mark and this is the best weekly effort so far. They were credited to the following with Earl Douglas setting the pace with his 231 pin counter. McCullough was right behind with 230 and 210, Hunt 224, Kolb 222, Parsch 214 and 209, Piney 212, Dillman 205, Czesewski 205, DeFrain 203, Wallace 202, Larkin 201.

Guy W. Landon, Sec.

## A MESSAGE OF INTEREST to all who await deliveries of new Chevrolets

We want you to know that everything possible is being done to speed deliveries to you; but production still lags far behind schedule—even though Chevrolet has built more cars and trucks than any other manufacturer from January through September 1946

WE REALIZE how eagerly you are awaiting delivery of the new Chevrolet you have ordered from us, and we want to pass on to you the latest information received from the Chevrolet Motor Division, even though that information isn't too encouraging at this time.

It is true that Chevrolet leads all other manufacturers in total production of passenger cars and trucks from January through September 1946, despite the fact that Chevrolet was out of production entirely during the first three months of this year. It is also true that Chevrolet has continued to maintain its lead in total production during the third quarter of 1946. And yet production is still running far below desired levels, with the result that Chevrolet's output of cars and trucks through September 1946 was only 38.7% of the number produced during the corresponding period of 1941.

This means it may take many months for the Chevrolet Motor Division to reach peak

**Perspiration Stains**  
Yellow perspiration stains on white material will sometimes vanish when bleached in the sun after washing with soap and water. For stubborn stains, sponge with hydrogen peroxide. Or quickly dip the stained spot into a solution of two teaspoons sodium hydrosulfite to one pint water, and rinse immediately, but test the cloth for colorfastness to this bleach before using.

**King Cotton Takes Over**  
In early times flax was grown entirely for the fiber of its stalk, the source of linen. It dressed American colonists and has been a European crop since Stone Age days. Eli Whitney and his cotton gin delivered the stunning blow to flax as a textile fiber in the United States that sent the colonial spinning wheel to a corner of the attic.

**Eyes Suited to Water**  
Seals and sea-lions have eyes whose corneas are not smooth and for that reason have astigmatic sight out of water, says the Better Vision Institute. However, since sea water and their corneas have about the same index of light refraction, the astigmatism disappears when the animals are in water.

If it takes 3 pairs of wires to connect 3 telephones and 12 pairs to connect 6 telephones, how many are needed to connect 12 telephones? The answer is 66! Puzzling, isn't it? As these pairs of wires increase, expensive central office equipment increases in proportion. Each additional telephone means wider service for you without raising your telephone bill. And here's something else. Each additional telephone installed adds to the cost of providing telephone service for you and everyone else.

**Indigo Widely Grown**  
Indigo is a plant widely grown in Asia, Africa, East Indies, Philippines and America. It produces a brilliant blue color of great fastness to light and water from a dye derived from leaves.

**No Coincidence**  
One scientific study of hallucinations revealed that the death of the person seen in an hallucination occurred within the same 24 hours 440 times more often than could happen by chance.

Concluded from page 1.  
chance of getting more funds at Lansing.

The straw in the wind to this conclusion is provided by Rep. John P. Espie of Eagle, chairman of the powerful house ways and means committee of the State legislature. Espie believes the amendment is bad legislation. He warns that the state government cannot function with only 24 per cent of the sales tax revenue.

However, he recommends that state aid to schools be increased from \$60,000,000 to \$75,000,000 or \$80,000,000 a year, a boost of 25 to 33 per cent.

Espe also favors state aid for new buildings in school districts financially unable to construct necessary additions because of increased population.

It is the judgment of State Treasurer D. Hale Brake, Republican nominee for reelection and president of the Michigan Institute of Local Government, that adoption of the sales tax amendment would lead to a \$21,500,000 deficit for the first year of operation of state government.

If the \$270,000,000 veteran's bonus is also approved, the treasury deficit would be \$39,114,000, Brake warns.

"You cannot stop caring for the insane, running the prisons, paying old-age assistance, educate your veterans, and the thousand-and-one things state government is doing for the people of Michigan," he said. "People just won't stand for it."

Brake predicts more taxes, if the tax amendment carries.

Robert S. Ford, director of the University of Michigan's bureau of government, points out that school benefits under the tax amendment would depend on whether or not total local property tax levels stay at their present level of \$71,500,000 for the entire state.

"If these levies are reduced, as they may be in school districts, revenues for schools will not be increased as much by adoption of the amendment as is now anticipated. Likewise, if the state should decide to impose additional taxes to maintain existing services, residents of school districts would have to pay more taxes."

Ford also pointed out that the hope of financial gains for cities,

villages and townships may turn out to be a mirage. The state now returns all of the proceeds of the intangible tax and the new 10 per cent tax on liquor to cities, villages and townships. The combined yield amounts to \$13,000,000. "It is conceivable that the state legislature might amend the law to retain all of the proceeds of these two taxes for state purposes," he explains. "If so, the gains to local units would be almost entirely nullified."

The Detroit bureau of governmental research takes much the same view.

In an announcement December 9, the bureau declares that the adoption of the tax diversion amendment will lead inevitably to more taxes.

"As things now stand, the school lobby has been the most successful in the state," states the bureau report. "School aid distributed by the state has grown from 22 million in 1933, prior to the sales tax, to 50 million three years ago and close to 64 million last year. In 1941 basic grants to schools were 41 millions. This year they are 60 millions."

Fundamentally, in the opinion of the bureau, the amendment is unsound because it "violates the fundamental and sound principle that responsibility for raising money should accompany the spending of it. That principle is bedrock in responsible government."

Dr. Eugene B. Elliott, state superintendent of public instruction, recently pointed out that approval of the tax amendment may force the legislature to throw back upon local governments more than \$4,000,000 worth of state educational services now paid by the state.

Michigan Society for Mental Hygiene, through its directors, has expressed opposition to the amend-

ment charging it would "jeopardize" the state's entire mental health program.

The State Association of Equalization Schools, headed by John S. Page, superintendent of schools at Howell, likewise opposes the amendment.

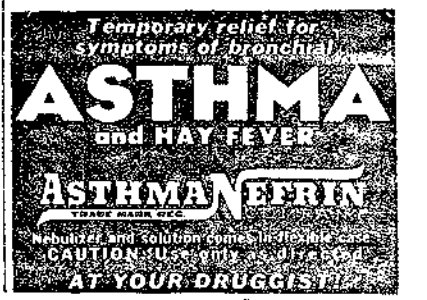

After studying all the arguments pro and con pertaining to the sales tax amendment, the writer of this column has come to the following conclusions: Schools will gain financially whether the amendment is defeated or adopted. New taxes will be imposed if the amendment

is approved. Cities, villages and townships will not be ahead financially if the amendment carries.

**Tasty Leaves**  
Tasty, healthful dishes often go to waste because people discard the leaves of cauliflower, endive and chard. These can all be used to good advantage in stews and soups.

**Substitute Molasses**  
Molasses may be substituted for part of the sugar in baking, but it should not be used in canning fruits as it gives them a dark color and may overpower their flavor.

**Turnover of Cows**  
Records indicate that usually a complete turnover of cows in the milking line occurs every five years.
