## Arbela War Club Gives \$61 to Red Cross

The Northeast Arbela War Club was very active during the war years in the Red Cross sewing program and in many other activities. ## 34 ATTEND PICNIC AT D. McARTHUR FARM

Friends to the number of 34 from Oklahoma, Port Huron, Royal Oak, Utica, North Adams and Cass City enjoyed the Fourth of July at the Duncan McArthur home in Novesta Township. A picnic dinner was served in the orchard.

What makes a vacation trip to Michigan memorable?

As likely as not, it will be the memory of Michigan hospitality — the warmth of friendship which Michigan people extend to strangers.

This thought was emphasized to me the other day. Meredith Clark, editor of the Tekonsha Patriot, a weekly newspaper at Tekonsha in Branch County, told me this story:

"My wife and I drove to Traverse City for the summer convention of the Michigan Press Association. Just before dinner, I discovered I had not packed a tie. It was about 6:30 p. m. then, and clothing stores were closed. Finally, I went to Wright's drug store and told the proprietor my dilemma. 'Do you know of a place where I could buy a tie?' The merchant noticed my convention badge. His face brightened. 'Here take my tie!' he exclaimed, whipping off his tie and putting it into my hands. I wore this man's tie Friday night and returned it to him the next morning. Here was a real test of hospitality. I'll never forget Traverse City."

**Party Symbols**  
For more than 60 years the elephant has been symbolic of the Republican party and the donkey the symbol of the Democratic party. Both owe their origin to Thomas Nast, probably the greatest political cartoonist of all time. When Nast first pictured the donkey as the symbol of the Democratic party it was resented by members of that party, but later they became friendly to the little beast. From the beginning Republicans accepted and became devoted to the elephant.

SECOND WEEK!  
CONTINUED BY POPULAR DEMAND

IGA HITS HIGH PRICES RIGHT BETWEEN THE EYES!!

Smashing

RED TAG  
SALE

Dear Friends:

I figured up my grocery bill last week and spent much  
less than I had the week previous. IGA's Everyday  
Low Prices together with their gigantic Red Tag sale  
certainly do save money.

Comparing my last week's food bill with my friend,  
Maggie Bellows, who buys at another store, I dis-  
covered that I saved around \$3.00 buying at the IGA.  
We have the same size family—we live about the same  
—so I know that it really pays big dividends to do all  
my shopping at IGA. As I said last week, if other  
businesses would follow the example set by IGA,  
there could be no depression in this country.

After eighteen years in the pastorate, he was called to North Central College, as professor of philosophy and psychology and served in that position for thirty-five years. He has lived in retirement since 1939, and died at the age of eighty-four.

He was an uncle of the present pastor of the Evangelical United Brethren Church, Rev. S. P. Kirn, and well known to many of the older residents of this community. Funeral services were held in Naperville last Tuesday.

Oak Bluff Breezes  
Daisies gleam along the un-trimmed roadsides like meadow frost. Some call them "Farmers' Curse" but they are flowers of the chrysanthemum family and often called oxeye daisy. It is also related to the feverfew which was brought from England long ago and cultivated in our gardens.

The name daisy has an interesting history and reaches far back into Old English usage, coming directly from the term "day's eye."

Part of the daisy family tree includes the sun flower whose center is composed of hundreds of individual miniature florets just as the daisy if you will examine it under a magnifying glass.

Like so many of the wildlings, the field daisy is too common to be appreciated. If they were as rare as arbutus, the pink and yellow lady slipper or the fast disappearing harebell, they would be treasured and exclaimed over. Even their foliage would be appreciated for it is both beautiful and graceful. But few give it a thought.

Many summer residents of Oak Bluff who for the past 20 years have found either Mr. or Mrs. Curran always present to serve them at the local post office will miss the couple when they retire this month. The Currans have earned a vacation and everyone at the Bluff will miss them but wish them a continuous and happy vacation.

Changes in the post office personnel are not the only ones in the village. Several new buildings have gone up on Main St. The LeBlanc store, under new management, has been completely revamped. Bob McLean has a new self-service store opposite the park, and with his usual pleasant manner, serves everyone and is most accommodating.

We regret to see the woods along the beautiful scenic highway cut up and strewn with overnight cabins of all descriptions, but this seems to be the case all over the U. S. A.

This week end has seen quite a crowd for our small community. The annual meeting went off as usual with harmony and dispatch. One new director was elected in place of G. H. Burke, whose term expired and who was not a candidate for re-election. Warren Fry was chosen to serve three years.

This season seems to have a scarcity of birds and large fox squirrels which is regrettable. The natural beauties, the trees and wild life, are Oak Bluff's greatest assets. Since hunters do not seem to realize this perhaps the conservation department will be concerned about exterminating this friendly little animal.

Dr. and Mrs. H. H. Madigan are fast becoming regulars here at Oak Bluff. This is the fourth year the Madigans have rented a cottage and their second year at the Ketchum cottage.

E. R. Wilson and his father came for the long week end. Mrs. Wilson and her mother, Mrs. Levi Bardwell, have been here for a week or more.

Mrs. Milholland is here for the balance of the summer and is enjoying the addition to her cottage and many changes of the interior.

Mr. and Mrs. A. J. Knapp were here for the annual meeting and called on a few friends.

Mr. and Mrs. C. R. Todd of Grosse Pointe Farms arrived Saturday for a two weeks' stay.

REPORTS OF YOUTHS TO BE GIVEN SUNDAY  
Concluded from page 1.  
"The Candlelight Consecration," Jerry Priesskorn.  
"Conference High Lights," Duane Kottelwell.  
"The Evening Campfire," Marjorie Karr.

Sally Colbert, who was at Waldenwoods, is visiting in Pontiac and will not be present to participate on Sunday.

Mr. Vender predicts that this will be a service of outstanding interest and inspiration, as the worshippers catch the spirit of the conference and gain an insight into what these summer conferences mean to the youth of the church, and what it portends for the future of the Christian enterprise, locally and world-wide. Parents and friends are cordially invited to share in this fellowship of worship.

PLEASANT HOME HOSPITAL  
Patients in the hospital Wednesday afternoon were: Randolph Dulong of Gagetown; Mrs. Ernest Heck of Elkton; Mrs. Fred Krause and Raymond Levine of Detroit; Wm. Hillaker of Snover; Mrs. Jake Erndt of Fairgrove; Doris Perry and Elizabeth Suranay of Caro; Gerald Whittaker, Rose Gordon and Lester Barnes of Cass City.

Patients admitted the past week and since discharged were: Margaret McKenzie of Muskegon; Albert Mozdren of Detroit; Charles Militzer and James Mosher of Gagetown; Vincent Dillon of Colwood; Janet Bass and Betty Jean Denhoff of Kingston; Mrs. Vern Cannon of Marlette; Mrs. Emerson Kennedy, Beverly Czeszewski, Roy, Billie and Bobbie Tuckey, all of Cass City.

Proper Fly Control Eliminates Disease

Proper Equipment and Application Important

Many diseases and cases of contamination are traceable to flies. Spraying with DDT and other new chemicals presents the first truly effective means of controlling flies.

DDT is amazingly effective for several weeks. Flies landing on treated surfaces die in a few minutes from a condition similar to delirium tremens. The main steps to a good fly control program are:

First: Clean up the breeding places where flies lay their eggs.

Second: Spray DDT on all surfaces where flies gather. For this work a sprayer developing some pressure is needed. A garden type compressed air or larger sprayer will do the job efficiently. Around the home, spray the doors, windows, the back porch, out buildings, et cetera. On the farm, the ceilings

and walls of barns, poultry houses and hog houses should be sprayed. Two or three sprayings a year will provide excellent control.

DDT is positive but slow in its action. Dairymen still are using hand sprayers for a quick knock-down of visiting flies at milking time. The hand sprayers also are convenient for spraying again those areas exposed to rain, where DDT may be washed off.

The types of sprayers for fly control include: (1) hand atomizers; (2) hand pump action—knapsack, wheelbarrow, and bucket pump sprayers; (3) compressed air—usually 2 to 4 gallons in size; (4) engine-operated sprayers from 3/4 to 1 1/2 H.P. up in size. At least one of each type should be available.

Flavor and Value of Milk Can Be Retained

In recent months small unit pasteurizers have been placed on the market. Tests conducted by state experiment stations and research organizations have proven that the taste, quality or value of milk pasteurized by these units is not diminished—but on the other hand the

health factors are greatly increased. There is a serious milk-borne disease danger of using raw milk. This may be entirely eliminated. With many cities, counties and districts demanding pasteurization of milk to be sold, the small units will prove of value to owners of a small number of cows who desire to retail their excess milk supply. The only certain way to avoid disease from milk is to heat it sufficiently to kill all disease-producing bacteria—this can only be done properly by pasteurization. Boiling will kill bacteria.

Hurdle for Hogs

Much time can be saved in herding, moving or catching hogs by use of the easily constructed hurdle shown above.

Not Possible to Make Hay While Sun Shines  
Too often rain comes before the hay can be field cured or placed in the barn. Barn-drying is a system designed to overcome the weather hazard in making hay. New York station specialists point out that it is possible to produce high quality hay with barn dryers when they are used wisely. Unless drying can be accomplished in 7 to 10 days, moldy hay or a product of low feeding value may result.

First Farm College  
The world's first agricultural college was founded at Hohenheim, Germany, in 1818. In America the first one is believed to have been Gardner's academy, founded in Maine in 1823.

You should see the Smiths these days! The clothes they wear, as well as their curtains and linens at home, all have that razor-sharp look that can come only with the most expert kind of ironing.

Mrs. Smith says that pressing's no problem with her new electric ironer—especially since she asked an Edison Home Service Advisor to show her the fine points of its use. Thanks to that half-hour demonstration, Mrs. Smith now whips through a pile of work like a professional. At ease in her chair, with no steam to bother her, she can do shirts and even suits without a speck of trouble.

Like Mrs. Smith, you'll find that a visit from a Home Service Advisor can often be helpful. Whether your question's about an appliance or lighting—kitchen arrangement or recipes—the Home Service Advisor can tell you of ways to make household tasks easier.

### Michigan Mirror

Concluded from page 1.

College the other week. The boys from towns all over the state assembled to study how government operates. They were housed in student barracks.

Morning assembly was at 6:30 a. m. Someone had the bright idea of sounding off a bugle for first call. He blew it loud and long.

From trailers in the veterans' village nearby came a chorus of howling babies.

The next morning: No bugle. College babies had the right of way!

Frank Morris, Lansing correspondent of the Detroit Times: "Secretary of State Fred M. Alger, Jr., is being groomed to succeed Sigler after a second term. A novice at politics, Alger has been surprisingly successful in quietly accomplishing objectives for the good of the state without stepping on toes."

Clarence W. Lock, deputy revenue commissioner, predicts that an amendment to the sales tax law may save Michigan farmers and owners of farms \$1,500,000 to \$2,000,000 a year. New exemptions were authorized by the 1947 legislature on purchases by persons "having an interest in tilling of soil or raising of livestock and poultry" for such things as clothing, household appliances, and other products. Buyers must sign statements as to intended use.

From my notebook: Communism thrives on low living standards and a weakened middle class. Free elections in Hungary in November, 1945, while under Russian occupation, resulted in only 17 per cent vote for communists. . . . There are three eagles' nests at the Ludington State Park which spreads over 3,142 acres. . . . "Rural Iowa is seriously over-churches; over one-half of the rural churches are standing still or declining; ministers are poorly paid" — Dr. H. Paul Douglass in a report to a national convocation on the church in town and country at Des Moines.

Marshall is proud of its Schuler hotel, and rightly so. This small hostelry recently opened a Centennial dining room which would do justice to Chicago or New York City for colorful surroundings, fine food, reasonable prices. The place was packed the other night when we stopped for dinner. Michigan is full of surprises; the Schuler is one of them.

### Test For Fastness

When washing prints, be sure to test for color fastness. One way is to dip a belt, or a piece of the fabric snipped from a seam, into a glass of lukewarm water. To prevent color bleeding when print dresses on a hanger with an old sheet or a bath towel run between the front and back and another through the sleeves.

### Railway Payroll

Railroads of the United States are among the largest employers of labor in America, and by far the most important item in their operating budget is their payroll. In 1933, the worst year of the depression, the payroll of Class I railroads (roads with annual revenues of more than \$1,000,000 each) was \$1,404,000,000. With more traffic to handle, their 1940 payroll totaled \$1,994,000,000. In 1946 their payroll reached the all-time high peak of \$4,086,000,000, or more than \$11,000,000 a day!

## Decorative Scheme Can Assure Cool Atmosphere for Summer

By Ertta Haley

ALL of us expect, and have a right to expect, comfort and convenience from our homes, but our ideas of what they should be change from season to season with the weather. During the cool, crisp months, we like warm colors and a crisp, crackling fire, with hominess and cheer reaching out at us as we enter.

In summer, however, any suggestion of warmth is likely to drive us to whatever is the coolest spot in the house. In my childhood I always headed for the basement with its stark white-washed walls, but at least I always found comfort.

Colors and fabrics are so important to keeping a cool feeling within us that we should strive to put this psychology into practice. The summer is no time for heavy drapes in lush reds or deep purple. We need light-weight fabrics in cool blue or icy green. We need them not only for the cool feeling they give us, but also for the ease with which they can be kept clean and fresh looking to take away any rise in temperature we might experience.

In the bedrooms, it is best to have cool white or pastel shades which will close out the heat and make for a feeling of restfulness. The curtains, too, should be light and airy, preferably made of some sheer open fabric that gives us a chance to feel we actually are breathing.

In the youngsters' playroom or nursery, if you are lucky enough to have venetian blinds, you may dispense with curtains entirely. In their place, I'd suggest just running a piece of ruffling around the windows to give them a finished appearance. This should be about two or three inches wide.

**Select Fabrics**

**For Cleanability**

Naturally we want to cut down our cleaning as much as possible during summer, and one of the ways this can be done is to select easy-to-clean fabrics for our furnishings. For kitchen and bathroom, the plastic materials that are simply wiped off with a damp cloth are by far the best.

**Solve Cleaning Problems . . .**

In the porches, you may use glazed chintz, as this has a dirt resisting finish and it does keep the finish after washing. Or, you might even use oilcloth in the porch as much as possible. This too may just be wiped off.

For dining, use as many paper accessories as possible so you can eliminate some of the laundry from the dining room. Also, plan to eat outdoors as much as possible, as a lift to your morale as well as for your comfort.

You'll be much more comfortable during the summer months if you don't let cleaning get you down—or out of hand. When you can use paper in place of washable fabrics or in place of dishes, by all means do so, as it's an effort to stand over a sink full of dirty dishes or a tub full of soiled clothing when the weather beckons.

Plan to do the cleaning early in the morning before the weather becomes sweltering hot, and you will be well repaid by having leisure hours in the afternoon.

**Change Bedding**

**For Summer**

One of the major changes you will want to make for warmer weather involves bedding. Sleep must be

**Be Smart!**

That ultra-feminine touch of this season can mean almost anything that's fresh and beautiful . . . also colorful! A single luxurious rose, a quaint little nosegay against its cuplike background of lace, a huge taffeta sash in stripes or plaid for a dress or bolero.

### Eyelet Batiste

This lovely lady is ready to go dancing in a glamorous white formal of exquisite cotton batiste and organdie. The strapless bodice in eyelet batiste fits snugly until it meets the full organdie skirt. A flouncy organdie ruffle skips downward from back to front. Red carnations over one shoulder add a bright touch of color.

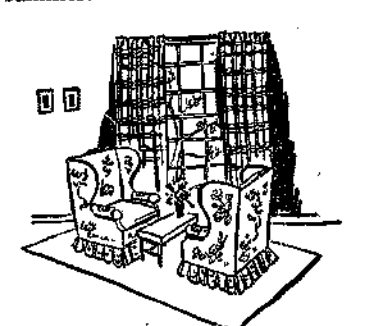

comfortable no matter what the weather, and a few precautions will guarantee it so.

Within the last few months a number of plastic covers have been reaching the stores. They include mattress covers as well as pillow covers and shut out dust and dirt efficiently from the bedding itself. Once you put it on, you can be assured that no dust will reach the bedding, and you will be relieved of a cleaning problem.

There is no laundering on either of these items. They are cleaned as any plastic, simply, quickly and easily just by swishing with a damp cloth.

If you do not have a set of summer bedspreads, preferably in cotton, then plan to get some immediately. They give bedrooms a light airy feeling and many of the tufted spreads, quilts and seersucker spreads need no ironing at all. They will take tubbing nicely, and if hung properly will be smooth and wrinkle-free, ready to put back on the beds as soon as they are dry.

Many women dispense with spreads entirely by using light summer quilts for the bed. They look so summery and add such a gay note to the rooms, and are so easy to clean, it would be foolish even to consider using spreads. After all, the more gay the home, the more informal the atmosphere, the more pleasure the place will be during summer.

With Easily Cared-for Fabrics.

Quilting is not difficult, and most women like to do it, so it might be a good idea to use up odds and ends of material for these very useful furnishings.

All rugs that soil easily should be replaced by easy-to-clean ones during the warm weather as there is so much traffic from outdoors to indoors. Porches which take the major share of the wear should be fitted with grass rugs of one type or another or by linoleum, for both are easy to clean surfaces.

In the bedrooms you might dispense with any of the larger rugs entirely as these are certainly a job to clean, and fit the room with several attractive throw rugs that are easy to pick up and shake or clean otherwise.

If you are fortunate in having the use of a loom for weaving "rag rugs," this will give you an outlet for those balls of leftover materials. If you do not have a loom for weaving, there are a number of boards and gadgets available for making yarn and twine rugs quite inexpensively.

Just a word of caution about rugs: Do select them for their color scheme as well as utility. If you do not have colors that lend themselves to your rooms, you can, of course, do a dyeing job readily and make the rug a real asset to the room. Use colors such as green, rust or blue, which will not show every bit of soil that is tracked into the house.

You can't have this

IF YOU ALLOW THIS

Do you like to hunt?

Then don't destroy the forests which give game the cover and shelter it needs.

Forest fires have raced through forests faster than deer can run. Surviving wild life is left to starve and die with the corpses of animals cooked by the flames.

For the protection of wild life . . . for plenty of forest products for your own use . . . help prevent fire by never being careless in the woods.
