Brief Sketch of Pioneer Life in Elkland Township.

Old Settlers of Huron, Sanilac and Tuscola Counties Should Organize a "Pioneer Association."

The history of Tuscola county is not a record of sensational events, but represents the noblest activities of human ingenuity—the transforming of a wilderness into cultivated farms and thriving villages.

Its settlement began in 1835 in the present township of Tuscola and the One of the Fiercest Games Ever first actual settler was Ebenezer Davis. Until 1850, when the county was organized and its civil history munds commenced sawmill operations at Vassar, and opened the channels of immigration), the settlers were few. About 1865 general improvements began and the subsequent years have been an unbroken record of progress.

In the history of Elkland Township we find much of interest. The town was organized Oct. 14, 1856. The pioneer settlers were Messrs. Cooper and Wright. Among the earliest settlers were Andrew Walmsley, Hugh Seed, Wm. Edgar, John Bird. Wm. Jacobs, Chas. W. Smith and David Winton. Of these only Messrs. Walmsley and Seed are still residing in the town.

Hugh Seed, native of Ireland, made his first residence in Oakland County. In 1854 he began work in Tuscola County, being employed in Cooper and Wright's lumber camps, in what is now Elkland. Mr. Seed struggled valiantly against pioneer hardships, and by his perseverance and industry soon cleared for himself a large farm tract. The present site of Cass City was once included in Mr. Seed's home-

tion was dissolved, but in 1845 it was Walmsley and Wm. Edgar who began clearing land at once. Mr. Walmsley, also a native of Ireland, came to Elkland in 1854, and he with Messrs. Edgar and Seed took entries for land in May, 1855, which they often work-

In those days a trip to Vassar required at least a week of time since such a trip necessitated the opening of roads while making the journey. It was almost impossible to get through the swamps with wagons, and backs of the settlers. Often for weeks at a time, these settlers heard

no other human voices. The first religious service was held in 1860 by Rev. John Baker of the M. E. Church, in the log house of Andrew Walmsley which continued to be the place of worship for more than a year. Settlers from a distance of seven miles around attended these twice-a-month services, one being conducted by Mr. Baker, and the other by Mr. McKenney of Ellington. Later on these services were held in the schoolhouse where now stands the the town and was taught by Mrs. Walmsley in 1861 at the home of Mr.

Cass City and Caro Crossed Bats at Caro Monday. Caro Won-3 to 2.

The game started out with Cass City at the bat, and Schwaderer, Seeley and Brumm failed to score. Cass City scored her first run in the fourth inning when P. Schenck crossed the plate. The second run was fair trial of this industry will contallied in the first half of the ninth by Schwaderer.

Caro scored Harris in the first inning and Kellogg in the last half of the eighth. At the end of the ninth inning the score stood a tie. The tenth inning was fierce but neither team scored. Cass City came to bat out the following blank and to forin the eleventh but did not score. When Caro came to bat the excitement was intense. McKay and Beckton took the bench, then Moore reached first, while Harris fanned the air for two strikes. Moore attempted to steal second, and McKenzie acting upon a natural impulse, tried to shut him out. As this play was not anticipated by Seeley, he was unprepared for the wild throw and Moore easily scored. While McKenzie lost the game by throwing wild, not one out of a dozen would have played the ball otherwise, and we must attribute the loss of the game to a mere "freak of

# SUGAR FACTORY?

Michigan Can Support at Least 30 New Factories.

The Land in the Vicinity of Cass City Well Adapted to the Raising of Sugar Beets.

Within the past three years a dozen sugar factories have been established within the state. Experts say that Michigan can easily support thirty more such factories, and there is a general hustle among the towns in Michigan to locate the same. The success of a beet sugar factory depends upon the farmer-he must furnish the beets. Wherever the experiment has been tried, the farmers began (when Messrs. Peter Smith, aged 35 years, a repected farmer of Bainbridge township, and a tenant on the farm of Fred Baker, near Sister Lakes, was shot and killed Thursday while engaged in cutting wheat on the Jacob Winn farm, a mile and a half from his home. The first known of the murder by others in the field was the discharge of the gun, the man having secreted himself behind a shock of grain. The report was heard, the sight of the smoke was noted and the nearness to Smith created a suspicion that murder had been committed. Smith was struck in the back and the ball passed under the shoulder. He lived but three hours. Wayne County Taxes. City Assessor Louis Smith, of Saginaw, was in Detroit for a short time Tuesday. Smith, with the assessors of Kalamazoo, have been hired by the state tax commission to investigate the assessments of Wayne county, the purpose being to show that assessments here are low. Ex-Tax Commissioner Oakman made the following comment on this move:

"It might be well for some of the heavier taxpayers of Detroit to ask the state tax commission to appoint the city assessors of Detroit to investigate the assessments of mines in the upper peninsula and to see how the figures in other Michigan cities are placed.

The city assessors have set ten of footprints, instead of looking ahead, their men at work to take the figures and say, "How gloomy it looks in the shadows!" may be shown that Detroit property is assessed at almost market value. Cannot Tax It.

The assessor of Howell assessed the money which had been loaned through Gordon in this state on notes and mortgages, and such money as Gordon might have had at the time in his custody belonging to Rogers. The circuit court held that the money was subject to taxation and that the determination of the board of review as to the amount was final and not reviewable, no fraud being charged.

The supreme court has reversed the case. The court says it is the policy in this state to tax credits owned by residents only, and the provisions of the law and decisions are quoted to that effect. "It is legally clear," says the court, "that the money in Gordon's possession was not assessable?

#### The Crop Prospects.

Secretary of State Warner reports that the wheat crop of Michigan this year will be very poor, the crop having continued to fail during the past month, many fields that promised well in the early part of the season, having been plowed up or pastured. The Hessian fly is mainly responsible for this condition, and had it not been for the cool weather of spring, this damage

would have been much greater. The average estimated yield in the southern counties, where three-quarters of the Michigan wheat crop is grown, is 9 bushels per acre; central counties, 14; northern counties, 12; state, 10. One year ago, the estimate for the state was 7 bushels.

There is no truth in that whatever," aid President Eliot.

Mr. Adams is the former rector of St. Paul's Episcopal cathedral, at Buffalo. He said: "Yale, Harvard and all Men of universities are conspirators otlier against the truth of God. He thought differently and it worried him. One night while playing cards with a friend he got up, left the house, and from that day until now nothing was ever heard of him. When Mr. Pingree's remains were in New York an old man called and wished to see them. It was Charles H. Smith. ## Other Events of the Week.

The Ohio Democrats. The Ohio Democratic state convention met in Columbus on Wednesday, the great fight being on the platform, which was won by Mayor Johnson, of Cleveland. The Johnson men won on their favorite views on state matters and the others on national issues. The three planks of the Johnson men-on franchises, steam and electric railways and corporation taxation-were adopt ed as amendments. The platform

savs: The acceptance of free passes or other favors from railroads by public officers or employes shall be made adequate grounds for vacating the offices held by them. All public service corporations shall be required by law to make sworn public reports, and the power and duty of visitation and public report shall be conferred upon the proper state and local auditing officers, to the end that the true value of the privileges held by these corporations shall be made plain to the people.

Steam and electric railroads and other corporations possessing public franchises shall be assessed in the same proportion to their salable value

as are farms and city real estate. Powers granted the federal government were not meant to be used to conquer or hold in subjection the peo-ple of other countries. \* \* \* The Democratic party opposes any extension of the national boundaries not meant to carry speedily to all inhabiants full, equal rights with ourselves. If these are unfitted by location, race or character to be formed into selfgoverning territories, and then incorporated into the union of states, they should be permitted to work out their own destiny.

Maintenance of the Monroe doctrine s demanded; a navy adequate to the protection of American citizens and property the world over; election of senators by direct vote; and the right of labor to combine for the assertion of ts rights and the protection of its in-On "boss rule," etc., the party pledges itself to "rescue our government from the grasp of selfishness and

corruption, and restore it to its former fairness, purity and simplicity." The following nominations were made: Governor, James Kilbourné; Lieut. Governor, Anthony Howells; Judge of Supreme Court, Jos. Hidy; clerk of Supreme Court, Harry B.

Young; attorney general, M. B. Mc-Carthy; treasurer of state, R. P. Alshire; member of board of public works, James B. Holman. A striking feature of the convention was the treatment of W. J. Bryan. The most bitter things were said of that there should be no reference to this plan had been agreed upon, one of

the Kansas City platform and expressing confidence in Bryan. He received only six votes from the 950 delegates on his substitute for the preamble. A few minutes after the platform was adopted, one of these six delegates called attention to the fact that pictures of other Democrats were displayed in the hall, and none of Bryan, as heretofore. He started to carry a small banner, with Bryan's picture on it, to the platform. The aisles were ordered cleared, but the picture did not reach its destination. It was trampled under foot and spoiled during the wild

demonstrations when Kilbourne was escorted into the hall. While it is generally believed that the marching clubs did not know they were walking over Bryan's picture, yet there was much comment after the convention that the picture was not treated worse than had been the old standard-bearer himself by the committee on resolutions and the convention. Members of the committee on resolutions said over an hour was spent in efforts to strike the word "saleable" out of the plank on railway taxation and several hours in denouncing the Chicago and Kansas City platforms, and the leader who stood on them.

### Russia's offer.

Another important exchange has occurred between the Russian government and the United States relative to the tariff. The Russian minister of finance, M. de Witte, has proposed that Russia will vacate all of the additional duties levied on American goods since the imposition of the sugar differential. if the United States will vacate its action on the sugar differential. To this Secretary Gage replied that the offer of the Russian government cannot be accepted, as the question of the sugar differential is now in the hands of the court, thus precluding action by the executive branch. These exchanges, although made nominally by the minister of finance and Secretary Gage, have gone through the medium of the Russian foreign office and the state department.

## How They Are Taxed in the Great

City of New York. The surprising poverty of rich men and millionaires revealed in personal property tax lists is strikingly illustrated in the returns made by the tax board in New York. Pierpont Morgan has sworn that he has only \$400,000 for taxing purposes. Senator Depew said all he could call his own was \$25,000. Russell Sage solemnly swore he had only \$400,000. Seth Low was under suspicion for a while of owning property worth half a million, but he said he did not own a cent's worth, and so he was wiped off the lists. Helen Gould and Frank Gould are in the same impoverished condition as gards personal property. Bradley Martin's fortune is placed at \$200,000. John D. Rockefeller is taxed for \$1,-000,000. Andrew Carnegie put the assessors in a kind mood and they let him off with a \$1,000,000 record. James Stillman, the Standard Oil bank president, doesn't save much of his salary, and when he was charged with being

half a millionaire he proved that he had only \$50,000, in the usual way. Judging from the personal property assessments the Vanderbilt family has corner on that kind of wealth in New York. Between them, the various descendants of the old ferryman have cared well for the money he left. Frederick W. and George W. admit they both have \$2,000,000 worth of personal property. W. K. pleads guilty to owning \$1,000,000, and the others to about the same amount between them.

For the first time this year, Richard Croker allows his name to stand on the personal tax books. His assessment is for only \$25,000, though he lost \$62,000 F. Carroll got his assessment of \$30,000 cut to \$5,000.

Corporation Counsel John Whalen has been reduced from an estimate of \$25,000 to \$5,000. Comptroller Coler has allowed his original assessment of \$20,000 to stand. J. Sergeant Cram, of the dock board, has acknowledged to \$1,000 out of an assessment of \$15,000, while Dock Commissioner Murphy gets off with a final figure of \$2,000 out of an assessment of \$25,000.

TURKEY PAID UP. The state department has received the amount of the American indemnity claim against Turkey, \$95,000, through the American legation at Constantino

The money was paid by the Turkish government to Mr. Leishman, our minister at Constantinople; was by him placed in the Ottoman Imperial bank and drafts remitted for the amount These drafts have just reached Washington. As is always the case, the claims in the aggregate considerably exceed the amount of the indemnity actually paid, but our government has expressed itself satisfied with the payment. It assumes full responsibility for the distribution, the Turkish government paying down a lump sum of \$95,000 and leaving it to the state department to distribute this among the claimants at its discretion and after its own fashion. It is stated that as soon as the department officials can prepare their list, they will communicate directly with the claimants.

Steel and Tin workers, adjourned finally at 6 p. m. Saturday without reaching an agreement. In less than in hour later President Shaffer of the Amalgamated association wired the ollowing order to all the Amalgamated lodges in the tin plate, steel hoop and sheet steel mills of the country:

"Notify your men that the mill is on a strike, and will not work on Monday, July 15."

For the present, President Shaffer says, only three companies named will be affected, but later all the union men in the Federal Steel company, National' Steel company and National Tube company may be called out, if it is found necessary to resort to extreme measures to win the fight. At the start, it is claimed, 45,000 skilled workmen, 30,-000 unskilled men and indirectly many thousands more will be affected, reaching a possible total of 150,000.

#### The Death List Grows.

The death list of the Chicago & Alton collision near Norton, Mo., grows hourly. Thursday morning 17 persons had died, 3 were dying, and the hospital physicians state that others who inhaled steam from the wrecked locomotives may not recover. Not all of the other 24 patients in Kansas Oity hospitals are out of danger. Indeed, on horse racing at Newmarket. John all of those scalded about the head are probably injured internally by inhalation of steam, and the physicians and attendants say that many of the cases are serious. A passenger says of the wreck: "The train was making a fine sprint and everybody feeling pleasant and happy, when all of a sudden there was an awful crash and it seemed as hough a tremendous fist had struck the train in the face. In an instant the air was filled with cries and screams; cars were smashed into splinters, while several rolled down the huge embankment. In an instant that splendid train was reduced to a mere mass of debris, with human bodies crawling, screaming or lying in mangled heaps on the ground. Fire immediately added its horror to the scene, and above all the terrible clamor of our train were heard the almost human cries of the burning cattle of the freight train."

CHAPTER III.

The Castle Falls. We have already spoken of Pedro Francisco, the wealthy planter, the lover of Senorita Jacinta, and the confid- and the standard of the new king, ant and agent of Ferdinand Gomez.

Francisco was a man about thirty years of age, and had inherited from his father, Spaniard of the type of Don Juan Garza, not only the broad lands that made him wealthy, but the flerce and haughty spirit of the true Spaniard, and the love of the pomp and display of royalty that Don Juan possess-

The hatred of the republican government was as strong an emotion in the heart of Francisco as his love for Jacinta Salvarez. He had thrown himself into the conspiracy with fervor. The success of Philip of Aragon would doubly reward him. With Salvarez in power, he could not hope to win Jacinta. If the republican power was crushed, he would not only see his beloved court and courtiers, royal glory and military pomp, but he would have Salvarez in his power and Jacinta should

be his. The plan of Gomez to begin the war in the valley of the Coroni, and his selection of Francisco as his chief organizer there, was but another proof of the boundless genius of the man.

All the cupidity of the Zambos had been well worked upon by Gomez and Francisco, and they were organized, ready for the revolt against the government having been promised a rich bounty for their services.

These creatures were under the immediate command of one Mattazudo, a half-breed, but not a Zambo. Mattazudo was half white, that is, Spanish, and half Indian. He was shrewd, unscrupulous and cruel as Gomez could have wished him to be. Moreover, he had unlimited sway over the Zambos. Francisco was wonderfully well informed of events of which General Sal-

varez was entirely ignorant. He had received full instructions from Gomez and knew just when and where to meet the Turtle.

Ten miles down the Orinoco from the mouth of the Coroni, the southern bank of the river had a peculiar forma-

In the midst of miles of swamp and lagoon, one high and dry ridge rose like a great hog's back from the river to

the dry lands beyond the lagoons. Gomez, who knew the geography and topography of the country perfectly, had selected from the very first that hog's back as the point on which to

land his arms. His orders, therefore, to Pedro Francisco were to assemble a large forceas many of their adherents as could be gathered without arousing the suspicion of General Salvarez-on the hog-back to meet him and his fellow

conspirators from the Turtle. It was therefore a strangely wild and animated scene that was spread out before Lola Garza when the Turtle anchored off the hog-back, and the un-

loading of firearms began. Preparations did not lag. Every man as armed, and, having given orders to the captain of the Turtle to take the ship out farther into the stream and await a message from him, Gomez

gave the order to march. "Where shall we go first?" asked

Philip of Gomez. "To the Castle of Salvarez," said Gomez. "The army of the Republicthat portion of it south of the Orinoco -is commanded by Salvarez, who has

most of the men at his castle. They are now at Bolivar watching the unloading of the Agostura, and his castle will be an easy prey." At the castle of Salvarez two women

were growing anxious. The prolonged absence of Salvarez filled his wife and daughter with alarm. Rumors had quite like it. A flag no doubt designed Salvarez to Bolivar would be worse party in Venezuela." than useless, for the enemies that were expected had already landed in an unexpected way, and the Coroni flowed between the friends and the enemies of the republic.

Dona Maria and Jacinta heard these rumors with alarm, for if the insurgents should cross the Coroni and attack the castle, the pitiful handful of thirty men left by Salvarez would not be sufficient to protect it.

General Salvarez had an invention of his own in use on two flat boats used to convey cattle or produce across the river. These boats could be pulled across the river from either side. Francisco understood them well, and already the strained eyes of Jacinta and her mother saw a boat load of the enemy crossing the river.

The few men in the garrison began firing, but frightened by the seemingly endless throng that was coming to conquor them, threw down their arms

"We are lost!" cried Dona Maria. "Deserted by the few we had, what can we do? Even the servants have left us. We cannot escape!"

"The secret passage!" exclaimed Jacinta. "There is not a man unfaithful to my father who knows it. Come: we can escape them there!"

"Of what use is it?" asked Dona Maria. "We can, it is true, leave the castle by the secret passage, but what

shall we do then?" "Time enough to think of that when

we are safe," said Jacinta. "Come." They ran to their rooms, hastily packed up a few articles, seized their jewels, and entering a room on the

ground floor, left it again, disappear-

<del>\*</del> ing completely and leaving no trace of

the manner in which they went. An hour later the followers of Philip and Gomez had all crossed the Coroni, Philip of Aragon, floated from the flagstaff of the castle of Salvarez.

CHAPTER IV.

The Secret Passage. There was one person in the retinue of Philip of Aragon whose joy at the successful capture of the castle of Salvarez was not entirely without alloy.

This was Pedro Francisco. He knew that Senorita Jacinta was not with her father at Bolivar. He had dwelt upon the pleasure with which he would make her his prisoner, to win release only by making her captivity lifelong-by becoming his wife.

His chagrin, therefore, when the castle was found to be unoccupied was very great.

He knew nothing about the secret passage. Neither did Gomez, or any one else in the royalist army.

Meanwhile the returning battalions of Salvarez heard the flying rumors. Salvarez, who was slowly riding ahead, accompanied by Medworth and Tempest, was startled at seeing three horsemen coming at full gallop toward him.

The general spurred forward to meet them. "What is it? You have news?" he

said. "The castle! The castle!" cried one. "The Spaniard!" cried another. "The

eople have gone over." "We are lost!" exclaimed the third General Salvarez turned pale. "What do you mean?" he demanded

'You cry 'the castle!' Has anything gone wrong at the castle? Has the enemy come? My wife and daughterwhere are they?" "All is lost, I tell you?" was the re-

ply. "The whole country has risen in revolt. An armed force, consisting of hundreds of men, under Francisco and the half-breed Mattazudo, attacked the castle. We fought bravely. We killed over a hundred, but they were too many for us."

"Silence!" roared General Salvarez. Fear has turned you into garrulous old women. You say the castle is taken? Where, then, are my wife and daughter "

"Alas! We do not know. They either escaped or were captured." "Likely," said Tempest, speaking in English to Arthur. "The ladies are either free or in captivity, alive or

dead. No denying that fellow's brilliant intellect." "Hush!" said Medworth. Salvarez turned toward them, with a

pale, but stern face. "My young friends," he said, "the worst has befallen us. We have been outwitted-tricked-in the most skillful way. While we were in Bolivar, the enemy has entered at another point and now occupy my castle, and have no doubt captured or killed my wife and daughter. There is hard work before me. The castle must be retaken.

Forward!" He spurre news spread among the men. They pressed on close behind him. At the rear came the lumbering artillerythe guns he had taken to Bolivar to prevent the landing of the enemy.

After a wearisome march they came in sight of the castle, and from its staff floated a peculiar flag.

"It not that the flag of Spain?" asked Medworth.

"No," replied Tempest, whose venturesome life at sea had made him familiar with the flags of all nations and the languages of most. "It is the flag of no known country. It is modeled closely after that of Spain, but is not reached the castle that the errand of and chosen as the standard of the royal

The column was now halted. Salvarez called several of his officers

to him. As was perfectly natural and proper, Medworth and Tempest were not admitted to this council of war. They slipped from their horses and walked away toward the Coroni. Some of the soldiers of Salvarez looked at them, but none tried to stop them from going.

It was Medworth's idea to get below the bank of the river, which at this point was high, and, thus screened from observation, creep toward the castle and endeavor to obtain some information of the actual situation there. Carefully they crept up the river, drawing nearer each moment to the castle, now and then peeping over the

bank to take bearings. The path was beset with difficulties. At one place they came to a small stream that flowed into the Coroni, and to cross which they must find stones

or logs to make a stepping-way. The road to the castle, along which the troops of Salvarez were marching, crossed this stream over a bridge a quarter of a mile away, but Medworth did not know that, and if he had, it is not likely he would have left the shelter of the river bank to go to it.

After a time they found themselves near the castle. At this point there was a deep, thick

growth of vines and low trees along the river, and they had a view of the castle only in one place where the road was cut through down to the landing place of the general's flat boats.

They hurried passed this, and found a secure place among some vines and appear on many of the smart models.

bushes on a low spot between the river and the higher bank, about ten feet from the water.

Here they halted, and if they spoke at all, spoke only in whispers, while they peered here and there to see if there were any human beings near

Suddenly Mdworth was startled at seeing the thick vines on the side of the bank move. A hand appeared-a small, jewelled hand-and then a woman's face.

Medworth clutched Tempest, and they remained hidden, wondering what sort of hiding place that was.

Two women-one young and pretty, the other mature, but still handsomeemerged cautiously from some secret place, looked this way and that, and moved slowly away up the river.

They had not gone beyond the sight of the young Americans, when, with a loud shout, a man rushed upon them and seized the younger.

The Americans heard her scream and knew that she needed protection. All thoughts of their own safety fled, and as they saw two others come to the assistance of the first, they rushed out.

"Are you not the wife and daughter of General Salvarez?" asked Medworth. Jacinta looked up into the handsome face of the young American, and said: "We are, senor, and this man is our enemy."

It is, of course, apparent to the reader that Jacinta's assailant was Pedro Francisco. He made a gesture as if to draw his knife, but before he could use it, the sledge-hammer fist of Tempest caught him square, and he went cursing and howling to earth.

His two companions attempted to help him, but Medworth, who was a strong man himself, though not equal Harris, Commissioner of Education, is to Tempest in strength, knocked one of them down, and Tempest nearly killed the other.

The Americans then, to end the affair before others came, drew their revolvers, and Francisco and his companions sneaked away, crestfallen and swearing vengeance.

The Americans were overwhelmed with thanks, and Jacinta's black eyes were devouring Medworth's face and figure, while her tongue was uttering statement continues: "Our system of soft words of gratitude for his timely assistance.

"What a handsome man!" she was saying to herself. "I wonder who he is. hope I shall meet him again." "Senors," said Dona Maria, who had

no thought of the romance in the situation, but hungered for news of her husband, "do you know where General Calvarez is now?" "He is about a mile below, with his

soldiers," replied Medworth, who spoke Spanish better than Tempest. We left him to hurry forward and gain some knowledge of the situation. We will escort you to him." So they started back down the river,

Then Jacinta did not look so pleased. "Is there any secret approach to the eastle?" asked Medworth.

"No," replied Jacinta, boldly; "there is none.' When they had escorted the two ladies to that point where they could see closes with a discussion of normal the faces of the approaching army, they bade them adieu, and again receiving thanks, turned back toward the castle.

"Quite an adventure," said Tempest. 'By Jove, though, that girl's a stunner! What eyes! But what are we go-

ing to do now?" "Those women escaped from the castle by some secret way," said Medworth," and we saw them emerge apparently from the very ground. It's my belief that there is a cave or something there, perhaps with a communication with the castle." \* \* \*

(To be Continued) EXAMINING THE DOCTORS.

Partially Educated Physicians Menace

Health of the Public. Medical examinations in this state are strict, but not severe, says the Philadelphia Times. Certainly no person should be allowed to take human life into his hands unless he was able to answer the few questions that are asked, and yet those who fail consider their fate a personal hardship. They probably forget the interests of the people they would practice upon, if allowed to hang out their signs. Consider for a moment that in many other states in this country young men enter at once into the practice of medicine from imperfectly managed schools any means. which turn them out in short order. If put to the Pennsylvania test, they could never practice medicine, but with imperfect educations, with scant training, and as a rule with little natural aptitude for the work, they physic the body and occasionally operate upon it with knives and saws. Considering the thousands of partially educated doctors who are turned upon the country every year, it is wonderful that the longevity of the nation is increasing. Still that may be explained by the fact that most sensible people nowadays are not taking medicine except under compulsion, and many of our best doctors are stronger in demands about food, exercise and fresh air than they are about their prescriptions. The wife of one of the most successful and most noted physicians in this country complained the other day that she never got an opportunity to give her children medicine, except when the doctor was called out of town.—Philadelphia Times.

teresting facts about it. The coffins used by these negroes, he says, are rectangular, and each is fashioned carefully out of a large block of acajou wood. The sides, moreover, are ornamented with colored bas-reliefs and the cover is usually wrought in most artistic style. As an example of such a cover, M. Delafosse presents one, which was made in 1895 for Territory, portions of Nebraska, the the mummy of a chieftain named Ny-Dakotas and the southern tier of Iowa ango Kuassi. On it the chieftain is counties. Nor is there any promise of represented as lying on a leopard skin, which has been artistically engraved, the spots therein being shown by

On the right in like manner may be seen drawings of his dagger and of his gun. Below the corpse is a death's head and the figure of a woman, who is holding in her hand a saucer filled with bread. The death's head represents that one among the dead man's slaves, who, according to ancient custom, should have been sacrificed at the time of his death, but whose life was spared at the intercession of M. Delafosse.

A Peerless Opal.

The Imperial Opal, as it has come to be called, was on view the other day to the agents general and other leading colonials living in London. The owner of it, Mr. Maurice Lyons, invited them to meet him and see it at the office of the agent general for Victoria. Really there are two stones, but the smaller one is regarded as a fragment, though not by any means an "unconsidered trifle." It is the larger one, weighing 20 carats, which is the Imperial Opal. It is it that Mr. Lyons is wishful of presenting to the king, for the royal regalia, in honor of the establishment of the Australian commonwelath. Naturally there was talk about the opal and its qualities, and about opals in general. Sir Horace Tozer pointed out that the best way to see an opal was to look at it away from the light. Held thus it appeared to be alive with fire; to burn, as it were, in all manner of changing colors. Each facet in its composition seemed to have its own gleam, and that gleam leaped from hue to hue with every motion of the stone. "It is," the owner of it remarked, "what is known as a harlequin opal, a name indicating the various colors in it. This is the most perfect kind of opal the rarest, and so always the most valuable." All Doctors have tried to cure CA-TARRH by the use of powders, acid gasses, inhalers and drugs in paste form. Their powders dry up the mucuous membranes causing them to crack open and bleed. The powerful acids used in the inhalers have entirey eaten away the same membranes that their makers have aimed to cure while pastes and ointments cannot reach the disease. An old and experience practioner who has for many ears made a close study and specialty of CATARRH, has at last perfected a Treatment which when faithfully used, not only relieves at once, but permanently cures CATARRH, by removing the cause, stoping the discharges, and curing all inflammation. It is the only remedy known to science that actually reaches the afflicted parts. This wonderful remedy is known as "SNUFFLES the GUARAN TEED CATARRAH CURE" and is sold at the extremely low price of One Dollar each package containing internal and external medicine sufficient for a full month's treatment and every thing necessary to its perfect use. Silent Multi-Millionaires. The reticence of the multi-millionaires is provoking. Several of them Mr. J. Pierpont Morgan among the number, lately returned from Europe, They had been on the ocean in close communion for the better part of a week. They must have spent most of their time in discussing grave affairs of business, just as statesmen of the same party, if thrown together on a steamer, would have discussed great matters of state and would have outlined a political policy for the coming season. The "community of interest" men who were together on the Deutschland must have outlined their fall campaign. What it is they will. not say, but the people would like to know. Statesmen are not always taciturn. They are often willing to take the public into their confidence. It enables them to get along better than if they were resolutely silent about their plans. Often they throw out hints of what they intend to do, and if they find a cold response they change their tactics and escape making a blunder. It would not be a bad idea if the financial and industrial potentates of today were to try this practice occasionally and put out feelers to find whether the community will take kindly to some grand scheme they have in mind. If the men of high finance and consolidated industry are to continue to play the important part they have been playing of late they ought to reign like constitutional rulers and be a little less reserved. They should be as accessible as senators, cabinet officers, and presidents, and occasionally they should be communicative. If they have in mind further invasions and subjugations of European industries the people will be

Small Boys and Angels. Dr. Francis Wayland Parker is right BRIDE AT LAST SAID "OBEY." in his contention that it is folly to expect Sunday school children to stand up and say, "I want to be an angel and with the angels stand," and that more common sense and practical ingenuity should be shown in the expression of youthful desires. The angelic aspiration is a survival from the days, two or three generations ago, when children were actuated either by the fear of eternal fire or the prospect of heavenly reward according to their spiritual condition at death, as expressed by Dr. Watts in his collection of "Divine Songs for Children"-Just as the tree cut down, that fell To north or southward, there it lies;

WHEN TO EXPLCT A PANIC. Extravagent Speculation in Real Estate Options a Forerunner.

In the opinion of Mr. Alexander H. Revell, a writer in the Saturday Evening Post, undue speculation in real! estate options is the invariable precursor of the financial panic. We call the attention of our readers

to the advertisement of St. Mary's Academy, which appears in another column of this paper. We do not need to expatiate upon the scholastic advantages of St. Mary's, for the catalogue of the school shows the scope of work included in its curriculum, which is of the same high standard as that of Vassar and Bryn Mawr, and is carried out faithfully in the class rooms. We simply emphasize the spirit of earnest devotion which makes every teacher of St. Mary's loyally strive to develop each young girl attendant there into the truest, noblest, and most intelligent womanhood. Every advantage of equipment in the class rooms, laboratories and study rooms, every care in the matter of food and clothing, and exceptional excellence of climatic conditions—all these features are found at St. Mary's, in the perfection of development only to be obtained by the consecration of devoted lives to educational Christian work in a spot favored by the Lord.

According to statistics published by the Northern Railway Company of France they carried to the exposition of last year 206,338 passengers from England, as against 227,662 in 1889.
