#### CREEL.

Long Jones of Cass City visited Creel on Thursday last, he was also purchasing property from parties here.

Richard Hughes is visiting friends at Teeswater, Ont. At present Richard will undoubtedly take the good of his

Quite a number of our youths took in the box social and dance at Echo hall on Monday evening. All report having had a good time.

Miss Aggie McKee of this place departd on Thusrday morning for Petrolia, Ont., to visit Mrs. Laidlaw. A safe return to you, Aggie.

Miss McAlpine of Sheridan has been engaged to teach the summer term of Everything Fresh, Wholesome school in Dist. No. 4, Creel, as a successor to Miss Willins of Bad Axe.

Miss Christy Crawford returned Bad Axe on Monday to resume her situation at that place, which has been vacated during the last two weeks on account of sickness

John Forsythe, who has been visiting riends tn this locality for the past month, returned to his home in Ontario on Thursday, accompanied by his nephew, Alex. Davidson.

Please excuse us for neglect in filling our little space in your columns for the past two issues, as business and pleasure have been at high water mark. But we will try to be more faithful in the fu-

L. A. DeWitt's smiling face was easy to behold in Creel on Wednesday of last week. He was purchasing some property in this vicinity, and left an appointment for Saturday to finish his busi-

Death has again appeared in our midst. James Crea lost his youngest child by inflammation of the lungs on Thursday morning last. The parents have the sympathy of the community in their sad loss.

Your correspondent at this place does not consider its question in a February ssue, regarding the grain market at Cass City or Gagetown properly answered as yet. By perusing the columns of the Enterprise of March 8th, under the head of "local gleanings," we notice that the Cass City buyers pay as high a the "Thumb," if not better; further, the posts and pavement blocks. little item contains the assertion that if Cass City they would be convinced of is novel and attractive. If you stand the statement. Now, my dear readers, in front of the sign it reads, II. Free-I do not wish to hold any controversy man; step to the right and it reads. over the matter, but shall endeavor dry goods; and on the left you can see merely to sprove that the statements I th made concerning the same. Cass City or Gagetown fails as yet to come to the front in grain buying of any kind. E. Robertson; treasurer, E. Hennese; When the farmers of this vicinity or any clerk, Martin Bartoolong; assessor, F. other place could only obtain 92 cents Eyer; street commissioner, Wm. Blakper bushel at either of the above points, ley; trustees, J. M. Young, L. Leonhard the same wheat in Eikton. This is undoubtedly a fact which can be proyen to the satisfaction of any buyers or farmers who doubt the same. I might also say that Elkton buyers paid 29 cents for oats all fall when it was impossible for farmers to get more than 25 or 26 cents per bushel for the same at either of the former places, and I will also say in conclusion that it would seem yery unreasonable to ask the farmers of baking powder at Hunter's. Creel to market their grain at Cass City when at the same time the same class of the arrival of a young daughter. industrious workers in your vicinity were hauling their surplus to Elkton. These are facts, Mr. Editor, which if you do not credit at present, search the mat-Granite and Marble ter up for yourself. I did not cast any reflections upon Cass City, but merely for information upon the subject.

### GRANT.

Preaching in school house district No. 4 on Sunday.

#### A Double Dinner in Russia

The Russian cats on an average once every two hours. The climate and custom require such frequent meals, the digestion of which is aided by frequent draughts of vodki and tea. Vodki is the Russian whisky, made from potatoes and rye. It is flery and colorless, and is generally flavored with some extract like vanilla or orange. It is drank from small cups that hold perhaps half a gill. Vodki and tea are the inseparable accompaniments of friendly as well as of business intercourse in the country of the czar. Drunken men are rare. Russia and Sweden are the only countries in which the double dinner is the rule. When you go to the house of a Russian, be he a friend or a stranger, you are at once invited to a side table, where salted meats, pickled cel, salted cucumbers, and many other spicy and appetizing viands are urged upon you with an impressiveness that knows no refusal. This repast is washed down with frequent cups of vodki. That over, and when the visitor feels as if he had eaten enough for twenty-four hours, the host says, "And now to dinner." At the dinner table the meal is served in courses, with wines grown in the Crimea and in Bessarabia, where excellent clarets and Burgundies are made and sold for from a

#### THE STATE.

Will Interest Editors.

The proposed press excursion next July will be to St. Paul and thence on to the Yellowstone park, if enough desire to continue the journey to make it possible to arrange for transportation. The trip to St. Paul will require about four days and may Paul will require about four days and may be made for \$15—for stateroom on the steamer while crossing Lake Michigan to Milwaukee, and for estimated extras. Should any fair number desire, after stopping over a day at St. Paul, to allow the majority to turn back towards Michigan, while they push on to the Yellowstone park, the following will probably be necessary: Ten additional days of time (making 14 in all), which will include five days stay in the park. The extra additional expense may be kept within \$55 (or \$70 from Grand Rapids), of which amount \$14 will be for sleeping cars and \$35 for stage and meals while in the park. The railroad and steamboat transportation can be arranged for all to St. Paul on the can be arranged for all to St. Paul on the basis of of an equivalent being given to ad-vertising, and the same can also be done to the park for a number not exceeding 125. the park for a number not exceeding 125. In round figures the distance from Grand Rapids to St. Paul is about 500 miles each way, but may be made without requiring sleeping cars; the distance to the Yellowstone, however, is about 1,200 miles each way upon the railroad, exclusive of 170 miles of staging in the park. It is desirable to learn as soon as possible whether any considerable number desire to go west of St. Paul, as the arrangements are dependent. St. Paul, as the arrangements are dependent upon enough going to charter at least one sleeping car. Address at once the sec-retary of the Press Association, Mr. Geo. W. Perry of Bellevue.

Col. Morley Dead.

Col. Morley Dead.

Col. Frederick Morley died suddenly at his home in Detroit on the 28th ult.

Col. Morley was born December 23, 1821, in Derby, Eng. While a young lad he was a companion of Herbert Spencer, the Eng lish philosopher. He came with his parents to this country at the age of seven, settling in western New York. He early became interested in politics, was attracted to the Whig party, and while still a very young man his abilities secured the favorable attention of Thurlow Weed and William H. Seward. He drifted into journalism and soon after his arrival in Detroit associated with Rufus Hosmer in the conduct of the Detroit Enquirer. In 1858 he became editor and publisher of the Advertiser, retaining that position for about three years. During the war he was assistant adjutant general, and after the retirement of Carl Schurz from the Detroit Post, in 1867, he for 10 years had charge of that paper, retiring in 1876 on account of ill-health. For a few months of 1883-4 he resumed his connection with that paper under the name of Post and Tribune, but enresumed his connection with that paper un-der the name of Post and Tribune, but en-feebled health again interrupted his work. Since that time he had led a private life,

Since that time he had led a private life, deeply interested, however, in all public questions, especially of a political character, and indulging in occasional contributions to the city press. In intervals of newspaper work he engaged in the bookselling business with John A. Kerr from 1854 to 1858, and was immigration commissioner of Michigan in the years 1881 and 1882. In 1875 he was appointed consul general to Cairo, Egypt, but declined the appointment. appointment.

Ex-Senator Babcock Dead. Ex-Senator J. W. Babcock died at his home in Crosswell, Sanilac county, of an af-

fection of the kidneys and liver.

Jonathan W. Babcock was born in Ontario, April 19, 1849. Three years later he removed with his family to Macomb county and in 1865 he went to Sanilac county. Until he was 15 years old Babcock had the advantage of three months' schooling every year, the remainder of the time being employed is realized bears and stay.

ployed in making hoops and staves. When he was 19 years old Babcock was appointed sub-agent for the purchase of supplies for sub-agent for the purchase of supplies for the salt company at Onondaga, N. Y. All the while Babcock read carefully selected books, and after filling the offices of town clerk, supervisor, school inspector and sheriff of Sanilac county, he began the study of law and by working at his trade in the daytime and reading at night he was admitted to the bar in 1877. In 1880 he was elected prosecuting attorney, and re-elected in 1882 and 1884. He was elected to the state senate of 1887-88.

state senate of 1887-88. Sears Charged With Crueltv.

Supt. Sears of the state public school at Coldwater is charged with severity to two boys in that institution. Philip Smith, aged 12, and Frank Harper, aged 13, claim to have been taken to the barn and whipped with a horse whip by Mr. Sears, for running away from the school. The punishment was inflicted several days ago, but the facts did not become public until the boys complained of not being able to roll up their sleeves because their arms were so badly swollen. Persons who have examined their arms say that the cuts are very deep and from two to three inches in

Supt. Sears does not deny the punish-Supt. Sears does not deny the punishment, and thinks the boys deserved severe chastisement. He acknowledges giving them from four to fourteen blows each; says his lash cut the skin, but no blood followed the blows. followed the blows.

Killed by An Attendant.

A few days an attendant, H.F. Taylor, at the insane asylum in Pontiac, killed patient Wm. Davis of Davisburg, Mich. Whether it was done in self-defense is considered by some a question, but the coroner's jury said it was, after listening to the testimony of the whole corps of asylum officials, includ-ing five lunatics. This was all the evidence taken, no outsiders being called to give light upon the matter. The patient's body was crushed to a mass, nearly every bone in his body being broken, and all admit that he was treated in the most terrible

### WOLVERINE WHISPERINGS.

The three-story brick building near the Pontiac asylum, designed as sleeping apartments for the attendants, was destroyed by fire the other morning at a loss of \$6,000. The origin of the fire is unknown. Hon. M. V. Montgomery of Washington. one of the attorneys in the famous Crouch murder case, has taken legal proceedings to collect a bill of \$600 for services rendered

Byron Crouch. Hon. George Robertson, member of the legislature from 1877 to 1881, died at his home in Albion on the 4th inst.

Dennis Dowling, a well known lumber-man of Muskegon, is dead.

Elijah Butcher of Jackson has sued the water gas company for \$2,000, for injuries received by himself and family as the result

After next Jure when the appropriation for the Michigan Indian agent expires there will be no more money available for this

Mark Stevens will therefore have no successor in the Indian agency John Hanmer, an employe of the Lake Shore & Michigan Southern railroad, while shoveling wheat in a bin at the depot in Bronson, was drawn into the chute and

W. J. Daley of Mt. Clemens, democratic nominee for regent of the university, de-

clines the nomination. A \$10,000 site has been purchased for a hospital in Kalamazoo.

Burt M. Fellows, the boy colonel of the Michigan sons of veterans, has been elected president of the village of Bronson.

An effort is being made at Ovid to establish a book case and desk factory at that

A tree-planting association has been formed in Grand Rapids.

The war department will change the record of Sergt. William E. Smith of company M. Tenth Michigan cavalry, so as to nuster him for pay and muster out as sec and lieutenant.

ond lieutenant.

K. Rolla Peet, who died recently at Ithaca, held a \$2,000 policy in the Knights of the Maccabees, and the company now declines to pay his father the money on the ground that the Ithaca lodge was suspended at the time of death for non-payment of lodge dues. Suit will be instituted to collect the money and test the validity of such a decision

Edward Smotak, hurt at the Detroit steel and spring works in July, 1887, sues the firm for \$10,000 damages.

Mrs. Louise Reed Stowell, who has taught microscopical botany at the Michigan university for several years, has just been appointed special microscopic artist of the botanical department at Washington, D. C., at a salary of \$2,000 per year. Mrs. Stowell graduated from the university in the 1876 literary class the 1876 literary class.

The annual report of the board of control of the state reform school says the reformatory work for the past year has been very

Orno Strong, formerly of Nashville, and known to every newspaper publisher in Michigan, is now at Tacoma, W. T., where he has established a paper called the West Coast Trade.

William Morrison of Holland, Ottawa county, who was stabbed in an election row at Wheatfield, Ind., on Nov. 6, last, died on the 4th inst.

Port Huron authorities are trying to keep

Detroit Sunday papers out of the city. The court of appeals in New York has affirmed the probate of the will of the late Jesse Hoyt. This is the decision of the court of last resort, and practically disposes of the controversy. The suit was commenced in 1883 by Mary Irene Hoyt, daughter of Jesse Hoyt.

The governor has fully considered the case of Olive E. Friend and her relatives, who were arrested on charge of fraud in connection with the Electric sugar muddle, and he has decided not to recall his extra-dition warrant. This means that Mrs. Friend and the Howards and Halsteds must go to New York for trial.

Fred A. Maynard and George P. Wanty of Grand Rapids have been admitted to practice before the United States supreme court.

Kerwin W. Rabbit of Plymouth, has been promoted from a \$1,200 to a \$1,500 clerkship in the postoffice department. A. W. Bing-ham and James Young, two Michigan clerks, have each been advanced to \$2,000 per annum.

The lands in the Michigan railroad gran areas thrown open to settlement by the for feiture bill will be opened at once.

A school teacher in Byron whipped a boy after school hours, and the law is asked to

after school hours, and the law is asked to say whether he had a right to do it.

George Bateson of Bay City died in the Pontiac asylum early in February. It is declared that when he left home he was sound bodily, but when his body was brought back for burrial three physicians found he had seven ribs broken and that his left lung was punctured so as to admit air. The doctors refuse to speak, but have air. The doctors refuse to speak, but have sent word about the matter to Lansing. A \$20,000 potato starch factory will probably be started in Muskegon.

The new game law bill as it now stands permits the shooting of migratory ducks from October 1 to April 15. Jackson county sportsmen want the time extended to May 15.

The great tunnel shield, to be used in the constructon of the Port Huron end of the St. Clair river tunnel is 21 feet six inches in diameter and 15 feet three inches long, and will be advanced by hydraulic pressure from the rear.

Congressman Burrows has been endorsed by the entire Michigan delegation for

L. T. Rawson, for over 30 years a grain buyer at Decatur, has sold his grain eleva-

A Genesee county jury has rendered a verdict against the Michigan hedge company, in a case brought by Wm. Fletcher of Grand Blanc. The company claimed that Fletcher should pay for re-setting his hedge, but the jury said no. The case is of interest in other places.

The city of Ann Arbor puts in a heavy claim for taxes against the estate of the late Luther James, the man who left his cock, on condition that the young man should get married within a certain time. Luther James lived in Lima township to escape city taxation, but the lawyers of the city claim that his residence in Lima was only a fiction.

John Yager and George Schultice of Three Rivers enlisted together during the war, served in the same company, fought in the same battles, came home together, and the other morning both died, within an hour of each other.

James Winnie, who was the Union Labor party's nominee for state treasurer last fall, was defeated for village trustee at the election in Grand Ledge the other day.

O. Laduke, a farmer on Black river, o. Laudies, a larmer on Black river, seven miles out of Cheboygan, went to town on business, and on his return found his home in ashes. His wife was ill at the time, and with her small child barely escaped with her life.

The national camp-meeting association will hold its annual meeting at Eaton Rapids June 11 to 19, and an effort will be made to secure the services of Moody, the great evangelist.

The "Detroit and Michigan land syndicate" has been formed, with a capital stock of \$50,000 in 2,000 shares of \$25 each. stock of \$50,000 in 2,000 shares of \$25 each. The stated purpose of the "syndicate" is to influence a portion of the more desirable immigrants from Europe to this country to settle in Detroit and Michigan, and to provide them with city, suburban and farming homes at reasonable profits.

The records of Isle Royale county, in The records of Isle Royale county, in Lake Superior, which have been hidden from public view for seven years, have been brought to light by the opening of the safe to which they were committed when the county was abandoned. A joint resolution was passed by the legislature and signed by the Governor empowering the properly authorized presents to cook the properly authorized persons to open the safe.

The Detroit, Lansing & Northern rail road company's payments lets loose about \$10,000 a month at lonia.

The veterans of the Michigan soldiers' nome are about to establish a paper to be known as the Hornet

H. Dederick of Marshall, has been fined \$25 for spearing a pickerel out of season. At the annual meeting of the G. R. & I. railroad company the following directors were chosen: W. O. Hughart, Hervey J. Hollister, W. R. Shelby, Grand Lapids; J. G. Waif of Sturgis; S. S. Cobb. F. B. Stockbridge, Kalamazoo; J.N. McCullough, William Thaw, Thomas D. Messler, Pittsburgh; George B. Roberts, John F. Green, Henry H. Houston, Philadelphia, and Charles F. Muhler of Fort Wayne.

A fire broke out in the Webster paint shop at the Jackson prison the other day, and before it was subdued had done \$12,000

damage. Ralph Taylor has been appointed post-master at Rome, Lenawee county. This is the first Michigan appointment under the new administration

new administration
The stockholders of the Jackson, Lansing & Saginaw railroad met in Jackson a few days ago and elected Figure A. Hayden of Jackson, president; W. D. Thompson of Jackson, treasurer, and Orlando M. Barnes of Lansing, secretary.

Mrs. Sophia Dean, a resident of Adrian since 1830, died on the 8th inst.

The application for a new trial in the case of Calvin Young, convicted of killing Levi Allen in Bloomfield, Oakland county,

as been denied. Edward Cornelius Plugger was arrested in Grand Rapids by Deputy Marshal Car-mody of New York, on a warrant charging him with forgery. Carmody started im-mediately for the east with the prisoner. Plugger formerly lived at Middleburg, Holland, and is accused of defrauding a loan association out of \$500. He is 40 years old, and came directly to Grand Rapids from the old country, and was living with his family apparently believing himself entiroly secure.

John Peck, a prosperous farmer living about three miles from Constantine, lost his barn and nine horses by fire the other morning. The loss is \$3,000, but whether insured or not is unknown.

William Anderson, a Washtenaw county convict in Jackson, died there a few days

Robert Rulison, Flushing's boy editor, has been sent to the Detroit house of correction for 90 days for printing obscene literature. Grant Boyden, a young companion was fined \$10 for circulating the stuff. The Michigan state horticultural society will hold their spring meeting in Lansing, commencing on the morning of March 26, and continuing two days. Those intending to attend should write E. C. Reed, secretary, at Allegan, and secure reduced rates certificates

rates certificates. Mrs. Elizabeth Leroy, one of the oldest residents of Kalamazoo, died a few days ago, aged 99 years.

A five-year old daughter of Frank Curtis of Cass City was instantly killed the other morning, by a log rolling on her, Her head was so badly crushed that the brains oozed

The public schools of West Bay City have been placed upon the list of schools whose graduates are admitted to the university without examination.

It is reported that the Michigan copper nines have agreed to restrict their out-put or two months.

for two months.

Lieut. D. O. Miller, U.S.N., who has been detailed to three years' service at the university, has reported for duty. Lieut. Miller was born at Toledo, Ohio, and after graduating from the high school entered the naval academy at Annapolis in September, 1876, graduating near the head of the class, in high honors, in June, 1880. His first appointment was on the United States ship Alliance, which was sent in search of the Jeannette in the polar regions, reaching on that trip 80 degrees and 14 minutes north, which is further than any ship has as yet succeeded in going. He was absent on this cruise one year and a half, when he was detailed to duty on the north Atlantic on this critise one year and a har, when he was detailed to duty on the north Atlantic station until November, 1882, when he was made a member of the naval advising board, whose duty was inspecting the steel used in the United States men-of-war. In March, 1885, he was again ordered to sea in the Pacific station returning last March. the Pacific station, returning last March, at which time he was detailed to duty at the Norfolk navy yard, where he remained until called to Ann Arbor. He will be engaged in the mechanical labratory, paying especial attention to the subject of ship-building. building.

William Sanborn, aged 70, was instantly killed by a falling 'tree near Sutton's Bay the other morning.

Ex-Senator Palmer can have the appointment as minister to France or Spain, or in fact any other appointment he may ask of the powers that be.

David W. Smith, formerly master mechanic of the Fort Wayne & Jackson railroad, dropped dead while riding near his home in Leoni the other day.

A collection of bugs, representing 12,000 species, has been presented to the agricultural college by Senator McMillan.

John Burk, a Michigan Central brakeman, was seriously injured in West Bay City the other day. He had stepped between two cars to make a coupling when tween two cars to make a coupling when the draw bars passed each other, the wood work catching him above the hips squeez ng him badly.

Ten thousand brook trout have been planted in the streams near Stanton.

The board of control of the state public school in Coldwater have investigated the alleged severe punishment of two boys in that institution by Supt. Sears, and exonor-ate that official from intentional severity. The board say that the general discipline of the school is moderate, and that the cases under investigation are the first which have come to the knowledge of the board during the administration of the present superintendent.

#### A GREAT INVENTOR DEAD.

Capt. Ericsson, the Famous Engineer Passed Away.

A Remarkable Career.

A Remarkable Career.

Capt. John Ericsson, the famous Swedish engineer who designed the iron-clad Monitor and launched her complete in 100 days, died in New York March 8. He had been ill for only one week when a physician was called in. Owing to his advanced age Mr. Ericsson failed to rally.

Capt. John Ericsson was born July, 31, 1803, in the province of Wermeland, Sweden. His father was a proprietor of mines; his brother Baron Nils Ericsson, became chief of Swedish railways. John was made a cadet of engineers when 12 years of age. Two years before that he had constructed a miniature saw mill and pumping machine that attracted attention in Sweden. At 17 Sir Julian Pauncefote, the new British minister to the United States, will start for Washington about the end of this month. names of the policemen who were killed by the anarchists, but, under the figure of a policeman, this inscription: "In the name of the people of the state I commend peace." that attracted attention in Sweden. At 17 that attracted attention in Sweden. At 17 he entered the army and in 1827 was promoted captain by King Charles John (Bernadotte.) In 1826 he constructed a flame engine and went to London to introduce it, and while there resigned his position in the Swedish army. He produced, in rapid succession an instrument for sea-soundings

A passenger train was fired into on the prarie near Chicago the other morning. Passengers were panie stricken but no one was seriously injured. succession an instrument for sea-soundings Ex-President Cleveland has been elected an honorary member of the New York chamber of commerce.

succession, an instrument for sea-soundings a hydrostatic weighing machine and numerous other devices, including a tubular steam boiler. In 1829 he competed with Stephenson for the historical London & Manchester railway prize, for which he built the locomotive "Novelty," that was said to excel in lightness, elegance and speed all other competitors, but Stephenson's proved superior noint of traction. The same year he in An English syndicate has purchased the three largest breweries of Rochester, N. Y., for \$3,500,000.

The Indian appropriation bill, which became a law with the last hours of the fiftieth congress, provides that \$1,912,942 shall be paid to the Seminoles for 2,037,415 acres of land in the Indian territory. These lands, except the school sections shall be disposed to actual settlers, for homesteaders only, no one person to have more than 160 acres. Commissioners are to be appointed to negotiate with the Cherokee and other Indians owning lands in the territory. The lands referred to are not in the Oklahoma country, but lie east of it. in point of traction. The same year he invented a steam fire engine. In 1833 he constructed the famous caloric engine, and in 1853 the ship Ericsson of 2,000 tons propelled by this motor. A sea trial from New York to Washington and back established great economy in fuel but at a speed too great economy in fuel, but at a speed too low to compete with steam. In 1836 Erics-son invented and patented the screw pro-peller which has revolutionized navigation. In 1837 he built a screw vessel which towed Ex-Secretary and Mrs. Whitney are gothe American packet ship Toronto on the Thames. During his early life he was to Europe what Edison is to America. He The reported destruction of the American war ship Nipsic by a German vessel in Samoan waters, is decredited at the navy nvented in three years forty different nechanical contrivances, two-thirds of

which were patented. In 1639 Capt. Ericsson was invited to visit America. He came at once, and in 1841 he designed for the United States government the screw propeller warship Princeton, with machinery placed below the water line. This, the pioneer of screw warships, carried a 12 inch wrought iron warships, carried a 12 inch wrought iron gun, designed by Ericsson, also a wrought iron gun carriage that took up the recoil without breeching. He contributed several valuable inventions to the London exhibition of 1851, including a pyrometer, an alarm barometer, a sea-lead and other philosophical instruments. In 1854 he offered the plan of a turret vessel to Napoleon III., and in 1861 built for the United States government in 100 days the iron-clad Monitor, which on March 9, 1862, defeated in Hampton Roads, the confederate iron-clad Merrimae that had just destroyed the Cumberland and Congress and was about to destroy land and Congress and was about to destroy the rest of the wooden fleet. The Monitor and the Princeton practically revo-lutionized warship building and caused the reconstruction of the fleets of the world. Other monitors quickly followed the first one and won many payal battles. the first one and won many naval battles, and Ericsson's system was taken up by the naval powers of Europe and carried out on a large scale. His latest war vessel, the

Destroyer, carries a submarine 16-inch gun which discharges 300 pounds of gun cotton in a 1,500-pound projectile against an iron-clad's hull beneath the armor belt. clad's hull beneath the armor belt.
Ericsson's later scientific studies include computations of the influences that retard the earth's rotary motion, and the intensity of solar heat. His sun-motor, erected in 1883, develops a steady power obtained from the inexhaustible supply of direct mechanical energy stored up in the sun. This motor is not patented, being intended by the designer as a contribution to applied science.

The variety of Capt. Ericsson's work is only less remarkable than its intrinsic importance. His inventive genius has brought out new discoveries in every department of Emigrants by the hundreds are flocking into the Sioux country to take possession of the 11,000,000 acres of land opened to set-

out new discoveries in every department of mechanics and he has received honors from every country of the world.

The Inter-State Commerce Law.

The inter-state commerce commission as issued an important circular pertaining to and explaining the inter-state commerce act of March 2, 1889. The amendment as adopted is given and then the commission 'The effect of the amendment is to place

joint tariffs and individual tariffs under substantially the same rules. Neither can be reduced without three days public nobe reduced without three days public no-tice, or advanced without 10 days public notice; and the commission must also be notified of all contemplated changes; indi-vidual and joint tariffs alike must be ob-served in their integrity; and all inter-state traffic is necessarily accepted under either an individual or a joint tariff. In reference to the application of these provis-ions of the law to export traffic the commission understands that all tariffs new on file in this office established by car-niers excepting merchandise billed or in-tended for export by sea, show the rate charged by the inland carrier or carriers to the point of export, with a notation to the effect that the through rate is determined by the addition of the ocean rate from time to time prevailing. The law contemplates that all traffic from inland points designed for exportation by sea must be taken under a joint tariff or an individual tariff. Under these tariffs the inland rate to the point of export cannot be varied without subjecting the carrier to the penalty imposed for vio-

Federation of Labor Rules.

A circular has been sent out from the headquarters of the American Federation of Labor to the national and international unions affiliated with it. The circular con-tains rules and recommendations adopted by the last convention of the federation. and asks the various unions to vote upon all as a whole and return an answer to head-quarters by August 28. The first rule is that of the general strike assessment, and states that when any national or interna-tional union affiliated with the federation shall happen to be involved in any trade difficulty it may appeal to the executive council of the federation for aid, and if the application be approved the executive council shall furnish aid and raise the funds by levying an assessment of two cents on each national or internation union, for each member in the organization. Shall two or member in the organization. Shall two more organizations be equally entitled receive assistance from the union, it shall be divided equally among them.

Another request in the circular is for a

petition to congress for an amendment to the alien contract labor law, so as to secure its better enforcement, and to prevent ex-cessive immigration.

The Female Idea.

First Female Juror (some years hence)— That fool of a woman who wants a divorce admits that her husband hung up a lot of number introduced. Of these nearly one-third were public acts, the remainder being private pension bills, etc.

President Cleveland has vetoed during this session of congress 150 bills, and has allowed over 200 to become laws, without his signature. His total number of vetoes

#### LEGISLATIVE MATTERS.

Summary of Subjects Under Consider eration by the Legislators.

Some Matters Acted Upon.

Governor Luce refused to sign five bills passed by the senate in the absence of President pro tem Ball, and which were certified to go by Temporary President Giddings. The governor asserts that the senate exhaused its authority in appointing a president pro tem. and that Senator Giddings has no more power to certify to the passage of bills than any other senator. In this opinion the governor is sustained by the attorney general and ex-Chief Justice Cooley. The governor suggests as a way out of the difficulty that he appoint a lieutenant governor and the senate can then tenant governor and the senate can then elect another president pro tem, and thus have two legal presiding officers. If this is not done all the bills signed by Mr. Giddings will be returned to the senate to be passed again with President Ball in the chair. Later President Ball in the be passed again with President Ball signed the bills which were hung up by the governor because they were signed only by Temporary President Giddings. The governor has modified his views somewhat and will sign the bills certified to by Ball even though the latter was not present when they were passed they were passed.

The secretary of state was directed recently by concurrent resolution of the legislature to ascertain the per diem and mileage expenses of all the county boards of supervisors. The report has been made to the legislature and it shows that the total cortes gravening and resolution in 1887 was cost of supervisors' meetings in 1887 was \$81,944 41, and in 1888 \$80,549 66. Senator Galbraith presented a resolution with a view of ultimately abolishing the boards of supervisors, as auditing boards, substituting smaller, less arbitrary and less expensive beards of commissioners. sive boards of commissioners.

The house was lavishly decorated on inauguration day. Harrison's picture appeared between two large flags above the speaker's desk, and over the main entrance hung Morton's picture gracefully draped with hunting. with bunting.

of the legislature about the advisability of abolishing the board of supervisors. Gov. Luce has fixed upon March 19, as the day of his reception to the legislature.

There is some talk among the members

The various liquor bills are now under advisement by the committees.

A bill regulating the selling of milk has passed the house committee of the whole. Aside from the prohibition against diluting with water, adulteration, etc., it is forbidden to sell skimmed milk to any cheese or butter factories, or to keep back any part of the milk known as "strippings." The original bill prohibited the sale of milk produced from a cow fed upon distillery or browery refuse, but several granger mem-bers argued that this food was not necessarily deleterious, and that clause was stricken out out.

Thos. C. Barry, the anti-Powderly leader addressed the house a few days ago. Mr. Barry commended warmly the free text book bill now before the house, and said that in his own city, East Saginaw, the experiment has proved a great success. It has increased the school attendance there 16 per cent., and the city would not return to the old method for any consideration.

The bill to wipe out of existence the state board of pharmacy was killed by an adverse committee report.

The house has passed the bill to enable Saginaw county to bond itself for \$100,000 for building stone roads. The blind school appropriation bill, including the \$\$,500 item for a pipe organ, which had been greatly opposed, has passed the bares.

ed the house.

Representative Judd's bill to establish the office of beef inspector and to provide for the inspection of stock alive in cities of 10,000 or more population has been referred to the committee on health and agriculture.

The house has killed the bill to give Saginaw county an additional circuit judge.

The railroad committee have made an adverse report in the house on Mr. Wettlaufer's bill requiring all railroads to lower their grade 16 feet at the Woodward avenue crossing, Detroit.

A bill to prohibit junk dealers from purchasing from minors without the written consent of the latter's parents has received a strong indorsement from Supt. Pittman of Detroit. He believes that if the bill be comes a law, and is enforced, the arrest of young boys for larceny will decrease by at least 50 per cent.

The opponents of the joint resolution relative to the life of corporations have succeeded again by a single vote in defeating the

The joint resolution increasing the gov ernor's salary to \$4,000 per year has passed both houses.

The joint resolution to be submitted to the people of the state at the spring election concerning the extension of corporation charters has passed both houses and been signed by the governor. It reads:

Sec. 10. No corporation except for municipal purposes, or for the construction of railroads, plank roads, and canals, shall be excepted for a larger period than thirty.

created for a longer period than thirty years; but the legislature may provide by general laws, applicable to any corporation not herein excepted, for one or more extensions of the terms of such corporation while the term is running, not exceeding 30 years for each extension on the consent of not less than a two-thirds majority of the capital of the corporation; and by like general laws for the corporate reorganization for a further period, not exceeding 30 years, of such corporations whose terms have expired by limitation, on the consent of not less than four-fifths of the capital.

Provided, That in cases where there is no capital stock, the legislature may provide the manner in which such corporation may be reorganized. A resolution has been adopted by both

death of the two insane inmates in the Pon-The Maison island "accretions" matter

houses authorizing an investigation of the

has been referred to a joint committee.

The senate committee on the deaf and dumb reported back the bill to prohibit the transportation of the dead bodies or the bones of Chinese or Chinamen from the state of Michigan, and to provide a penalty therefor, with a recommendation that the bill be referred to the committee on state affairs. This request was granted. Senator Babcock, chairman of state affairs, be ing quite willing to take the bill under consideration.

A resolution has been adopted by the senate requesting the board of control of the industrial home for girls at Adrian to furnish the senate with the names of parties with whom contracts for buildings at the home had been made and the names of those who held other contracts in connection with the fitting out of the buildings, and also those who furnished material or labor and the amounts paid for the several purposes.

The house has passed the bill giving Detroit women the right to vote at school elections.

A bill making it lawful to shoot ducks from Oct. 1 to May 1 has passed the house, and given immediate effect. The present law limits the time from Oct. 1 to Jan. 10.

FORGIVE AND FORGET.

Oh! forgive and forget, for this life is too fleeting
To waste it in brooding o'er wrongs we have met:
It is better, far better, to smother our

anger, To teach the proud heart to forgive and forget.

In the path we must tread leading down to the valley,

Are crosses and trials to lift and to bear, And the chalice of life from which we are

drinking Oft bears to our lips drops of sorrow and But life is so short, be it sunshine or

shadow, That we cannot afford to brood over a wrong; Let us lift up our burdens and bear them

We'll lay them down shortly, it cannot be long. Then forgive and forget! If the friends you love fondly

Prove themselves false and unworthy of

Deal with them kindly, for they are but mortals, Erring, like us, for we, too, are but dust.

Deal with them tenderly, pity their weak-We know every heart hath its evil and

we all have one Father in Heaven, hence are brothers,
Then let us forgive and forget as we should.

## TOO LATE

### A Story of St. Valentine's Day.

CHAPTER IV.

The Squire did not put that embarrassing question to the Baron; he did not need: the information required was given voluntarily. The next morning he asked his guest if he should like to see his stud, of which he was not a little proud, and deservedly so-the Nettlethorpe stud had a wide reputation.

"But you don't hunt, I believe?" he added.

The Baron said he did not, but that he knew a little about horse-flesh, and did love a fine horse. Smoking cigars, the gentleman proceeded to the stables. The Squire was not quick at observation, and, even when observant of some unaccountable trifles, he was not given to put two and two together; they simply puzzled him for the time being, and then he was apt to forget they had occurred. To-day he was struck by the extensive knowledge of matters pertaining to horseflesh evinced by his guest, and thought it odd, considering that he had disapproved of any sporting proclivities. Then he remembered that he had been in the Prussian Guards, and ceased to wonder. In a little while however he was again forced to notice a further and more marked discrepancy. In an animated discussion with the Squire's stud-groom, the Baron's broken English seemed suddenly repaired, a very unmistakable cockney vernacular making itself evident. Every now and again, though, he seemed to recollect his part. and diverged into the imperfed pronunciation of a foreigner. Then the Squire thought it odd that a foreigner and a gentleman, ostensibly so ignorant of the English language, should be so familiar with the technical terms of a trainer's stable; these he not only understood, but applied correctly.

The Squire expressed his surprise. "My fader," replied the Baron, lapsing into his broken speech-"my fader had a very' fine stud too, and ven I was a small boy I did ride like one jockey;" and he laughed. His host was satis-"Madam Kennett, she did tell her broder had splendid horses," he continued, "and asked me to come and see dem; so, as I did always hear how hospitable de English Squire was, I did come now."

Squire Nettlethorpe was more than satisfied: he was intensely relieved. The situation had explained itself; but he must warn his sister to be more careful with foreigners for the future. Then, feeling that he had harbored unworthy thoughts of the stranger, he intended to treat him to a piece of gratuitous confidence.

"Stub," he said to the stud-groom, "show the Baron the colt."

With a reluctant air the groom obeyed.

"For de Derby?" said the Baron. The Squire nodded.

"I've kept him quiet." he said. think he'll be a surprise;" and then he sketched the splendid animal's pedigree. Unwittingly he made an omission, which, with unerring quickness, the Baron detected and corrected.

"You know it!" he said, startled. The Baron saw his mistake. "Everybody knows Dickey-bird," he

said hastily, naming the colt's greatgreat-grandsire. "My father did breed from him. What you call this one?" "Nettle," replied the Square, almost hesitatingly.

"If I vos one betting man I know what I should do;" and he went up to the colt and felt him with a hand evidently used to the office. "I do not believe dat in all England there is such a beauty," he said; and then he asked some experienced questions concerning the stable management, which the groom answered with reserve.

They had proceeded some yards on their return to the Hall, when the Baron suddenly turned on his heel, saying he had left his stick in the stable, and would fetch it. The Squire waited for him, standing still.

where the Baron had left it, and Stubbs produced it. The men looked each other in the eye steadily, the stick in the groom's grasp.

The stick was found behind the door,

"What game is this you are up to?" he said menacingly.

"Don't you cut up rusty now, or I'll blow on you," was the answer; "keep dark and I'll square it."

"If you lay a finger on the colt, I'll "Not likely-I'll take every penny I | thy?"

can get on him. What are you in for

"More than you could square; so be off. And look here," the groom added, as he handed his companion his stick. "Don't you show your nose here

to the Squire." With unruffled effrontry the Baron took out a pocket-book and handed the

again, or I'll make a clean breast of it

groom a hundred-pound note. "For old times, Bill," he said; "I've turned over a new leaf. Never go inside a stable now—doing the foreign noble for a spree. Keep dark; I'm off at the end of the week."

"Well"—and Stubbs eyed the notewe've been pals; and, if I'd been half the rogue you was, I'd maybe be doing a Spanish make-believe. Bein' on the square's often a virtue that's its own reward. If so be as you clear out of the Hall when you ses, an doesn't seek to come here agin, I'll take the note-its New-Year times, and it'll come handy."

The transfer was made under the conditions laid down, and the Baron rejoined his host, accounting for the time he had detained him by stating that the stick had got among the straw,

and he had difficulty in finding it. Before the end of the week, the Baron had established his footing in Nettlethorpe Hall as first favorite with all save Nell and Janet. Andrew declared him a good fellow, and invited him to his quarters in London, and the Squire pressed him to return at no distant day.

Nothing had been said about the prooch; at Janet's express desire, no allusion was made to the Baron on the subject; but, the night before his departure, his adieux being all made preparatory to an early start in the morning, he found on his toilet-table a small parcel containing the trinket. No sign or word accompanied it; it was there by itself, to speak for itself. The Baron was not sensitive. His attentions to Janet had answered the end for which they had been paid-namely, intimate relations with the family He had seen that they were not acceptable from a serious point, even had he intended them seriously, which he did not; the prize, he said to himself, was not costly enough. So he put away the brooch as future stock-in-trade. During his brief stay at the Hall, he had picked up some valuable pieces of information outside stable-matters. Nothing had escaped his ears or his notice.

Nell's little love affair with her cousin, her anonymous Christmas gift, her supposed disappointment of the autumn, all were known to him. He had listened to good purpose, and, being quick of apprehension, had understood allusions meant only to contain meanings to the ears addressed. What remained to be told he drew from the Squire in apparently inadvertent questioning, and from Mrs Kennett, who was apt to be cofidential if well led up.

A few days after the Baron's departure the twins returned home. Randall, at his sister's request, said nothing of the anonymous gift the latter had received on Christmas morning; but Nell, to whom unnecessary concealment was abhorrent, took a private opportunity to display it to her mother, requesting that she would not mention the circumstance to any one, with the exception of her father. On taking it from its case, Nell found it was broken. two of the links having snapped across. She was distressed, far more than the occasion seemed to warrant.

"It must have been aunt Kennett," morning; I took it to her, and, when she was examining it, Janet called me out of the room. When I came back I found it neatly done up in the case, and lying on the table. Aunt was not there; so I took it away, and put it in-

to my box without examining it." "It could not have been your aunt, Nell," exclaimed Mrs. Thanet. "Some one must have come in in her absence. opened the case from curiosity, and, handling the chain roughly, broken it -vour servant probably.

"Or it might have been the maid who helped me to pack," said Nell. I forgot to lock my box when I went down to dinner, and she may have returned to my room from curiosity, and so broken it. We packed the night before as we left early the next morning. Oh, I am so sorry-it is so unlucky!"—and she burst into tears.

Her mother took the girl's hands and held them to her breast. Her eyes too were moist, and her voice tender with sympathy.

"My child," she said almost in a whisper, "I did not ask you for your confidence. I knew why you withheld it. You had nothing definite to tell me; but a mother's eye is keen, Nell, and I read your secret. Even now I do not ask you to tell me all that has passed between you. I too have had my young days, and I know there are things too delicate for speech, things so fragile speech would break them. But I do ask you one question, Nell, and you will answer me truly, that I know. Did he ask of you any pledge?" A faint "No," was the answer Nell

gave. "Do you consider yourself pledged to him?"

"Yes," was the reply this time,

lowly spoken, but firm. "Do you believe that he will return some day and ask you to be his wife?"
"Yes," again answered the girl, looking suddenly up into her mother's eyes half defiantly, as if rebutting an unworthy suspicion, and yet not wholly

voice. "You are young, Nell dear. You may have mistaken farcy for love; for, when you do love, you will not love unworthily, and a fancy is easily set

with the ring of confidence in her

"Mother darling," said the girl, drooping her eyes, "it is love, not Love with me is love for everfancy.

"Nell, would you be false to yourself?"

··No; only too true, mother. Love is no part of moral nature, to be himself satisfactorily. evolved from virtue; it is a thing apart. How it comes no one yet has told; but, once come, no one yet has er joyful surprise, He pledged himcast it out—a possession if you will—

She quailed for her child; but she saw first she spoke.

"You would make one effort, darling, to forget, would you not? Your waste your youth in vain regrets; you would up and do."

Nell's eyes took a troubled look, as of vague apprehension. She answered

"I should never try to forget, mother; don't you know a sorrow's crown of sorrows is remembering happier things'? But, if it were possible that the need should come, my pride should arm me against vain regrets; and life and I should find something better to do than pine in a 'moated grange'."

She tried to smile, but her lips quivered. "Mother, I believe in work." Then the mother went silently to her desk, and laid before her child first the copy of the letter she wrote to Lyon Leslie, and then his answer.

With a face pale as the moonbeams, and scared eyes, Nell read the docu-

Mrs. Thanet's was simple and dignified. Even as her heart burned within her, Nell held her mother blameless f not wholly justified.

It ran thus—
"My Dear Mr. Leslie,—May I ask you, if circumstances forbid you to follow your in clinations to the only ultimatum her parents would approve, to cease the particular at-tentions you have lately paid our daughter. I have no reason to suppose that you have made yourself peculiarly acceptable to her; but youth is impressionable, and I would spare her unnecessary pain. We live in too small a community, and a young girl's name is a delicate commodity.

"Yours very truly,
"MARY THANET." The gentle and almost portentous bringing-up of her mother had in a measure prepared Nell for the blow Lyon Leslie's letter dealt. Like a young sapling she bent to the blast, every leaf trembling, every fibre quiv-

The rebound was sudden-a spring back as from an inner force; but in after time the perfect growth would ever bear the traces of the storm it had weathered.

Nell's nature, though sympathetic with others, was partially independent of sympathy in itself. In her lightest hours she had been reticent of her own inner feelings, and in her grave moods, though often the recipient of the hopes and fears of doubting hearts, carefully enveloping her own in a reserved silence, not her most intimate friends, save Janet Kennett, and she but in part, had ever dared to question her.

The letters fell from Nell's hands. "My poor child?" whispered her mother, the tears rolling down her

cheeks. But Nell's eyes were dry. Her eyes had deepened into night, they seemed to have suddenly sunk in their cavities. She spoke; her voice was cold and hard. It was nearly five o'clock, and she heard the servant bessiz har mother on oither cheek so brushing away the tears.

"I would be alone, mother," she

step was firm.

heart, so intense was her sympathy with her child in this her hour of agony

Nell's hand was on the door. With a sudden recollection, she turned back, went up to the table, replaced the locket and chain in its case, and, not trusting herself with a glance at her mother, left the room, Mrs. Thanet thought, like a shadow.

CHAPTER V.

For once in his life Mr. Thanet had, in the matter of his children, to yield to his wife; but not without a battle. Randall was to return to his studies at University College at the end of the week, and Nell was to accompany him in her deliberately chosen capacity of medical student. She had decided to be a woman-doctor.

But not even to her husband did Mrs. Thanet confide her daughter's motive, nor the circumstances which had led up to her decision. She had accepted Nell's determination as She recognized the fact the sound. girl in a few words stated, that work of an imperative and absorbing nature alone could save her mind from preying upon itself, and prevent her nature from drifting into hardness and

recklessness. "Just at present I am indifferent to the whole human species," she said, "save my own family; so do not give me credit for the wish for a vicarious life; but the science of medicine is a noble one, and I shall love it for itself, and in time it will humanize me once more. even he is interested, and, perhaps, when we come to study together he will apply himself in greater earnest, and so better."

And it was this argument that gave Mrs. Thanet the victory over her husband. Whether Nell would pass a good curriculum or not, or would even pass at all, seemed a matter of perect indifference to Mr. Thanet. however her "fad" was likely to be of service to Randall, there was an end to serve in letting her take what he cate workmanship and examined it considered an unwomanly step; and ha would give his consent.

Professions in commerce for his sons, and husbands for his daughters, were Mr. Thanet's moral responsibilities to his children; in these, until the episode of the twins, he had acquitted

To Randall the news of his sister's sudden determination was an altogethself to increasing exertion to his fathout dominant, and vital beyond time." er, and even went so far as to declare The girl spoke calmly; but her eyes | that, now Nell was to share his studies, glowed, and her mouth had a line of he would rather follow the medical will which her mother read aright. profession than any other in the world. And Mr. Thanet, more than her duty, and with a beating heart satisfied, gave his wife carte blanche to she performed it. One tender word make liberal arrangements for their

daughter's comfort in London. The nurse who had been in the family for over a score of years was to acpride would help you. You would not company the twins, and to have Nell under her special charge. She was a Scotchwoman, McIan by name, and a native of Mrs. Thanet's county, shrewd and faithful and of sober years, being

over fifty. In a very short time the trio had settled comfortably down in a small the twins were busy at work. Before appearing among her fellow-students, Nell paid a quiet visit to a hair-dresser, from whose sanctum she issued shorn of her woman's glory, her What abundant and wavy hair. remained was a crop, just long enough to curl slightly up all around the neck, and to fall, as her brother's did, in a large lock over her forehead, touching her eyebrows. lamp between, their likeness to each other was simply startling. The dress too was illusive—she in a close serge narrow collar just appearing, he in his him.

student coat of similar material. Nell's step had caused a commotion at Nettlethorpe Hall. Perhaps it was not altogether unpleasing to Mrs. Kennett. The lady had noticed with no favorable eye her son's evident admiration of his beautiful cousin. She had other views for him; the baronetcy to which he was heir would be a barren honor, and her own fortune, though considerable, when it had been mulcted of portions to her daughters would not suffice to restore dignity to a title now associated with poverty and a menial profession. It was therefore incumbent on the future Baronet to marry well; money in the first place, but family also, if possible.

Lyon Leslie had joined his regiment, his brother-officers all declared that he was not the good company he had been. He was hasty too, an unusual thing with the easy-going, self-indulgent yesterdays and confident to-morrows. Leslie. Some ventured to hint at country quarters, and to ask leave to look at his late additions to his photograph album; they did not find it convenient to touch on that ground again. The officer who had relieved him in his recruiting appointment at Thorpe had written to him once or twice, detailing such gossip as he thought was likely to be of interest to his predecessor. It was in this way that Lyon heard of Nell's Christmas visit to Netthorpe Hall, and then he called to mind the connection between his own family and that of the Kennetts; he was conscious of a tame regret that he had not remembered it sooner. If only there had been fortune, it might coming to draw the curtains and light have been possible then; the Kennett the lamp. Her senses were keen and baronetcy was important enough on clear. As she spoke, she bent and paper, and really, after all, such a -needed girivery few adventitious aids, he was said. "Good night. You will tell feel she had good blood in her veins. father—what you will." sure-now he remembered, he used to After all, race never did die out. It She went to the door slowly, as one might degenerate, but ever and again walking in an uncertain light; but her it asserted itself in a perfect specimen. It had done so in the case of beau-It seemed to Mrs. Thanet as if blood tiful Nell Thanet. Well, he would were oozing drop by drop from her think over it - time enough; she wouldn't soon forget, that he knew; and there was no knowing what might turn up. Then he hoped with a sudden fear, that a certain little note might never reach Nell's eves, he wished he had not been so hasty; but he hated manœuvering mothers.

With these thoughts chasing each other with uncertainty and regret through his brain, Lyon Leslie strolled into his club, and ordered luncheon At a table close to his own were seated two men, one a Captain Barnes, known to him rather intimately. They were about to lunch, and Captain Barnes asked Lyon to join them, which he did. Captain Barnes then introduced his companion to Lyon as the Baron

von Melkenburg. "The Baron had come to buy some racing stock," he said; "he has made some good hits already, I think;" and

the conversation became horsy. The Baron, although he had made no sign, had at once recognized in his new acquaintance the gay recruiting officer of the little town of Thorpe, known to him well by reputation, and the haughty Miss Nell Thanet's lover.

The horsy talk led the Baron to Nettlethorpe Hall, He had been staying there during Christmas, he said, by special invitation, had gone to see Squire's stables, knew Mrs. Kennett and her three pretty daughters at Dresden, had nearly lost his heart to the youngest, Mees Janet; feared though, he was not of constant mind, for he fell head over heels in love with her pretty cousin Miss Nell Randall does not like it; but | Thanet. He found out in time however, that she was only a flirt; he caught her one night in the conservatory with her consin, kissing him, not under the mistletoe, but under the rose. She gave him however a very pretty souvenir, and he took from his waistcoat pocket a tiny box, opened it, and gave it to Captain Barnes to in-

spect. "You're a pretty fellow for girls to give love-tokens to," he said, laughing, as he took out a tiny link of deli-

curiously. "Read de inside," said the Baron, the near future.

with a sly glance at Lyon, who, with a quickened eye that betokened mischief, was watching the box.

"Dinna forget," read Captain Barnes, passing the tiny ring on to

"Did Miss Thanet give you thatthat link?" he asked. "Yes, surely, I did say she did;" and the Barou replaced the box in his

pocket. With a violent effort, Lyon restrained himself. His caution, never long at fault, whispered to him how compromising a dispute with a so called Baron would be, a man who already was a little more than suspected to be an adventurer. His common sense, on which he prided himself, also told him that he had no right to be angry, no manner of right to question Nell Thanet's acton. Lyon Leslie was, if not base, yet hollow of heart; it never

statement. "She is gone to be one female medicine," added that gentleman. "I did see her in Gower Street this day; but suite of rooms in Gower Street, and she did not see me. I did take good care of dat. She was dressed like one boy, and her hair it was cut like one mop. Ve have woman doctors in Germany too-dey are ver' strongsouled females."

occurred to him to doubt the Baron's

A letter from Lyon's Thorpe correspondent corroborated the Baron's

statement. There was something in the matter unaccountable to Lyon Leslie. He felt an inner conviction that, in some way, Seated opposite to each other at he was connected with the step the night in their little study, the shaded girl had taken; but he smothered thought, and tried to keep from speculating. His friend at Thorpe threw no light on the circumstances attending jacket buttoned to the throat, with a Nell's strange conduct, as it seemed to The affair of the link rankled in him, and, after a day or two's unwonted uneasiness and actual indecision, he determined to forget all about the girl, who, he had no doubt, was a designing little minx, after all. His heart smote him, and he anathematised an unobtrusive crossing-sweeper. He had had a good escape; and he would take good care of country quarters next time.

(TO BE CONTINUED.)

Tolstoi's Religious Teaching.

Count Tolstoi claims to have gained perfect peace and happiness from his sudden discovery of the true meaning of Christ's teaching. Whereas he once hated life and dreaded death, he now enjoys a complete serenity and a tranquil empire over himself. Wherethe -th, stationed in London. But as life once appeared to him appalling in its emptiness, and he experienced the thrice-doubled "vanity" of the preacher, he now lives with "happy Whereas wealth and fame and rank and comfort once seemed to him to slip into ashes at a touch, like the body of an exhumed king, he now finds contentment, hope, health, and blessedness in the life of a peasant and the toil of a shoemaker.

I have no doubt that in all this he does not deceive himself. In all sincerity and in all self-sacrifice there lies a potent alchemy, and the extent to which true happiness depends on external surroundings is inappreciable in comparison with what it gains from those elements of contentment and charity which have more power than aught besides to make our thoughts Pleasant as roses in the thicket's bloom. And pure as dew bathing their crimson leaves."

He who lives up to an unselfish ideal will find with certainty that it yields him a delight which neither the world, the flesh, nor the devil can pretend to bestow.

Butit no more follows that the same ideal should be adopted by all mankind, than it follows that the joy inspired by a delusion is an argument in favor of accepting the delusion. A hermit, a trappist, a stylite may be supremely happy, and yet the theory on which their lives are based may be radically false.

The church, he says, has nothing left her but the valueless pariphernalia of temples, images, gold embroidered banners, and-words. With her metaphysical explanation she has hidden the light of Christ's doctrines under her vestments, and has been scorched by it. She has done any work she ever had to do, and is atrophied. Therefore mankind has repudiated her and everything that is alive in the world of Europe has detached itself from her. All churches (he says) are like sentries carefully keeping guard over a prisoner who has long escaped them. He expressly compares himself to Jonah preaching to the Nineveh of a disregardful world.— Archdeacon Farrar in the December Forum.

Gladstone's Voice.

Gladstone's voice was heard in the dison laboratory at Orange, N. J., tae other morning. Mr. Gladstone and other prominent Englishmen talked into the phonograph at Col. Courand's, Mr. Edison's representative in London, Dec. 18, and the cylinders were shipped to this country.

When the cylinder was affixed and the little machine started, the voice of Col. Gourand was first heard, introducing Mr. Gladstone to Mr. Edison. There was a moment's pause, and then in full, deliberate tones came the following words dropped from the English stateman's tongue nearly a month provious:

I am profoundly indebted to you for, not the entertainment only, but the instructions and the marvels of one of the most remarkable evenings which it has been my privilege to enjoy. Your great country is leading the way in the important work of invention. Heartily do we wish it well; and to you, one of its greatest celebrities, allow me to offer my hearty good wishes and earnest prayers that you may long live to witness its triumphs in all that appertains to mankind."

Mr. Edison promises to give a private rehearsal of great men's voices in THE FOURTH DIMENSION.

A Curious Theory Which Ends Where It Began.

Most people know that space--proper space, that is, such as we live in—has three dimensions. Any given piece of space you can measure in three waysalong from end to end, across from side to side, and up and down from top to bottom, or from bottom to top-and then, when you know the shape of its circumference, you know all about it. It has pleased different persons, chiefly mathematicians, to speculate upon the characteristics of space with only two dimensions and of space with four dimensions. The human mind is so made that it cannot imagine anything about four dimensional space, except by an ingenious artifice based upon a tremendous and entirely irrational assumption. The assumption is that four dimensional space, if there is any, bears the same relation to proper space as proper space would bear to two dimensional space if there were any. It is not very difficult to imagine space with only two dimensions, though it is not so easy as it looks. The following suggestions are commonplace to persons skilled in some branches of mathematics, but may be useful in enabling those whose learning lies in other di rections, and who have not praviously devoted their attention to the subject. to grasp the importance of the analogical extension to morality of some of the theories of dimension hitherto principally studied in relation to physical phenomena. Space in two dimensions would be pace in which nothing had any thick-

ness, in which motion might be along or across, or toward any point of the compass, but never up or down. To the inhabitants of such space the words up and down, high and low, deep and shallow, thick, thin, level and so forth, would have no meaning. They would not be able to think of any such ideas. They would say, or the impulsive ones among them would, that space was infinite because you could go infinitely far east, west, north, south, or as the case might be, but that if a thing was neither east, west, north nor south of where they were (on the same level), it was nowhere, because there was nowhere else for it to be, and that therefore it did not exist. Suppose they had something they wanted to keep, and they made a ring about it, they would assert it to be absolutely inclosed, just as we should assert a thing to be absolutely inclosed which was shut up in a hollow sphere, and they would with absolute confidence that if the substance of the ring was opaque no one could see what was inside it, and also that no one could possibly take the inclosed substance away without breaking the ring. But if a three-dimensional person came upon the scene he would see merely a ring and something mysteriously suspended in the middle of it, and he would be able to take it away without touching the ring, which to the two dimensional people, when the ring was opened and the contents found to be gone, would appear miraculous; monstrous and contrary to nature. This idea being established, and the arbitrary assumption 2:3::3:4: being firmly made, it is plausibly alleged that if we inclosed an object in a box, rashly confident that, as ong as the box remained shut, the object since it could not be removed either up or down, or forward or backward, or to the right or left, or in any mixture of those directions, could not be taken out of the box at all, and there came along a four dimensional person, that person would see the thing lying in the box, would wonder why it did not fall out in some fourth direction which we cannot imagine, would take hold of it without touching the box, and would walk away with it. Another illustration of the theoretical possibilities of dimensions is that what we call a solid thing—that is, a thing in three dimensions—when it intercepts light, casts a shadow which has only two dimensions and has no thickness. Similarly, it is argued, when light fell upon a thing of four dimensions, it would cast a shadow of three dimensions. Of course, these speculations need not stop at four dimensions. They generally do, even among mathematicians. because it is complicated enough to speculate about one unintelligible direction; but that is no reason why there should not exist space of many other varieties, and perhaps there does. Anybody interested in this sort own account may read a pretty and quite easy discussion of it in a little book called "Flatland," published not long ago.— Saturday Review.

Will Never be Returned.

The Buffalo man who won a sweet girl by writing numerous love letters to her on \$5 bills has started a fashion that will make courting harder than ever. Not only will the dear creatures refuse to return such missives in case of a quarrel, but they will insist on bills of a larger denomination being used. The world will seem a dreary place to a man who has been using \$5 bills as stationery for his love letters when he gets a note like this from the adored object: "Another young gentleman is writing to me on \$10 bills. Unless you employ \$20 bills all is over

Cured Without Medicine.

An Albany physician says that the most curious prescription he ever gave to a patient was one he prepared for a lady. It was: "Stop walking up and down stairs." The only way this prescription could be taken was by changing her house, as she lived in one of the three story and basement houses so peculiar to Albany architecture. Her husband secured a roomy cottage of two stories, and within a year the invalid's health was almost completely

A Clear Case of Excelsior.

restored.

Sixteen years, after her burial the coffin of a Winnipeg woman was opened and the body found petrified. She had her mouth open, however, which goes to show that she was game even when it came to turning into stone. - ChicaB. F. & A. H. BROWNE.

FRIDAY, MARCH 15, 1889.

THE great cry raised by some church people against the inauguration ball proved to have been just so much wind wasted. There was such a jam present, according to reports, that dancing was among the impossibilities. In regard to dancing we are very much of the same opinion as, an old Presbyterian minister, who, when a sanctimonious female member of his congregation comfemale member of his congregation comfemale. plained to him about a young lady of his flock dancing, told her he thought one of the best posted sportsmen in Balif she "would use her feet more and ton- timore. He was originally a forester in gue less it would be better for the church and religion."

SOUTH DAKOTA is probably better prepared to assume the rights and duties of self-government and become a member of the union than any territory which has applied for admission since the union was formed. Its population is of an intelligent and industrious class, as is evidenced by the advance in wealth and their self-attained attiin wealth and their self-attained atti-tude while deprived of their political tifully mounted by Mr. Von der Wetrights for the advantage of the democratic party. They have also shown their ability to construct a state government by drafting a constitution which is as complete and well digested a fundamental law as any state probably possesses.

THE Detroit public building bill was passed by the house on Sunday morning last and was signed by President Cleveland. It appropriates \$1,— 500,000 for the postoffice building of our metropolis. Detroit has a dem ocratic representative, but it is conceded that the passage of the bill is largely due to the strategy of Julius Ceaser Burrows, the republican regresentative from the fourth congressional district, one of the best parliamentarians in the house; who suggested the method which prevented the death of the bill. The whole state will rejoice in the assurance that Detroit is to have a public building that will be an honor to the city and state.

#### Mr. Blaine and the Mugwumps.

Mr. Blaine has for a long time been a shining mark for the mugwumps, who have vilified him in all manner of ways. Whatever he did or said was pounced upon by mugwump organs, and held up as proof positive that he was all that the mugwumps represented him to be. To attribute all these un venomed attacks to the wounded vanity of the political pharisees who make them, would be to supply us with only a partial reason for the bitter hatred that the magwamps display for the secretary of state. The knowledge that he is an American statesman, who bear a collection of pipes and canes of rare designs, gathered from different parts of the world.

Mr. Von der Wettern has not as yet

These self-opinionated anglo-maniacs thought that they, forsooth, could persuade the country to forget its tradi-

would be able to so educate Americans that they would not be shocked by the advocacy of the most pronounced pro-

British policy.

But whilst congratulating themselves on the way in which the Cleveland administration was lending itself to the furthering of their plans, the mugwumps did not for a moment forget that there was danger ahead. The answer that Mr. Blaine sent back from Paris in answer to Grover Cleveland's free trade challenge served notice on the mugwumps that they would not be permitted to carry out their pro-British policy without meeting with a stout resistance from those who believe a nation of sixtyfive millions has outgrown the leading strings with which the Anglo-maniacs would bind the young giant of the west to England's skirts.

The mugwumps knew the kind of a man it was who took up the free trade gage that had been been flung down by the occupant of the White house. As a champion of the American policy of protection he had dealt blows that sent | ished by having its license revoked until the free traders reeling back. The the defective pipe should be replaced by mugwumps had boasted that they had a new one. Most persons will say that in 1884 killed him politically, and now his shadow falls across their path at the very moment they are flattering themselves they are within measurable distance of the free trade goal. Filled with rage they spit out their venom on him. But the more they revile him the more he grows in the estimation

the important office of secretary of state. This fills the mugwump's cup of bitterness to overflowing. From this time forth Mr. Blaine will be assailed more bitterly than ever. These attacks will, however, raise him in the estimaiton of thorough going Americans, who have an unbounded contempt for the miserable fiction of Anglo maniacs who would make the United States, if they could, a sort of annex to Ergland.

Mr. W. Von der Wettern, Sr., who re-Germany. The rifle is his choice gun, and, while he is fond of small game shooting, large game has been his favor-ite sport. That he is a master hand at rifle shooting a case of twenty gold medals attests.

Like all ardent sportsmen Mr. Von der Wettern has preserved many trophies of the chase, his collection of deer and other horns being one of the finest, if not the finest, in this country. The horns number over 300 pair, and are valtern, and, as he keeps them for his own pleasure, the immense amount of work which he has spent on them has been a source of pleasure.

On reaching the fourth floor of Mr. Von der Wettern's dwelling the visitor finds himself confronted by a passage, the walls of which are studded with mounted horns, under which are a lot of cages filled with song birds. The horns are of all kinds and so arranged above and about the cages as to remind the looker on of a rose bush with its thorns gain for speculation or for one who guarding the roses. In two rooms leading from the passage are neatly and systematically arranged nearly 300 pairs of horns. The mounting is artistic. Each pair is a true pair, being attached by the frontal bone of the animal to which they

Mr. Von der Wettern has not as yet catalogued his collection of horns, but on each pair he has attached a ticket thought that they, forsooth, could persuade the country to forget its traditions and become a sort of British province. In the Cleveland administration they found willing allies. The late occupant of the White house and his weak secretary of state were as putity in their hands. They could mould them to their purposes just as they pleased. No wonder they flattered themselves that the pro-British policy inaugurated under such favorable auspices would accomplish all they desired.

The country had not to wait long before it had practical proof that this policy was producing its legitimate fruits. A shameful fisheries treaty and a still more shameful extradition treaty followed in quick succession. Them came Cloreland's celebrated free trade message. From the mugwump point of view a good beginning had been made. It was however, only a beginning. The mugwumps flattered themselves that in course of time they would be able to so educate Americans that they would not be shocked by the which bears the name of the animal from

adapted to the sport to which he is devoted. Besides a regular target rifle, he has a case of guns of foreign and domestic patterns, generally of smaller bores, from 12 down to 16. Some of them are combination guns for shot and ball. One fowling piece has two sets of barrels of different caliber which fit the same stock. A handsome leather case sheathes a collection of his hunting knives.—Baltimore

A Plumber's Trick.

The Sanitary News describes a new plumbers' trick, which has been first discovered in Milwaukee, but may be known elsewhere, so that architects and inspectors will do well to be on their guard against it. In Milwaukee, as in ma. other cities, all soil pipes put up independent dwelling houses must be tested by filling them with water. A certain firm, knowing that a defective pipe had been used, contrived to plug it with clay, so that the water applied for testing it did not enter the pipe at all. It is not stated how the inspector happened to find out this ingenious deception, but he did, and the offending firm was reported, and punthe revocation of the license ought to have been made permanent.—Scientific American.

Our Canine Population. One of the proofs of the eminen respectability of the United States is that we have a dog for every three inhabitants. It costs us \$200,000,000 per annum to support our 20,000,000 dogs. The food Finally, when the great political battle is ended by the complete route of the free trade forces, James G. Blaine is honored by being called to upyocc

J. W. YOUNG.

pair is a true pair, being attached by the frontal bone of the animal to which they belonged. By the means of screws passing through this bone the horns are attached to the shield shaped wooden panels, the size of the panels being in conformity with the horns. The panels are attached to the walls by hooks, so that they may be easily handled.

There are horns that would have been the pride of old hunters in the days when rifles were loaded from horns and pouches; horns that would adorn the halls of a mansion; horns that the dude would give up his last dollar for, so that his cane and umbrella handle might be the envy of his fellow chappies; horns, big and little, straight and crooked, of normal and abnormal growth, from foreign shores and different parts of America, some with and some without a history; some that would make corkscrews, some that would make baseball bats and battle eaxes. In fact, it would be hard to find a more varied or beautiful collection.

Besides the horns the sanctum contains a collection of pipes and canes of rare designs, gathered from different parts of the world.

Mr. Von der Wettern has not as yet catalogued his collection of horns, but on each pair he has attached a ticket

## CASS CITY, Jan. 16, '89.

CASS CITY,

The departure of 1,480 Irish emigrants from Queenstown for the Argentine Republic shows that the supply of immigrants for that country may not hereafter be drawn exclusively from the sources of the Mediterranean. The republic's immigration policy is very liberal. The Argentine congress at its last session voted that the cost of passage from Europe should be advanced to 50,000 agriculturalists and artisans. The number of immigrants received in 1887 was 137,426. against 93.116 in 1886, and in eleven

months of 1888 the number was 128,-797. The government of Chili has authorized its immigration agents abroad to give free passage to all who desire to come to that country, and it is provided that the immigrants shall be fed and lodged for fifteen days after their arrival. In thus promoting immigration Chili will spend \$500,000. While the government holds out such inducements, thousands of Chilians have recently emigrated to the Argentine Republic.

Gen. Harrison has not permitted the excitement by which he is surrounded to interfere with his life-long custom. Every morning before sitting down to breakfast the family—the general and his wife, Russell Harrison and his wife, Mr. McKee and his wife-and those who are with them assemble and the general reads a passage of scripture and kneels in prayer. Mrs. McKee says: "Papa thinks it quite as important as his breakfast, and would not be able to do anything unless he had prayers first. Of course, he will continue the same custom in the white house. Now he is president he thinks it is more important than ever."

The campaign for the adoption of the prohibitory amendment in Massachusetts has opened with equal vigor, enthusiasm and confidence. The representatives of "300,000 church members and 1,000,000 adherents of christian churches in Massachusetts" have formally and unanimously resolved that prohibition is the only right principle of legislation, and that "in every prohibitory state the number of liquor dealers and the per capita consumption is calculably less that in license states," The momentum of this movement is assuredly to be great.

The truth or falsity of the charges made against the management of the Pontiac asylum remains to be proven. In justice to the people of the state of Michigan as well as to themselves, the management should be subjected to the most thorough and rigid investigation. If there are no grounds for the charges made the officers and attendants of that institution will be the ones most benefited by the investigation, and if there is the least suspicion of any wrong the people of the state should know it.

years ago of poor parents. He went to work when 14 years of age at \$1.50 per week wages. He

President Harrison's typewriter, Miss Sawyer, has aroused the enthusiasm of the Washington correspondents. She cannot whistle, like Elijah Halford, but she can sing with the best amateur in the land. She has plump, round, red cheeks, brown hair, light gray eyes and a trim little figure. She looks about 20 years old, but is probably older. She knows more about Harrison's political secrets than Halford himself, and she knows how to keep her knowledge to herself.

They tell of a judge in Bennington, Vt., who, having spoken of buying a safe, was interviewed by two rival agents, each of whom had so much to sav in favor of his own particular safe that the judge was quite at a loss to decide which to buy. In a happy moment he thought of Burglar Price, whom he had himself sentenced, and going to the jail, he obtained this expert safebreaker's opinion, and then gave the

The proprietors of an iron works in New Jersey wished their men to wear boots while at work, to avoid the danger of burning their feet. They offered to supply the boots free of charge and to pay damages to any man so injured while wearing them, but the men refused and, when the employers insisted, struck.

Even New Mexico plucks up heart over the prospects of statehood, and the legislature proposés to educate its half-breed population to a sense of the responsibilities of citizenship. A territorial university, a school of mines, an insane asylum and an agricultural college are projected.

Prof. Pasteur, the great French scientist, expresses his opinion that in the future diseases will be unknown. "Our children are in luck;" he says. "It will be much pleasanter to live in the twentieth century, when epidemics will be done away with.

#### THE NEW CABINET.

The Men Who Will Hold Council With President Harrison.

Sketch of the Cabinet Officers.

James G. Blaine, the new secretary of state, was born Jan. 31, 1830, at Indian Hill farm, Washington county, Pa. He entered Washington college washington college.

in 1843 and soon after graduating went to Kentucky where he taught school and did some newspaper work. While there he married Harriet Stanwood of Maine. He next went to Penn-

sylvania, studied law and afterward taught in an institution for the blind in Philadelphia. In 1853 he took editorial charge of the Kennebec (Me.) Journal. In 1858 he was elected to the Maine legislature serving for four years, the last as speaker. In 1862 he was elected to congress and was re-elected each term until 1875. He bere-elected each term until 1873. He de-came speaker of the house in 1869 and held that position for six years. In 1875 he was elected a United States senator, In 1880 he was made secretary of state by President Garfield, but resigned upon the latter's death in 1881. He was a prominent candi-date for nomination to the presidency in 1876 and 1880 and was the defeated candidate in 1884.

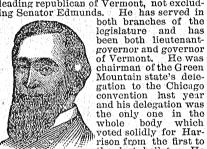

William Windom, the secretary of the treasury, was born in Belmont county, O., May 10, 1827, of Quaker parents. He studied law and was admitted to the bar in Mt. Vernon in 1853.

In 1855 he removed to Winona, Minn., where he precised

where he practiced law until 1859, where he was elected to congress and re-elected for four succeeding terms. In 1871 he was elect-ed to the United States senate and re-elected in 1877.

elected in 1877. President Garfield rresident Garneld made him secretary of the treasury but he resigned on President Arthur's accession. Mr. Windom is a capitalist of means and an able financier. He lives much in New York but is written. an able financier, He lives much in New York, but is a citizen of Minnesota.

Redfield Proctor, secretary of war, is the eading republican of Vermont, not excluding Senator Edmunds. He has served in

governor and governor of Vermont. He was chairman of the Green chairman of the Green
Mountain state's delegation to the Chicago
convention last year
and his delegation was
the only one in the
whole body which
rison from the first to
the last ballot. He
town he founded, situatlives at Proctor, a town he founded, situat-

He

ed a few miles from Rutland. He is a farmer on a large scale and also owns one of the argest marble quarries in the country. William H. H. Miller, attorney-general

was born in Augusta, Oneida county, N. and is now in his forty-eight year. entered Hamilton college at 16 years of age, and after graduation turned his attention to law, studying and

teaching school at the same time. He read law under the instruction of Waite of Toledo, afterward hief justice of the United States supreme court.

On the completion of his studies, and after having married, he set-tled in Fort Wayne, Ind., where he began practice. There he lived for eight years, rapidly gaining his way, so that he soon was at the head of the bar at that place. Since 1873 he has been at Indianapolis as the partner of Gen. Harrison. Mr. Miller is very methodical in everything pertaining to business, and Gen. Harrison, whose public duties took up much time, has come to regard him as absolutely necessary to him-

John Wanamaker, postmaster-general, was born in Philadelphia about fifty two

week wages. He was advanced and in five years had saved \$2,000. In 1859 he was made secre-tary of the Young Men's Christian as-Men's Christian as-sociation of Phila-delphia; went into business with a partner in 1861; married partner's sister; partner died

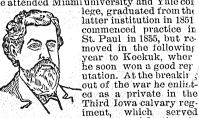

when Wanamaker has been alone in business. Mr. Wanamaker takes an active interest in all matters pertaining to the trade and commerce of his native city, where he enjoys the esteem and respect of all who have been thrown into business or private relations with him. He is reputed to be a very rich man, and an earnest republican, always liberal with his money.

always liberal with his money.

Benjamin F. Tracy, secretary of the navy, was born in Tioga county, N. Y., and is 39 years old. He has been a farm lad, student, lawyer, having been admitted to the bar in 1851. He was elected district - attorney of Tioga county in 1854, and was a prominent member of the New York assembly during the session of during the session of 1862. In the same year he raised two regiments for service in the union army, was coloral and the service in the union army, was coloral and the service in the union army, was coloral and the service in the union army.

or service in the union army; was colonel of one of them and afterwards rose to be brigadier-general. From 1866 to 1873 he was United States district attorney for the eastern district of New York. He was one of the counsel in the celebrated Beecher trial. He has always been an earnest republican and has been on the party ticket several

times lately. John Willock Noble, secretary of the in terior, was born in Lancaster, O., in 1831 He attended Miamiuniversity and Yale col lege, graduated from the latter institution in 1851

out of the war he enlisted as a private in the Third Iowa calvary regiment, which served during the whole war, participating in many battles, in which it always distinguished itself. Mr. Noble was in the tattle of Pea Ridge, was present at the surrender at Vicksburg, and took part in the cavalry raid into Georgia and Alabama. When the war closed he had gained the ray k of brigadier-general. Gen. Noble mar/led in 1864 Miss Halsted, daughter of Mur/t Halsted of Northhampton, Mass. Since 1867 he has made St. Paul his home. He was made United States district attorney by President Grant, but resigned in 1870. Since then he has practiced law successfully.

Jeremiah M. Rusk, secetary of agricul-

Jeremiah M. Rusk, sectotary of agriculture, was born in Mc rgan ounty, O., June

17, 1838, and received a good education, When 23 years old

he removed to a farm in Viroqua. Vernon county Wis., and soon en-tered politics. Aft er holding several county offices he was elected to the egislature in 1862. In the same year he joined the Union army as major and rose to the rank of

brigadier - general. From 1866 to 1870 he was state bank controller. He was a member of the forty-second, forty-third and forty-fourth congresses. In 1881 he was elected governor of Wisconsin and held

the office two terms. An alum mine has been discovered in Utah. It yields 80 to 90 per cent. pure alum, which can be extracted by simply placing

he crude material in boiling water. Edgar Saltus has written a novel which he calls "A Transaction of Hearts." presumption is that it is full of dismal pictures. Saltus is the prince of pessi

Nearly a million Lebel rifles have been urned out in France, yet the manufacture of them continues, since the government in ends to have four rifles ready for each soldier when the great mobilization comes. According to the Fiji Shimpo there are wenty cotton factories now in operation in

Japan, with a total of 82,680 spindles. There are also twenty factories in process of establishment or extension, with an estimated apacity or 180,680 spindles. Mrs. Newton, one of the four women who were given the Crimean medal, which

Queen Victoria personally pinned on her, is

still living in Toronto, She was a nurse in the Crimean war, and was shot through the knee in a trench before the redah. United States Minister Strauss has induced the Sultan of Turkey to allow the explorers sent out by the University of Penn-

sylvania to excavate in the ruins of ancient Babylon for two years. This favor has been vainly sought by representives of European powers. On a mountain in Alpine county, California, during a thunder-storm the lightning

struck a pine tree, followed it down into the ground and immediately there burst forth a brilliant fire, which has continued to burn ever since. It is believed that the lightning ignited a bed of coal, which is now feeding the flames. Miss Emma G. Shields, a public school

eacher of Rockland, Me., made an election bet with a friend, the loser to sell peanuts in Postoffice Square all day on a designated Saturday. Miss Shields lost, and she paid her bet a few Saturdays ago. She had a great run of customers, and made quite a sum of money, which she gave to the fund of the Rockland Charitable Associa-

There is a decided movement in West Virginia in favor of changing the name of that state. Its promoters say that every state should have a distinct name of its own, so far removed from the name of any other state that no confusion of names can arise. West Virginia is so near like Virginia that the people do not enjoy it. Curiously enough, they all agree "Kanawha" is the name for the state.

The big iron tower in Paris which is now in process of being erected is about twothirds finished. It will be 984 feet in height when completed, and the ascent will be accomplished in elevators in five minutes. At present the workmen occupy an hour in reaching their work, and they wear blinders, which prevent them from seeing any thing but the work before them, as an outlook would produce giddiness.

At Charleston, S. C., last week a carboy of vitrol exploded while being conveyed on a dray, and the liquid swelled into a seething mass of flame around the two draymen and the mules. The clothing of the former and the manes and tails of the mules were quickly in flames, when both men and mules jumbed into the river and the flames were extinguished. The mules will recover, but the men are expected do

A tramp passed through Augusta, Me. called "English Charley," who quoted Scripture as glibly as he gave a history of the prize-ring, and narrated the story of the rebellion, giving all the battles and skirmishes in which the Union army was victorious or defeated as clearly as he discussed the events of the present day. Thirty-three years ago he was a soldier in the English army, and he vivaciously told the story of the fall of Sebaspol in 1855, which he wit-

At a recent book auction in Cleveland, Ohio, two young husbands, married but a few months, became considerably warmed up in bidding on a cook book. Both were savagely bent on having it, and the price vas run up to a good figure. What do you suppose called for such strife, and what would the wives of the young men say if they hear of such conduct out in public? The husband that had been the longer married got the book. He was (presumably)

desperate. Mrs. Mary Maccribbin, who died at Washington the other day, nearly one hundred years old, used to say that she had seen every president from George Washington to Grover Cleveland. She was living in Baltimore in 1812, and saw the bombardment of Fort McHenry. She knew well John Howard Payne, the author of "Home, Sweet Home," and witnessed his first appearance on the stage at Baltimore. She went to Washington first in 1821, and it took twelve hours by stage.

The Mound Morgan gold mine of Queensland has proved to be the richest mine in the world. It is situated on the range of a sheep ranch. It is an iron-stone hill in the midst of green grass. A public road runs over the mountain, and it was while repairing it that the gold was discovered. It was ourcased for \$3,200, just 85 an acre, and the shares are now worth \$75,000,000. It is supposed to be an old geyser impregnated with gold. The metal is extracted by the chlorination process and costs \$7.50 a ton.

Living on a farm near Cherrytree, six miles from Titusville, Penn., is Ralph Alcorn, a boy thirteen years old, who has the largest head for his years on record in that state. Three years ago his measurement was for a No. 8¼ hat. Two years later his his head had grown to acquire a No. 81/2. Last season a No. 8% dicer was ordered for him, while this week No. 854 was the size required. The boy is very bright and quickwilted, has a wonderful memory, is goodlooking, well built, weighs 108 pounds, and, though it is very large, his head is regular in shape and perfectly formed. In playing he is obliged to abstain from running, for, as he says, he is liable to become overbal-anced and to fall. The physicians say that in the end he will experience no inconvenience from his big head, as the body will in time catch up with his head and thus

even matters.

### WILLIAM THE WANDERER

he writes a few things which HE HAS THOUGHT UP.

Lines on the Prosperous Porter-Where Mr. Cleveland Lost Votes—A Small
Reporter with Ghoulish Glee Downs the Great Man—The Reformed Lecturer-Also the Baggage Man's Alphabet.

Every thinkful student has doubtless noticed that when he enters the office or autograph department of an American a lithe and alert male person seizes his valise or traveling bag with much earnestness. He then conveys it to some sequestered spot and does not again return. He is the reporter of the hotel or inn. He may be an humble porter just starting out, or he may be swollen and purse-proud porter with silver in his hair and also in his sock I speak of the porter and his humble

ot in order to show the average Amercan boy who may read these lines that humor is not the only thing in America which yields large dividends on a very small capital. To be a porter does not require great genius or education or ntellectual versatility, and yet, well attended to, the business is remunera-tive in the extreme and often yields excellent returns. It shows that any American boy who does faithfully and well the work assigned to him may become well-to-do and prosperous. Last week I shook hands with a conductor on the Milwaukee and St. Paul railroad, who is the president of a bank. There is a general impression in the public mind that conductors all die poor, but here is "Jerry," as everybody calls him, a man forty-five years of age perhaps, with a long head of whiskers, and the pleasant position of President of the Irish-American Bank. As he thoughtfully slams the doors from car to car, collecting fare on children who are no longer young, and vhose parents seek to conceal them undor the seats or as he goes from pas-senger to passenger sticking large blue checks in their new silk hats, and otherwise taking advantage of people, he is sustained and soothed by the blessed thought that he has done the best he could, and that some day when the summons comes to lay aside his loud smelling lantern and make his last run, he will leave his dear ones provided for. Perhaps I ought to add that during all these years of Jerry's prosperity, the road has also managed to keep the wolf from the door. I mention it because it is so rare for the conductor and the road to make money at the same time. I knew a conductor on the Union Pacific railroad some years ago who used to make a great deal of money, but he did not invest it wisely, and so to-day is not the president of a bank. He made a great deal of money in one way or another while on his run, but the man with whom he was wont to play poker in the evening is now President of the bank. The conductor is in the puree.

THE DAILY STRUGGLE.

It was here in Minneapolis that Mr. Cleveland was injudicious. He and his wife were pained to read the fol-lowing conversation in the paper on the day after their visit to the Flour city:

"Yes, I like the town pretty well,
but the people, some of 'em are too
blamed iresh."

"Do yon think so, Grover. I thought they were very nice, indeed, and still I think I like St. Paul the best. It is so old and respectable."

"Oh, yes, respectability is good enough in its place, but it can be over-done. I like Washington where re-

spectability is not made a hobby."
"But are you not enjoying yourself

"No, I am not. To tell you the truth, I am very unhappy. I'm so seared for fear that I'll say something about the place that will be used against me by the St. Paul folks, that I almost wish I was dead, and every body wants to show me the new bridge and the water works and speak of 'our thirteenth story of a flour mill and pour cornmeal down my back and show me the wonderful growth of the city debt, and the sewerage, and the West Hotel, and the glorious ozene and things here, that it makes me tired. And I have to look happy and shake hands and say it knocks St. Paul silly, while I don't think so at all, and I wish I could do something besides be President for a couple of weeks and quit lying almost entirely except when I

went a fishing."

"Bot do you think the people here are very cordial, darling?"

"Yes, they're too cordial for me altogether. Instead of talking about the wonderful hit I have made as a President, and calling attention to my remarkable administration, they talk about the flour output and the electric plant and other crops here, and allude feelingly to "number one hard" and chintz bugs and other flora and fana of this country which, to be honest with you, I do not and never did give a dam

"Well, I beg your pardon, dear, and I oughtn't to speak that way before oughtn't to speak that way before you, but if you knew how much better I feel now you would not speak so harshly to me. It is, indeed, hard to be ever gay and joyous before the great masses who, as a general thing, do not know enough to pound sand but who are still vested with the divine right of suffrage, and so must be treated gently, and loved and smiled till it makes me and loved and smiled till it makes me

Mr. Cleveland was greatly annoved by the publication of this conversation, and could not understand it until this fall, when a Minneapolis man told him that the pale, haughty coachman who drove the Presidential carriage was a reporter. He could handle a team with one hand and remember things with

THE LISTENING REPORTER.

And so I say that as a President we cannot be too careful what we say. I hope that the little boys and girls who read this and who may hereafter become Presidents or wives of Presidents, will bear this in mind, and always have a kind word for one and all

whether they feel that way or not.

But I started out to speak of porters and reporters. I carry with me, this year, a small, sorrel bag, weighing a little over twenty ounces. It contains a slight bottle of horse medicine and a powder rag. Sometimes it also contains a costly robe de nuit, when I do not forget and leave said robe in the sleeping car or hotel. I am not over-drawing this matter, however, when I say honestly that the shrill cry of fire at night in most any hotel in the United States now, would bring to the fireescape from one to six employes of said hotel wearing these costly vest-ments with my brief but imperishable

name engraved on the bosom.

This little traveling bag, which is not larger than a man's hand, is rudely pulled out of my grasp as I enter the inn, and it has cost me \$29 to get it back again from the porter. Besides, I have paid \$8 35 for new handles to replace those that have been torn off in a frantic scuffle between the porter and myself to see which would get

away with it.
Yesterday I was talking with a reformed lecturer about this peculiarity of the porters. He said he used to lecture a great deal at moderate prices throughout the country, and after ten years of earnest toil he was enabled to retire with a rich experience and \$9 in money. He lectured on phrenology and took his meals with the chairman of the lecture committee. In Ouray, Colorado, the baggageman allowed his trunk to fall from a great height and so the lid was knocked off and the bust which the professor used in his lecture was busted. He, therefore, had to borrow a bald-headed man to act as bust for him in the evening. After the close of the lecture the pr fessor found that the bust had stolen the gross receipts from his coat-tail pocket while he was lecturing. The only improbable feature about this story is the implication that a bald-

headed man would commit a crime. But still he did not become soured. He pressed on and lectured to the gentle janitors of the land in piercing tones. He was always kind to every one, even when people criticised his lecture and went away before he got through. He forgave them and paid his bills just the same as he did when people liked him.

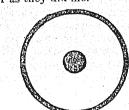

Once a newspaper man who had done him a great wrong and said that 'the lecture was decayed and that the professor would endear himself to every one if he would some night at his brains as he gas and turning off his brains as he usually did, just turn off the gas and blow out his brains." But the professor did not go to his office and blow bales in his rice as a large professor did not go to his office and blow days to come and no one will know the source of the source and no one will know the source of the source holes in his viscera. He spoke kindly to him always and once when the two met in a burber shop, and it was doubtful which was "next" as they came in from opposite ends of the room, the professor gently yielded the chair to the man who had done him the great wrong, and while the barber was shaving him eleven tons of ceiling peeled off and fell on the editor who had been so cruel and so rude, and when they gathered up the debris, a day or two afterward, it was almost impossible to tell which was ceiling

and which was remains.
So it is always best to deal gently with the erring, especially if you think it will be fatal to them.

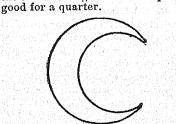

The reformed lecturer also spoke of a discovery he made, which I had never heard of before. He began, during the closing years of his tour, to notice mysterious marks on his trunk, made with chalk generally, and so during his leisure hours he investigated great and phenomenal growth,' and show me the population statistics, and the schoolhouse, and the Washburn residence' and Doc. Ames, and Ole Forgerson, and the saw mill, and the boom, and then walk me up into the carrier of telegraphing. What them and their cause and effect. He found that they were the symbols of the Independent Order of Porters and Bagthe expense of telegraphing, what style of man owned the trunk and the prospect for touching him, as one

might say.

The professor gave me a few of these signs from an old note book, together with his own interpretation after years of close study. I reproduce them here because I know they will interest the reader as they did me.

This trunk if handled gently and then carefully unstrapped in the owner's room, so as to open comfortably without busting the wall or giving the owner vertigo when he opens it, is

This man is a good, kind-hearted man generally, but will sometimes

escape. Better not let him have his hand baggage till he puts up.

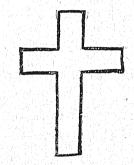

This trunk belongs to a woman who may possibly thank you if you handle the baggage gently and will weep if you knock the lid off. Kind words can never die. (N. B. Nyether can they procure groceries).

This trunk belongs to a traveling man who weighs 211 pounds. If you have no respect for the blamed old fireproof safe itself, please respect it for its gentle owner's sake. He cannot bear to have his trunk harshly treated and he might so far forget himself as to kill you. It is better to be alive and poor than it is to be wealthy but dead. It is better to do a kind act for a fellow being than it is to leave a desirable widow for some one else to marry.

If you will knock the top off this trunk you will di-cover the clothing of a mean man. In case you cannot knock the lid entirely off, burst it open a little so that the great, restless, seething traveling public can see how many hotel napkins and towels and cakes of soap he has stolen. The baldheaded man and his hair are soon

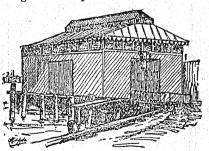

This is the trunk of a young girl and contains the poor but honest garb she wore when she ran away from home. Also the gay clothes she bought and paid for afterward with gentle memories of her mother and the baby prayers she said before a wicked ambition had poisoned her simple heart. They are the gaudy garments and flashy trappings for which she ex-changed her honest laugh and her bright and beautiful youth. Handle gently the poor little trunk as you would touch her sad little history, for her father is in the second-class coach weeping softly into his poor coarse red handkerchief, and she herself is going home on the same train in her cheap days to come, and no one will know about it. It will be a secret known only to her sorrowing heart and God.
BILL NYE.

LAST STOP ON THE ROAD.

The Most Gruesome Place in America-How the Unknown Deads are Cated For.

There is a dingy old building on a pier that runs out into East river at the foot of Twenty-sixth street, New ork which is the last stop in many a life's journey. One who has ever traveled in his dreams to the shore of time and looked at an imaginary ferry-house, where the last boat for eternity was waiting for him, has probably seen a building very much like this one. The tides of the river flow under it, and there is another tide that passes through it day by day—a tide of mys-tery and wasted lives It is undoubtedly the most gruesome spot this side of eternity and the Atlantic ocean this morgue of New York City, where the unknown dead are allowed to rest for a time before they are hurried to potter's field and oblivion.

Two thousand people who fall in the battle of life every year without friends to remove them from the field are brought to this place.

THE DEAD HOUSE.

The gray dawn was just breaking in the east and had begun to sweep the shadows off the high walls of Bellevue hospital when I entered the deadhouse. The drip! drip! drip! of water falling on the white faces was the only sound that broke the solemn stillness It is monotonous, but the dead mind it not, nor does the keeper who snoozes comfortably in the entrance. The river gurgles and flows under the morgue, and meanwhile the dead sleep on, but the keeper is to be awa sened.

A heavy footfall arouses him and he starts up. It is a hospital attache who

has awakened him. There is a rough greeting.
"Another one, I s'spose?" the keeper

says.

ders for me, for after a protracted siege of suffering from rheumatism and general nervous debility I now feel well and am entirely free from all pains, after having taken four bottles of the Compound. Icheerfully commend it to all suffering as I have been with severe rheumatism and nervous affections." FRANCIS J. TAYLOR,

Belle Plaine, Kansas.

### Paine's Celery Compound

will cure rheumatism, nervous debility and dyspepsia; overcome "that tired feeling," and tone up the whole system. It acts upon the system like nothing else, and in a way of its own it conquers these diseases.

\$1.00. Six for \$6.00. At druggists.

Cures all Diseases Peculiar to Women! BOOK TO "WOMAN" MAILED FREE. BRADFIELD REGULATOR CO., ATLANTA, GA SOLD BY ALL DRUGGISTS.

The Female Idea.

First Female Juror (some years hence)— That fool of a woman who wants a divorce admits that her husband hung up a lot of pictures, and put up 10 curtains and six lengths of stove pipe without saying one bad word or even losing his temper. Second Female Juror—Yes, the man must be an angel. Let's give her the divorce, and maybe one of us can get him.— Philadelphia Record

At Maidstone, England, as proved by investigation, 109 electors accepted £1 apiece to vote for a candidate, and then cast their

ballots for the opposition.

Dentness Can't be Cured

Denfness Can't be Cured by local application, as they can not reach the diseased portion of the ear. There is only one way to cure Deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucus lining of the Eustachian Tube. When this tube gets inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed mal condition, hearing will be destroyed forever; nine cases out of ten are caused by catarrh, which is nothing but an inflamed

condition of the mucus surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that we can not cure by taking Hall's Catarrh Cure. Send for circulars, free.

F. J. CHENEY & Co., Toledo, O. Sold by Druggists, 75c.

HINTS FOR EMERGENCIES.

How to Act in Cases of Accident and Sudden Illness. Sir W. Moore, late Surgeon-General with the government of Bombay, has a paper in the hospital on "The Immediate Treatment of Accident and Sudden Illness," in which he states that only the other day he was passing Kensington Gardens, when he observed an old man being supported by two other persons, and encouraged to cling to the railings, so as to maintain an upright posture. A glance showed what was the matter with the old man. He had been struck by cardiac failure, or serious apoplexy, or that variety of the malady in which the face is pale, and the circulation of the blood failing. His pulse was feeble and intermittent, and there was evident paralysis on one side of the body. Now, what ought to have been done in such a case? The poor old man should have been laid on his right side full length, his collar should have been opened, he should have been allowed plenty of fresh air, and his legs, feet and hands should have been well rubbed. Then, when the first shock of the malady had passed away, he ought to have been carried, still in the recumbent posture, to the nearest hospital. Again, another instance. Only a few days back, in the Hammersmith road, two boys were knocked down by a cab. One escaped with little injury, the other got concussion of the brain. He was almost senseless, speechless, cold and pallid. The same plan ought to have been pursued as in the case of the old man; but instead of this, the boy was surrounded by a dense crowd of inquisitive people, and one good but mistaken Samaritan was supporting the injured youth in an upright position on his knee. After a time the poor boy was dragged away on his legs, being well shaken and jostled in the process. Yet a third instance. In Hyde Park, one recent Sunday, a person was taken in an epileptic fit. One bystander wisely ran for water; others carried the epileptic to a bench, on which he was seated. Now, in epilepsy there is a great

struggling, the limbs are convulsed and the tongue is very liable to be protruded between the teeth and severely bitten. This accident should be guarded against by placing something, as a small piece of soft wood, too large slip into the mouth, between the teeth; and the person should be simply prevented injuring himself in his struggles until the fit passes away. But nothing of the kind was attempted; the consequence being that the tongue was bitten, and the limbs of the epileptic were bruised against the hard wood of the bench on which he was seated and held. Had he been placed on the soft grass and left alone he would have injured himself less.

The following are rules which may be safely adopted in cases of accident and sudden illness. Place the person on the ground or floor lying toward the right side, and with the head raised to the level of the body by a pillow, folded coat or other soft substance. Then unbutton or split open any clothing pressing upon the neck or chest. The face and chest should be sprinkled with cold water, and some cold water may be given to drink if the power of swallowing remains. Wine, brandy or other liquor should not be hastily given without evidence of their being needed. Examine the head and limbs separately. The prominent parts of the limbs may be examined with very little movement of the body. If it is necessary to move a person after any injury, especially of the head, the person should be carried while lying down. He should not be allowed to sit upright in a vehicle or to walk. See that the person is allowed plenty of fresh air. The history of the accident should be obtained, and when sending for a surgeon the message should be as clear as possible, and, if practical, a written

The most common maladies which occur suddenly to people in the streets of large towns are apoplectic and epileptic attacks, maladies depending on heart affections, and drunken fits, although, perhaps, the latter should not be classed under the head maladies. But it is necessary to distinguish apoplexy and epilepsy from "dead drunk," as it is called, and also poisoning by opium. Apoplexy is known from epi-lepsy by the puffing or snoring breathing which occurs in the former malady. epilepsy there is no struggling of the limbs, the eyes are turned up under the lids, so that the whites only are visible, and the person generally falls down with a loud cry, none of which are the symptons of apoplexy. Apoplexy is to be distinguished from affections due to the heart, because in the latter maladies the symptoms are very similar to fainting. The person is pale, unconscious, with feeble pulse, scarcely perceptible breathing, white lips and a deathlike expression of countenance; while in apoplexy, though the person is unconscious, there is snoring or puffing breathing, and the face is often drawn to one side. Apoplexy is best distinguished from the effects of spirituous liquors by the history of the case, which may probably be one of drinking. Secondly, by the smell of liquor in the person's breath; although this is not a certain sign, for some one may, in mistaken kindness, have given the person struck with apoplexy some kind of liquor. Thirdly, in the "drunken fit," the size of the pupils of the eyes is equal, while in apoplexy one is often larger than the other. By the pupils of the eyes is meant the round space in the center of the dark part of the eye. Fourthly, the person "dead drunk" may generally be roused, when he babbles incoherently, while from apoplexy the person cannot be roused. Lastly, if any movements occur in drunkenness they will be of the limbs, whereas movement is usually restricted to one side of the body in apoplexy. From poisoning by opium apoplexy is distinguished by the history of the case: by the smell of opium in the breath; both pupils of the eyes being very small and contracted; by the fact that the patient may be roused.

to sleep again.

If all that has been advanced cannot be held in recollection the condensed rules may certainly be remembered, viz: First, in all cases of accident or Globe.

although he does not then babble as in

the drunken fit, but immediately goes

sudden illness let the person lie down, and do not assist him to maintain the upright posture; secondly, let him have plenty of fresh air; thirdly, unloose all clothing round the neck and chest; fourthly, convey the patient, still in the recumbent position, to the nearest hospital. Stretchers for this purpose ought to be available at known points, or at least at every police station.

#### He Had Seen It.

It is difficult to dwell in love and amity with the man who evidently caps your best story with the remark, "Yes, I've heard that before," and who invariably has seen in the paper whatever opinion you have to offer upon any of the momentous questions of the day.

Upstir was one of this kidney. He had exasperated Fogg repeatedly, until forbearance had ceased to be a virtue; but Fogg was pretty hard on Upstir when he did strike back-though, to tell the truth, Upstir hadn't sense enough to know what a rough handling

he was getting. But we anticipate. Fogg—It is a remarkable fact that cattle, when exposed to the weather, invariably face the wind, which if they turned their backs to it would blow un-

der their hair and chill them. Upstir-Yes, I saw that in the paper last evening.

After an interval Fogg has something o say about the tariff. "Say what you will, no system of im-

post duties can be permanent which does not recognize the rights of the Upstir-That's just what Blenkinsop says in his treatise on "Commercial

Equities." Fogg-(with evil in his heart)-When George Washington arrived on the field of Waterloo the First Michigan Cavalry, which was nearly decimated, reformed spontaneously at the sight of their beloved chief, and in an incredible short time they had driven the Paynim host into dire confusion and took

several thousand prisoners, including the renowned cavalier Kosciusko. Upstir-Yes, that's word for word

what Bancroft says in his history. Fogg—And speaking of cavalry reminds me that it is the custom on the plains for the men to ride with their faces to their horses' tails, in order that the enemy may not advance too closely to their rear.

Upstir-I saw that in the paper the other day.

Fogg-It is a very interesting fact that on the plains the men frequently become lost in the thick forests which everywhere abound; a squadron of horse has been known to wander for years, without food or water, vainly endeavoring to extricate themselves. The trees on the plains, you must know, grow to an immense height and are so close together that it is impossible for a snake to pass between them. It will therefore be seen that the men, as they wandered through these impassable giant growths, must suffer untold agony from the sun, which beats down upon them so unmercifully.
Upstir—What a memory you have,

Mr. Fogg! You quote from Parkham's "Great West" almost verbatim.

Fogg had his revenge and the rest of the company were scarlet with merriment; but Upstir was quite unconscious of the fool he was making of himself. On the contrary, he grew prouder of himself every moment. What is the use of trying to stab a rhinocerous to death with a toothpick? -Boston Transcript.

### Nature as a Temperance Lecturer.

There is a secluded vale in southern California called Jim-Jam valley, because the wonderful mirages of the Mojave Desert produce such frightful effects in the air. It requires a man of great nerve to pass through the valley alone. He sees dimly outlined forms -monsters and hobgoblins mingling in

a pandemonium-like dance. Pallid faces shift and change before one's eyes, and forked lightning blazes about, illuminating strange, unconth animals. We don't see what use California has for a cure for inebriates with that valley within easy reach. When a man given to sprees starts out on his favorite recreation, let his friends ship him at once to Jim-Jam valley, and he will let up. It might be employed as a school of warning to young men who are disposed to toy with the alluring but destructive bowl. One trip through the valley, which is said to be a stretch of about fifteen miles, upholstered with the most ingenious horrors and fitted up with the latest improved apparatus introduced in delirium-tremens, ought to be sufficient to make the most wreckless youth a total abstainer for life.—Texas Sift-

### Sarcasms on Women.

Lamennais-Woman is a flower that exhales her perfume only in the shade. Proverb-Take the first advice of a woman; under no circumstances the second.

Old Proverb-A lady and her maid acting in accord will outwit a dozen

La Bruyere-Women are extremists; they are either better or worse than Lemontey-Of all heavy bodies, the

heaviest is the woman we have ceased

to love. Commerson-Women distrust men too much in general and not enough in particular.

Balzac-Woman is a charming creature who changes her heart as easily as her gloves.

Montaigne-There is no torture that a woman would not suffer to enhance her beauty: Balzac-Women are constantly the

dupes or the victims of their extreme sensitiveness. A. de Musset-A woman forgives

everything but the fact that you do not

### Two ways of Getting into Office.

This has been an exceedingly busy month for burglars and office seekers. Both classes have been trying to get into offices, though it would be cruel to say with the same intent. - Boston

"Perched upon a bust of Pallas," or bet ter yet, on some handy shelf, the sensible housekeeker has her bottle of Dr. Bull's Cough Syrup, and when the child has a distressing cough or a touch of croup she cures the little one in no time.

MAY TO BELL.

Dear Bell: I'll write you a short letter To say I'm wonderfully better; How much that means you ought to know, Who saw me just one month ago-Thin, nervous, fretful, white as chalk, Almost too weak to breathe or talk; Head throbbing, as if fit for breaking, A weary, ever-present aching.

But now life seems a different thing: I feel as glad as bird on wing! I say, and fear no contradiction, That Pierce's Favorite Prescription Is grand! Why, I'd have died without it! Ma thinks there's no mistake about it. It's driven all my ills away: Just come and see! Yours ever. MAY.

As a powerful, invigorating tonic, Dr. Pierce's Favorite Prescription imparts strength to the whole system. For overworked, "worn-out," "rundown," debilitated teachers, milliners, dressmakers, seamstresses, "shop-girls," housekeepers, nursing mothers, and feeble women generally, it is the greatest earthly boon, being unequaled as an appetizing cordial and restorative tonic.

"Favorite Prescription" is the only medicine for women, sold by druggists, under a positive guarantee, from the manufacturers, that it will give satisfaction in every case, or money will be refunded. This guarantee has been printed on the bottle-wrappers, and faithfully carried out for many years.

Copyrighted, 1888, by World's Dispensary Medical Association, Proprietors. .
