Workstock Numbers

The 1946 crop of mule colts was the smallest since 1932 and 23 per cent less than the 1945 crop, according to department of agriculture figures. Number of colts under one year old on January 1, 1947, was estimated at 50,000 head compared with 65,000 head a year earlier and 67,000 head on the same date in 1945. This decline in mule colts numbers began in 1941. The number of horse colts under one year of age January 1 was 15 per cent smaller than a year earlier.

Multiple-Use Apron

One of the latest clothing developments is a two-in-one apron, which is made to give the user knee protection when doing kneeling jobs and provides a spacious pocket in which anything from a packet of seed on up to a mess of turnip greens can be carried.

Many Fail To Use

Pasteurization of milk and immunization against disease are weapons which still are unused by many of our people.

*When
Waiting
is
Necessary*

Time often moves too slowly for us. We'd love to speed up the time needed to provide telephone service for everyone still waiting. But, unfortunately, equipment necessary for expanded service has been slow in reaching us. Material shortages and other delays beyond the manufacturers' control have hampered production. Like everyone else, we must wait our turn for new equipment. Meanwhile, we will continue to do the best we can with what we have.

HELP BUILD

AMERICA'S AIR POWER

on AIR FORCE DAY, AUGUST 1ST

No one today questions the fact that the whole future of the United States may rest in the very clouds over your head. And the new, reorganized Air Force give thousands of eligible young men an opportunity to take an active part in building America's air power... on the ground as well as in the sky.

You may, for example, enlist in the Air Forces for three years. If you have a specialty which will qualify you, you may also be able to enlist in a grade at higher pay.

If you have had Air Forces experience, you may join the Air Reserve and continue your military aviation training outside of business hours.

Or, you may join the Air National Guard and perhaps become eligible for advanced technical training at special Air National Guard schools.

On Air Force Day, make a point of finding out everything about your Air Forces — especially the new Aviation Career Plan described below. Full details can be obtained at your U. S. Army Recruiting Station.

NOW—THE WORLD'S GREATEST OPPORTUNITY FOR A CAREER IN AVIATION

Today the Army Air Forces offer high school graduates an unprecedented opportunity to get the finest aviation schooling on earth — and select your school or course before you enlist.

The AAF Career Plan is unlike anything ever offered before. It permits selected high school graduates to apply and qualify for AAF specialized courses of their own choice. Simply go to your U. S. Army Recruiting Station, advise the Recruiting Officer the kind of aviation training you want and he will provide you with an application blank and a complete list of available courses.

When you are selected to attend the course of your choice, you enlist in the Army Air Forces for 3, 4 or 5 years. After your basic training period you are guaranteed the education you have selected to make you a specialist in the type of work you want.

Get a list of all the schools and courses open to you under the AAF Aviation Career Plan at your U. S. Army Recruiting Station.

Government Jobs

Veterans rapidly are displacing non-veterans in government jobs, the percentage of federal employees who are ex-G.I.s increasing from 26 to 42 in the past year. California leads the field in the number of resident veterans employed by the federal government, almost 52,000 of a total of 212,912 federal employees in the state being ex-servicemen. New York is runner-up with 80,912 veterans out of a total of 192,596 federal jobholders. The national low, on a percentage basis, is in the nation's capital, where only 32 per cent of 221,288 federal employees are veterans.

Traffic Violations

Six principal traffic violations account for more than four-fifths of all auto accidents. Principal infractions are speeding, improper passing and disobeying stop sign or light.

Check Equipment

Disorder of farm equipment is the greatest single cause of farm accidents.

Animals Need Water

The average cow requires 33 gallons of water a day for watering, cleansing and sterilization, a total of 12,000 gallons per year. Below that amount, milk production may fall 10 to 20 per cent. A hundred laying hens require 10 gallons a day or 3,500 gallons per year. Without it egg production may be off 8 to 10 per cent.

A Statement To Our Customers About Resale

PRICES of PRODUCTS

Built by International Harvester Company

Here at Harvester we are concerned over the fact that a growing number of our products are appearing on the resale market at greatly inflated prices.

As manufacturers, we try to produce at the lowest possible cost. We cannot set the prices at which our products—tractors, motor trucks, farm implements, refrigeration, and industrial power equipment—are sold. We can and do suggest list prices which the great majority of our dealers adopt as their retail prices.

\$20,000,000 Price Reduction

Our basic price policy was publicly stated in March, 1947, when we announced price reductions at the rate of approximately \$20,000,000 per year on our products. At that time, Fowler McCormick, Chairman of the Board, said: "ANY PRICE IS TOO HIGH IF IT CAN BE REDUCED."

Practically all of our dealers cooperated with this policy and passed on the savings to their customers.

The objective of the price reductions was to make it possible for customers to buy our products, which they need so badly, at lower prices. Naturally, this purpose is defeated when our products are sold by anybody at inflated prices.

IH Production at All-Time Peak

Inflated prices are caused by

the difference between supply and demand. To increase supply, we now have the greatest number of employees in history on our payrolls—almost 90,000 in the United States, as against about 60,000 prewar. Large new plants are getting into production in Louisville, Evansville, and Melrose Park. A fourth will soon be in operation in Memphis. The men and women now employed are turning out the greatest quantities of IH products of all kinds that we have ever made. These are also the finest products we have ever made, and recognition of that fact is an important contributing factor to the demand for them.

Distribution to Dealers

But even record-breaking production is not sufficient to give your dealer—and other IH dealers—enough products to meet today's demand. We have tried to make the fairest possible geographical allocation of our products so that every dealer would get a fair share, and we know that dealers, in most cases, have tried earnestly to make the fairest possible distribution to their customers.

But we also know that many of our products—far too many—are being resold at inflated prices. The public criticism and resentment of these resales are of real concern to us, as we know they must be to our dealers, because such reactions en-

danger the good will of both the dealer and the Company in any community.

Distribution to Customers

Experience shows that many IH new products are being resold by users who decide they can continue to make out with their old equipment after they have had an inflated offer for their new equipment. To eliminate this, many dealers are taking measures to be sure that equipment purchased is for their customers' own use and is not to be resold.

Nearly all IH dealers, we believe, are now using the basis of PRESENT NEED as their primary guide for the sale of scarce products. The customer whose need is real and urgent is not likely to resell.

What Price Should You Pay?

While it may take a little more time to get delivery, we urge our customers to consider all of the factors mentioned here, before paying more than the list price for any IH product. Any IH dealer or branch can furnish the suggested list price for any IH product.

We know that the overwhelming majority of IH dealers are as much opposed to inflated prices as we are. In the public interest, we have already asked their cooperation—and are now asking the cooperation of customers—in correcting this situation.

Oak Bluff Breezes

There's a peculiar depth to summer nights after a day's rain, a depth of sensation as well as of distance and darkness. The trees still drip slowly and nature rests as though the effort had been exhausting. The air is moist and the scents of the woods are intensified.

Walk a little way on such a night and the rain-bound branches touch and drench you.

The darkness is deeper somehow, even though the clouds are thin. The moon is covered and the stars, but the clouds move quickly, the moon bursts through only to be veiled again, then to re-appear, and there is light. Light silhouetting the giant pines, shines on the white birches, and makes of the bay a great shining mirror in the deep darkness of the night.

Week ends here need fine weather for complete satisfaction. For a short time the rain threatened on Sunday but soon cleared and the out-of-doors continued to claim most of the interest.

Mr. and Mrs. Curtis Hunt and Mrs. Wain Jackson and children are spending some time at the Hunt cottage.

From early morning until long past sunset the outboard motor boats are constantly coming and going. Fishing remains good.

Among the fishermen with good catches were members of the Lunn family from Detroit who are spending two weeks at the Sandham cottage.

Fresh cherry pies are heading the list of "specials" on the menus here and much controversy continues as to the merits of the varieties. We still go for the old time two crust, but the glazed cherry pie topped with whipped cream is not bad, especially after a piece of resistance of white fish and green salad.

Mr. and Mrs. Dor. Heator have been installing plumbing in their cottage and several of the family have been here through the week.

Mrs. Walter Willetts and son, Bill, are back for a few days.

Mrs. J. E. Wurm left Sunday afternoon for a few days' visit with her sister, Miss Mae Goulet, in Bay City.

The Robert Dillmans of Detroit who have been spending their vacations at Oak Bluff for a number of years, are occupying the A. J. Knapp cottage for two weeks. Mr. Dillman is connected with the Michigan State Telephone Co.

Mr. and Mrs. J. K. Brooker of Bay City and Mrs. J. D. Brooker of Cass City were guests at the Burke cottage Sunday. Mrs. J. D. Brooker remained for a few days' visit.

For the past week the Carnegie family have occupied the Knapp cottage while their friends, the

Safety Rules

There are five fundamental safety rules that prevent accidents involving tractors. They are: (1) reduce speed before turning or before applying brakes; (2) don't ride tractor drawbar or drawn implements; (3) stop power take-off before dismounting; (4) don't refuel when motor is running or extremely hot, and (5) don't operate tractor in closed building or near inflammable materials.

Jarring peach trees during the blossoming period as a supplementary measure in peach curculion control is recommended by horticulturists. It should begin at blossoming time and continue two or three times each week as long as beetles are caught.

Timely Sewing

Stitches in time save headaches for housewives. Pressing each seam before it is overlapped, keeping an abundance of pins on hand, letting dresses hang a day or two before hemming, and machine gathering by making two rows of large stitches and then pulling the lower thread are useful tricks for all sewing enthusiasts to know.

Going Up

For ease in climbing stairs, the "rise" from one step to another should be about seven inches; the "run" or tread should be about eleven inches.

Mirror Cleaning
Special care to prevent water from running between mirror frames and the glass should be taken when washing them. Mirrors are cleaned best by wiping with a vinegar or ammonia-moistened cloth and drying with a soft, clean, lint-free cloth.
