Iola Newsome, 9, Fatally Injured in **Accident at School**

Evergreen Township Girl Died Ten Minutes After Arrival at Hospital

Iola Mabel Newsome, nine-yearold daughter of Mr. and Mrs. Roy Newsome, was fatally injured in grounds on Wednesday at 3:55 p. have been in ashes today. m., as a group of children of the lower grades were rushing to board a school bus to take them Snow Removal to their homes.

Apparently the little girl either stumbled and fell under the bus, Cost in Tuscola or in the rush of youngsters, was or in the rush of youngsters, was shoved or ran into the side of the vehicle. It is thought a rear wheel Co. Over \$100,000 of the bus ran over the child. The driver, Miles Gerou, was slowly rounding the corner at the northeastern part of the school to stop at the loading point on North Oak street, next to the building. He was unaware of the accident until told of the tragedy.

Mr. and Mrs. Albin J. Stevens were leaving the school building when the accident happened and rushed the injured girl to Pleasant Home Hospital where she expired 10 minutes after her arrival. Mr. Stevens says the bus was traveling about five miles an hour as it went around the corner.

The little girl had a crushed and fractured skull, a six-inch lacerathe accident.

Thursday, April 17, at 2:00 p. m. roads.

Quick Action Saves Seeley Farm Barns

A serious fire loss was averted Tuesday afternoon on the farm of Mr. and Mrs. George Seeley, five and one-half miles west and a quarter mile north of Cass City, when a blaze on the roof of a barn was extinguished by the owners with the help of neighbors who responded very quickly to a call for aid. A bucket brigade worked very efficiently. The blaze presumably started

from sparks of a grass fire. The Seeley farm barns situated closely together and but an accident at the Cass City school for prompt action the two might

Districts Desire Consolidation Vote

Over 50% of Citizens Sign Petitions Circulated for Expression on Project

Sentiment in the outlying rural chool districts appears to favor an lection on the project of consolilation of 13 districts with the Cass City district. Over 50 per cent of the electors in each of these districts signed petitions favoring the holding of such elections.

In these districts are the Dickhout, Heron, Bird, Winton, Wright, Dillman, Cedar Run, Hillside, Brown, Paul, Quick, McConnell and Chambers rural schools.

The matter of consolidation of the schools of this area was presented to members of the Rotary, Gavel and Woman's Study clubs at their sessions Tuesday and the concensus of opinion seemed to be that school districts of this comnunity should be consolidated so that Cass City will be the center of primary education for its trading area. While the local district has no need as far as its own students are concerned to increase the size of the present school building, this will be necessary if the area of the local district is enlarged to any considerable extent. The club members seem to be in favor of the Cass City district sharing the expense of the building neces-

sary to house the expansion. Two communities in Tuscola: County -- Unionville and Millingcraft, clothing, electricity, food to have voted to consolidate their schools within the past year. According to the Michigan Department of Public Instruction the consolidation of school districts, especially in the less densely populated areas of the state, is growing quite rapidly.

Coming Auctions

HOUSEHOLD MEMOS ... by Lynn Chambers

Serve Waffles for Any Occasion! (See recipes below)

Versatile Waffles

One of our simpler foods, the waffle, can be served in an amazing variety of ways. Add a few variations to the original waffle recipe and you have a

wonderful new breakfast treat or Sunday night supper special. Instead of a sauce, serve it with fresh or stewed fruit or a fluffy whipped cream and you have

an extra-delicious dessert. Or, if you prefer, top it with creamed chicken, ham a la king, and presto! There's your luncheon dish all ready. Waffles are hearty fare, and that's pleasing to those of you homemakers who have trouble giving

the family enough nourishment on nippy days. Let them fill up on watfles in all their variety, and the whole family will be pleased as You won't be able to run through all these different suggestions I'm giving for waffles immediately, so clip the ideas and save them.

They're wonderful to have on hand for the different occasions I've just mentioned, and your menus-whether for snack or breakfast-will never fall into doldrums. Peanut butter waffles are tasty and

have a softer crust than the ordinary waffie. They're breakfast fare, but may be served for a light supper with soup 'n salad.

Peanut Butter Waffles. (Makes 7 waffies)

- iablespoons peanut butter 6 tablespoons fat
- 2 eggs 1% cups bottled milk 1% cups flour
- 3 tablespoons sugar 3 teaspoons baking powder ¼ teaspoon salt

Cream peanut butter and fat together. Add beaten eggs and blend well. Add milk. Sift flour, measure and sift again with sugar, baking powder and salt. Add milk mixture to dry ingredients. Mix until smooth. Pour onto hot waffle iron and bake 3 to 5 minutes.

A good basic waffle recipe may be varied in countless ways. The mixing is easy and need take but a few minutes.

> Plain Waffles. (Makes 6 waffles)

1% cups sifted all-purpose flour 3 teaspoons baking powder ¼ teaspoon salt 2 eggs

l¼ cups milk tablespoons melted butter or fat Sift together dry ingredients. Beat

eggs with an egg beater until light. Add milk and butter. Add this to sifted dry ingredients and beat until smooth. Bake on waffle iron according to manufacturer's

Cheese Waffles: Add 1 cup grated cheddar cheese to above recipe with melted fat.

LYNN SAYS: Don't Forget Salads During Winter

Green vegetable salads gain distinction when you add a few savory herbs to them. Sprinkle such seasonings as chervil, thyme, basil, tarragon and dill on the salads before serving, and watch appetites

Salads should never be placed on the table until you are ready to eat them. They lose freshness and cosmics on dry to a worm toom

LYNN CHAMBERS' MENUS

Ham a la King on Waffles Green Peas with Mushrooms Molded Carrot Salad

Chocolate Waffles: Add 2 squares of chocolate, melted, add 1/2 cup of sugar and 1 teaspoon of vanilla to batter. Serve with whipped cream for dessert.

Rice Waffles: Reduce flour to 11/2 cups, and add 1 cup of cold cooked rice to batter with the melt-

If your family is fond of waffles. then they're bound to like raised waffies for a change:

Raised Waffles. (Makes 9 to 12)

- l tablespoon sugar 1 teaspoon salt
- l tablespoon butter 1% cups scalded milk ¼ yeast cake dissolved in
- 4 cup lukewarm water 2 cups flour 2 egg yolks 2 egg whites

Add sugar, salt and butter to milk. When lukewarm, add dissolved yeast cake and flour. Beat well. Let rise overnight (make evening before if you want waffles for breakfast). Add well-beaten egg yolks, then stiffly beaten whites. Bake in waffle iron.

Now, here's a grand variety of sauces that may be used with waffles for different occasions. These, of course, may be made up ahead to save time before serving, and kept stored in jars under refriger-

Hot Fudge Sauce. (Makes 1% cups)

2 squares unsweetened chocolate ½ cup water

11/2 cups corn syrup 1 teaspoon vanilia extract

Cook chocolate and water over direct heat for 2 minutes, stirring constantly. Remove from heat, add corn syrup. Simmer for 10 minutes, stirring occasionally. Add vanilla.

Ice Cream Sauce. (Serves 10 to 12)

- 1 cup heavy cream 1 egg
- ¼ cup granulated sugar 1/2 cup melted butter 1 teaspoon vanilla

Beat egg until light, add to sugar and beat well. Fold in melted butter and mix well. Fold in whipped cream and vanilla, then place mixture in refrigerator tray to chill.

Butterscotch Sauce. (Makes 1 pint)

1 cup sugar 34 cup corn syrup 1 tablespoon butter

1/4 pint thin cream Cook until a soft ball forms when ested in cold water. Remove from fire and serve hot or cold. Thin with cream, if desired.

Fish, meats and vegetables will be more palatable if they are first marinated before being tossed with the other salad makings. Frequently two dressings may be combined to give extra sparkle to salads. Use french dressing mixed with mayonnaise or sour cream dressing, for example,

If you want to dress up vegetable and meat or fish salads, use carrot curls, black olives, green stuffed olives, requefort cheese, stuffed celmy hearts, potato chips and pickle DOUBLE TIME WORKER

Foreman-How is it that you only carry one plank when the others are carrying two?

Worker-Well, I suppose because they are too lazy to make two trips

Sliced Thin

In a certain swank restaurant, where the portions served in this day of meat shortages are about one-sixteenth the size of the widow's mite, a patron was patiently registering a complaint.

"You'll simply have to give me table farther away from the door," he begged. "I can't stand it

"Afraid of the draft, sir?" the vaiter inquired. "Not at all," was the calm rejoinder, "but every time someone

Sandwich Possibility Peanut butter has many possibilities in sandwiches. When added to chopped carrot, shredded cabbage or diced onion, a crisp, chewy spread results. If peanut butter is added to dried fruits, jelly or honey, the result is a sweet sandwich. When combined with chopped pickle, chili sauce or catsup, still different flawors are achieved.

High Flyers Normal cats can easily withstand an altitude of 24,000 feet. Rabbits display no lethal effects of altitude until they are taken above 27,000

Mar Furniture More furniture is damaged by cigarette burns than any one other cause. Alcohol stains are next.

	Landon	17	25	2
	DeFrain	17	25	2
ĺ	Wallace	17	25	2
	Kwic	15	27	2

Ten High Average Bowlers. Larkin, 177; Landon, 175; Me-Cullough, 173; Parsch, 169; De-Frain, 169; Collins, 168; Kolb,

168; Dillman, 167; Reid, 166;

Gross, 166.

Going into the final week of bowling finds first place honors divided between the Dillman and Gremel teams. The Dillman squad has been holding down the top spot for the last month, but the persistent bowling by the members of the Gremel team has elevated them into this tie for first place, and each team is credited with 36 points. Howard Wooley, the lead man from the Gremel team, has taken charge of the squad since Captain Nelson Gremel retired from the team several weeks ago, and has done a very good job. His own personal contribution has been good and his last series totals of 554 pins were the only weekly totals high enough to rate honorable mention. George Dillman, captain of his own team, also has been doing some very consistent bowling and last week demonstrated his ability of pin spilling when he picked up that most difficult split the 4-7, 9-10, in a game that netted him a 206 count. The battle royal will be on in the closing week of the schedule to see which team is to emerge victorious.

The Mzyk and Reid teams trail the leaders by three full points and have only an outside chance to catch either of the top teams. Cecil Larkin has all but clinched the league's individual championship, his first since coming to Cass City. Meredith Auten is another former champion, having copped the crown a few years back, while ,929.13 the present runner-up to this year's 7,500.00 champ has tasted victory through several seasons, but is playing second fiddle now.

Clifton Croft, bowling as substitute on the DeFrain team, rolled the week's high single game of 217 pins, with Dillman turning in the second high of 206. Both Fred Knoblet and Leonard Damm posted games of 201 pins each to round out the games that were over the 200 mark, which incidentally was the lowest number of 200 games rolled in any one week during the entire season.

rings down the curtain on the sec- will not beat in. An ideal type is ond and final schedule for the season and the City Tournament will be made to fit any size or type of open April 21 and continue through the week. The team events will take place on Monday and Thursday evenings with doubles and singles scheduled for Tuesday and Wednesday. All entries can be made through the secretary or at the bowling alleys. The date of the annual banquet and business meeting will be announced later. GUY W. LANDON, Sec.

Safe Substitute

After getting married to his secretary, the big business executive remarked, "Well, my dear, I suppose I must get someone to take your place in the office.'

"I've been thinking of that, too," answered the bride. "My cousin has just graduated from high school." "What's her name?" asked the

"Robert Harrison," replied the bride, significantly,

You're Another Way out West there is a small railroad station whose name is

spelled E-u-r-e-l-i-a. The conductor and the brakeman radically disagreed as to the correct pronunciation of the name.

The result was that one would come through the train calling out: "Your-a-liah, Your-a-liah," and the other would follow through with You-really-ah, You-really-ah!"

Cardiac Stimulant

Digitalis, the dried leaf of the purple foxglove, appears today a cardiac stimulant. Growing wild in all parts of England, foxglové is said to have been brewed for the first time by a Shropshire housewife on her kitchen stove. The recipe was handed down from generation to generation as a cure for the dropsy before a young British doctor learned of the "old wives" remedy from one of his patients and introduced digitalis to regular med-

Hike Potato Sales By New Packaging Paper Bags Provide Ideal Retail Units

Millions of pounds of potatoes are getting a new ride to market this

They are riding in new paper bags, made of "wet strength" paper which

Wet strength paper bags meet

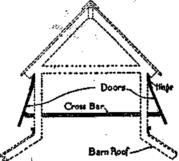

with consumer acceptance.

absorbs moisture without breaking. They are going in 10, 15 and 50 pounds quantities which retail stores can sell immediately without further sorting, sacking or handling.

At one time, not so long ago, all grades, sizes and quantities, including culls, were shipped in burlap bags. Merchants had to sort and package the vegetables. Today an ever-growing number of shippers are pre-packaging potatoes in the new paper bags. This means a little more work, but it pays in providing a better-selected, higher quality and more uniform product. The store gets clean, graded potatoes packaged in retail-size bags which can be sold at once.

Wet strength paper was developed before the war but its merchandizing potentialities were not utilized until this year.

KNOW YOUR BREED Cheviot

By W. J. DRYDEN

Cheviot sheep are one of the oldest purebred varieties in the world. Prolific, hardy, with little oil in their

wool, they produce an exceptionally high class of fleece.

The mutton may be classed as among the very best. It contains about the right degree of fatness and is high in grain and flavor. A beautiful breed, with fleece from 4 to 5 inches long in one year. and rams clipping between 8 and 10 pounds, it has proven its worth as a general purpose sheep. According to breed standards a mature ram in good flesh should weigh 185 pounds or more and a mature ewe.

Keeping the Farm in The Family Forever

140 pounds or more;

Thousands of elderly farmers carried on while their sons were fighting the war. Many of them now are seeking a way to retire and transfer their farms to younger hands.

Those retiring farmers want to be fair, both to the son and to his brothers and sisters. Today's swiftmoving events demand that farm property arrangements be kept sound and continuous for the welfare of nation and family.

YANKEE SALESMANSHIP

A New England merchant seeking good dray horse found what he wanted at the country fair. After a careful examination of the animal and a discussion of its good points, the merchant inquired, "What's the rock-bottom price you will take for the horse?'

"One thousand dollars," said the farmer.

"I'll give you one hundred dollars," countered the merchant. The farmer silently considered the offer, then replied, "We-el-l, it's a heck of a come-down-but I'll take

When the deal had been consummated, the merchant demanded, 'Why in the world did you ask one thousand dollars for this horse when you were willing to take one hundred?

"Well," said the farmer, "I guess have sized you up wrong, friend. thought you might want a one thousand dollar horse."

First 'Cress-Words' Crossword puzzles were probably

first printed in England in the 19th

century, according to the Encyclopaedia Britannica. They were pubished in the United States in the New York World in 1913.

Colorful Kid

By Howard Beckler

It is a well known fact that Marty Burns is the smartest bozo in the leather pushing racket, insofar as the managing end of the game is

That's how he happened to get his hooks onto the Walla Walla Kid, and came to make the one and only mistake of his career.

This knuckle duster came bristling into the office one winter day with a crash and a bang. He tossed six newspaper hounds off the muchscarred mahogany of Marty's desk, and then spoke his piece to the great man himself.

"I can lick anybody in the joint," he told Marty. "Including you, Burns. But I ain't gonna." Marty Burns opened his mouth and closed it again. He was mildly shocked.

"You're going to be all right Kid," Marty told him. "And about your brains, I'll take care of that. I've got a set of signals worked out for your next fight. It'll be just as though I'm right in the ring with you. I run my hand through my hair, you cross your right. I pull my left ear, and you hold him off with your left jab. I tweak my nose and you hook him to death with the left."

In his fight with Big Boy Riley, the Kid dropped Riley for the count with a steaming right cross, while Marty is tweaking heck out of his

"I've been holding out on you, boss. Yeah. I've two faults instead

nose, calling for a left hook. That kind of got under Marty's skin. "What's this mean, Kid?" Marty tweaked his nose for a demonstra-

The Kid looked at him. "Your nose itch, boss," he said. No, the Kid wasn't exactly an Einstein,

After that Marty tried every known method of signaling his fighter, but the Kid kept on winning and doing the opposite to what the signal called for.

Before long, they signed with Tiger Jones, who was right next to the champ. The Kid was a magnet

Marty Burns wore himself to a orrying about the Jones fight. He didn't sleep nights, trying to figure a way to get his brain into the ring with the Kid. He walked the streets. He smoked fifteen cigars a night. The Kid could never take Tiger Jones without his, Marty's, help. He was positive of that. Then two days before the fight, the Kid gave him the answer.

He was reading his press notices in the Morning Gazette. "Hey, boss, listen to this: THE WALLA WALLA KID IS PERHAPS THE MOST COL-ORFUL SCRAPPER TO HIT THE COUNTRY IN A DECADE."

"Colorful," Marty mused, "Colorful. That's it! Colorful, colors!" He slammed the Kid on the back. "You like colors, don't you, Kid?" "It's jake with me, boss,"

"All right. This is simple, Kid. So simple, I think even you can understand it. Now, listen close," Marty talked slowly to make sure it would penetrate the mystic thickness of the Kid's flaming skull. "I take three cards, of three different colors. I hold up the red card and you cross your right. Green card' and you jab with the left, and blue card you hook the left."

They were hanging from the rafters at the Armory the night of the fight. Tiger Jones didn't waste any time loosening up the Kid's lower lip with a wicked wallop.

The Tiger was rushing. Marty flashed the blue card. A steaming left hook would slow the Tiger to a walk. But the Kid was backing away jabbing with his left. The Tiger crashed through and dumped him in the corner for an eight count. That's just about the whole story. Four rounds later, the referee stepped in and pushed a badly beat-

en Walla Walla Kid to his corner. Reporters circled Marty and the Kid after he had showered and dressed. "What beat him, Marty?" They shot the question at the little

"His one and only fault beat him," Marty tapped the red head of the

"Nothing between the ears." The Kid managed a grin through shattered lips. "I've been holding out on you, boss."

"Yeah. I forgot to tell you that

I'm color blind."

Woman's World

Gay Spring Coats for Children Are Easy to Make from Old Wool

By Ertta Haley

OST mothers are acutely aware M that their youngsters are growing by leaps and bounds, and last spring's coats are woefully unprepared to cope with this year's sizes. If the clothing budget doesn't permit buying material for new coats,

then mother had best look to her old pieces of wool for available material. Grownups' clothing can easily be converted into something useful for the youngsters, but this will take some care and attention. It's not merely a matter of cutting the coat down, but rather of ripping it apart completely, and oftentimes dyeing it into an attractive color for the youngster.

Children are too young and gay by nature to be clothed in somber colored things, so try to make even renovated clothes attractive. A young mother I knew recently made use of her ex-navy husband's "blues" by converting them into spring coats for her two youngsters. On the little girl's coat she added a crisp touch with a white pique collar: and on the little boy's coat she sewed some miniature navy insignia on the sleeves. Both youngsters are delighted with these additions to the wardrobe.

This only goes to prove that even a navy blue shade can be lightened effectively with little crisp or bright touches which take only a few minutes to apply.

If you have pastel coats of your own (or even suits) that have faded,

Use old woolens for making ...

plan to dve them into bright colors which are particularly attractive on the younger set.

Don't become so beset with your cleaning and laundering problems that you shy away from gay, bright things for the children. We don't want the youngsters to look like miniature wise old owls even if we have a little more cleaning to

Fitting is Important For Children

I've emphasized this point before, but I'd like to mention it again. Never make things too large for the children, thinking they will grow into them. Little girls will look like dolls if they are dressed in short. perky dresses and coats, and little boys look all the more masculine if their clothes are of a proper length -not an inch or two too long.

Of course you may make large hems on coats and such so they will last longer, but the point is, don't make them long to begin with. If you do so, the child will dislike the garment so thoroughly by the time he really fits into it, that he will refuse to put it on unless there's a major battle every time you insist

on his wearing the garment. Try to make fittings as brief as possible, as it becomes tiresome for the little folk to stand still for a lengthy period. Have all your equipment handy, set the children on a stool or table to make the task

Be Smart!

Wear the flowers and discard the hat, if that's your mood! The flowers, colorful as life and twice as large, are anchored to a wisp or band of a brim-that's the lovely head-dress fashion that is becoming more and more im-

for yourself, and work quickly if you would avoid a trying

Children's clothes are primarily simple, but they may contain one or two little details to make them look

Straight-Line Coats Easiest to Adjust

Coats which have simple straight lines—those of a boxy style, for example—are preferred by many mothers because they are easy to adjust from time to time for length. Children do not get broad as fast as they grow in height, so have plenty

of hem to let down as time goes by Double-breasted coats for both girls and boys are popular, too, because these follow simple, straight lines and look good on the youngsters. Having no belt, there is no belt line to be a problem when lengthening the coat.

Tailoring is easy on these small clothes because there is not as much to do as on a larger garment.

Use basting generously, particularly when applying the sleeves to the armholes and press and fit carefully after this is done to make certain the garment will give com-

The edges of the collar and lining may be taped. Interfacing helps in giving a tailored look if you have planned pointed lapels on the coat. Baste the canvas to the collar.

Youngsters' coats do not have to be lined for warm weather wear but they do hang better when lined. If you do not line them, finish the edges by binding them with matching tape rather than using the pinking shears. Coats such as these receive too much wear to withstand much tossing around unless finished properly.

If you want to make a little princess style coat for daughter, it will need a little more work and tailoring than the straight line models, but the attractive garment will re-pay every care. Select a pattern and fit it carefully before cutting the woolen material.

The linings of these coats should be sturdy as they will need to take a lot of wear. A closely woven cotton and rayon fabric will give good wearability, provided it is sewed

and fitted carefully to the coat. All buttons should be sewed securely, and buttonholes must be finished carefully so they will not fray after a few wearings.

Fashion Flashes

Two-tone corduroy ensembles are [very popular for the younger set more materials are reaching the

Armed Forces Study Defense

Board of Five Generals to Work With Civilians on Various Problems.

WASHINGTON.-Alarmed at the frightful lessons learned in the atom-shattered cities of Japan and the Bikini tests, the armed forces have set experts to work on defense plans for American cities and fight-

The army disclosed creation of a board of five generals, with an advisory group of other officers, "to study the question of civil defense for the United States insofar as it pertains to war department participation in this essential part of national defense planning." The board will work with outstanding civilian authorities.

The board's president is Maj. Gen. Harold R. Bull, chief of operations for General Eisenhower when he commanded the European theater.

The navy meanwhile has appointed a "director of atomic defense," Rear Adm. William S. Parsons. physicist and technical chief for the joint army-navy task force at the Bikini atomic bomb experiments.

Seek to Prevent Chaos. Studies of the army board, it is understood, are directed not only at anti-atom-bomb measures but any other methods of modern mass destruction, including bacteriological warfare. One official explained that procedure must be perfected to prevent chaotic conditions, such as occurred in Hiroshima, from arising out of any form of enemy attack. Such conditions could be exploited militarily by an attacker.

Those discussing the survey emphasized that it should be viewed only as spadework, the presentation of problems to be expected, with some recommendations for meeting

Persons familiar with the policy underlying establishment of the board reasoned this way: A national plan for defense against atomic age attack, involving as it does such questions as dispersion of industry and possible shifts of populations, involves fundamentals definitely not the responsibility of the military. The military, however, is in a position to advise on such subjects as underground shelters for populations and factories as well as to carry out active defense measures against an attacking force.

The navy, with a mission somewhat different from the army's, centers its major interest on protection of its own ships and shore installations. However, Parsons, who has worked on the atomic bomb project since its inception, also is directly interested in civilian protection against the weapon.

Three Possibilities.

Coordination of studies by the two departments presumably is maintained through several agencies, including the joint chiefs of staff and the joint army-navy liaison committee appointed as an advisory group for the new atomic bomb commis-

Both Parsons and war department planners bear in mind the dictum of scientists that "there is no defense against the atomic bomb." But they agreed, in talking to a reporter, that there are three possibilities:

1. A workable agreement on international control which would outlaw the bomb from the world's ar-

2. Positive defense -- and this means only counterattack with atom bombs and rockets and whatever new weapons are available. The United States must make ready now for this form of defense by providing the material, training the men and maintaining an adequate intelligence system to warn of attack.

3. Passive defense-the preparation of yast underground installations, machinery for evacuation or dispersions of populations and industry, a thorough indoctrination on what to expect in an atom bomb attack, including deadly radioac-

Group of World War I Pilots Helping Vets of Last One

CHICAGO. - A group of World War I pilots has set up an organization that is finding jobs for air corps men of World War II.

A year ago the group, composed of businessmen, bankers, lawyers and manufacturers in this city, incorporated the air service placement center, a non-profit organization to help discharged army and navy air force men.

Since then more than 3,000 men have had counseling at the center and 70 per cent have been placed on jobs. Most of the jobs have been in sales work, although the center maintains close contact with the aviation industry to find opportunities for pilots.

the seat and sort of sweeping through the street. Others use the hell-for-leather method, a system whereby the rider bends low over the handle-bars and raises her knees almost to her chin.

1941 Dollar Worth 69 Gents Now, U. S. Says

WASHINGTON. - Government economists said purchasing power of the dollar dwindled to 69 cents from 1941 to mid-September, 1946, and possibly will shrink further with the freeing of food prices.

Living-cost experts of the bureau of labor statistics estimated the dollar's purchasing power may go down another cent or so on the basis of mid-October consumer-cost figures, now being cal-

However, they said some prices will drop after initial upward flurries following decontrol and this may halt the decline of dollar values.

Rails Will Lose 300 Million In 1947, ICC Is Informed

WASHINGTON. - Dr. Julius H. Parmelee, director of the bureau of railway economics of the Association of American Railroads, estimated that railroads would lose more than 300 million dollars in 1947 if present freight rates remained in efwrath developed into a frenzy. But fect.

Parmelee testified before the Interstate commerce commission at a final hearing on the carriers' request for a 25 per cent increase in freight rates. He followed a number of opposition witnesses.

Parmelee said that since 1939 railgoad wages and the prices of fuel and supplies had increased more than 50 per cent, with a resultant rise in railroad operating costs of more than two billion dollars a year. This, he said, was offset only by the temporary increase in freight rates, granted last June by the ICC, which he estimated would produce about 300 million dollars a year in additional freight revenue.

Two economists from the production and marketing administration of the agriculture department had sought earlier to show that costs in connection with refrigeration of rail shipments had not increased unduly.

Japs' Filipino Puppet Stirs Up Anti-United States Move

MANILA, P. I.-Jose P. Laurel, wartime Japanese puppet accused of being the archtraitor of the Philippines, is regaining public esteem by lambasting a proposal to give Americans equal rights in developing the islands' natural resources. Out on bail, Laurel has made three speeches. At each he was cheered wildly for his militant stand against the so-called parity amendment to the new republic's constitution.

Today he appears to be an influential public figure. Minority congressmen opposing the President Roxas backed amendment are reported urging him to lead the fight against it before the March I plebi-

Neighbors Donate Meat

To Aid Blind Youngster GOSHEN, IND .- Neighbors surrendered scarce items to an auction sale, so that 12-year-old Edward Rookstool might see again.

The farm boy was blinded when he fell off a wagon and fractured his skull. His parents had no money to pay for the expensive operation which would restore Edward's sight.

A hundred friends and neighbors pooled furniture and produce, including meat, eggs and potatoes.

New Camera Makes Photo in One Minute

Finished Picture Is Equal to Dark Room Products.

NEW YORK. - A revolutionary new camera, which turns out a finished picture one minute after the shutter is snapped, accomplishing in a single step all the processing operations of ordinary photography, was demonstrated here before the Optical Society of America by its inventor, Edwin H. Land of Boston, the discoverer of Polaroid.

Several types have been built, Land said. The inventor, demonstrating a portrait type and also one of the size frequently carried by news photographers, said the process could be adapted to any camera and possibly to making motion pic-

The camera produces a fully-finished picture, of the same quality as if developed and printed by darkroom technique.

The one-step camera, which uses ordinary silver-bromide film, has its secret in a tiny capsule of chemicals that produces all the ordinary developing and printing steps inside the camera.

After the picture is snapped, the inventor explained, the film rolls onto a piece of special photographic paper, with the two face to face, and in contact, and with the capsule between them. The capsule breaks and the contents spread between the film and photographic paper.

The capsule spreads out the ordinary developer of the silver film and the "hypo" so familiar to photographers.

Also contained are chemicals that control the size of the silver grains that make the picture, the color of the print, that prevent discoloration and that make the process work over a wide range of temperatures.

Land said motion pictures and color pictures have not been made, **but** that the principles are applicable to both.

Two Sisters Becoming Boys, Doctor Asserts

CAPETOWN, SOUTH AFRICA -Dr. W. P. Steenkamp said that two sisters living in Lansdowne became brothers in the last few

Dr. Steenkamp said that several months ago the sisters, aged 15 and 17, started undergoing physical changes. A series of operations is being performed now to permit full male develop-

The girls are pleased with the transformation and have taken the names David and Daniel Muller. Daniel wants to join the army, but David said he probably would go on working in a factory.

Mew Gold Rush On in Alaska; Prospectors Are U. S. Soldiers

FAIRBANKS, ALASKA, - There is a new gold rush in Alaska which rivals in enthusiasm, if not in rich strikes, the ismous rush of 49

Today's prospectors are soldiers stationed in Alaska. Their gold rush is sponsored by the USO and is classed as off-duty recreation. But rthat doesn't keep the G.I. "sourdoughs" from hoping to strike it

Confronted by soldiers freshly arrived from the United States for postwar duty and demanding "the shortest way to an undiscovered gold mine," the USO leased eight old mining claims near Fairbanks. There the off-duty miners pan for gold and dream of the day they become millionaires.

USO hostesses, most of them native Alaskans, drive the soldiers as far as possible over rough mountain roads in station wagons. On the last part of the trip to the claims, the G.I.s have to pack their pans and shovels through the gorges just as the old-timers did.

Youth Dragged Behind Car; Four Held for Auto 'Gag'

PHILADELPHIA. - Seventeenyear-old Ernest Ulrich, who police said had been tied by a rope to the rear of an automobile and forced to run behind it four blocks before he fell and was battered into unconsciousness, was reported "improved."

Meanwhile, four youths were held in \$5,000 bail each on charges of assault and battery by automobile. The youths told police they tied the rope around Ulrich "just as a gag to see how fast he could run.' Ulrich, whose clothes were torn

from his body, attracted the attention of patrons of a riding academy who cut him free and took him to Methodist hospital.

Vandals Tip Over Pulpit in Church and Rip the Bible

PEORIA, ILL.-Vandals entered Hale Memorial Methodist church, tipped the pulpit over the altar rail, broke off the United States and church flags, tore the back off a bible and caused other damage throughout the building. The damage was discovered by William I. Lewis, a student who is church janitor. In the church basement, dishes sufficient for 150 persons were

The Morning After

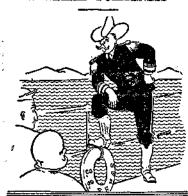

George, the Negro janitor at the college, listening to the learned discussions of the professors, developed a great liking for big words and, as a prominent member of his local lodge, he began to make use of them in his remarks to his fellow-

Brain Surgery Alters Outlook

Morally Degenerate Made Over Into a Useful Society Member.

DETROIT.-That a cigar smoking, morally degenerate 28-year-old woman may be transformed into a useful member of society by a delicate brain operation was revealed by staff doctors at Wayne county

The woman, described by doctors as "attractive," has a sordid police record of commercial immorality, theft, mayhem and drug addiction that began when she was less than 10 years old.

, She has spent 15 years in penal institutions, according to Dr. Louis S. Lipschutz, clinical director of the hospital. Her name is a secret.

Her case was reported to the Michigan society of neurology and psychiatry with the authorization of Dr. Lipschutz and Dr. T. K. Gruber, superintendent of the hospital

Claims Two Killings.

The woman claimed to have killed two persons, including a former husband, "because I wasn't going to let any other woman have him and I knew I couldn't keep him." Dr. Lipschutz told reporters, however, that there is no evidence to support

The woman, picked up by Detroit police on a minor charge, was sent to the hospital on the strength of her long record, which was documented by FBI officers from coast to coast, Dr. Lipschutz said.

"We had the choice of letting this woman continue in her present vicissitudes with every reason to expect that she would spend another 15 or even 30 years in institutions," he explained, "or of performing the

operation. With the consent of relatives, Dr. Aage Nielssen performed a frontal lobotomy, which Dr. Lipschutz said "severs the connection between the part of the brain responsible for planning and carrying out desires, and the other parts of the nervous system which translate them into

Thoughts Remain Same.

"Her thought content will remain the same," the clinical director continued. "The abnormal ideas will still be there. But if we were successful the push to translate these ideas into abnormal actions will not be there."

Following the operation about a month ago, the woman said her "outlook on life" had changed. Dr. Lipschutz said psychological tests prove that the woman, hitherto a confirmed liar, now is telling the

Dr. Lipschutz said the operation is not new but that its application in such cases is relatively rare, as far as he knows. He has heard of other such cases, he said, but in all of them the patient died "or the results were

The hospitals interest in the case successful, to sex criminals.

"What damaging results the oper- fill the Churchill vacancy. ation may have, as well as good, remains to be determined," Dr. Lipschutz concluded.

Half of United States Army **Now is Stationed Overseas**

HONOLULU, H. I.-Approximately half of the United States army now is overseas and "so far as I know there is no plan to reduce forces either in Germany or Japan,"

He said that "we have reached the minimum" of occupation troops in Japan, although he cited no figures. General MacArthur months ago estimated that 200,000 would be neces-

says Gen. Thomas C. Handy, deputy

There are proportionately more troops in Germany than in Japan, Handy added, because Japan is not split into zones and has an efficient central government.

The army's biggest problem, he declared, is that "we lack trained personnel. But I can say we are on the upgrade. We are doing something about our problems."

Army Finds Food Lack Perils Feeding of Children in Reich

plemental feeding of 245,000 underless the volume of imported food Mrs. Harry Chard of Marlette. was increased.

The relief food is contributed chiefly by combined relief agencies | Sunday at the Charles Sherman licensed to operate in Germany and the Red Cross. Army officials in Pontiac. said the low supply of relief food was attributable to the dislocation of transatlantic transport by the shipping strike.

The Want Ads Never Speak, But Hundreds Answer Them!

Concluded from page 1. adopts minimum salary scales whereby teachers will be guaranteed adequate wages, the school

teacher must rely on the School Board of Education for such

Governor Kim Sigler recently revealed that he was seriously contemplating recommendation of minimum salary scales for Michi-

gan's 32,000 public school teachers. California, Indiana and New York recently enacted by legislative action \$2,400 yearly minimum salaries for teachers with a college bachelor degree.

The New York law, recommended by Governor Thomas E. Dewey, completely revised the Dewey, completely revised the Subscription Price—To post offices in minimum salary schedule for Tuscola, Huron and Sanilac Counties, teachers whereby teachers would \$2.00 a year. In other parts of the United receive a minimum of \$2,000 in schools outside cities of 100,000 population or more, and \$2,500 for information regarding newspaper advertising and commercial and job printing, telephone No. 13R2. schools in cities of more than 1,000,000. Teachers with a master's degree would receive a minimum of \$2,200 for schools in small population areas and a minimum of \$2,700 for schools in cities of ains, Mich., and Newspaper Advertising more than 1,000,000 population.

The Indiana Legislature has

The Indiana Legislature has just enacted a law which provides for 1947-48 a minimum of \$2,400 for teachers with a bachelor's degree, this sum being 81.8 per cent higher than the present salary of \$1,320 for this position. A teacher with a master's degree and 20 years' experience would receive a minimum of \$3,600, which is 111.8 per cent higher than the \$1,700 which is in effect for the current

The State of Washington enacted a law this year assuring a minimum salary of \$2,400 for qualified teachers. The state aid per teacher was more than doubled.

The new minimum salary schedule in West Virginia will raise the minimum salary for teachers with a bachelor degree by one-third, the new salary being \$1,800.

Dr. Elliott has recommended that Michigan adopt a minimum salary law whereby a teacher with a bachelor's degree, covering four years of college training, would receive a minimum of \$2,400 for the school teaching year.

Dr. Elliott favors a minimum of \$1,950 for a school teacher with one year of training. He suggests a differential of \$150 a year for each year of training less than the base of a bachelor's degree.

The average school year runs nine months.

The Indiana minimum salary scale for teachers, adopted by the Legislature this spring, guarantees a for a teacher with two years college training and a minimum of \$266 a month for a teacher with four years college training including a bachelor's degree. Worked out on an annual basis, the compensation respectively is \$1,800 and \$2,400. The compensation increases each year until it reaches a maximum of \$2,850, or \$325 a month, for a graduate of a college who has 10 years teaching experience.

The Indiana law gives an incentive to a teacher to attain a master's degree whereby at the end of 24 years' experience the teacher would be receiving a total of \$400 a month or \$3,600 a year in com-

Such a salary scale, if enacted in Michigan, would go a long way towards attracting better-class eachers.

A recent national survey of the national educational system revealed that 350,000 teachers had left the public schools since 1940.

The Michigan Education Association last fall pointed out that Michigan in 1946 had granted substandard certificates to 5,000 teachers and probably lacked another 1,000 teachers to take care of children who are on half-day sessions to reduce heavy teaching loads, or to provide teachers for schools which were forced to close and transport pupils.

On a national basis it is said that 125,000 teachers, or one out of every seven, are now serving on an emergency or sub-standard certificate. That teaching stand-ards have deteriorated in recent

years is widely recognized. Twenty per cent of all teachers, or 175,000, are new to their jobs each year — twice the turnover that existed before World War II.

What the Sigler administration proposes as a financial solution to the prospective deficit of \$83,000,-000 was to be the theme of a special message by the governor

this week. Legislators generally are reluctant to enact any new taxes during the current session. Unless

Heavier irons are favored by those women who believe that weight saves the worker from exerting extra pressure and that the combina-

tion of weight and right temperature makes for greater efficiency in the Mennonite Brethren in Christ Ironing process. Those who prefer lightweight irons believe that much energy is saved in lifting and that ironing success can be achieved by proper heat in the iron combined with correct moisture in the fabric without the use of added pressure.

Woman's World New Techniques Are Required For Sewing Plastic Materials

By Ertta Haley

WITH plastic film and plasticachieve all sorts of smart effects for the home. Using them, you can make things that have a smart ap-

pearance and are easy to clean. With these fabrics appearing in stripes, checks, florals and plain designs, you'll find it easy to turn out attractive curtains for the kitchen and bath, bedspreads, shower sets, chair covers and other household accessories that can be kept fresh and stainless with a swish of a damp cloth. If they need more attention, you can even launder them periodically in lukewarm

Even beginners can achieve the ultimate in thrifty home decoration with these newest of fabrics after a few short-cut decorating lessons at a local sewing center. You'll find, too, that many of these new fabrics come in color-coordinated arrays so you can mix stripes, florals and plain designs for any sewing project you've set for yourself.

There are just a few things you should remember when sewing on these new fabrics. It will require some adjusting to learn how to stitch most efficiently, but actually that's an easy matter to learn even if you're an amateur at this sewing

Adjust Sewing Machine For Stitching

When using either plastic film or plastic-coated fabric for such projects, local sewing center instructors recommend the use of a size 11 needle for the sewing machine. Thread the machine with mercertzed thread and regulate machine for a slightly longer stitch. Light

tension and light pressure also are recommended for plastic film stitch-

shower curtains and matching window curtains, it's a good idea before mer and edge stitcher attachments cutting desired lengths to hang the fabric over an open door with ends balanced evenly on both sides. You then can smooth out the wrinkles with the balls of the fingers or the palm of the hand. Avoid fingernail contact, however.

The use of weights rather than pins on the cutting table also is a big help when working with plastics. You can fill small sacks with beans or borrow marbles from the youngsters for this purpose.

Use a pencil to mark off heading, hems for curtains or follow pattern markings. Do not use tailor's tacks under any circumstances. You can easily keep the pattern pieces together with ordinary paper clips and thus avoid tearing the fabric.

Tubes or rolls of wrapping paper come in handy, too, for you can roll each cut section over it in the opposite order to the sequence on the construction chart of the pattern. This will keep pieces from becoming wrinkled as well as giving neatness and orderliness to your work.

Be Smart!

Look for the biggest, richest block plaids ever imagined . . . in coats, suits and dresses. Cottons are a dream of color combinations-often five or six-plus silk-like sheen, novelty touches as to weave. You'll love 'em!

Peplum Pockets

Designer Kiviette knows the value not only of glittering sequins but also of the tailored classic in which a woman lives most of her life. This one is in beige with peplum that has pockets and a soft silk scarf at the neck.

Pinning and basting are considered non-essential when sewing with plastic film. Another thing, you won't have to turn under raw edges as the fabric does not fray. Always finish edges plain or "pinked" with the pinker attachment on the sewing machine.

Tips to Make Sewing Easy

It's easy to achieve smart decorator finishes such as ruffling, gathering and binding on these fabrics with attachments of the sewing ma-When using plastic film for chine such as the binder, ruffler and gathering foot. The fine hemcan readily be used, also.

If the plastic film becomes soft and moist from humidity, brush a

For making shower sets.

bit of talcum powder lightly over the edge to be inserted into the sewing machine attachment. If the film seems tough from cold, brush a very thin film of oil along the edge of the fabric with the finger tips. One drop of oil is sufficient.

When a great deal of ruffling is necessary, as in curtain making, it's advisable to pass a ½-inch strip of very fine emery cloth between blades of the ruffler from back to front, should there be any inclination to skip gathers.

The emery cloth will provide a gripping surface for the blades since continued contact with plastic film sometimes causes a waxy or oily deposit to interfere with the

drive of the blades. If an oily condition develops when using plastic film, simply dust very lightly with talcum powder. If waxiness appears, use emery paper on the underside of the gathering foot.

Plain fabric binding may be used with plastic film and this is simply treated as in average sewing. When plastic binding is used, cut binding ½-inch in width and insert in the outside slot of the binder. Since plastic film does not fray, it is not necessary to fold the edges under as in fabric binding.

Fashion Flashes

Clever ideas for making new dresses out of one good one include different accessories such as

scarves, gloves and belts, Even though your bats are small this season, they should fit your head, say the experts. The styles particularly filling this order are bonnets, bretons and small side

A fashion trick which is popular with the use of black dresses for spring and summer is the introduction of loose swinging coats to be worn with them to give the ansemble lightness and airiness. If you use lace or organdie trimming with the black ensemble, point up the simplicity, as this is the most elegant way of showing it off.

Will Redesign Plants, Beasts

Cotton That Produces Seeds Only Among Changes Scientists Made.

WASHINGTON .- With the idea of putting more money in the pockets of cotton farmers, experiments in Texas are designed to produce cotton plants that don't grow cotton. These plants are intended to produce only seeds because of the demand for cotton seed in industry.

The work is another venture in the science of redesigning plants and animals through genetics to bring forth "tailor-made" varieties. This kind of breeding has put more meat on turkeys, taken some of the fat out of hams, produced eggs with tougher shells and popcorn with more "pop," brought watermelons down to home refrigerator size and made certain crops resistant to diseases or easier to harvest.

Cotton Experiments. The cotton work, conducted since 1940 by David Killough, chief of plant - breeding investigations at developed some cotton plants that that produce more and larger seeds. Cottonseed oil is used for shortening, oleomargarine, soap, paints, varnishes, linoleum, printing inks and lubricants. The seeds

also are used as cake and meal, Scientists at the Beltsville, Md., research station, department of agriculture, produced eggs with a stronger shell and others with a thicker white that beats more easily for desserts and that poaches

From Beltsville also has come a small, compact turkey weighing only about two-thirds as much as a normal size turkey, a bird designed for kitchenette ovens or the small family table.

Swine bearing more lean meat, with smaller hams and leaner bacon, are coming from long-term experiments conducted largely at the Ames, Iowa, regional swine breeding laboratory of the department of agriculture and state experiment

Changes Made in Sheep.

Sheep almost blinded by snaggy locks so that they had trouble finding food, and with horns and skinfolds which impeded shearing, gave geneticists another problem. Over 25 years, an open-faced, hornless, smooth-skinned animal was developed.

New Hampshire state experiment station redesigned the watermelon into a small round type weighing three pounds. Corn that pops better, expanding much more, came from Midwest research. The crook-neck squash was straightened out for easier packing and cucumbers have been grown to uniform length for the same purpose.

Chickens bearing more meat, with bigger drumsticks, higher percentage of white to dark meat and even meatier wings are the goal of a three-year contest now under way. A top prize of \$5,000 is offered to the breeder producing the best meat type by the end of 1948.

Pilot Training School Is

For Enlisted Men Only WASHINGTON. - The sign on the army air forces' cadet pilot training school reopening at Randolph Field, Texas, this spring will say

For enlisted men only. Gen. Carl Spaatz, AAF chief, said that candidates for the school would be drawn solely from the ranks of regular army air forces enlisted personnel.

"The army has long looked forward," he said, "to a day when it could regard every enlisted man as a potential commissioned officer. While we now are limiting the field to enlisted men of the army air forces, the next step will be to expand the list of eligibles to include every enlisted man in the regular

Currently, the plans call for training about 1,500 pilots in three classes, but Spaatz said the exact numbers depended upon a congressional decision on the size of the armed forces.

Use of 'Unsafe' Ships by Army **Approved by Merchant Marine**

WASHINGTON. - A house merchant marine subcommittee approved legislation authorizing the army to operate until December 31 troopships that do not comply with marine safety standards.

The wartime authority under which the army has operated such ships expires on March 31.

The committee acted after a war department spokesman admitted that some transports have "serious (safety) deficiencies" but insisted that lives are not being jeopardized.

Woman Snakes Her Way Through Crowds in a Store

DETROIT.-The bargain counter of a department store was packed with women when Mrs. Grayce Milton, 53, edged her way through the crowd.

The women took one look at her, screamed and fled from the store. Mrs. Milton was carrying a six-foot

king snake in a wire cage. Police charged her with disturb-

A certain Yankee householder recently laid in his winter's supply of coal. When the bill came from the dealer he noticed that it boasted the slogan: "It's a Black business, but

we treat you White." The householder wept a little when he noted the amount of the invoice, then, wiping away his tears, he bravely made out the check. But with it he sent a little note reading: 'May I offer a suggestion? I think you should change your slogen to 'It's a Dirty business, but we Clean you good.' "

Too Many Stones

Lord Birkenhead proudly announced to his family that he had obtained a lucrative contract for a series of articles to be called "Milestones of My Life." They discussed what incidents he proposed to use. "You might put in our marriage,"

Lady Birkenhead suggested; "and the birth of your first child." "I said milestones, my dear," rejoined Birkenhead, "not millstones."

Useless Expense "Brother Jones," said the deacon 'can't you-all donate some small contribution to de fund for fenc-

ing in the cullud cemetery?" "I dunno as I can," replied Brother Jones. "I don't see no use in Texas A and M college, already has a fence around a cemetery. You see, dem what's in there can't get are almost bare of cotton fibre and out, and dem what's out sho' doan wants get in."

Mental Cases Are Increasing

Jump 50 Per Cent in Last Decade: Nation Short Of Proper Help.

WASHINGTON. Eight million Americans have mental disorders "in some degree," Surgeon Gen. Thomas Parran estimated in his annual report. He said that the nation is "woefully short of personnel" to treat them.

Parran added that mental cases now fill half the hospital beds in the country, yet our existing hospitals are inadequate to care for even the most seriously ill.

He said that the number in mental hospitals had increased 50 per cent in the last 10 years.

Psychiatric disorders he said, are becoming increasingly evident as the cause of juvenile delinquency and crime "as well as personal inefficiency and unhappiness."

"We have but a fraction of the clinics and outpatient services needed to treat mild cases or to care for progressive disorders before they become disabling," Parran re-

Federal Action Cited.

Parran said passage of the national mental health act "marked the first large scale, coordinated attack," on the problem of providing adequate treatment. This act authorized construction of a mental health research center and allowed federal grants to states for development of mental hygiene services and clinics.

Another, step, he said, is the hospital program approved by the last congress. This act provides for federal grants of 75 million dollars in each of the next five years for hospital construction in the states. Parran has announced that he would ask congress to make the first year's appropriations at this session.

"As we have gained victories over the major communicable diseases," Parran said, "conditions such as heart disease, cancer and diabetes have moved to the fore as causes of death. We are intensifying our efforts to combat them.

Economics Unsolved.

"There are not nearly enough physicians, dentists, nurses and other health personnel to go around, nor enough hospital beds and clinics to care for our minimum needs. Those we have are unevenly distributed, so that many areas have no doctors and no health facilities of any kind.

"And finally, we have yet to solve the economic problems of medical care; we have yet to make it possible for everyone, regardless of income, to obtain the basic services needed for the protection of his own health and that of his neighbor. These are our basic objectives of the future."

Weather Conditions Recall Travelers Had Fire Ropes

SEATTLE. - December's disastrous hotel fires in Atlanta and Saskatoon, Canada, prompted Clarinisce about the "good old days" when travelers took individual precautions about hotels going up in smoke.

Johnson, a traveling salesman for many years, said seasoned tourists in the past always carried their own ropes in case of emergency.

"The old-time salesman had to know all the angles," Johnson said. "A bad fire was always a real danger in the days when most country hotels were made of wood."

Part of Johnson's luggage when he was on the road was a rope long enough to lower him from a fourthfloor window. It was knotted at regular intervals to provide hand-

Gloucester Is in First Place

In Nation's Fishing Industry GLOUCESTER, MASS.-This 323 year-old picturesque port on the shores of granite-strewn Cape Ann paced the nation's fishing industry in 1946 for the fourth successive

Total fresh fish unloaded here in 4.507 trips by 265 vessels was 207,-390,000 pounds, only 2 per cent less than the all-time record set by this 'city's fishermen in 1945.

Gloucester easily bested Boston, which reported catches totaling 165,-914,000 pounds.

Redfish was king here with a new high of 135,391,000 pounds that overloaded freezers and resulted in a warning to fisherfolk to stop catching that variety until some of the backlog can be sold.

The industry paid out some fourteen million dollars to 3,500 fisherman and wharf workers.

Active Sons Give Father Real

Busy Night as Hospital Cop INDIANAPOLIS. -Night policeman Charley Ford of Indianapolis Methodist hospital had to help unload both of his sons at the clinic as

patients. Twelve - year - old Charles Jr. broke his left arm trying out a pair of roller skates.

An hour later the wagon brought in another son, Walter, who was injured in an automobile accident. He broke his right arm.

Army Is Studying **Distance Measures**

Latest Device Is Claimed More Exact Than Radar.

HAMPTON, VA. - A new electronic distance-measuring device, which the inventor claims is more precise in some respects than wartime radar and suited to a wide assortment of peacetime uses, is now under army scrutiny.

The instrument, called "Raydist" from a wedding of the words radio and distance, is a development of Hastings Instrument company here. Charles E. Hastings, 33-year-old head of the company, served 11 years with the national advisory committee for aeronautics.

Like Radar, "Raydist" measures the speed of high frequency radio waves in computing distances to "targets." A difference between the two is that Hastings' system requires a radio transmitter at the target point.

Radar bounces its waves off the target unassisted and measures distances automatically by the time required for these echo waves to

"Raydist," however, the inventor says, gives considerably greater exactitude and the present degree of error is less than one foot in a mile. "Raydist" consists of two fixed receivers, which are the main recording station and reference station, and a mobile transmitter. It operates by comparing the phase relationship between signals received from the transmitter.

An important use of "Raydist," Hastings believes, may be in ground control approach for aircraft coming in for blind landings. He also sees it as suitable for surveying and serial and surface navi-

Three Children Married; Five Remain 'Next Trip'

CORAOPOLIS, PA. - Albert Dinell, foundry foreman, watched two sons and a daughter marry at a triple ceremony, rubbed his hands briskly and exclaimed: "Now, if I can get my five other children on the next trip, everything will be fine."

Papa Dinell took the credit for promoting the three ceremonies and with a fine sense of responsibility, bought a house and converted it into three apartments as a wedding gift. He also stood the bill for a open house party

with 400 guests and an orchestra. Married were Lawrence, 25, and Yoland Loretta, Coraopolis; Joseph, 23, to Antoinette Magleri, Coraopolis; and daughter, Virginia, 21, to Albert Dalenzi, of Sewickley, The couples plan a joint honeymoon trip to New York. Ages of the five other children range from 8 to 19.

Byrd Finds Little America Has Moved Four Miles Since 1929 LITTLE AMERICA.-A Meriner plane of the western task group has

discovered a new bay in an exploratory flight over the Knox coast area Wilkesland, Rear-Adm, Richard E. Byrd announced.

The bay, 200 miles wide east to west and 60 miles deep north to south, was mapped during a flight, Byrd told reporters.

The western group also discovered that there is a peninsula west of Adelie coast, where earlier maps had shown a bay, Byrd said. The admiral displayed a map of the Bay of Whales and the Little America area, prepared by Dr. Paul Siple, showing that the first Little America had moved 4¼ miles westward since 1929.

The entrance to the Bay of Whales is now only 904 feet wide, Byrd said, and Siple estimated that the bay walls are closing in at a rate of 4% feet per day. The latter measurement was made at a point along the tractor trail between the bay water and tent town.

Old Model T Auto Parts Are

Big Help to Fire Department MEMPHIS, TENN.—The model T Ford is a virtual museum piece, but delegates to a fire conference here were told how the T is being used effectively in three home-made firefighting inventions.

In one case, Model T valve springs were used to separate plates in a device over which hose was laid at points of friction when surging. The springs take up the surge and save the hose.

In a second case, a model T spindle and wheel have been adapted as a one-man, handpowered hose rewinder.

A third invention mounts a model T starter to power a pumper reel for one-man re-winding.

Alexander Graham Bell Right Smart Man, Oldtimer Admits

HOLDEN, ME. - Howard S. Nauler, "nearly 90," was coaxed by his family into making a telephone call—the first in his life—to an 81year-old crony who had never before used the contraption, either.

Thomas R. Merritt, 81, of Brewer, said he couldn't hear Nauler any too well, but agreed with him that inventor Alexander Graham Bellborn 100 years ago-had been a right smart man.

Anywhere You Look There's Oil

But Most Surprising of All Locations Is High in Colorado Clouds.

HAMILTON, COLO .- Look where you will-in the Pacific ocean, off the coast of California, in the jungles of South America, in the dust bowl of Oklahoma-you can

always find at oil field. Travel the world over and you will never see one in a more surprising location than the Wilson Creek field of Colorado. Anyone but an oil man, who takes his oil wherever he can find it, would wonder how the field ever was discovered

in the first place. For Wilson Creek sits precariously in the clouds on the continental divide, 8,378 feet above sea level. It's the highest field in the United States and you take your life in your hands to get there.

You start from Craig, Colo., over the "Little Burma Road," which is called that because it looks like the famous and equally hazardous wartime route over the Himalayas.

Giant Pin Cushions. 40 breath-taking miles, you wind around towering mountain peaks, looking dizzily off into space. while your ears pop as you gain altitude. You don't see a man-made structure the entire trip until suddenly you reach the roof of the continent and there you are at Wilson Creek where oil derricks stick crazily out from the mountainside like pins in giant pin cushions.

These wells are on shelves carved out of the sides of the peaks. A false move at any of these sites would send a careless man spinning a thousand feet down to a rocky canyon floor.

Amazingly there have been no such false moves to this day at Wilson Creek. The nation's highest oil field was

discovered in 1938 and until the mammoth development began two years ago at nearby Rangely field it was the biggest producing area in Colorado. No Pumping Problem.

Gaining access to Wilson Creek involved a major feat in road engineering. Even after the road was finished, there remained the gargantuan task of keeping it clear of snowdrifts. Up here at the top of the continent a 14-inch snow in mid-May isn't unusual. There's an airfield for emergency use.

The Texas Co. and the California Co. a subsidiary of Standard Oil of California, developed Wilson Creek. There's no pumping problem. The oil just flows downhill to the nearest refineries.

Wilson Creek's 29 wells produce about 7,000 barrels of oil a day in the summertime from the Morrison and Sundance sands at depths of 6,000 to 7,000 feet. In winter, the paraffin in the crude gets stiff from the cold and hampers the flow of

This oil flows by gravity from the

Woman Kills Her Baby Boy, Feared Father Would Take Him

WEBB CITY, MO .-- A 36-year-old mother tearfully related that she had shot and killed her baby son, police said, because she thought her husband was going to take the child away from her.

Prosecuting Attorney Ralph Baird said Mrs. Ruth Gilbert Hampton signed a statement in which she said that she first sent three bullets into the six-weeks-old infant's body and then turned the revolver on herself. She suffered powder burns.

A quarrel with her husband, Tom Hampton, a truck driver, preceded the shooting, Baird said Mrs. Hampton told him. The prosecuting attorney said he would file murder charges against the mother.

Heap Big Talk Has One-Way Tongue When It Comes to Cash ALBUQUERQUE, N. M .- An eld-

erly Indian sat at the desk of Giles L. Mathews, chief field deputy for the Collector of Internal Revenue, seeking aid in filling out the income tax return,

"How much did you earn?" Mathews asked. "Ugh," replied the Indian, "What did you raise, or sell?"

persisted Mathews. "Ugh," said the redman. "You'll have to tell me," Mathews retorted. "Maybe you have a

refund coming.' "How much, and when do I get it?" demanded the Indian in perfect English.

Helicopter Rises 18,850 Feet

For World Altitude Record DAYTON, OHIO. - An unofficial world altitude record for helicopters of 18,850 feet was set by Maj. Ernest Cassell, the army's No. 1 test

A National Aeronautical association observer in an accompanying B-25 bomber announced that the figure, far beyond the previous record of 11,243 feet, would be certified to the association for entry in its records.

QUARTERLY SUMMARY OF BENEFITS PAID IN SOCIAL SECURITY ADMINISTRATION

The quarterly summary of benefits in force for the period ending March 31, 1947, announced by Joseph W. Ramsey, manager of the local office of the Social Security Administration, showed a gain of \$2,089.41 a month in Tuscola County over the figures of March 31, 1946.

The present monthly benefits for his county are \$7,109.57, going to 77 retired workers, 56 wives over 65, 115 children, 21 widows over 65, 34 widows with children.

In addition, six claims for lumpsum payments, in those cases where there was no one eligible for monthly payments, were paid an aggregate amount of \$764.70 in Tuscola County during the first three months of 1947.

The payment of benefits to insured workers for permanent and total disability through the expansion of the present Federal Government system of old-age and survivors insurance is one of the recommendations of the Social Security Board in its eleventh and last annual report, Mr. Ramsey said today.

In July of 1946 the board was abolished, its functions transferred to the Federal Security Agency, and its organization designated as the Social Security Administration. The current report, required of the board under the Social Security Act, is for the fiscal year 1945-46.

In making its recommendation for the inclusion of disability insurance, the board said that the vage loss suffered by permanently disabled workers and their families probably runs from \$1,500,000,000 to \$2,000,000,000 a year.

Another recommendation of the board calls for the extension of old-age and survivors insurance to all gainfully employed workers. Workers not at present able to earn protection under this program include those employed in agriculture, domestic service, non-profit organizations and Government service, and the self-employed.

Mr. Ramsey pointed out that this ts protection.

ered employment, he added.

calls for changes in the method by Church Finance," led by Kenneth which old-age and survivors insur- Kerr of Caro. ance benefits are figured, to increase the amount of the benefits, particularly for low-paid workers. The general level of insurance benefits should be raised, the report states, largely because of increased

living costs. Other recommendations of the wells to the gathering tanks and board call for increasing from from there the Texas Co. sends its \$3,000 to \$3,600 a year the wages share rocketing on downhill to a that may be credited to a worker's refinery at Craig. From Wilson account, thus expanding the base for determination of benefits, and an increase in the amount of earnings a beneficiary may receive in covered employment without hav-

ng benefits suspended. The board also recommended reduction of the qualifying age for all women beneficiaries from 65 to 60 years.

Eight Youth Attend State Fellowship

Eight young people from the Westminster Fellowship of the local Presbyterian Church attended the annual conference of the Westminster Fellowship of the Synod of Michigan which was held in the First Presbyterian Church,

Bay City, April 11-13. Betty Decker, Gerry Prieskorn. James Wallace and Don Karr attended throughout the conference. Edward Golding, Duane Kettlewell, Roger Little and Dick Wallace attended the Saturday sessions and evening banquet, the attendance of which was 500.

The first four delegates were entertained in the home of Glenn Folkert, formerly of Cass City.

The local group gave reports at their Sunday evening meeting upon their return.

Provides Needed Water An adequate supply of water, at

the proper temperature, must be provided laying hens to get maximum egg production. Farmers who have electricity enjoy an advantage in meeting this goal, since it makes possible the winter use of a pressure water system for chicken houses, and provides the current needed for operating drinking water at the desired temperatures. Such a pressure system, with water piped to all places on the farm where a supply of water is needed, saves farm families considerable work and many unnecessary steps.

Hearing Casualties

all of Cass City. Philip Wright of Cass City xpired. Mrs. Harold Thane of Caro

expired. Patients discharged the past week were: Mrs. Irene Webster and Mrs. Millard Knuckles of Cass City; Marilyn Thane of Caro Detroit spent the week end at the (burns).

Vegetable Storage

Both onions and potatoes do best under cool storage of around 40 degrees, but onions keep best if the humidity is 60 per cent or drier, while potatoes keep well in a more damp atmosphere to prevent shrinkage or shriveling.
