It seems that a former Cass Cityite has got himself into trouble. This is what the Evening News says: Elmer C. Webster, a former street car conductor, has been arrested at Grand Rapids and conused in the Sweet street riot. He says the scheme was concocted by the strikers. although not formally by the union. He was formerly a well digger, and it was thought that his purchase of dynamite would not excite suspicion.

Children's Day will be observed in the M. the children and parents in the morning by the pastor, S. Gilchriese. All the children are expected to be present. The evening services will be conducted wholly by the Sunday school. The program to the board of education,

Excellent Prospects

For a Grand Celebration at Cass City on July 4th.

The executive committee met on Monday and completed arrangements for a grand celebration, one that will without doubt excell any 4th of July celebration ever had at Cass City. The several subordinate committees made complete reports which, when joined together made an excellent program. About \$300 will be expended in the several sports and games. The Cass City The 4th of July celebration this year Cornet Band has been engaged for the This might be a move in the right di- promises to surpass all previous efforts day. Chas. S. Rawles, of Caro, will desports and games have arranged a good program in this department. In connection with the usual games there will be \$150 in prizes offered for horse races. The fair ground is being put in shape for the horse and bycycle races, A grand street parade, headed by the band and a "Ship of State" will occur in the forenoon. There is no place in Michigan where you can go with your family and see more for less money than at Cass serve dinner on the 4th of July on the City. The program arranged will be lot east of Wallace's harness shop. Ice carried out in every particular unless the weather interferes.

The Promotional Exercises.

For some time past the scholars from the primary, intermediate and grammar rooms, who have become far enough advanced in school studies to warrant their teacher in promoting them to a higher grade, have been very active in the preparation of the exercises which were given at the Town Hall Wednesday evening. The large audience present was both delighted and surpused at the excellent manner Married, June 17, 1891, at the residence in which the pupils rendered their parts. seemed unembarrassed. Miss McDougall, Miss McClinton and Miss McArthur, the the teachers of the three different departments, deserve considerable credit for the excellent manner in which they had drilled the pupils for this occasion; the scholars' general conduct showed that they had received good training at school and respected their teachers. We refrain from mentioning any of the participants singularly, as all did remarkably well, but here is the complete pro-

Bitten by a Mule.

A Sebewaing Blacksmith's Awful Battle With a Vicious Mule.

Fred Heyman, a blacksmith at Sebe waing, while shoeing a vicious mule last Saturday, was suddenly attacked by the animal, which made a savage rush for him and before he could get out of the way, bit off his nose. The mule belonged to a farmer living

near that place and had always displayed marked adversion to being shod. It once kicked a farrier and broke his leg and it has been the practice since then to throw the beast off its feet while the shoeing process is going forward. Saturday Heyman vowed he would put shoes on the fractious mule in the regular way. With a good deal of struggling and the help of several men the brute was finally shod. Heyman stood at the doorway after the job was done puffing and perspiring from his recent exertion. Suddenly the mule jerked away from the man who was holding it and with a cry resembling a roar darted toward the unconscious blacksmith. The other man fled in terror calling to Heyman to look out for himself. The latter turned about just in time to see the mule right apon him with mane erect and jaws wide

"Shoot him, somebody," screamed the terrified man, "he'll kill me. Shoot

him. Oh, heaven!" As he spoke the maddened brutestruck at him with its iron-shod feet. Heyman yelled for help and retreated, warding off the blows as best he could. The mule seemed to grow more furious and began to bite, thrusting its head viciously forvard and bringing its teeth together with a snap. Suddenly by a movement like lightning in swiftness the teeth were buried in the flesh of Heyman's face. Nearly all spoke in audible tones and It was a most horrible spectacle and the other men were transfixed.

"Great God," shricked the blacksmith. struggling vainly with his hands to part the jaws of the beast, while the blood poured from his face, "can't somebody kill him?"

The fracas caused a terrible uproar and by this time a crowd had collected: One man happened to have a revolver. He stepped close to the mule and, placing the weapon against its head, fired. The brute droped Hayman instantly and, rearing up on its bind legs with a roar of fury, fell upon the floor dead.

Heyman lay almost unconscious with the blood covering his clothing and the foor around him. The mule's teeth had entered the left side of the nose and about the middle of the right cheek and had almost met. The nose was hanging by a few shreds only. A physician was summoned at once. The detatched organ was sewed on without delay, but it is doubtful if the terrible wounds can be made to heal without an entire loss of the partly detached portions. Heyman is greatly prostrated, and it is their capture. feared that the fright may undermine

his reason. There is also a possibility of hydrophobia. There was foam in the mouth presence of a species of rabies. The Class Prophecy Laura Wickware bio. but he is very uneasy about the Song-"The Violets"......Nine Girls case. Heyman does not stand a very good chance of recovery.

Bold Burglars

Enter the Houses of A. G. Berney and D. P. Deming Saturday Night and Steal therefrom \$127 and Two Watches.

Late Saturday night or early Sunday morning burglars entered the residence of A. G. Berney and D. P. Deming, 'while the inmates were asleep and gained possession of two watches and about \$127 in cash.

Mr, Berney had retired for the night and in his sleeping room had left a light burning and his clothes lying on a chair. The house was locked and apparently every thing in safe condition. The theives must have gained admittance through the cellar, advancing to the room where Mr. Berney was sleeping, they removed the chair on which his clothing was hanging to the dining room took therefrom his watch and \$125 after which they went to the pantry and took some victuals which had been prepared for Sunday, and then left the house without awaking the occupants.

The supposition that the same parties who went through Mr. Berney's dwelling went through the Dr's house, About the same state of affairs existed at Dr. Deming's as at Mr. Berney's- a light vas burning and the Dr's clothes were hanging in his room. They removed his clothes to the yeranda and there renoved the desirable contents which consisted of a gold watch valued at about \$45 and \$2,00 in cash. The clothes were found the next morning lying on the veranda and watch and money gone.

No clue has yet been obtained as to who or where the outlaws are, however, they were no amateurs at the business. They are without doubt the same parties who entered H. H. Markham's residence at Caro, Friday night and stole a gold watch and chain valued at \$65, escaping unheard.

On Monday, the 15th, Wm. Grayes. Constable at Kingston, arrested two suspicious looking men at that place, They were brought here and placed in the lockup until Tuesday morning. at which time investigation showed that they were only vagrants, without any visible means of support.

They gave their names as Richard Williams, of Beloti, Harrison county, West Virguna, and Elijah Gray, of Mason, Mason county, Mississippi. Gray was a man of about twenty-four years of age; Williams about forty. Both were robust, hearty fellows, able to earn a ivelihood by manual labor. A Warant was sworn out for them before Jusice Wates for vagrancy, and upon being arraigned they plead guilty and were sentenced to the county jail for thirty days.

No other arrests have been made, and at present the outlook for the capture, of the thieves is not very promising. However, a liberal reward is offered for

The monthly crop report for June says the severe drought prevailing from April 21 to May 20 retarded the growth of wheat and it was somewhat injured in some localities by the hard frosts of May 5, 17 and 27. The condition in the southern counties is reported at 96, in the central 76 and in the northern 71 per cent, the average for the state being 89 per cent. The number of bushels of wheat reported marketed in May is 822,townships have been received and show the sheep and wool footing in excess of the number sheared in 1890.

To The Public.

All persons having planted out trees of any description the past spring, I would advise them to mulch their trees well. Owing to very extreme dry weath er thus far this season it will be a very hard matter to make them live. Being personally interested in the growing of nursery stock here. I respectfully call your attention to the same.

Life is too short to be wasted in petty worries, frettings, hatreds, and vexations. Let us banish all of these, and think on whatsoever things are pure and lovely and gentle and of good report.

It is best to strive to cultivate an interest in simple, innocent and inexpensive pleasures. We may thus aid in diffusing that spirit of contentment which is of itself a rich and a permanent possession.

A HOUSE built on sand is, in fair weather, just as good as if builded on a rock. A colweb is as good as the mightiest chain cable when there is no strain on it. It is trial that proves one thing weak and another strong.

Ir you want knowledge, you must toil for it; if food, you must toil for it; and if pleasure, you must toil for it. Toil is the law. Pleasure comes through toil, and not by self-indulgence and indolence. When one gets to love work, his life is a happy one.

EXERCISE, to be beneficial, must be enjoyable. The more enjoyable it is, the more good it will do. Even laughing does one good. Thus, light, cheerful talk, with merriment and laughter, has always been known, from time immemorial, to be the best thing after a hearty meal.

SOLITUDE is pleasant. It is an escape from the rough and tumble of life—from hard words and hard knocks: but its pleasures are dangerous. They are two fascinating for any but the best-balanced minds; and overindulgence in them almost invariably means melancholia and madness.

It is becoming quite the popular thing to commit suicide: Probably the increase in the number of deaths that are brought about in this fashionable manner is simply the result of cause and effect. Men are living their lives more intensely than did their grandfathers. In those good old days men went along on an easy, agreeable "jog-trot," but to-day they assume the pace that kills and rush pell-mell into an untimely maturity. They see all of life at an early age and are old while they are yet young.

Ir you have a little farm or business, or steady work and out of debt, do not fret and work yourself and wife into the grave for the sake of making money. You have but one life to live and that is very brief at least. Take a little comfort and pleasure as you go on day by day, and try to do a little good to others. A morbid insatiate desire to possess the earth and to grab everything in sight, is at the change of weather six months ahead and in what quarter of the moon it is as I pause between these utterances. The King does not land because the just as fine, but I mean to say that are gone.

THERE is a general impression prevalent that all gold is alike when refined, but such is by no means the case. An experienced man can tell at a glance from what part of the world a gold piece comes, and in some cases from what part of a particular gold district the metal was obtained. The Australian gold, for instance, is distinctly redder than the Californian, and this difference in color is always perceptible, even when the gold is 1000 fine. Again the gold obtained from the placers is yellower than that which is taken directly from quartz.

A THEORY is current among some philosophers that a person can gradually grow to look like his or her most intimate companions. Thus husbands and wives often grow to resemble each other, girls not related to each other after years of intimate association by dressing alike and thinking alike have been known to grow to look alike. Hunters and stockmen who have made is the Gospel that is going to save the companions of their dogs or stock have gradually grown to look like them. To associate with the beautful and employ the mind with thoughts that are elevating are other means of changing features that may have been warped by dissembling nature.

THIS habit is quite common, and it is shared by men of the highest pow- heaven, great for quietness for those ers. Compassion must be felt for a man who would like to perform some immortal feat in the way of abstract thought, but is prevented by a mind landscape for those who like beautiful that plays truent on slight provocation. that plays truant on slight provocation. Who like music, great for pro-The poor victim may console himself cessions for those who like by thinking that the cross which he armies on white horses and great for bears in life has been sorrowfully carried by many men of positive genius, through the doings of One who was and he may solace his harmless vanity horn about five miles south of Jeruby fancying that his mental excursions salem and died about ten minutes walk from its eastern gate, all may enter into the land of dreams are akin to the that great heaven for the earnest and freaks of genius. One very delicate heartfelt asking. Is that all? That is question comes up in this connection, and it is, What is the essential differ- to face that way and start thitherence between the abstraction of the ward and finally go in.

THE BATTLE OF CREEDS.

DR. TALMAGE PHILOSOPHIZES ON THE PRESENT SITUATION.

He Says the Ministers Should Go to Work and Teach the Simple Gospel and Avoid Hair-Splitting-Some Timely Christian Advice.

BROOKLYN, N. Y., June 14, 1891.—Dr. Talmage dealt in his sermon this morning with the very timely topic, the Battle of Creeds. His text was taken from Proverbs 26:17: "He that passeth by and meddleth with strife belonging not to him is like one that taketh a dog by the ears."

Solomon here deplores the habit of rushing in between contestants, of taking part in the antagonisms of others of joining in fights which they ought to shun. They do no good to others and get damage for themselves. He compares it to the experiment of taking a dog by the ears. Nothing so irritates the canines as to be clutched by the lugs. Take them by the back lugs. Take them by the back of the neck and lift them and it does not seem to hurt or offend, but you take the dog by the ear, and he will take you with his teeth. In all the history of kennels no intelligent or spirited dog will stand that. "Now," rays Solomon, "you go into quarrels or controversies that are not yours and you will get lacerated and torn, and bitten. 'He that passeth by and meddleth with strife belonging not to him is like one that taketh a dog by the

This is a time of resounding ecclesiastical quarrel. Never within your memory or mine has the air been so full of missiles. The Presbyterian Church has on hand a controversy so great that it finds it prudent to postpone its settlement for at leas; one more year, hoping that something will turn up. The Episcopal Church has cast out some recalcitrants. "Shall women preach?" "Or be sent as delegates to Conference?' are questions that have put many of our Methodist brethren on the "anxious seat." And the waters in some of the great baptistries are troubled waters. Because of the controversies throughout Christondom the air is now like an August afternoon about 5 o'clock, when it has been steaming hot all day, and clouds are gathering, and there are lions of thunder with grumbling voices and flashing eyes coming forth from their cloudy lairs, and people are waiting for the full burst of the tempest.

Let those who are jurymen in the case, I mean those who in the different ecclesiastical courts have the questions put directly before them, weigh and

This trouble throughout Christendom. was directly inspired by Satan. He saw that too much good was being done. Recruits were being gathered by hundreds of thousands to the Gospel standard. The victories for God and the truth were too near together. Too many churches were being dedicated.
Too many ministers were being ordained. Too many philanthropies were being fostered. Too many souls were being saved.

What amazes me most is that all people do not see that the entire movement at this time all over Christendom is Sa-Many of the infernal attacks are tanic. sly and hidden and strategic and so ingenious that they are not easily discov-But here is a bold and uncovered attempt of the powers of dark-ness to split up the churches, to get ministers to take each other by the throat, to make religion a laughing stock of earth and hell, to leave Bible with no more respect or authenticity than an old almanac of 1822, which told what would be the pest to plant turnips. In a word, the effort is to stop the evangelization of the world.

Now, what part shall you and I take in this controversy which fills all Christendom with clangor? My advice is: Take no part. In time of riot all mayors of cities advise citizens to stay at home or in their places of business and in this time of religious riot I advise you to go about your regular work for You, a man only five or six feet high, ought not try to wade an ocean a thousand feet deep. My own experience has been vivid.

Creeds have there uses, but just now the church is creeded to death. The young men entering the ministry are going to be launched in the thickest fog that ever settled on the coasts.

You see, God knew as much when he made the Bible as he knows now. He has not learned a single thing in six thousand years. He knew at the start that the human race would go wrong and that would be the best means of its restoration and redemption. And the law which was thundered on Mount Sinai, from whose tops I had the two tables of stone in yonder wall transported, is the perfect law. And the gospel which Christ announce while dving on that Mount from which I brought that stone in yonder wall and which Paul preached on that hill from which I brought yonder granite, world. Young man, put on that Gospel armor! No other sword will triumph like that. No other shield will protect like that. No other helmet will glance off the battle-axes like that. Now, what is the simple fact that

you in the pew and Sabbath school class and reformatory association and we in the pulpits have to deal with? It is this that Gold has somewhere, it matters not where, but somewhere, provided that a who want quiet, great for vast assemblage for those who like multitudes, great for architecture for those who like architecture, great for beautiful landscape, great for music for those anything that one especially desires in such a rapturous dominion; and all. What, then, mine? Our work is to persuade people

an of science or the poet and the ol-gathering of the average muddled sent to the hospitals at the front. She A peculiar patchwork quilt was, durhad a boy in the army, and was naturbase.

ally interested in the welfare of soldiers. But what a patchwork quilt she sent! On every block of the quilt wa: a passage of Scripture or a verse of a hymn. The months and years of the war went by, On that quilt many a rounded man had lain and suffered and died. But one morning the hospital nurse saw a patient under that blanket kissing the figure of a leaf in the quilt and the nurse supposed he was only wandering in his mind. But no, he was the son of the mother who had made the guilt and he recognized that figure of a leaf as part of a gown his mother used to wear, and it reminded him of home. came from?" he asked. The nurse ans- colored people around the plantations wered, "I can find out, for there was in the Citra district of Florida say. that.", Sure enough, it confirmed what he thought. Then the nurse pointed to a passage of Scripture in the block of fore the late war the Southern planters the quilt, the passage which says: "When he was yet a great way off his father saw him and ran and fell on his neek and kissed him." "Yes," said the daying soldier, "I was a great way off, got to work then, and now fortunes but God has met me and had compassion on me." "Shall I write to your mother and tell her that the lost one is found and the dead is alive again?" He answered, "I wish you would, if it would not be too much trouble." Do you suppose that woman who made that quilt and filled it with Scripture passages had any trouble about who Melchizedek was or how the doctrine of God's sovereignty can be harmonized with man's free agency, who wrote the Pentateuc

or the inconsistencies of the Nicene creed? No, no; go to work for God and suffering humanity and all your doubts and fears and mysteries and unbeliefs put together will not be heavy enough to stir the chemist's scales, which is accustomed to weighing one-fiftieth part of a grain of chamomile flowers. Why stop a moment to understand the mysteries when there are so many certitudes? Why spend our time exploring the dark gar rets and coal-holes of a great palace which has above ground one hundred rooms flooded with sunshine?

Do you know that I think that if all

ministers in all denominations would stop this nonsense of ecclesiastical strife and take hold the word of God, Christ and in how short a time, Lord would soon appear for the salva-tion of all nations? When the young Queen of England visited Scotland many years ago, great preparations were made for her reception. The vessel in which she sailed was far out at sea, but every hill in Scotland was fertilize a whole grove. illumined with bonfires and torches. The tenderfoot is The night was set on fire with artificial illumination. The Queen standing on ship's deck, knew from that that Scotland was full of heartiest welcome, and the great thunder of the great guns at Glasgow and Edinburgh castle woke up all the echoes. Boom! they sounded out over the sea. Boom! they sounded up among the hills. Do you know that I think that our King would land if we were only ready to receive him? Why not call to him from all our churches, from all our hospitals, from all our homes? Why not all at once light all the torches of Gospel invitation? Why not ring all the bells just proper for the growth of oranges. of welcome? Why not light up the long night of the world's sin and sufference or a dealer ever hears, either by ading with bonfires of victory? Why not unlimber all the Gospel batteries, and let them boom across the earth, and boom into the parting heavens? The King is ready to land if we are ready to receive him.

But the skies do not part. I hear no him.

rumbling of chariot wheels coming down over the sapphire. There is no swoop of wings. I see no flash of angelic appearances. All is still. I hear nothing but the tramp of my own heart world is not ready, and the church is there is no other like stretch of terrinot ready. To clear the way for the tory. Ah, what a fine sight it is the Lord's coming let us devote all our ener- view of grove after grove of flourishing gies of body, mind and soul. Be that the charmed word with which we go forth to do our whole duty. In many languages it whole duty. In many languages it has only a little difference of termina-tion. Christos! It stands for sympathy. It stands for help. It stands for pardon. It stands for hope. It stands for heaven. Christos! In that name we were baptised. In that name we took our first sacrament. That will be the battle-shout that will win the whole world for God. Christos! Put it in our banners when we march! Put it on our lips when we die! Put it in good flavor of the orange. the funeral psalm at our obsequies! Put it on the plain slab over our grave! Christos! Blessed be his glorious name forever! Amen!

Silvering Iron.

A new process for silvering articles of iron is thus described: The article is first plunged in a pickle ofhot diluted whence it is rehydrochloric acid, moved to a solution of nitrate, and connected with the zinc pole of a Bunsen element, gas carbon or platinum serving as the other pole. It is rapidly covered with a layer of quicksilver, when it is removed, washed, and transferred to a silver bath and silvered. By heating to 300 degrees C. (572 degrees Fah.) the mercury is driven off, and the silver firmly fixed on the iron. To save silver the wire can be first covered with a layer of tin. One part of cream of tartar is dissolved in eight parts of boiling water, and one or more tin anodes are joined with the carbone pole of a Bunsen element. The zinc pole communicates with a well-cleaned piece of copper, and the battery is made to act till enough tin has deposited on the copper, when this is taken out and the ironware put in its place. The wire thus covered with tin chemically pure, and silvered, is said to be much cheaper than any other silvered metals.

It is proposed to establish a mail service on the street cars in St. Louis.

The Weems electrical railway system will allow the running of pas ger trains, it is said, at the rate of 150 miles per hour, and experienced electricians say it is practicable. The motor car will have seven feet drive wheel GOOD AS YELLOW GOLD.

THE RIGHT KIND OF A FLORIDA ORANGE FARM.

But There Are Groves and Groves-An Orange Grower Tells About the Florida Fruit Situation-One Farm's Crop.

"De massas used to keep us a-grubbin' an' a-grubbin' to git dese yah wile orange trees outen de way, and heah comes dese yeah men frum up Nawth "Do you know where this quilt an' gits rich offen 'em," is what the That is the fact, and represents the orange industry in that region. Bealways ordered their slaves to chop enormously greater than ever cotton could have been the source of are being accumulated from these very wild orange trees by the grafting of tame stems on them.

A Cincinnati Times-Star reporter saw one of the prominent orange growers of that region from which come the finest oranges in the world in the

store of one of his customers. "There are two sorts of land for growing oranges in Florida," said he, the pine land and the hammock land. The first is often advertised as producing very fine oranges, and glowing accounts are written showing why real estate should be bought there and families should settle there. But in reality it is not known that any good oranges. or any large quantity of oranges come from any of these lands. They are the lands which support the pine trees and oranges do not grow on them. There is something funny about this. A pine land owner in Florida will tackle a 'tenderfoot' and try to sell him land. He takes him around the side of the house and shows him a the only question with each of us being how many souls we can bring to fully and growing bravely. 'Now,' he magnificent orange tree blossoming says, 'people try to say that you can't grow oranges on pine land.' The fact is that this particular tree has been fertilized by all the dishwater of the house, which is a fine fertilizer. But no one can get dishwater enough to

"The tenderfoot is entrapped and forthwith buys the land. He will get a few poor trees and some bad oranges. That will teach him a little bit about orange land.

"But there is another sort of land, the hammock land as it is called. You notice on the pine land grow trees which are not deciduous, and it is just the opposite with the hammock land. This is what I think accounts for the difference in fertility. The leaves of the trees in the hammock lands have been continuously shed for many years, and have enriched the soil so that it is except a dealer ever hears, either by advertising or otherwise, for every owner knows their value and does not care to sell, or should he have any desire to do this then he can find the purses of his neighbors ready to accommodate

"The best orange district in Florida is the vicinity of Lake Orange which is two and one-half miles wide and twelve miles long. Plantations orange trees. Imagine such a stretch of pear trees all in finest condition, bearing magnificent yellow fruit. That is a sight worth seeing, and it is from this place, hardly a good-sized stock raiser's farm, from which one-fourth

At one end of the lake is the Sampson farm, whose last year's yield was worth \$45,000. At the southeast end of the lake are the best orange groves in the region, for here is where they are best protected from frosts, while at the west end the fruit is poorer in quality as the protection from frost is not so complete there as at the other end of the lake, and besides the russet mite gets in his work here, eating the orange skin and giving it what some think a beautiful tinge, but which at the same time destroys part of the

"These orange groves are very carefully watched. Every year dredgeboats are run in the lake, the muck from the bottom is brought up and being put on a tramcar, by means of movable rails the car is taken ali over the field and the whole grove is fertilized with natural fertilizer. A corps of about thirty hands mow all the rank grass three times a year. When the oranges are ripe an experienced overseer goes through the grove telling his men which oranges to pick. Some persons have an idea that oranges should be picked green, but that is a mistake. An orange picked ripe will keep longer than one left to ripen in a box. It is peculiar that the older the tree the sweeter, better and smaller the orange. This fruit is as carefully handled as eggs.

"No one can prevent the frost, which sometimes goes to the extreme end of Florida. But bugs are kept off by spraying the under side of the leaves of the tree with a solution of sulphur. He may grow 'standard' oranges, which have some small defect either in color or it may be a dent caused by the bursting of one or both of the inside skins. Yes, the orange has three skins, one within the other. The 'threes' are good oranges but may have many defects of flavor, shape, size, etc. If the orange is very poor it is shipped to some near point to be sold at auction.

"After the oranges have been sorted experienced men wrap each one in tissue paper, and others do the packorder of packing, the number of tances apart.

oranges in a box ranging from ninety-IRON HORSE DISTEMPER six to 300, according to size and man ner of packing, and it is a strange thing that a smaller number sometimes weigh more than a larger. But that is explained by the fact that the box is less completely filled by the larger than by the smaller, because in packing the larger number the oranges are put on the top of one another, and to get 112, say, into a box, they are put one between the space left between the tops of the lower two.

NOT BAD MEN.

A Good Word for the California Miner of the Rough Days of '49.

painted. I protest against the flippant style and eccentric rhetoric of those writers who have made him a terror, or who, seizing upon a spasmodic case of extreme oddity, some drunken, brawling wretch, have given a caricature to the world as the typical miner. The so-called literature that treats of the golden era is too extravagant in this direction. In all my personal experience in mining camps from 1849 to 1854 there was not a case of bloodshed, robbery, theft, or actual violence. I doubt if a more orderly society was ever known. How could it be otherwise? The pioneers were young, ardent, uncorrupted, most of them well educated and from the best families in the East. The early miner was ambitious, energetic and enterprising. No undertaking was too great to daunt him. The pluck and rescurces exhibited by him in attempting nighty projects with nothing but his courage and his brawny arms to carry them out was phenomenal. His generosity was profuse and his sympathy active, knowing no distinction of race. His sentiment that justice is sacred was never dulled. His services were at command to settle differences peaceably, or with pistol in hand to right a grievous wrong to a stranger. His capacity for self government never has been surpassed. Of a glorious epoch, he was of a glorious race.-Century Magazine.

The same invention would be much more valuable in the United States.

An ingenious French engineer has dis covered a new device for ascertaining the speed of a train, so that a check can be had on the engine driver as he runs around curves and other difficult parts of the line The instrument is a tuning fork, having a point which inscribes a curve on a rotating cylinder. The mechanism is set in motion and also stopped by the wheels of the ing into the boxes. There is a regular | train passing over treadles at known dis

ENGINEER ON THE WHIMS OF LOCOMOTIVES.

If an Engine Gets a Bad Name Its Fate is Scaled-Engineers are a Brave, But Superstitious Class of Men, Generally.

·Locomotives become deranged and maniacal, like human beings," said an old and highly skilled engineer, to a New York World reporter, not long ago. "I assure you," he continued. that locomotives require regular rest, The early miner has never been truly constant attention, even nursing when they don't feel right. An engine will take spells when nothing you can do will make it act properly. Then the shop is the only place for it, and there my machine has got to go, or I quit the service of the road."

"They certainly do grow unmanageable sometimes. Generally this is frem over-work. Engines are like a thereughbred horse in that particular respect. They will get 'off their feed' -by which I mean that they will not pump up right, the furnace will clog and the efficiency of the fuel will not be obtained. They suffer from a lack of energy. You are liable to stall on an up-grade. They will act badly on the curves, manifesting a decided inclination to mount the rails or to take sudden starts that endanger the couplings.

"But, recurring to the temper of locomotives, they are affected by the weather, which is readily understood, but a dull, heavy sky or a dense atmosphere has a like effect. This I cannot explain in any other way whatever. Why, Mart Smith, who was a strict churchman, couldn't do anything with one of his engines during Lent. After Easter day the disinclination to make time disappeared. She would 'hustle' whenever called upon. Sounds very absurd, doesn't it? But it's true. The grip is the only distemper to which I can liken a locomotive such as Mart's was. When a machine gets so, I tell you, she must have treatmentthe best scientific overhauling. She needs a masseur-needs galvanism.

"When once a locomotive has lost seem almost to have stepped off the force of character or self-respect, does she ever again regain it?" was asked. drawn are their costumes. The hair is 'Generally not," said Bowcher, braided up into hundreds of little meditatively, 'but I know a recent plaits, small as to be mere strings, case in which an engine recovered from These braids have been soaked in cas- a stroke of this paralysis and became, tor oil and rubbed with dust, until in as she is to-day, the best on the road. places they are perfectly solid. In the When No. 71, on the L. N. and C. middle of the forehead dangle short road came out of the shop brand new, strings of beads, holding a fancy gold she was successively put in the hands pendant, and in the nostrils a large of half a dozen of the best engineers ring. Around the neck are strings of on the road. Of bracelets chinery. The general superintendent there are several, of coarse, dark heard of the engine and ordered her condemned, but the master mechanic

"She doesn't like the run. It is a them a black shawl, and their feet are blanked mean run and she knows it as well as you do.'

"You see the master mechanic wanted the locomotive to have another chance. Well, she got it, and I tell you it was to have been her last one. She'd have been sold for scrap-iron or run off the track into a forest and conwith him. He developed a mania for verted into the motive power for a saw-mill. She was sent up to Indianapolis and put on the run to Monon. I went to the round-house and looked 'No, I couldn't do that, so I was her over, for I'd heard of her and am obliged to arrange matters so that he curious. I was asked what I thought was the matter. I spent an hour over her and everything appeared to be "I made him a lawyer."-New York | right. I took an off day and ran down fifty miles on her. She made great time. To-day she is the fastest on the road and the most reliable. She can pull a vestibule train of five cars a. mile a minute. Now she's the pet, the 'banner' engine of the road.

"You speak of the need of rest, Mr. Bowcher. Must it be regular? I mean at regular times?"

"Most assuredly," was the prompt reply. "A locomotive must be allowed to recover her resilience. That's the word, you have it spelled correctly -only one l. Remember, a locomotive that pulls out of its berth in the round-house (where it has been in a state of quiet and rest), backs up to a big train, and at the sound of the conductor's bell rushes off on a bundredmile run at fifty or sixty miles an hour is under a heavy nervous strain. Don't smile, I mean exactly what I say. Every atom in the molecular structure of the steel and iron composcomotive engines, now working in the ing it is at the highest tension. The engine, literally is out to do or die! To fail in making the run on schedule time once or twice arouses suspicion. The moment an engine is ranked as untrustworthy her decadence has begun. Unless she has a friend at court, as No. 71 had, her doom is fixed,"

"What is her fate?" I asked with feelings of real sympathy.

"She is put at the most menial service, such as drawing construction and gravel trains. Sometimes she is put on a local run, stopping at every crossroad. She is treated just as if she were known to be lazy and as if 'stopping' were her strong point.

"This brings me to another point. Some engineers have a way of punishing engines that are refractory. Yes, indeed. They can abuse a locomptive worse than the most brutal driver can maltreat his horse. How? Twenty ways. For instance, they can give the engines less coal while exacting the same speed, less oil on the bearings, by pulling the throttle wide open on the slightest pretext. Of course, such men are always in trouble. They burst a cylinder-head by leaving the water-cocks closed to spite the engine, or they allow the bearings to heat, swell and jam. The element of danger is largely increased when such a man is in the cab. Anything is liable to happen if he have a cranky engine that can get just as stubborn as her master. I often am impressed with the idea that some engines are mortal.

VAST MARINE WEALTH NOW WITHIN EASY REACH.

By the Use of the "Beam Trawl" the Atlantic Coast Will be Made to Give Up New Food to Fish Eating Millions.

A new fishing industry for this country has been discovered, which adds more than 10,000 square miles to the fishery area at present available off the Atlantic coast. This means that a novelty in the shape of what is known as "beam trawling" has been introduced to the coastal waters of the United States as a means of catching fish. Up to the present time the fisheries of the North Atlantic have been confined almost wholly to the great shallows called "banks," far off the shore, where cod, haddock, and aches and fevers and cures habitual halibut are caught by means of hooks

The fact has been known for a long that no effective mode of taking them was understood.

This seems rather curious, inasmuch as the taking of such fishes by ready means under like conditions is pursued on a vast scale from ports of simple character, and is known as the beam trawl." The reason why it has not been adopted here is to be found in the prejudices of the fisher-

A Gloucester, Mass., schooner made the first experiment with a beam trawl imported from England. She returned with an enormous catch of cod, haddock, and halibut captured in the trawl, besides 5,000 lemon sole, which sold for four cents apiece wholesale. The captain threw overboard ten tons of these same soles, because he did not know that they were salable. His A Farmor at ily. We live in a trawl net came up time after time so Edom, Texas, subject to violent difficulty was experienced in getting Colds and Lung them to the surface, because his vessel Troubles. I have was only an ordinary schooner, and used German Syrup for six years not properly equipped for such work. So great were the catches that it took Cold, Hoarseness, Pains in the as much as nine hours to fetch the trawl on board, so that most of the fish were too badly injured to be saved. He estimates that 240 tons of fish were

This was no fortuitous incident. The great shelf of the Atlantic from the northern limits of the banks southward perience. If you use it once, you to and beyond the capes of Virginia will go back to it whenever you are aswarm with fishes that are unneed it. It gives total relief and is known to our domestic markets, simply a quick cure. My advice to every- for the reason that no practicable one suffering with Lung Troublesis | method has hitherto been applied for -Try it. You will soon be con- their capture. Vessels equipped with vinced. In all the families where steam apparatus for hoisting trawls will shortly be built on this coast, after the models commonly in use at British ports, and the production of fish on the shores of the Atlantic will be multiplied within the next ten years many fold. It is a very moderate estimate to suppose that 10,000 square miles will be added to the fishing waters of this side of the ocean. In fact, an entirely new fishing industry is on the point of being created, and inasmuch as it will be prosecuted off our own coast line, and without the use of bait, it will give rise to no such international questions as have caused difficulties between this country and Great Britain.

And yet a beam trawl is the simplest apparatus conceivable. It is merely a huge net, in the shape of a pocket, seventy-five feet in length, spread wide by a stick of wood which goes on runners like a sled, so that the net can be hauled over the bottom easily, its lower portion weighted with lead, and scooping every living thing that comes within its reach, especially the soles and other flat fish that hug the sandy or muddy ground. In summer the soles frequent the sandy bottom mostly, but in winter they seek the muddy holes for warmth.

Together with the soles is brought up a most wonderfully varied exhibition of marine life, and on the deck of the trawler after a haul may be seen the flapping and writhing shapes of the conger eel, the fierce wolf fish with wickedly snapping jaws, the dog fish, always the fisherman's enemy, and the wide-mouthed fishing frogs, which some one has called "animated carpet bags," together with shells, sea anemones, sea corn, ad infinitum.

Refinement of Cruelty.

The constitution of the Indian Territory leaves doomed criminals the PENNA. SALT M'F'G CO. option of dying by lead or hemp, and there is a story of a murderer in the county prison of Talequah who was TAY FUED CURED TO STAY CURED formally requested to decide in which manner he would preper to be executed dressof every sufferer in the cuted. "Without cant" was the la-Q. ASTIMA U.S. and Canada. Address conic reply. But even that modest privilege seems to have been denied the Russian convicts, for by a recent revision of the penal code the prison chaplains of the Greek Orthodox church are required by law to inflict their presence on the last twelve hours of a condemned criminal. A more sensible law is that which obliges foreigners either to become citizens or leave the country after their residence has been beyond a period of five years. The mental condition of persons who will volunteer to live five years in Russia must become so suspicious that they can hardly expect to be left alone.

Good for Practice.

The "pianophone" is the latest. It consists of a keyboard with keys of the same size and description as an ordinary piano, a simple but offective striking action, and the substitution of metallic plates for the ordinary strings. These being tuned to the ordinary hour, would be perfectly safe

A DROP OF HAY-WATER.

What One May See Therein by the Aid

of a Microscope. Let me tell you of some of the won derful things I have seen. Once I put a little hay in a tumbler, covered it with water, and set the glass in a warm place for a day or two. Then, with a medicine-dropper, I put a drop of the water on a glass slip, covered it with a very thin glass wafer the size of a cent, placed it under my microscope, adjusted the focus, and what a sight met my eyes. Dozens and dozens of what looked like animated drops of jelly were darting here and there, bumping against one another, or dodging one another like schoolboys at recess. Perhaps among the crowd of smaller ones would dash a much big-ger fellow. I fancied it might be a big brother, older than the others by some hours, and so entitled to the deference he seemed to exact. Then, in another part of the drop of

water, the little ones formed almost a circle, and presently in the center of this came a big fellow—he must have to the Ladies' Hollywood Memorial association. been at least 1-100 of an inch longwho began revolving slowly. "P. T. Barnum," I thought to myself. "That is exactly the way I have seen him address an audience surrounding a circus ring." But I can never know what he told the smaller ones, for not even the "little ghost of an inaudible squeak" reached my ears. Besides these little creatures, I could see what looked like dark specks darting above. Determined to find out what these were, I used a stronger magnifying glass, and looking through it the specks proved to be other little swimmers such as I had just been examining; and the latter, of course, seemed larger. But now there were still other specks darting about, so a still stronger glass was used, with the same result. Magnify as I might, I could not reach a point where there were not some moving atoms needing further magnifying. I have since learned that no glass has ever been made powerful enough to reveal the tiniest of these "infusoria" as they are called. -St. Nicholas.

Just Like Some People. A story comes from across the water that a young lady in an English church accidentally let her handkerchief fall. By repeatedly stooping to reach it furtively she attracted the notice of a gentlemen in the pew behind, who thought she was about to faint. With the best of motives, therefore, he took her gently under the arms and raised her up, greatly to her surprise. As she tried to release herself another gentleman went to his assistance, and before the lady knew what was the matter they were moving her out into the aisle, and, indeed, carried her into the vestibule before she could recover from her astonishment sufficiently to find words for protest. The finale, of course, was ludicrous in the extreme.

A BILL is pending in the Wisconsin senate which provides that every person who has for a third time been convicted of crime, whether in that state or in the United States, shall be deemed an habitual criminal and shall not be released at the end of his third term but detained for the remainder of his

THE story is told of an old-time Bangor merchant who had a propensity for picking up all the stray buttons that came in his way, that during his long life he filled a barrel in his store with them. After his death some one had the curiosity and patience to go through the lot, but failed to find two buttons of the same pattern.

KING HUMBERT, of Italy, has been awarded a gold medal by a state com-mission "for civil valor," the occasion being the collapse of a house in Rome last January. His majesty climbed down a rickety ladder into the cellar ahead of every one else, and assisted in rescuing several persons who were badly injured from the ruins.

SINCE 1820 immigration from foreign countries to the United States has added to our population over 15,000,000 persons, and more than half that number have arrived since 1870. During 1889, 444,500 came, and in the first four months of 1890, 92,862 landed at Castle Garden, as against 74,454 in the corresponding mor hs of 1889.

THE following plan is adopted in the Paris laboratory for testing the comparative durability of paving stones. A sample of the tock is placed upon a herizontal plate rotating around a vertical axis and pressed against it by suit able contrivances. The wear is then compared with that of a standard material under the same conditions.

Bolckow, Vaugun & Co. enjoy the distinction of being the largest firm in England. There are employed in the various departments 13,075 workmen, receiving over \$4,500,000 annually in wages. The chief products last year were 1,877,694 tons of coal, 597,056 tons of coke, 1,877,694 tons of iron ore, 478,-749 tons of pig-iron and 194,077 tons of

THE Duke of Marlborough, who ranks among the bright Englishmen of the day, has an article in the current number of the Fortnightly Review comparing English railroads with those of the United States. Among other things he says: "Our English railways are toy systems; our rolling-stock, toy freight-carriers compared with the trains which are run all over America.'

THE death of Gen. Johnston removes one of the best known figures in Washington. He was a small, slight man, but little over five feet high, with his days. West Point training written all over him in spite of his eighty-four years. Three years ago he suffered the loss of his wife, an attractive woman much quilted a quilt, younger than himself, and whom he married when well on toward middle life. He never recovered from her death.

AT a meeting of the Asiatic Society of Bengal, at Calcutta, a piece of cable was exhibited, showing that the India rubber covering had been pierced by a blade of grass. The piercing was so complete and the contact with the cop-per core so perfect that "dead earth," as it is technically called, was produced | Wade feels joyous over a similar happi and the efficiency of the cable destroyed. The species of the grass, owing to its dried-up condition, could not be de-

In England and in Canada there are regularly incorporated coffee-house companies. These put philanthropy on a business basis and make it pay good dividends. One company was formed in Liverpool in 1875, with a share capital of \$200,000. It has now 63 houses and has never paid less than 10 per cent. In Birmingham a similar company was formed in 1877, with a capital of \$100,000. This pays from 10 to 15 per cent.

THOUGH the development of the mineral wealth of the South is building up new cities and towns the Southerners still continue a rural people dwelling in small communities. The old cities, while they grow, grow but slowly, and the new boom cities do not quite verify the figures of the boomers. The special bulletins of the census bureau dealing with populations by counties show that there are very few counties in the South which have 60,000 or more inhabitants. Throwing Maryland out of the catagory the Southern States contain only one big city, New Orleans.

RECENTLY in the United States senate | Saratoga Springs, N, Y.

cnamber some amazing statistics were given as by authority, and their accuracy has not since been questioned. These relate to the wealth of the country and the distribution thereof. During the double decade from 1860 to 1880 the national wealth increased at the rate of \$250,000 for every hour. With every outstanding claim paid, we have a balance in our favor of between \$60,-000,000,000 and \$70,000,000,000. This is a fine showing. But it is shadowed ominously by the increasing tendency on the part of this wealth to gravitate from the many to the few.

Nothing adds so much to a person's appearance as a fine thick head of hair of even color; and to assure this use only Hall's Hair Renewer.

It is only conjectured that a specific may yet be found for every ill that flesh is heir to. However this may be, certainly the best specific yet found for disenses of the blood is Ayer's Sarsaparilla and most diseases originate from impure blood,

"My father at about the age of fifty, ost all the hair from the top of his head. After one months trial of Ayer's Hair Vigor, the hair began coming, and in three months, he had a fine growth of hair of the natural color."-P, J. Cullen

Good News!

No one, who is willing to adopt the right course, need be long afflicted with boils, car-buncles, pimples, or other cutaneous cruptions. These are the results of Nature's efforts to expel poisonous and effete matter from the blood, and show plainly that the system is ridding itself through the skin of impurities which it was the legitimate work of the liver and kidneys to remove. To restore these organs to their proper functions, Ayer's Sarsaparilla is the medicine required. That no other blood-purifier can compare with it, thousands testify who have gained

Freedom

from the tyranny of depraved blood by the use of this medicine. "For nine years I was afflicted with a skin

disease that did not yield to any remedy until a friend advised me to try Ayer's Sarsaparilla. With the use of this medicine the complaint disappeared. It is my belief that no other blood medicine could have effected so rapid and complete a cure."—Andres D. Garcia, C. Victoria, Tamaulipas, Mexico. "My face, for years, was covered with pim-

ples and humors, for which I could find no remedy till I began to take Ayer's Sarsapa -rilla. Three bettles of this great blood medi-cine effected a thorough cure. I confidently recommend it to all suffering from similar troubles."-M. Parker, Concord, Vt.

Several of our town boys are contemplating taking in the Maccabeo concert and dance at Elkton. There is talk in town of the big

mill being lit with electricity in thirty days. This will demand a double crew of men as it will run night and day.

The cheese factory is now in full blast

with a capacity of about 2 tons of milk

Rev A. Ross, of Brant Mission, was in town the past week looking after the interest of his farm at this point. The box social and dance under the

auspices of the Maccabee Society at this place Thursday evening last, was a grand success. Much credit is due the several committees in charge. Receipts of the occasion was \$21.50 The lemonade stand netted 5 per cent on the investment. Several from Goodman and Cass City were present and ail report an excellent time. The boys talk of having a semi monthly occasion of this kind in the future.

P. T. BARNUM within the last twenty years expended upward of \$3,000,000 in newspaper advertisements, and he left behind him a fortune of \$5,000,000.

AT Yakutsk, Siberia, the ground is perpetually frozen to a depth of 612 feet. Every citizen of Yakutsk can have a coldstorage cellar without extra expense.

A LAUGHING ghost is said to haunt the mountains of east Tennessee Ghosts are not particularly desirable, but this kind is preferable to the conventional wailing and sobbing spook.

JUDGE VIRGIN said, in granting a divorce at Skowhegan, Me .: "No woman who is decent should be obliged to live with a drunken husband, and if she comes to me I will grant her a divorce every time."

OSCAR WILDE has not proved entirely recreant to estheticism, inasmuch as he dines now in a white room with no furniture save the table and chairs, while his drawing-room is provided with settees with high white backs and sage green cushions.

MISS MAGGIE SCHUTT, of Derry, Pa. died recently. She was 65 years of age, and since her father's death, twenty years ago, had been living out as a maid of all work. Investigation of an old canvas bustle belonging to Miss Schutt disclosed a fortune of \$9,000.

THE statistics show that fewer Italians bring their wives and families with them to the United States than any other class of immigrants. As a rule they do not come to stay and are neither profitable to the people of the United States while they do remain or their own nation, which has to care for the families of the wanderers in their ab-

THE finding of fifty human skeletons near Corpus Crispi, Tex., is accounted for by William Payne, manager of the Farmers' Alliance at Whitewright, Tex. He says eighty of his comrades deserted in a body from the rebel service and started for Mexico, not one of them having been heard of since, and that they were captured and executed to a man.

PAY-CARS are familiar sights on American railways, but this country has not yet employed the locomotive in banking operations. One of the New Zeuland banks has a special car which visits the rural districts, cashes checks and receives deposits. The experiment is said to be profitable, and it is a great convenience to settlers who would otherwise be compelled to leave their farms and visit town on numerous occasions.

THE heavy losses by fire in April have already carried the aggregate of the first three months and a half of 1891 far beyond the corresponding period of 1890. For the first quarter of the year the loss has been \$35,197,053, against \$24,246,592 in the same quarter of 1890. During April the loss was \$5,435,845, as compared with \$3,601,960 during the same time last year. The total is \$40,-632;898 in 1891, as compared with \$27,-848,552 in 1890.

ONE of the largest pieces of tunneling ever undertaken in the world has been completed at Centralia, Pa. It is six thousand feet in length, and extends into the workings of the Hazel Dell mines and through the basin of the mammoth vein. This tunnel will drain the entire Centralia basin. It is eleven feet wide by seven feet high, and although it was driven through the hardest kind of rock was completed in fifteen months.

In the United States district court at Boston the other day, Gen. B. F. Butler, who appeared for Mrs. Johnson, defendant in a prosecution for pension forgery, was ordered from the room by Judge Carpenter, who had the marshal and an assistant enforce his decree. Gen. Butler, with tears in his eyes, said that he yielded to force; and when he returned to the court after the judge had left the bench, remarked that the room smelled a little better.

BUFFALO BILL and his Indians are now exploring the picture galleries of Antwerp. They will have ample op-portunity for seeing the historic nymphs and madonnas whom Sir Joshua Reynolds described as all being faithful pictures of "fat Mrs. Rubens up in the the clouds." They will also see a European reproduction of their own Pine Ridge society-women and dogs drawing street-carts, while the men smoke and walk behind the procession. If this does not civilize them, nothing can.

THE death of P. T. Barnum elicited numerous press comments on his career. His name is familiar to the people and has become incorporated in the French language. Hon. Whitelaw Reid said: "Barnum had many excellent qualities. Horace Greeley agreed with Barnum on the questions of temperance and universalism, and always spoke of him in the highest terms. A few years ago Barnum sent me his autobiography with a dedication on the flyleaf saying: 'As I cannot live to correct the proof sheets of my obituary, I offer you these pages, where you will find all the facts of my life correctly told."

THE town of Kiowa, Kan., has a lady mayor, Mrs. Dr. Paxton, who has closed and double-locked the gambling houses and saloons, and is deaf to all appeals to moderate the rigor of her programme of reform. Thirsty citizens have endeavored in vain to induce her to show a little leniency. Despairing of shaking her resolutions, a delegation called on her husband the other day and begged him to use his influence with the city's fair chief magistrate. The husband's reply was that his wife was running the city as well as her household. and that he was powerless. The mayor ess evidently means business.

He's Stopped Now. "They say that Upson Downes' tailer has been dressing him for nothing." "Indeed! For the 'ad,' I suppose?" "No; because he can't collect a cent."

FEARFUL WRECK ON THE D., S S. & A. AT L'ANSE.

The Station Demolished and the Engineer Badly Injured .- Damage Estimated at \$50,000.

Train Wrecked at L'Ansc. special from Marquette says: A frightful train wreck occurred Thursday morning on the L'Anse grade of the Duluth, South Shore & Atlantic railway. The brakes of a freight train going west failed to work and the train plunged down the steep grade, over a mile in length, jumped the track at the curve in front of L'Ause station and tore through the station buildings. The occupants of the latter had been warned by the shricking whistle and the rear of the madly rushing train and sought safety in flight. Brave Engineer Con Harrington, a resident of Marquette, stood at his post, and when his engine leaped the track and tore its way through the station he was still at the throttle. He was drawn unconscious from the wreck, his right leg broken and his right arm almost torn from its socket. His recovery is very doubtful. A special train took his wife from Marquette to her husband's bedside. Marvelously the other trainmen escaped with a few bruises. Twelve cars were piled in a heap and demolished. One was loaded with horses and the shricks of the injured animals added to the terror of the scene. Some were killed and others had to be shot to put them out of their misery.

Later details say that the conductor and brakeman escaped by cutting of the caboose from the train. The fireman ran back over the train and drooped off the last car. The total damage is estimated at \$50,000. The engine and 12 cars are a total wreck, the station is smashed to atoms and a carlead of horses and cattle were killed or so badly injured that they have to be shot. The speed of the train is estimated to have reached over 85 miles per mile.

The Weather and the Crops. The reports for last week indicate that the weather conditions have been generally unfavorable to the growing crops, corn having made the most progress during the week. In those sections where the rainfall was sufficient, especially in the southern tier of counties, the crops have made very fair progress, but in the northern portions of the state, where there has been but very little rainfall in the past six weeks, the conditions are unfavorable. The rainfall was not well distributed as to amount, even in the same county, varying in some sections over one inch, and along the west shore but very little if any rain fell during the week. This was especially so in Mason and Oceana counties, where no rainfall was recorded during the past week. Cut worms and potato bugs are working quite freely in the corn and potatoes in the southern section. Wheat is heading out in all sections and with a copious rainfall during the coming week the condition will be much improved. Corn oats and potatoes need warm rains very much to bring them forward and without rain the coming week the condition will not improve.

Big Fire at Adrian. The Adrian furniture factory burned at midnight Monday. The fire started in a pile of shavings and waste in the engine room and rapidly spread to the carving and dry rooms in the south building, 120 by 38 in size, and then worked north to the machine rooms, 140 by 40 feet. These two were soon in ruins, only the walls remaining. The finishing department was The loss, above insurance, is estimated at \$20,000. The cause is not known as the factory had been shut down for two or three days for repairs. One hundred and fifty men are thrown out of work.

Jennie Orr, the five year old daughter of William Orr of Bay Mills, Chippewa county, was fatally burned while playing near a bush fire Monday.

Boise & Lewis, general dealers in Mc-Bride, Montcalm county, near Stanton, assigned Monday with liabilities at \$6,000 and the assets unknown.

Emmet Evans, proprietor of the cold storage works in Jackson, and one of the influential citizens of the city, died Monday of peritonitis, aged 44 years.

Mrs. Peter Hughes of Forest, Genesee county, was thrown from her buggy by a runaway horse last week and so badly injured that serious results are feared. While Agent Mack of the Lansing office

of the Lake Shore was at dinner Monday thieves broke through the window and secured \$40, all the money there was in the The people of St. Ignace, irrespective of party, tendered Judge J. H. Steere of the

circuit court, a farewell banquet Tuesday St. Ignace is in the new judicial night. circuit. The program for commencement week

at the Ypsilanti normal school has been arranged. It will open on Friday, June 19, and continue until the following Wednesday. Rev. Wilfred Lindsey has been tried the past six months, as pastor of the

Saranac Congregational church and, not

having been found wanting, will be installed June 16. Joseph Lozon, a well known merchant of Battle Creek, took rat poison Saturday night and died Sunday. He had lately increased his business and the extra burden

unbalanced his mind. The Branch county soldiers' and sailors' assocation met in reunion at Coldwater Wednesday and put in a pleasant day. Gen. F. D. Newberry was elected presi-

dent for the ensuing year. May Ford, a Jackson typewriter girl, trusted a horrid man and when he telegraphed her to go to her sister she went. He met her, borrowed her watch, and now

May is stranded in Indiana. Adams, Blodgett & Co., the bankers who bought the Bay City water bonds do not want to take them but will be forced to if there is any virtue in the law; at least so says the council of that city.

A. Sleight of Hart, Oceana county, bored a hole 176 feet in the ground. He was surprised when he reached that depth to have the water come pouring from the hole in great quantities. It still pours.

Capt. W. B. Miller, late secretary and treasurer of the Mutual gas company of Detroit, has beer found to be \$11,788 short in his accounts. He will not be prosecuted out of regard to his family's position.

Clark H. Gibson, a prominent lawyer of Grand Rapids, was on his way home Saturday night when two men held him up, relieved him of his gold watch and \$35 in cash and fled before anyone arrived to help

Miss Lillian Thompson, daughter of W. G. Thompson of Detroit, and one of Michigan's wealthiest belles, was married in New York on Tuesday to Harry Le Grande Cannon of New York. The event was a great society affair.

Philip Refel of Garfield township, Alger county, hanged himself one night last They found him the next morning, but left him hanging until 5 o'clock that night as they could not get the coroner before. He was still dead when taken down. No cause known.

A freight train on the air line of the Michigan Central was wrecked and a tramp killed, near Niles, Saturday night. The train had an engine at one end and a pusher at the other. It broke in two and the pusher kept right on forcing the

wreck. The loss is not large. The Kalamazoo police are enraged because Detective Benthuysen of Woodstock Ill., took away the prisoner they captured for him without saying a word about the \$200 reward offered. If Illinois wants any more prisoners captured in Kalama-

zoo she will catch them herself. A lot of Jackson boys were playing Indian, Saturday night, and holding a war dance around a bonfire, when Christian Schiach, 7 years old, happened along. The other boys surrounded him as a captive and accidentally set fire to his clothing. He was fearfully burned, but may recover.

Ex-Constable Wayne McCrumb of North Lansing went to the state fair grounds Monday and took a dose of carbolic acid and accomplished his desire to end his life. He had been drinking freely of late, and feared trouble from the manner in which he disposed of some mortgaged property. Charles W. Seidell of East Grand Rapids, who has been in the marrying business for the past 13 years and had accumulated five wives according to the records, with several counties yet to be heard from, was sentenced to three years

in Jackson by a Grand Rapids judge Saturday. A Diamondalo photographer offers a premium of one picture of Nellie Griffin. the state ward who was murdered, to every one who has a dozen taken at his gallery. The picture of Nellie was made after she was taken from the water and may not prove as strong an inducement as

it might be. The state medical society which meets at Saginaw this week will have to investigate a charge brought against its president. Dr. L. W. Bliss of Saginaw, of performing an operation upon a young girl resulting in abortion and nearly causing her death. Dr. Oliver P. Barber of Saginaw makes the charge and sensational

developments are promised. Joseph Lozon, aged 44 years, died Sunday morning at Battle Creek from the effect of rough on rats taken Saturday noon with suicidal intent. Lozon resided in Detroit last fall, where he married his second wife. He had just purchased and removed to a new grocery store. He has been considered partially insane for a year or more. He leaves three children, two

boys and a girl. Two youthful lovers, Miss Ada Townsend and Elmer Foster, living in Rush township, near Galena, Ill., committed suicide Monday night. They had been out for a drive during the evening and returned late. The girl's mother called her at the usual hour next morning and, receiving no response, she broke into the room, where the two lovers were found dead, the young man upon the bed and the girl on the floor, to which she had fallen in her agony. They had taken strychaine which they had hidden for the purpose, the deed having been long contemplated. The girl's father is wealthy and Foster is a farm hand, and, it is said, her parents opposed the union.

STATE LEGISLATURE.

THE HOUSE SUSTAINS GOVER-NOR WINANS' G. A. R. VETO.

And Votes to Withdraw the Privileges of the Floor from W. C. Graves, a Reporter.

The bill making an appropriation of \$30,000 to aid in suitably providing for the twenty-fifth national encampment of the Grand Army of the Republic, to be held in Among the suspected was a Gen. Sully, Michigan next August, being the bill that committee to whom it was referred. bill now lies upon the table in the house, and can be taken up at any time.

The house of representatives decided on Tuesday not to push the charge against Wm. C. Graves, a Detroit reporter, for refusing to answer questions in an alleged bribery investigation case.

Gov. Winans issaed two vetoes Tuesday morning, killing the measure to allow Mayville, Tuscola county, to issue \$5,000 in relation to Fremont, Newaygo county, for \$10,000. He says the money is for boom purposes and he doesn't believe in it.

The house has passed the bill appropriating \$55,000 for the fish commission this year and next. It has also passed the enate.

The senate has passed the house bill

requiring that all work done on highways shall be finished by July 1. The house took action on the Graves ontempt case Wednesday and ended the

the session. The motion to shut him out was passed by a strict party vote. The G. A. R. appropriation bill, vetoed by Gov. Winans, came up Thursday and was defeated by 60 votes for it to 30 in

The house has concurred in the senate amendment adding \$16,000 to the Jackson prison appropriation.

At the evening session of the house Thursday the bill to pay a bounty to of February 1, 1864, was passed on third reading. It appropriates \$100,000 and is supreme court on that subject.

The senate has passed the last of the political measures, the state senatorial apportionment bill.

Without any debate or particular comment. Senator Park's ten-hour bill passed the senate Thursday afternoon, receiving a vote of 26 to 0.

The Richardson bill for the taxation of all railroads existing under special acts has passed the senate; also the measure reducing the admission fee of visitors to the Marquette prison from fifty cents to twenty-five.

Naval News.

The novel spectacle of a United States composed of only ten men is that presentby the Yantic now lying at the Brook lyn navy yard. Saturday all the men composing the Yantic's, crew save the ten referred to, were sent from the navy yard to the United States Naval Academy at Annapolis, Md., where they will be attached to the frigate Constellation for a summer cruise along the coast with the naval cadets. Strange to say, there is no probability of the Yantic's going out of commission, notwithstanding her plight as to men. On the contrary, her officers think she will be provided for somehow before long, and they confidently expect to rendezvous with the rest of the ships of the North Atlantic squadron at Ports mouth, July 4. Another step toward making the Brooklyn navy yard a central point of supply for all naval vessels on this side of the globe is now being taken in the construction of a large and substantial storage building. The new building, which will have a capacity of 5,000 tons of coal, is being built on the north wharf, where it may be most easily approached by the largest ships. The new building will be provided with an automatic coaling apparatus that will cost \$15,000.

Sir John's Burial.

The remains of the late Sir John A. Macdonald were committed to their last resting place in Cataraqui cemetery at Kingston, Ont., Thursday, which thus becomes a historic spot. The day was hot, the sun shining brilliantly much of the time. The morning was spent in viewing the remains in the city hall. Two thousand persons in double line passed the bier. The procession was the grandest ever seen in Kingston, 7,000 people being n line. It was over two miles long and occupied 40 minutes in passing a given point. The parado moved at 2:45 o'clock, at which time three miles of Princess street were lined with spectators. Not less than 40,000 persons viewed the solemn advance. The parade was under civic control. The hearse was drawn by eight black horses, wearing palls with leaders at each head. Eight mounted battery men guarded the hearse on either of the cabinet and Hon. J. C. Aikers, exside. The pallbearers were the members lieutenant governor of Manitoba. mourners were represented by Hugh J. Macdonald, Col. J. P. Macpherson and Joseph Pope, private secretary. The burial service was read by Archdeacon Jones.

The Belleville high school will graduate a class of eight June 26. The school officers have re-engaged Prof. Nethercott for principal, and Fred Cody and Miss Effic Sands as assistants, for the coming vear.

Robbed an Old Man. A dispatch from Chicago says: E. D. Thayer, the aged president of the National bank of Brandon, Vt., after transacting some business in Omaha, left that place for Chicago on Friday with a small hand satchel containing \$40,000 in notes and mortgages. While he was in the dining car en route the bag disappeared and he has been unable to get any trace of it since.

Forest fires are raging throughout the state of Maine. A large quantity of valuable timber has been destroyed and many cities are enveloped in smoke.

HAYTIAN HORRORS.

Insurgents Captured and Shot Dead Without a Trial.

A dispatch from Port Au Prince gives the following particulars of the massacre at Hayti: The massacre of St. Bartholomew sinks into insignificance beside the scenes enacted here in the last few days. For the last two or three weeks there have been rumors that a revolution against Hippolyte was imminent in this capital and these having reached the ears of the chief executive, he caused the arrest of about eighty suspected persons, dragged from their who hearing he was wanted, hid himself. was vetoed, has been reported back to the Failing to secure the general himself, his house, without recommendation, by the wife was taken and thrown into prison. The The outbreak of the rebels occurred on Thursday, May 28. While President Hippolyte was attending church, a former coinct minister, at the head of 80 followers, all well armed, stormed the prison and released two hundred political prisoners. The released prisoners were provided with arms, and when Hippolyte's troops arrived on the scene there was a bloody battle. Hippolyte, fearing that he would be shot down by some of the rebels if he appeared on the street, remained in the church all day guarded by soldiers. He called out the reserve militia in improvement bonds and a similar bill and the rebels were soon routed. The leader of the rebels, the former cabinet minister, was captured and shot at once, By night of Thursday forty rebels had been captured and put to death. Others were captured and shot on Friday, Saturday and Sunday. Every man suspected of being in sympathy with the insurgents was put to death without trial as soon as captured. Most of the 200 prisoners released from jail by the insurgents were recaptured and shot.

An Italian Earthquake. A recent dispatch from Rome says: Badia Calavena and Tregenanzo, in northmatter by expelling the correspondent from the floor of the house for the rest of Monday. The inhabitants are terrorstricken and they have taken to the fields for safety. The authorities have, as far as possible, sought to alleviate the distress among the people and have furnished a large number of tents to shelter those who have fled from their homes. The subterranean rumblings continue and occasionally slighter shocks than those of Monday are felt. The people are in dread of momentarily seeing the earth opening and swallow ing them. The damage done at these two places is much greater than was indicated in the first reports. The towns were prac-tically destroyed by the severity of the shocks. A commission appointed by the Michigan soldiers enlisting under the call authorities to examine the houses which of February 1, 1864, was passed on third were not thrown down by the undulations of the earth have made hasty investigation made to conform to the late decision of the and they report that at least three-quarters of the houses are in such a condition that public safety domands that they be pulled down entirely. Large bodies of troops have been dispatched to these places to assist the authorities in clearing the streets of debris, in tearing down dangerous houses and to render such other assistance as they may be called upon to give.

Lived a Double Life.

J. L. Campion, who for several years has been cashier of the Consolidated tank line company at Omaha, Neb., was arrested Monday night by Inspector Bow-man of the New York Fidelity surety company. Campion's peculations exceed \$5,000 and cover a long period. He kept two sets of books, one for the company and the other in a secret drawer for himself. In the latter he kept a record of his man-of-war in commission with a crew stealing. Campion was superintendent of composed of only ten men is that presentcent absence of the pastor had charge of the services. His stealings have been known for some time, but he was spared arrest on account of his family, he having sons and daughters married here. pastor, too, interceded for him, but on Monday the preacher went to Inspector Bowman and asked to withdraw his plea for Campion, saying the latter was a thief before he came to Omaha. Campion was on the point of committing suicide when taken.

MEN AND THINGS.

The British parliament will be prorogued early in August. Col. Lebel, who invented the rifle of that name, is dead.

The Minnesota department of the G. A. R. is encamped at St. Cloud.

Work was resumed in all the lumber vards in New York this week.

Forest fires destroyed about 40 houses near Sherbrooke, Que., Sunday.

It is claimed that 25,000 cattle are grazing on the forbidden Cherokee strip. John Dillion of Bradford, Pa., was killed

by an explosion of dynamite Monday. The mill of Blackman Bros., at Snowwich, Wash, burned Tuesday. Loss \$100, 000.

Louis Grauman & Co., boots and shoe dealers at Louisville, Ky., failed Tuesday for \$50,000. The London, Ont., city council has

refused a grant of \$200 to the workingmen's free library. A hat trimming case involving \$30,000,-

000, is on trial in the United States circuit court at Philadelphia. P. H. Mayo & Co.'s tobacco factory at Richmond, Va., was damaged \$75,000

worth by fire Tuesday. At Denver Tuesday John C. Jones killed T. J. Strawn because the latter was

walking with Mrs. Jones. The Arkansas river is on the rampage and it is feared the cotton crop along its banks will be greatly damaged.

Bernard Glandi has been found guilty of offering a \$500 bribe to a tales juror in the Hennessey case at New Orleans. Dr. Briggs is anxious for a trial, but the

committee of the New York presbytery to arrange for the trial asks for more time. C. N. Cook, the Chicago man charged with wrecking banks at Juneau and Hartford, Wis., has been held in \$50,000 bonds.

Prof. S. W. Williston, of Lawrence, Kas., has just found a skeleton of a pteradactyl with a skull three feet in length in Gove county, Kas. It has just been ascertained that Ronca-

dor island, in the Caribbean sea, heretofore

claimed by the state of Columbia, is a United States possession. At Sacramento, Cal., Monday Mamie Frates refused to marry her cousin, John Peery, so John shot and fatally wounded

her and then killed himself. Two war ships of the congressiona party attempted to bombard Pisagur, Chili, at long range Monday but withdrew without doing any damage.

FOR FREE COINAGE.

A LEADING SILVER MAN TALKS ABOUT THE PROSPECTS.

Boston's Latest Fad, the Breeding of Cats.—Exhibiting the Felines in Competition.

Free Silver. A Washington special says: The meeting of the free coinage silver committee, which was to have been held in Washington on the 18th inst., will take place on the same date at the Hoffman house in New York instead. They will take up the work of the promotion of free coinage where they left it at their last meeting. The proposition for a compromise on the coinage on the products of the American mines is not regarded favorably by the committee, and they say they will have nothing but free coinage in the fullest sense of the term and claim to have enough votes to carry it through the next congress. Senator Stewart said to a reporter that he was confident that a free coinage bill could be passed through the next congress over the President's veto. course, he says, there can be no doubt about a two-thirds vote for free coinage in the house, and in the senate it has been shown that there is a majority. The question is what will the senate do in case of a veto? If all the democrats in the senate will vote to pass the bill over the president's veto, Mr. Stewart says there will be no trouble about the matter.

The republican votes in the senate Mr. Stewart counts on as sure for free coinage are: Two from California, one from Oregon, one from Washington, two from Idaho, two from Montana, two from Nevada, two from Colorado, one from Wyoming, two from South Dakota, one from North Dakota, two from Kansas, two from Nebraska and one from Pennsylvania. Collum, Stockbridge and Davis he regards as doubtful. The votes counted as sure would give free coinage 60 votes if the democrats voted solidly for free coinage as policy might induce them to do. Fifty-nine votes is enough to carry the bill over the veto. The only senators on the democratic side whom Mr. Stewart regards as doubtful are Gray, McPherson and Vilas.

The Boston cat breeders' association is the latest addition to the almost countless number of clubs and associations and institutions which have their headquarters in Boston. It is not really a charitable institution, yet its aims and purposes are most praiseworthy. An exhibition of the new association has been open in a small had at 131 Tremont street the past few days, and the crush has been so great some of the time that it has been necessary to close the doors until those inside were willing to make room for others. Naturally the

CANADA'S NEW PREMIER.

Hon. J. C. C. Abbott Called Upon to Form a Ministry.

The governor-general of Canada has called upon Hon. J. J. C. Abbott, leader of the conservatives in the dominion senate, to form a ministry. The government will be carried on on the old lines until after the session, when the reconstruction takes place. As far as can be seen all the recent colleagues of Sir John Macdonald have been invited to join Mr. Abbott's ministry. It is definitely known that already Sir Hector Langevin, Sir John Thompson, Hon. George E. Foster and Hon. McKenzie Bowell have accepted. If any trouble occurs it will come from Hon. J. A. Chapleau, who asserts that he regards Sir John Thompson as the best qualified under the circumstances for the premiership. Mr. Abbott has cabled to London ordering his broker to sell his stock in the Canadian Pacific. President Van Horn has also received Mr. Abbott's resignation as director of the company. Sir John Thompson, it is understood, was asked by the governorgeneral to form a ministry, but he de-clined, owing to the opposition of two of his French colleagues and the ultra-protestants of Ontario.

Cabmen's Strike in London. Hardly a single omnibus of the 875 vehicles belonging to the London General Omnibus Company is running, and it is estimated that about 5,000 men and 10,000 horses are thrown into a state of idleness through the strike which commenced The amount of inconvenience which the workingmen and business men of London are thus put to can be readily imaginal when it is understood that tens of thousands of people depend upon the omnibuses to convey them to their work. The Road Car Company came to a decision Monday to offer 12 hours' work per day from July 13, drivers to be paid six shillings per day, and after a year's service six shillings and six pence per day, and conductors to receive four shillings and six pence per day, and after a year's service five shillings per day. If these terms are not accepted a lockout is certain.

Train Wrecked in Kansas. The most disastrous wreck that ever occurred on the Missouri, Kansas and Texas took place Monday between Savannah and Frink, near Parsons, Ks. Three men were burned to a crisp and six injured, some of them, it is thought fatally. The two engines were totally demolished and the wreck took fire and 30 cars were burned. The two freight trains were ordered to pass at Frink. One of them arrived at the station ahead of the other and the engineer seeing a train on the sidetrack, supposed it was the train he had orders to pass, and did not stop for orders.
One of the men burned to death was a head brakeman and the other two were unknown. The brakeman could only be identified by the finding of a switch key on his body.

Barnum's Estate.

The appraisers appointed to inventory the estate of the late P. T. Barnum at Bridgeport, Conn., have completed their work and filed the result with the probate court. Following is the total: Personal property, \$1,283,599; real estate, \$2,993,-933; grand total, \$4,279,532.

Three German war ships have sailed from San Francisco for Chili.

NEW YORK, June 15.—R. G. Dun & Co.'s review of trade says: Very rarely has such a strain been put upon productive industry and legitimate business as by the enormous experts of gold in May. It is a most significant fact that after this sovere test the state of trade is better for the season and more hopeful than it was in April, when the great movement of gold had not begun. Within thirty days the largest crop of wheat ever grown, it is probable, will be moving to the market. The government report and other information put down the price 3½c last week, while the official report was not so favorable regarding oats, the price dropped 2c though corn rose nearly 1½c. The business failures occurring throughout the country during the last seven days were 244, as compared with 247 last week. For the corresponding week of last year the figures were 212.

NAUTICAL OXEN.

Among his neighbors Job Haines was considered a pretty fair sort of a man. He had settled in the southern part of Kansas, where he lived as an immigrant from New Hampshire, and he brought his Yankee sharpness with him, but as he dealt fair and attended to his own business, he passed. The only member of the family beside Job and his wife was Ike, a nephew whom Job had taken to bring up, as he had no children of his own. Ike was a typical New England boy about fifteen years old. He had been brought up in one of the coast villages of Maine, and had a great love for the sea.

Job, like the majority of Yankee farmers, was a firm believer in cattle, and did most of his work with oxen, One day he said to Ike: "Ike, if you'll take that pair of yearling steers and break them to work you can have them.'

In his Western home Ike never forgot the far-off ocean. It had been the one hope of his life to be a sailor, but his being sent West had destroyed it. When his uncle gave him the steers to break, the idea came to him that though he could never expect to tread the deck of his own ship, he could use ship phrases in the education of his oxen, and thus always be reminded of his old home beside the sea. Tims it was that Jack and Billy were educated to work, "broken" totally ignorant of ity that Job turned a shade or two the usual commands by which oxen are | paler. managed. "Gee" and "haw," "git up" and "whoa" had no meaning for them whatever. It was "haul away" and "port," add "starboard" and "belay." "Stern all" was back. The oxen grew and waxed strong, and his uncle often remarked that he never saw a team that could do more work than those oxen and Ike. No one but Ike ever thought of handling them.

The nearest neighbor to the Haines' was Deacon Merwin, a good man and pillar of the church. The good deacon saw that Ike's yoke of oxen were good workers, and a desire came over him to possess them. He offered to buy them several times, but Job always said that they belonged to Ike and were not for sale. The deacon asked Ike if he would call them but mot with such an indignant refusal that he felt angered, but did not give up the idea of possessing the cattle. Finally he went to Job and said:

"Neighbor Haines, if them cattle 'll work good every way, I'll give you too much property for a boy like Ike to have, and it is apt to create in him a bad sperrit and makes him feel above his elders."

"Well, I don't know, deacon. The boy sets a deal by them cattle, and a promise is a promise. I gave them to him if he would break em, and he has, so I'm bound to keep my part." "That's all true enough, Neighbor Haines, but Ike's only a boy; and then remember, two hundred dollars ain't offered evey day for a yoke of cattle. Why not sell me these and give him another pair to break; that 'ud do jist as well."

The deacon's two hundred dollars and persuasions finally weakened Job's scruples and he gave in. The deacon was to try them, and if they worked all right was to have them. How to tell Ike what he had done was a poser to his uncle. His aunt declared it a downright mean piece of business, and told Job plainly what she thought of him. It was finally decided not to say anything to Ike until after the sale had been made and the cattle gone. In order that Ike might not be on hand to see his pets sold, he was given a holiday and sent to spend the day at a neighbor's a couple of miles away, where there was a boy of his age who was a sort of a chum of his.

The next morning Ike was off bright and early, and the deacon was on hand shortly after. It would not be fair to Job to say that he did not have any misgivings. He would have backed out of the bargain at the least chance, and he really hoped that the deacon would not be satisfied with them. The oxen were brought out and voked to the cart without difficulty, though the deacon remarked that they did seem "kinder stoopid." Job and the deacon climbed up into the cart.

The oxen turned their eyes around inquiringly. "Gee up, there!" repeated Job; but they did not move a hoof. "That don't appear like good break-

ing," remarked the deacon. "They're both all right," replied Job. "Come, gee up, there!" at the same time he gave each a prod with the goad. In response to the prodding of cattle walked off toward the open gate, in which direction their heads happened to be turned. Job did not want them to go in the road, so he shouted out, "Hoy! hoy!" to turn them around; but the oxen had no idea what "hoy" meant, and so kept going straight ahead. Job shouted louder and struck Billy with the goad. They quickened their gait into a trot and turned out into the road. Then Job shout, "Whoa! whoa!" but they did not mind that, either.

"They don't appear to be as well broken as I reckoned on," remarked the deacon, as he stood in the cart and viewed the proceedings.

"They're broke well enough," replied Job, rather nettled, "but I'm strange to them; nobody but Ike ever drove them."

"Well, turn them about," said the deacon. But they paid no heed on any command, and finally, exasperated, Job struck them both with the goad, and they started at full run down the road. Clatterty bang! the cart went, and both Job and the deacon were compelled to hold on the cart-stakes to prevent being bounced out of the cart. "Stop 'em! Stop 'em!" shouted the deacon. "I want to get out." "Whoa! whoa! whoa! ye varmints!" But the oxen only tossed their horns and ran

the faster. "Stop 'em, can't ye?" Job was downright mad by this time. "Stop 'em yourself, you old fool!" snapped he, "you know as much how to stop 'em as I do."

"We'll be chucked out and killed!" shouted the deacon, as the cart banged over a stone.

The oxen were now thoroughly frightened and running away for fair, and both men were badly scared and holding on for dear life. All at once an idea struck Job.

"Say, deacon, can't you talk some sea talk to 'em? That's what I've allers heard Ike talk to 'em," he called out as the cart bumped along.

"Brother Haines, such sea talk as I've heard ain't proper fer a pillar of the church to repeat, and I'll call meetin' on you fer this if we git out alive" replied the deacon, with as much dignity as he could assume while holding to the stake.

"Do try, deacon!" shouted the terrified Job; "it may save our lives." Just then the cart gave a fearful lurch and the deacon banged his head against the stake he was holding to with considerable force. This made him boiling mad in addition to his fear. "Jump aloft!" he shouted, "Splice the main brace! Shiver my timbers! Pipe all hands to grog!" and then as that had no effect on the frantic team, "Boat ahoy!" and then losing all control of himself, "Ahoy! Ahoy! drat ye, ye blankety blank brutes!" and the deacon let out such a string of profan-

While this was going on the oxen had gotten over considerable ground. The people along the road gaped in open-mouthed astonishment to see two such staid citizens going along so furiously with an ox team, and were terribly scandalized at their apparent hilarity.

Ike, totally unconscious of what was going on at home, was plodding along toward his chum's when he heard a fearful clatter coming behind him. He turned, and could hardly believe his eyes. There came his pets Jack and Billy at a furious pace, and his

uncle and the deacon in the cart. "Stop 'em, Ike! stop 'em!" shouted his uncle, when he saw Ike.

Ike stepped to one side of the road, dashed up called out, "Belay, Jack! Belay, Billy!" At the sound of the familiar voice and command they stopped at once and went quietly up to their young master.

'I'll have the law of you for this, Job Haines," snarled the deacon, as two hundred dollars for 'em. They're he painfully descended from the cart. "And I'll call church on you!" retorted job, as he rubbed his bruises. I won't belong to any church with a man that kin swear like you kin. A purty deacon, you be!"

"If I had a brat like that I'd skin him alive roared the deacon, as he glared at the bewildered Ike.

"Isaac, take them cattle home at once," said his uncle. "As for this wicked man here I shall never notice him again."

Ike took the cattle home. His uncle walked. His aunt told him about the contemplated sale, and though he exessed commiseration for his uncle it is doubtful if he felt any. His aunt said it served them just right. Ike kept his oxen.

Keep Moving. I dislike to hear that a man has retired from business, says Rev. Myron W. Reed, unless I hear at the same time that he has taken to travel or something that will keep body and mind on the move. Never wait for Death, simply be ready for him. "Occupy till I come," says the Lord. I am an eight hour man. No more, and no less. Make it compulsory upon men and women, and at once we will have a happier world. Did you ever hear a stone cutter enquire, "Is life worth living?" His wages are enough, his apppetite is good, his sleep is sweet. The question "Is life worth living?" is only asked by two one an overworked toiler and the other some idler, some prince of Denmark with nothing to do. If he had worked himself tired and gone to sleep he would have seen no ghost. But he prowled around at midnight and made himself and others a great deal of trouble. I read with delight "The Cotter's Saturday Night." It is a picture of rest and content. The children are all at home. That Saturday night has been preceded by six days of solid work; otherwise those children would all want to go some-

Mind Killing.

A Wiscasset, Me., man discovered a big gash in his boot where he had cut his foot while in the woods and just managed to get home, feeling himself growing fainter from loss of blood all the way, when somebody discovered that the gash only went through his boot and the red color was not blood, but only a woolen stocking.

The Price Varies.

If the devil didn't offer very big wages to begin with he would have a hard time in getting his work done.-Ram's horn.

BY HUGH CONWAY.

PART L

TOLD BY PHILIP BRAND, M. D., LONDON.

CHAPTER IV. CONTINUED. Then, with the liberty a close friend may take, I drew toward me a portfolio, full, I presumed, of sketches of surrounding scenery. To my surprise Carriston jumped up hastily and snatched it from me. "They are too bad to look at," he said. As I struggled to regain possession, sundry strings broke, and, lo and behold! the floor was littered, not with delineations of rock, lake, and torrent, but with images of the young girl 1 had seen a few minutes before. Full face, profile, threequarter face, five, even seven-eighth face, all were thore—each study perfectly executed by Carriston's clever pencil. I threw myself into a chair and laughed aloud, whilst the young man, blushing and discomforted, quickly huddled the portraits between the covers, just as a genuine Scotch lassie bore in the plentiful and, to me, very welcome break-

Carriston did favor me with his company during the whole of that day, but, in spite of my having come to Scotland to enjoy his society, that day, from easily-guessed reasons. was the only one in which I had undisputed

possession of my friend. Of course I bantered him a great deal on the portfolio episode. He took it in good part, attempting little or no defense. Indeed, before night he had told me with all a boy's fervor how he had loved Madeline Rowan at first sight, how in the short space of time which had elapsed since that meeting he had wooed her and won her; how good and beautiful she was; how he worshiped her; how happy he felt; how, when I went south, he should accompany me, and, after making all necessary arrangements, return at once and bear his bride away.

I could only listen to him, and congratulate him. It was not my place to act the elder, and advise him either for or against the marriage. Carriston had only himself to please, and if he made a rash step only himself to blame for the consequences. And why should I have dissuaded?—1, who in two

days envied the boy's good fortune. I saw a great deal of Madeline Rowan. How strange and out-of-place her name and face seemed amid our surroundings. If at first somewhat shy and retiring, she soon, if only for Carriston's sake, consented to look upon me as a friend, and talked to me freely and unreservedly. Then 1 found that her nature was as sweet as her face. Such a con-quest did she make of me that, save for one chimerical reason, I should have felt quite certain that Carriston had chosen well, and would be happy in wedding the girl of his choice, heedless of her humble position in the world, and absence of fitting wealth. When once his wife, I felt sure that if he cared for her to win social success, her looks and bearing would insure it, and from the great improvement which, as I have already said, I noticed in his health and spirits, I believed that his marriage would make his life longer, happier, and better.

Now for my objection, which seems almost a laughable one. I objected on the score of the extraordinary resemblance which, so far as a man may resemble a woman, existed between Charles Carriston and Madeline Rowan. The more I saw them together, the more I was struck by it. A stranger might well have taken them for twin brother and sister. The same delicate features, drawn in the same lines; the same soft, dark, dreamy eyes; even the same shaped heads. Comparing the two, it needed no phrenologist or physiogno mist to tell you that where one excelled the other excelled; where one failed, the other was wanting. Now, could I have selected a wife for my friend, I would have chosen one with habits and constitution entirely different from his own. She should have been a bright, bustling woman, with lots of energy and common sense-one who would have rattled him about and kept him going-not a lovely, dark-eyed, dreamy girl, who could for hours at a stretch make herself supremely happy if only sitting at her lover's feet and speaking no word. Yet they were a handsome couple, and never have I seen two people so utterly devoted to each other as those two seemed to be during those autumn days which I spent with them.

I soon had a clear proof of the closeness of their mental resemblance. One evening, Carriston, Madeline, and I were sitting out of doors, watching the gray mist deepening in the valley at our feet. Two of the party were, of course, hand in hand, the third seated at a discreet distance-not so far away as to preclude conversation, but far enough off to be able to pretend that he saw and heard only what was intended for his eyes and

How certain topics, which I would have avoided discussing with Carriston, were started I hardly remember. Probably some strange tale had been passed down from wilder and even more solitary regions than ours-some ridiculous tale of Highland superstition, no doubt embellished and augmented by each one who repeated it to his fellows. From her awed talk I soon found that Madeline Rowan, perhaps by reason of the Scotch blood in her veins, was as firm a believer in things visionary and beyond nature as ever Charles Carriston in his silliest moments could be. As soon as I could I stopped the talk, and the next day, finding the girl for a few minutes alone, told her plainly that subjects of this kind should be kept as far as possible from her future husband's thoughts. She promised obedience, with dreamy eyes which looked as far away and full of visions

as Carriston's. "By the bye," I said, "has he ever spoken to you about seeing strafige things?

"Yes; he has hinted at it." "And you believe him?"

"Of course I do-he told me so." This was unanswerable. "A pretty pair they will make," I muttered, as Madeline slipped from me to welcome her lover, who was approaching. "They will see ghosts in every corner, and goblins behind every cur-

Nevertheless, the young people had no doubts about their coming bliss. Everything was going smoothly and pleasantly for them. Carriston had at once spoken to Madeline's aunt, and obtained the old Scotchwoman's ready consent to their union. I was rather vexed at his still keeping to his absurd whim, and concealing his true name. He said he was afraid of alarming his aunt by telling her he was passing under an alias, whilst if he gave Madeline his true reason for so doing she would be miserable. Moreover, I found he had formed the romantic plan of marry-ing her without telling her in what an enviable position she would be placed, so far as worldly gear went. A kind of Lord of Burleigh surprise no doubt commended itself to

his imaginative brain. The last day of my holiday came. I bade a long and sad farewell to lake and mountain, and, accompanied by Carriston, started for home. I did not see the parting proper between the young people—that was far too sacred a thing to be intruded upon-but even when that protracted affair was over. I waited many, many minutes whilst Carriston stood hand in hand with Madeline, comfort-

ing himself and her by reiterating "Only six weeks-six short weeks! And then-and then!" It was the girl who at last tore herself away, and then Carriston mounted re-

luctantly by my side on the rough vehicle.

From Edinburgh we traveled by the night train. The greater part of the way we had the compartment to ourselves. Carriston, as a lover will, talked of nothing but coming bliss and his plans for the future. After a while I grew quite weary of the monotony of the subject, and at last dozed off, and for some little time slept. The shrill whistle which told us a tunnel was at hand aroused me. My companion was sitting opposite to me, and as I glanced across at him my attention was arrested by the same strange in-tense look which I had on a previous occasion at Bettws-y-Coed noticed in his eyesthe same fixed stare—the same obliviousness to all that was passing. Remembering his request, I shook him, somewhat roughly, back to his senses. He regarded me for a moment vacantly, then said:
"Now I have found out what was wanting

to make the power I told you of complete. I could see her if I wished.'

"Of course you can see her-in your mind's eye. All lovers can do that."
"If I tried I could see her bodily—know exactly what she is doing." He spoke with All lovers can do that."

an air of complete conviction. "Then I hope, for the sake of modesty, you won't try. It is now nearly three o'clock.

She ought to be in bed and asleep.' I spoke lightly, thinking it better to try and laugh him out of his folly. He took no notice of my sorry joke. "No," he said, quietly, "I am not going to

try. But I know now what was wanting. Love-such love as mine-such love as hersmakes the connecting link, and enables sight or some other sense to cross over space, and pass through every material obstacle.

"Look here, Carriston," I said seriously, "you are talking as a madman talks. I don't want to frighten you, but I am bound both as a doctor and your sincere friend to tell you that unless you cure yourself of these absurd delusions they will grow upon you, develop fresh forms, and you will probably end your days under restraint. Ask any doctor, he will tell you the same."

"Doctors are a clever race," answered my strange young friend, "but they don't know everything.

So saying he closed his eyes and appeared to sleep.

We parted upon reaching London. Many kind words and wishes passed between us, and I gave him some more well-meant, and, I believed, needed warnings. He was going down to see his uncle, the baronet. Then he had some matters to arrange with his lawyers, and above all, had to select a residence for himself and his wife. He would, no doubt, be in London for a short time. If possible he would come and see me. Anyway, he would write and let me know the exact date of his approaching marriage. If I could manage to come to it, so much the better. If not, he would try, as they passed through town, to bring his bride to pay me a flying and friendly visit. He left me in the best of spirits, and I went back to my patients and worked hard to make up lost ground, and counteract whatever errors had been committed by my substitute.

Some six weeks afterward—late at night—

whilst I was deep in a new and clever treatise on zymotics, a man, haggard, wild, unshorn, and unkempt, rushed past my startled servant, and entered the room in which I sat, He threw himself into a chair, and I was horrified to recognize in the intruder my clever and brilliant friend, Charles Carriston!

"The end has come sooner than I expected." These were the sad words I muttered to myself as, waving my frightened servant away I closed the door, and stood alone with the supposed maniac. He rose and wrung my hand, then without a word sank back into his chair and buried his face in his hands. A sort of nervous trembling seemed to run through his frame. Deeply distressed I drew

his hands from his face,
"Now, Carriston," I said, as firmly as I could, "look up, and tell me what all this means. Look up, I say, man, and speak to

He raised his eyes to mine, and kept them there, whilst a ghastly smile—a phantom hu-mor—flickered across his white face. No doubt his native quickness told him what I suspected, so he looked me full and steadily in the face. "No," he said, "not as you think. But let

there be no mistake. Question me. Talk to me. Put me to any test. Satisfy yourself, once for all, that I am as sane as you are." He spoke so rationally, his eyes met mine

so unflinchingly, that I was rejoiced to know that my fears were as yet ungrounded There was grief, excitement, want of rest in his appearance, but his general manner told me he was, as he said, as sane as I was. "Thank Heaven you can speak to me and

look at me like this," I exclaimed.
"You are satisfied then?" he said. "On this point, yes. Now tell me what is

wrong?" Now that he had set my doubts at rest his agitation and excitement seemed to return. He grasped my hand convulsively.
"Madeline?" he whispered. "Madeline

my love-she is gone." 'Gone!" I repeated. "Gone where?"

"She is gone, I say-stolen from me by some black-hearted traitor-perhaps forever.

"But, Carriston, surely in so short a time her love cannot have been won by another. If "What!" he shouted. "You have seen her! You in your wildest dreams to imagine

that Madeline Rowan would leave me of her own free will! No, sir, she has been stolen from me-entrapped-carried away-hidden. But I will find her, or I will kill the blackhearted villain who has done this." He rose and paced the room. His face was

distorted with rage. He clinched and unclinched his long slender hands.

"My dear fellow," I said; "you are talking riddles. Sit down and tell me calmly what has happened. But, first of all, as you look utterly worn out, I will ring for my man to get you some food,"

"No," he said, "I want nothing. Weary I am, for I have been to Scotland and back as fast as man can travel. I reached London a short time ago, and after seeing one man have come straight to you, my only friend, for help—it may be for protection. But I have eaten and I have drunk, knowing I must keep my health and strength."

However, I insisted on some wine being brought. He drank a glass, and then with a strange enforced calm, told me what had taken place. His tale was this:

After we had parted company on our return from Scotland, Carriston went down to the family seat in Oxfordshire, and informed his uncle of the impending change in his life. The baronet, an extremely old man, infirm and all but childish, troubled little about the matter. Every acre of his large property was strictly entailed, so his pleasure or displeasure could make but little alteration in his nephew's prospects. Still, he was the head of the family, and Carriston was in duty bound to make the important news known to him. The young man made no secret of his approaching marriage, so in a very short time every member of the family was aware that the heir and future head was about to ally himself to a nobody. Knowing nothing of Madeline Rowan's rare beauty and sweet nature, Carriston's kinsmen and kinswomen were sparing with their congratulations. Indeed, Mr. Ralph Carriston, the cousin whose name was coupled with such absurd suspicions, went so far as to write a bitter, sarcastic letter, full of ironical felicitations. This, and Charles Carriston's haughty reply, did not make the affection between the cousins any stronger. Moreover, shortly afterward the younger man heard that inquiries were being made in the neighborhood of Madeline's home, as to her position and parentage. Feeling sure that only his cousin Ralph could have had the curiosity to institute such inquiries, he wrote and thanked him for the keen interest he was manifesting in his future welfare, but begged that hereafter Mr. Carriston would apply to him direct for any information he wanted. The two men were

now no longer on speaking terms. Charles Carriston in his present frame of mind cared little whether his relatives wished to bless or forbid the banns. He was passionately in love, and at once set about making arrangements for a speedy marriage. Although Madeline was still ignorant of the exalted position held by her lover-although she came to him absolutely penniless—he was resolved in the matter of money to treat her as generously as he would have treated the most eligible damsel in the country. There were several legal questions to be set at rest concerning certain property he wished to settle upon her. This of course caused delay. As soon as they were adjusted to his own, or rather to his lawyer's satisfaction, he purposed going to Scotland and carrying away his beautiful bride. In the meantime he cast

about for a residence. Somewhat Bohemian in his nature. Carriston had no intention of settling down just yet to live the life of an ordinary moneyed. En glishman. His intention was to take Madeline abroad for some months. He had fixed upon Cannes as a desirable place at which to winter, but having grown somewhat tired of hotel life wished to rent a furnished house. He had received from an agent to whom he had been advised to apply the refusal of a house which, from the glowing description given, seemed the one above all others he wanted. As an early decision was insisted upon my impulsive young friend thought nothing of crossing the Channel and running down to the south of France to see, with his own eyes, that the much-lauded place was worthy of the fair being who was to be its temporary mistress.

He wrote to Madeline, and told her he was going from home for a few days. He said he should be traveling the greater part of the time, so it would be no use of her writing to him until his return. He did not reveal the object of his journey. Were Madeline to know it was to choose a winter residence at Cannes, she would be filled with amazement, and the innocent deception he was still keeping up would not be carried through to the romantic end which he pictured to himself.

The day before he started for France Madeline wrote that her aunt was very unwell, but said nothing as to her malady causing any alarm. Perhaps Carriston thought less about the old Scotch widow than her relationship and kindness to Miss Rowan merited. He started on his travels without any forebodings of evil. His journey to Cannes and back was hur-

ried-he wasted no time on the road, but was delayed for two days at the place itself be-fore he could make final arrangements with the owner and the present occupier of the house. Thinking he was going to start every moment he did not write to Madeline-at the rate at which he meant to return a letter posted in England would reach her almost as quickly as if posted at Cannes. He reached his home, which for the last

few weeks had been Oxford, and found two letters waiting for him. The first, dated on the day he left England, was from Madeline. It told him that her aunt's illness had suddenly taken a fatal turn-that she had died that day, almost without warning. The second letter was anonymous.

advised Mr. Carr to look sharply after his lady-love or he would find himself left in the lurch. The writer would not be surprised to hear some fine day that she had eloped with a certain gentleman who should be nameless. This precious epistle, probably an emanation of feminine spite, Carriston treated as it deserved-he tore it up and threw the pieces to

[To be Continued.]

One Way to Steal Diamonds.

It is natural that articles of great value are objects of temptation. are prepared to understand that the common thief is constantly scheming to gain possession of precious stones and jewelry, but it is a matter of surprise to learn, through stories that come from across the ocean, of the tricks indulged in there by the diamond trade-the legitimate, everyday dealers in precious stones. The pecu-liarity of this condition of things is that the sharp practice of dealers does not involve their reputation or standing, the thing being looked at as a matter of shrewdness and rather admired as a clever piece of business. An anecdote is related to illustrate this:

A dealer called upon a firm with whom he was in the habit of transacting business and asked to see a lot of diamonds. After examining them for some time he returned the paper, saying he would call again in reference to buying them. It was at once noticed that a large stone was missing. A hasty search was made, but no trace of the diamond being discovered, the dealer, without more ado, was accused of having taken the brilliant.

The stone was not found, and profuse apologies were offered for the false ac-cusation. The following day the dealer appeared again, this time with a paper diamonds to sell, but also with another object in view, which he took good care not to disclose. A careful observer might have noticed that while the stones were being examined at the light he ran his fingers along the under surface of the portion of the counter near which he sat and picked off something that stuck to the wood. It was nothing more nor less than the diamond which had so mysteriously disappeared the day before. He had fastened it to the counter by means of a piece of wax with which he had provided himself, and on the occasion of his second visit secured his booty. -Jewelers' Weekly.

Curious Cause of Death.

A school-girl in France died recently from a curious cause. At the distri bution of prizes she obtained a laure wreath colored green. She thought-lessly put the painted leaves in her mouth and died afterward from the effect of the poison.

The 41,000,000 gallons of spirit made in the United Kingdom in 1889 were mostly used in England, and nearly three-fourths of this vast quantity was drank as a beverage.

Thousands of cases of female disease have been treated by Mrs. Pinkham, and every fact recorded. Those records are available to suffering women, private corespondence solici.ed.

Gen. John M. Corse, late postmaster at of general manager of the Flint & Pere Marquette railroad.

Pretty strong reasons for trying Dr. Sage's Catarrh Remedy. In the first place, it cures your catarrh no matter how bad your case, or of how long standing. It doesn't simply palliate - it cures. If you believe it, so much the better. There's nothing more to be said. You get it for 50 cents, from all druggists.

But perhaps you won't believe it. Then there's another reason for trying it. Show that you can't be cured, and you'll get \$500. It's a plain business offer. The makers of Dr. Sage's Remedy will pay you that amount if they can't cure you. They know It was written apparently by a woman, and divised Mr. Carr to look sharply after his wrong, you get the cash. If you're wrong, you're rid of catarrh.

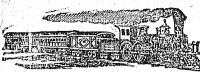

GOLD MEDAL, PARIS, 1879. W. BAKER & CO.'S Breakfast Cocoa from which the excess of oil Is absolutely pure and it is coluble. No Chemicals

are used in its preparation. It has more than three times the strength of Cocoa mixed with Starch, Arrowroot or Sugar, and is therefore far more economical, costing less than one centa cup. It is delicious, nourishing, strengthening, EASTLY DIGESTED, and admirably adapted for invalida as well as for persons in health.

A wail of distress comes from tortured clothes, Save their feelings, and your own back, by washing them with Pearline. Your clothes will last longer—your hours of labor will grow shorter. It takes away the dirt without taking away your strength. Nothing that "will wash" is toogoodfor Pearline-no praise is too strong for Pearline. Beware of imitations, 218 JAMES PYLE, N.Y.
