Bread Comes from Skies to Feed Shut-ins

Clark and Jim Jarvis of Grant Township, living on a farm eight miles north and a half mile east of Cass City, were snowbound by drifted roads last week and were sorely in need of bread.

They were reminded on Wednesday of the manna which fell from heaven to feed the Israelites in the wanderings of that nation in the wilderness, when a supply of the staff of life descended on the Grant Township farm from the skies to relieve the hunger pangs of the Jarvis brothers.

With the loaves were Delbert Burgess, a former pilot in the army, and Thos. Mathews, both of Marlette, and friends of the Jarvises. Their plane was equipped with skis and made a perfect landing.

Couple Honeymoons in Florida

In a candlelight ceremony at eight o'clock Wednesday evening, Mar. 12, in the Cass City Presbyterian Church, Elizabeth Jean Golding, daughter of Mr. and Mrs. Edward G. Golding, of Cass City, spoke her marriage vows to Mr. Royce H. Russell, son of Mr. and Mrs. Harry Russell, of Gagetown.

The bride wore ivory satin, made in princess style, with a sweetheart neckline and seed pearl decorations. Her net veil was of fingertip length and was fastened to a halo which was also adorned with seed pearls. Her colonial bouquet was an arrangement of white gardenias and lilies of the valley.

Harriett Russell, sister of the groom, was the bridesmaid and was gowned in rose chiffon. Her flowers were roses, carnations and baby breath. Barbara, Lucille Scully of Brooklyn, N. Y., cousin of the bride, was flower girl. Her dress was of yellow taffeta and she carried a miniature bouquet similar to the bridesmaid's.

Burke Sees Gulf Stream from His Apt.

G. H. Burke, former Cass City druggist, writes the Chronicle from Pompano, Florida:

"Please change address from Fort Lauderdale to Pompano, Fla., c/o Cloister Apts. We are just outside the Fort Lauderdale corporation and now on the broad Atlantic. Can almost touch the Gulf Stream from the apartment, it being less than three miles off shore and plainly visible especially if a north wind happens to be blowing. Wonderful view.

"Still big crowd of people here and as soon as anyone moves out more move in. I'm still dishing out the 'dope' every day but hope to be through in time to see a few exhibition baseball games. The Boston Braves are in training here and their first game here is with the St. Louis Browns Tuesday. There will be plenty of other games up to Mar. 20.

"First part of winter was very warm but in last two or three weeks it has been cooler with one night of frost. Understand you have a real old-fashioned winter up there. Anyway it seems to have chased plenty of Michigan people down here. Best wishes."

Tragic Accidents Claim Lives of Three in Thumb

Three Thumb of Michigan residents met tragic deaths on Saturday. Two were fatally injured when they were hit by trains and the other was a victim of carbon monoxide poisoning.

Harold Wood of Kingston, returning home from work in Pontiac, found the lifeless body of Thos. J. Mital, 17-year-old Kingston High School pupil in his car a mile from the young man's home at Kingston at 2:30 a. m. Saturday. Mital had attended a basketball tournament game in Vassar and had returned to Kingston with several other boys whom he had dropped off at their homes. An autopsy ordered by Coroner Lee Huston disclosed carbon monoxide poisoning. The lad was an eleventh grade student.

W. Howard Western, 65, Caro insulation salesman and former Bad Axe grocer, was killed instantly Saturday afternoon when his car was struck by a Pere Marquette freight train about a half mile north of Saginaw. Mr. Western, who had lived in Caro for only a month, operated a grocery store in Bad Axe for 46 years. He leaves his widow, four daughters, one son, his mother and two brothers.

David Fisher of Minden City, 21-year-old World War II veteran, died Saturday night in Hubbard Memorial Hospital, Bad Axe, of injuries suffered earlier in the day in a collision between a Pere Marquette Diesel freight engine and a horse drawn cutter. Mr. Fisher and Casimer Polom were going down the railroad right-of-way when the train approached suddenly around a curve. Polom escaped injury by jumping from the cutter, but Fisher, who was driving the horse, was unable to get out before the engine hit the light sleigh.

Mr. Fisher was married and was discharged from the army about six months ago.

Reorganization Discussion Meet of Schools Tonight

Tonight (Friday, Mar. 14,) at eight o'clock has been set as the time to discuss the school reorganization in this community. The gathering will be in the form of a town meeting at the school auditorium here and in attendance will be Dorr Stack of the Michigan Department of Public Instruction, School Commissioner Ben H. McComb, Supt. of Schools Willis Campbell, members of the local board of education and officers from closed rural schools in this community, all of whom will answer questions regarding reorganization.

The Cass City board of education is making plans for the next 10 or 15 years. Any rural school officers contemplating a change should attend this meeting. All school officers in this area are invited to attend. The meeting is open to the general public.

The following benefits of a reorganized district will be discussed:

1—Give rural representation on a board of education administering a system where the rural child is in high school.

2—Guarantee every child the opportunity of a high school education.

3—Provide a uniform tax rate.

4—Equalize the teaching load. In some districts concerned classes are too large, in others classes are too small.

5—Provide transportation at state expense. Many children now are paying for their own transportation in districts which cannot qualify for state transportation aid.

6—Provide transportation for elementary children.

7—Increase the number of rural pupils continuing to high school.

8—Give school electors in the area as a group the chance to plan the educational future of their children.

9—Enable the entire area to receive state aid in building funds. According to the proposed revised state aid program, only reorganized school districts will be eligible for school construction money.

10—Equalize educational privileges for all children in the area.

A playlet, "Our Union a Symbol," was read by several women. The next meeting will be held on Mar. 28 at the home of Mrs. John Sovey with Mrs. S. P. Kirn as leader.

Dated Mar. 1, at Miami, the clipping reads:

"Florida's principal asset — its climate — took a pushing around in February but emerged with nothing worse than frostbite. No records were broken.

"The month just ended brought the coldest weather in 30 years to the southern part of the state. That came along Feb. 6, when the mercury touched 35 degrees in Miami and 25 in outlying areas. The state was white with frost that day from its northern boundaries to the Florida Keys, with the exception of the Indian River section where breezes broke up the frost formation.

"It was colder in 1917, however. A record 27 degrees was set for South Florida for the month 30 years ago."

Why freight rates are going up...

Since 1939, railroad employees have had three general pay raises totaling 52 1/10%, and the prices of fuel, materials and supplies have risen 61 1/10%.

But when the war ended in 1945, the railroads were still hauling freight at rates no higher, and in some cases lower, than when the war began.

Without increased revenues, railroads could not meet these costs and also provide improvements in equipment and facilities—improvements that are essential for the low-cost freight and passenger services which are necessary to America's high standard of living.

Under these circumstances—and almost a year after the last major wage increase—the Interstate Commerce Commission recently approved an average increase in freight rates of 17 6/10%.

Of all the price increases in America

today, few have been so little and so late as that in the price of railroad transportation.

How important are healthy railroads to a prosperous country?

Only when the railroads are financially healthy can they provide the new equipment, improved road beds, and better terminal facilities needed for still better service to you.

The defense of the nation depends upon the continuance of the efficient transportation which served the nation so well in the last war.

The railroads are among the largest employers of labor. They buy over

100,000 different products. They pay big taxes—taxes which are spent not only for public schools, public health, and police and fire protection, but even for highways, airways, airports and inland waterways.

Railroads are America's lifeline—keeping goods flowing among the 48 states day and night in all weather.

They can continue to do this only if there is a reasonable balance between income and outgo. Like yourself, the railroads must make ends meet!

We are publishing this and other advertisements to talk with you at first hand about matters which are important to everybody.

"Landsakes, It's Past Seven!"

GRANDMA RILEY wasn't fooling either. "Past seven" was bedtime when Grandma was a girl. She was tired and tomorrow would be another hard day. She'd be up at 5:30 and busy every minute. Bread had to be baked and the wood stove had started smoking again. Then there were kerosene lamps to be filled—wicks trimmed and chimneys polished. And the oblong copper tubs had to be filled with clothes and steaming soap... then hand-scrubbed and put through the wooden wringer. Beating and sunning the rugs was another job that just had to be done. It had been put off too long already.

Today Grandma really would have lived the life of Riley! Just a flip of the switch brings light into darkened rooms... automatically launders and dries our clothes... vacuum cleans the rugs. It preserves our food and cooks our meals without fuss or bother. Yes, all of us are using more and more electricity these days and doing more jobs more easily and for less money than doing them any other way.
