"In this age the business man that does not advertise is doomed. Every style of advertising pays, but the greatest results are acquired from utilizing the advertising columns of a properly conducted journal. An inch advertisement in a newspaper is worth a dozen on a fence. We never knew of but one case in which advertising did not pay. A burglar overlooked \$80 in a bureau drawer, and the paper so announced. He returned the next night and not only secured it, but a suit of clothes besides. Death and discontinuance of an advertisement are regarded as positive evidence of going out of business."

THE Red Cross society has completed a remarkable piece of work in the relief which it has conveyed to the stricken people of the Sea islands off the coast of South Carolina. It was in September last that the islands were devastated and thousands of people left homeless and helpless. The general work of relieving the distress was intrusted to the Red Cross society, which, by reason of its experience and equipment, was admirably prepared to perform it. During all the intervening months its agents have been paring for those in need of assistance and distributing the bounty which generous-minded people provided for the suffering.

THE morphine habit among women in London is asserted by medical men to be greatly on the increase. and those who choose to regard it as a penalty inflicted on the British people by Providence for its agency in forcing the poisonous drug upon the Chinese for commercial reasons thereby inflicting on them untold injury and misery, may find it a good subject to moralize upon, though the two things have no necessary logical connection. The use of the drug among London women is probably no greater in ratio than elsewhere in large aggregates of population; but physicians write in testimony that it is more prevalent than most people suppose, and that it is increasing.

But I have to tell you that Christ's life and Christ's death were the outlay of this beautiful garden of the church of which my text speaks. Oh, how many sighs, and tears, and

The homeliest taste will dictate something, if dahlia, or daffodil, or coreopsis; but if there be larger means, then you will find the Mexican cactus and darkveined arbutelion, and blazing azalea, and clustering oleander. Well, now, Christ comes to his garden, and he conspicuous, but sweet in heaven. You have to search for such spirits to find them. You do not see them very often, perhaps, but you find where they have been by the brightening face of the invalid, and the sprig of geranium on the stand, and the window curtains keeping out the glare of the sunlight They are, perhaps, more like the ranunculus, creeping sweetly along amid the thorns and briars of life, givshould like to know is why it has up ing kiss for sting, and many a man who has had in his way some great black rock of trouble, has found that amid the crevices These Christians in Christ's garden are not like the sun- me," he laid flower, gaudy in the light; but whenever darkness hovers over a soul that | ciation needs to be comforted, there they Christ's garden there are plants that may be better compared to the Mexican cactus—thorns without, loveliness within-men with sharp points of character. They wound almost every one that touches them. They are hard to handle. Men pronounce them nothing but thorns, but Christ loves them, notwithstanding all their sharpnesses. Many a man has had very only been through severe toil he has raised even the smallest crop of grace. A very harsh minister was talking with a very placid elder, and the placid elder said to the harsh minister: Doctor, I do wish you would control your temper." "Ah," said the minister to the elder, "I control more the fact that there are hundreds admits was exceedingly dishonest. five years." his behavior, loved Christ, and could not speak of sacred things without tears of emotion and affection. Thorns without, but sweetness within-the best specimen of Mexican cactus I ever saw.

There are others planted in Christ's garden who are always ardent, always radiant, always impressive-more like the roses of deep hue that we occasionally find called "giants of battle" -the Martin Luthers, St. Pauls, Chrysostoms, Wickliffes, Latimers and Samuel Rutherfords. What in other men is a spark, in them is a conflagration. When they sweat, they sweat great drops of blood. When they pray, their prayer takes life. When they preach, it is a Penticost. When they fight, it is a Thermopylee. When they die, it is a martyrdom. You find a great many roses in the gardens, but only a few 'giants of battle." Men say: "Why don't you have more of them in the church?" I say: "Why don't you have in the world more Napoleons, and Humboldts, and Wellingtons?" God gives to some ten talents, to another one. In this garden of the church, which

Christ has planted, I also find the snowdrops, beautiful but cold looking, seemingly another phase of the winter. I mean those Christians who are precise in their tastes, unimpassioned, pure as snowdrops and as cold. They never shed any tears, they never get excited, they never say anything rashly, they never do anything precipitately. Their pulse never flutters, their nerves never twitch, their indignation never boils over. They live longer than most people; but their life is in a minor key. They never run up to "C" above the staff. In the music of their life they have no staccato passages. Christ planted them in the church, and they must be of some service, or they would not be there; snowdrops, always snowdrops. But I have not told you of the most beautiful flower in all this garden spoken of in the text. If you see a 'century plant," your emotions are

started. You say: "Why, this flower has been a hundred years gathering up it, and he shall have it. Walter Scott, for one bloom, and it will be a hundred years more before other petals will come out." But I have to tell you of a plant that was gathering up from all eternity, and that nineteen hundred years ago put forth its bloom never to wither. It is the Passion Flower of the Cross! Prophets foretold it. Bethlehem shepherds looked upon it in the bud; the rocks shook at its bursting; and the dead got up in their winding-sheets to see its full bloom. It is a crimson flower-blood pangs, and agonies! Tell me, ye exeat the roots, blood on the branches, cutioners who lifted him and let him blood on all the leaves. Its perfume down! Tell me, ye sun that didst is to fill all the nations. Its touch is hide, ye rocks that fell! "Christ life. Its breath is heaven. Come, Oh loved the Church and gave himself for winds, from the north, and winds it." If then the garden of the church from the south, and winds from the belongs to Christ, certainly he has a east, and winds from the west, and right to walk in it. Come then, O bear to all the earth the sweet smelling

Some of them are violets, un2 | irg, healthful fruit-not posies, but apples. "Oh!" says somebody, "I don't see what your garden of the church has yielded." Where did your asylums come from? and your hospitals? and your institutions of mercy? Christ planted every one of them; he planted them in his garden. When Christ gave sight to Bartimeus, he laid the corner stone of every blind asylum that has ever been built. When Christ soothed the demoniac of Galilee he laid the corner stone of every lunatic asylum that has ever been established. When Christ said to the sick man: "Take up thy bed and walk!" he laid they have covered it all over with the corner stone of every hospital the flowering jasmine running in and out | world has ever seen. One line has attempted to overcome the difficulty by putting into service steambarges to convey Manchester freight alongside the steamer, which remains in the Mersey at Liverpool, but this is not much cheaper than the old system of shipping to Liverpool. It was an immense undertaking, and I would be sorry to see it fail, but I greatly fear for its future.

Kite-Flying in Burmah.

Mr. E. D. Cuming, author of "In the Shadow of the Pagoda," describes the Burmese as much given to kite-flying, an amusement they contrive to enjoy with a minimum of bodily exertion. Their method of operations is very simple. Says Mr. Cuming:

You pare down two twelve-inch slips of bamboo, tie them at their centers cross-wise, run a thread around the four tips and paste upon this frame one thickness of paper. 'Tie a nail or a small screw-nut to one corner and your kite is made.

The altitude that a well made kits of this kind will reach is wonderful, and the lightest breath of wind will take it up. A hundred and fifty or two hundred yards of strong sewing thread, wound on a skeleton reel of four came rattling up to the tavern four inches in diameter and eight inches in length, completes the equipment.

How Did She Do It?

It is vertain that a cat can come home in face of the most incredible difficulties. Thus, to take a recent instance, a cat was carried from a than the poorer, but of course fore town on the northeast coast of Fife to a country-house near Perth. It went in a basket by train to Leuchars, where it changed for Dundee, and at Dundles changed for Perth.

Next day, about seven in the morning, this cat was observed to run down the avenue of its new home with a purposeful air. On the third day it appeared at its old home. Now, how did that cat achieve its journey? Did it take a bee-line across country, and if so, how did it know its direction? Or d'a it run to Dundee, cross Tay

bridge, the railway bridge, and so along the line to Leuchars, negotiating the Eden at Guard Bridge? We can kardly suppose that it swam the Tay. Or did it go round by the head of Loch Tay, a long, rough journey by the Killin, where a cat might meet many dangers and temptations?

The perils of a cat on the road are every game-keeper has a gun for it, every boy is ready with a stone. Indeed, we never see a cat on its travels; no doubt it runs by night. There is the hypothesis that the cat came by train, changing at Dundee, and achieving the difficult manœuvre at Leuchars, wherein many men have failed. going back to Dundee or getting to Cupar, though not one of them was like him "that will to Cupar."

This method of transit which needs agile acuteness of reason in any man. may not be beyond the powers and intelligence of a cat. - Saturday Review.

It wasn't to be any trivial elopement a getting marired before the register in London, and going to Paris for a few weeks, but a run to Liverpool's a marriage there by special licens and a trip riving there they would cr. ' merica and gradually work their \$ 3 around the world and back to Low on in a and could easily afford this ad of a wedding tour. In olden times the parents of Tilly Markham would have been more anxious that their daughter should marry George Webley rather moral young man, Tom Bantry, But

times had changed, and it was the daughters that now looked for money with their lovers. The girl admitted to herself that she liked Tom Bantry best. but he certainly had treated her badly. They had had an appointment for a picnic up the river, but without a word Tom had gone away, and worse still, he had sent no explanation or excuse for his desertion. So Tilly thought she would teach him a life long lesson, and knowing well that her parents would oppose the match, and especially its hurried conclusion she told George Webley if he would arrange for the special license at Liverpool she would meet him at Euston station on the 27th. and together they would journey to the seaport town, be married and sail for America on the 28th in the powerful steamship Erratic. Tilly concluded it was better to be married in Liverpool than in London, as there would be less innumerable. Every dog chases it, chance of the escapade being found out until such time as they chose to disclose

it. Tilly agreed that they would write letters to all concerned while on the voyage from Liverpool to Queenstown and mail them when there would be nothing but the broad Atlantic between them and New York. Tilly met the postman on the steps

as she was going out of the house that morning, and he handed her a bundle of letters. She had no time to read them then, nor in the cab, for there was barely time to reach the station, where she found Mr. Webley impatiently awaiting her. He had strongely advised her to bring nothing with her. Whatever was required could be bought at Liverpool, he said:

"I was very much afraid we should miss the train," he said, as he hurried her out of the cab. "I have reserved a compartment." "There's another train, isn't there?"

she asked. "Oh, certainly, but a railway station isn't the pleasantest place in the world to wait, and since I left my hotel I seem to have met every friend I have in London, and all wanting to know where I am going."

"And of course you told them, said Tilly. The young man laughed as he held open the door of the railway carriage for her to enter. He quickly followed ship, as their fashion was. But Anna her, and a moment after the 10:10 a. m. —the gentle and timid Meg of later train slid out of the great station and began its notrhern journey. Tilly sat

in her corner by the window and carelessly turned over the letters in her hand. Most of them were from girl friends, but on the envelope of one of them she recognized the fine, bold hardwriting of Tom Bantry. She stole a sparing with Kossuth into the heroid furtive glance at Webley as she tore open the envelope, but he was absorbed in his morning paper now that his

Tilly Markham was a cautious young voman and always considered that a three in the bush. She looked at George Webley and he smiled across at her. "Where do we stop first?" she asked. "Willesden Junction, I believe, and

"Certainly, miss," and he was moving away when Tilly said: "I may have an answer to this when we reach Bletchley station. Will you see that I get it quickly?"

"Certainly, certainly, miss." Just as the train was leaving George Webley sprang into the compartment with the train book in his hand. Tilly opened it and found the number of stops the train made between London and Liverpool. When she reached the station she said:

"Oh, George, I wish you would get me a cup of ten. "I don't think there is a refreshment room here," he said dubiously, 'but I'll go and see.'

"If you have anything to tell me, now is the time to tell it. I do not know when I shall return to London. Then turning to the guard, she asked: "Where do we stop next?" "At Rugby, miss; 11:59."

She quickly wrote where to telegraph her, as she saw George approaching. She added hurriedly to the guard as she thrust her message into his hand: "Bring me the answer when we get

George swung himself into the compartment, saying: "Just as I thought, not a blessed thing to eat here, but we wait ten minutes at the next stop, and I may be able to get you anything you wish. I say," he added, "you're

not telegraphing to your friends about this, are you?"
"Oh, not about this," she replied quietly. "I am only sending some necessary telegrams, that is all."

"You know if you are in a hurry, he said, "we can send all the telegrams you want from Queenstown just as well as from here or Liverpool. "Oh, I know that," answered Tilly damurely. "I hope I know enough to

send messages only where they ought to go, so don't be afraid." George laughed, for he was a goodnatured fellow, and the train sped on towards Liverpool. When it slowed up at Rugby station Tilly leaned affection ately over toward the young man and

said: "Now, George, you go over to the refreshment room and eat all you have an appetite for. I don't think I care for enything until we reach Liverpool. "May I not bring you a cup of tea?"

asked George, anxiously. "Oh, certainly, certainly, if you bring it two minutes before the train is off. Another man might have thought this equest a rather singular one, but George had no brains to spare, else he would not have been on this silly cloping expedition, so he thought nothing of it, but jumped out as soon us the train came to a standstill. The guard soon came to the compart

ment with a telegram in his land. Tilly tore it open and read: "Utterly impossible to say what I wish to say to you. Tell me where you are staying at Liverpool and I will

leave by first train an 1 meet you Tilly, with a sniff of impatience, and rapidly wrote:
"I may sail to-morrow with some

friends for America. There is no chance of your seeing me if you do come; therefore, whatever you have to say to me say it now; it is your last chance. Telegraph me at -She looked inquiringly at the guard, who promptly answered: Creve. We reach there at 1:35."

She gave the guard a handful noney to pay for the extra wording of this dispatch. That good man was rapidly becoming rich. He sighed as he remembered that the next stop was the last before reaching Liverpool. He wished that he was on a train for Scotland with such a passenger aboard. "Here is your tea, my dear," said

George, as he came gingerly along with it in his hand. The girl drank it with many expressions of gratitude toward "Well, the next stop is Creve, and aftheir goat-skin sacks by diving to the

"So the guards tell me," replied Tilly, sweetly. At Creve the guard came to her with the final telegram. Its wording was terse and to the point. It ran "I love you. Will you be my wife?"

"Lend me another of those blanks?" she said to George. "I haven't another, but you can get one at the telegraph office The train was moving off, so she said:

"Never mind, I can send the telegram from Liverpool.' They reached the terminus in an hour. Turning to the guard Tilly said: "Would you mind taking my things

to the telegraph office for me?" And to Feorge she added: "You wait here until I send for you." When they reached the telegraph office Tilly turned and said quickly to the

This being sent off she turned to the man who had been her friend all the way through. "Now." she said, "take me to the Midland train." As the guard hesitated, she added: "I am going to give

you £10." The guard personally conducted her to an empty compartment of the London train. She scribbled a note to

Webley on the back of a telegraph blank. The note read: "Dear George: I have concluded not to go to America this trip. Our proposed elopement was a very foolish affair, and I hope you never thought I was in earnest about it. Take my advice and go to America. I am told that the girls over there are much prettler

He will offer you much money of course, because he has plenty. Take the money, and tell him I have gone to the country. Tell him anything you like, only not where I have really gone." All of which went to show that

Tilly had no conscience.

The guard touched his cap and departed. After the London train had steamed away from its station the guard handed George the note. He did not get the money expected. A look of relief passed over the young fellow's face, and he swore a little. Then he whistled, and said to himself more than to the expectant guard: "Sensible girl; I was getting a little

Three Inches of a Diseased Tooth Cut Away and the Cavity Filed. Liga, an unusually intelligent animal,

which has for years been performing at the Nouveau Cirque, Paris, some time ago injured one of his teeth, and has suffered from toothache almost continuously ever since. The huge animal, which had hitherto been particularly docile, began to show signs of ill temper as a result of suffering from what Burns calls "the hell o' a' eases," and the management of the circus instituted an investigation. was noticed that Liga was in the habit of chewing up such wooden beams as came within his reach, at the same time trumpeting with great violence, and the conclusion was arrived at that the noor brute was suffering from toothache This was found to be the case by Prof. Valadon, of the Paris dental college, who was called in to diagnose the case. The elephant had secuped away the ivory and dental pulp from one on his molar teeth, the result being a decayed place about the size of a 50 cent piece. Prof. Valadon decided tha this would have to be excavated, and succeeded in doing the work with his largest instruments, the patient being meantime fed with sweets so as to keep him quiet. The intelligent pachyderm evidently understood that dentist "must be cruel to be kind." for he hardly winced during the trying operation. A space of three inches was cut into the diseased tooth, after which the cavity was kept filled for weeks with iodiform-soaked cotton. When the nerve had in this way been killed the huge hole was filled with composition, covered with a tin cylinder. Three nundred dollars worth of gold would have been necessary to fill the cavity Prof. Valadon's efforts have apparent been entirely successful, for Liga, who is about nine years old, has re

James Reddick, an irresponsible brute in Oklahoma, whipped his little 11-yearold stepdaughter to death. It is this kind of fact, coming with stunning force against the consciousness occasionally, that proves to us the world is not yet civilized. The best, most enlightened and refined way of bringing up children in | grace. this age of the world is to spare the rod if possible. Exactly in proportion as a parent is wise, refined, brainy and intelligent, exactly in that degree does he refrain from whipping. There is a property qualification to the amount of \$200 for the suffrage right. and the would be voter must be engaged in some reputable calling for his livelihood. That, of course, excludes disreputable white men as well as thousands of laborers. But the provision that clinches the thing effectually is the requirement that every man who votes shall be able to read, write and speak the English or Hawaiian language and explain in intelligent English or Hawaiian the provishuts out in one great batch the Asiatics, both Japanese and Chinese, who swarm in Hawaii and do the labor of the coun-

The Hawaiian president is to serve six years and not be eligible for re-election. Evidently the Sandwich republic does not intend its president shall spend his first term of office preparing to elect himself for a second. The elector who votes for a senator must possess property worth \$4,000 and have an income of \$600 a year. There are a senate and house of representatives, as with us, of the survivors of the event of 30 years and besides this also there is an advisory council, which will be apt to complicate matters considerably, as it is statehouse at Atlanta, where he still not quite clear what its mission will be. | tells the story of the great sea fight.

The Georgia Watermelon.

It is a steady source of satisfaction to the northerner in summer to remember that as the strawberry goes out the Georgia watermelon comes in, and the Georgia watermelon is as delicious as the has thrown it still more in the forestrawberry. It is the state of Georgia's best gift to man. He who makes two melons grow where one grew before is the benefactor of his race.

The crop this year will not be quite so The wide circulation of the Emperise in the large numerically as it was in 1893. This is owing to the dire frost that cut down the young vines in April. Many farmers were unable to get seed after that, and so their melon crop was not replanted. But those who did replant were rewarded by uncommonly fine fruit. It seemed almost as if nature got ashamed of herself for her churlishness in sending that frost and was trying to make it up by a great crop of big melons on the stems ness in the United States has seen its that were left. The Canadian Pacific railroad, while not actually owned by the government, is under direct official patronage, and a splendid institution. He is easier in the government throws things the railhis manners than the Englishman and road's way on all occasions, with the patriotic endeavor to do as much harm as possible to the United States. For this or some other reason the Canadian Pacific netted last year a profit of nearly \$7,750,-000. What railway in the United States did as well? There must have been something in the superior management of the Canadian road.

> If the American fishermen violate the three mile limit law because of a remarkably fine catch of mackerel on the coast of Newfoundland and are caught by the natives too close to British-American shores, they must expect to be dealt with just as Canadian fishermen would be dealt with if they should be caught in American waters within less than three miles of the shore.

Thirty years ago June 19, 1864, occurred one of the greatest sea fights of the nineteenth century. It was the battle between the American wooden ship of war career July 29, 1862. Every effort was made to catch her, yet for two years she lefied the whole American navy. She did much toward destroying that supremacy of the American merchant marine which it has never regained. The Kearsarge, Captain John S. Winslow. had been on the Alabama's tracks for months. He overhauled her in the French harbor of Cherbourg, where Capin for repairs. When these were com-

A Case of the Deadty and Dreaded Typhus -Counterfeiter Captured Red-Handed near Adrian-Brevities

Typhus Fever in Michigan.

It looks very much as though Michigan has a genuine case of typhus fever. health, received a telegram from Dr. W. Huff, health officer at Goble, Van Buren county, informing him of a suspected case of this dread disease at that place. Dr. Huff said that the body of G. E. Mentger, who died at Atlanta, Ga., was shipped to Goble for burial. The accompanying certificate gave the cause of death as typhoid fever, but friends of the deceased now say that the case was really typhus fever. A son of the dead man is now the state prison. sick with all the symptoms of the latter disease.

Secretary Baker ordered Dr. Huff to at once enforce absolute iso-lation of all persons infected and to institute a system of thorough disinfection. Dr. Baker has also tele graphed the health officer at Atlanta advising him of the circumstances, giving him the name of the deceased and the date of his death in that city and requesting a prompt investigation

Cornerstone Laving at Laneer.

The cornerstone of the Home for the Feeble-minded and Epileptic, at Lapeer, was laid with proper ceremonies under the auspices of the grand lodge of F. & A. M. of Michigan. Most Worthy Grand Master W. H. Phillips was master of ceremonies. A proces sion, headed by Gov. Rich and staff, containing over 2,000 men, representing the Michigan National Guard and various secret societies, marched two miles to the building site. Mayor Vincent delivered the address of welcome and after the usual ceremonies the remainder of the program was carried out in the beautiful grove adjoining, which forms part of the state's property. The venerable ex-Gov. Begole was introduced. Hon. Cyrus G. Luce delivered the oration of the day. Hon. W. B. Baum, of Saginaw, the father of the bill to establish the home, spoke concerning the necessity the F. & P. The program closed with a dress parade of the Detroit Knights Templar, and a lantern parade and fireworks by bicyclists.

Albion Class Pay.

Class day in Albion College so far as class '94 is concerned, was a tremendous success. The programme opened with a piano solo by Miss Jennie Fielden; invocation was offered by Dr. Fiske; a duet was sung by Misses Henry and Baird. Then Mr. Prentis E. Whitman delivered a brief eulogy of Lincoln, and, throwing back the Stars and Stripes, unveiled a magnificent portrait of Lincoln, which was displayed in the Michigan building at World's Fair, which had been purchased from its painter, Prof. F. C. Courter, of the college, and which, on behalf of the class, he presented to President Fiske for the college. The remainder of the program was: Valse caprice, Strelstzki, Clarissa Dickie; oration, "The Material and Immaterial." Forest R. Moulton; class poem, Winifreda Gale; address to undergraduates Mae B. Hunt: vocal solo 'Ave Maria," Pearl M. Henry; class his generosity its erection was largely history, Helen E. Osborne; valedictory, "The Sense Life vs. Spirit Life." Clarence E. It was reported in connection with the general managers' conference, that plans had been formulated for the arrest on charges of conspiracy of President Debs and Organizer Lynch. t was said that the general managers and been advised to arrest those men and have them searched for papers that, if found, would furnish indisputable evidence that certain men were amenable to the conspiracy law.

CONGRESSIONAL NEWS. SENATE.-162d day.-Mr. Allen made anohter acffectual attempt to secure consideration for his resolution, directing the secretary of the treasury to inform the Senate of the total number of persons engaged in protected industries, whose wages might be affected by tariff legislation. Then the Senate resumed the consideration of the income tax provisions of the tariff bill. Mr. Hill withdrew the amendment had offered to strike out the provision exsideration of the income tax provisions of the tariff bill. Mr. Hill withdrew the amendment he had offered to strike out the provision exempting the interest on United States bonds from the operation of the tax. His object in offering the amendment, Mr. Hill said, was to call the attention of the country to the fact that \$635,000.000 of property in government bonds were necessarily exempt from the operation of the income tax under the law, although the ostensible purpose of the income tax was to reach wealth and equalize taxation. There was an enormous investment of capital which the income tax could not reach. Mr. Hill then moved to exempt state, county and municipal bonds. He argued that taxation of state bonds by the federal government would be a direct attack upon the administration of the states. The discussion on the constitutionality of the taxation of state and county bonds was continued: several Senators coinciding with Mr. Hill's idea. The amendment was defeated, however. Mr. Hill then moved to exempt state bonds; lost. A motion to strike out the provision for a tax on personal property acquired by gift or inheritance was lost. The proviso offered by Mr. Vest as an amendment to section 55, "that in computing the income of any person, corporation, company or association there shall not be included the amount received from any corporations, etc., as interest or dividend upon the bonds or stock of such corporations, etc., if the tax of 2 per cent has been paid upon its net provise by said corporation as required by this act," was agreed to. An amendment of Mr. Allen's, to permit evidence in rebuttal before collectors of internal revenue as to the amount of income. permit evidence in reductal before collectors of internal revenue as to the amount of incomes, was agreed to, as was the Vest amendment excluding in the calculation of the incomes of banks, banking institutions, trust companies, life, fire and other insurance companies, railroad, canal, telephone, telegraph companies, life, fire and other insurance companies, railroad, canal, telephone, telegraph and other companies, catual operating and business expenses, losses and interest on bonded and other indobtedness. A committee amendment was adopted providing that the tax shall not apply "to states, counties or municipalities; nor to corporations, companies or associations organized and conducted solely for charitable, religious or educational purposes, including fraternal beneficiary societies, orders or associations operating upon the lodge system, and providing for the payment of life, sick, accident and other benefits to the members of such societies, orders or associations operating upon the lodge system, and providing for the payment of life, sick, accident and other benefits to the members of such societies, orders or associations and dependents of such members; nor to the stocks, shares, funds or securities held by any fiduciary or trustee for charitable, religious or educational purposes; nor to the loans made by building and loan associations to their shareholders for the purpose of enabling them to provide for themselves homes; nor certain savings banks, saving institutions or societies. House—The House passed the general deficiency bill, thus completing all the appropriation bills for the end of the liseal year. The present situation is quite unprecedented in Congressional history. The close of the fiscal year sees every one of the appropriation bills through the House of Representatives and not one of them yet passed by the Senate. In the deficiency bill as passed by the Senate. In the deficiency bill as passed by the House there was an item of \$5,000 for the widow of the late Congressman J. Logan Chipman. There was also contained in the bill an item of \$104,000 to pay the long standing claims of Pottowatomic Indians of Michigan.

SENATE.-163d day-Income tax debate continued. A large number of amendments were presented, but all were rejected with the exception of two: To exempt savings banks organized on the mutual plan, solely for the benefit of their depositors; compting mutual savings banks conducted for the benefit of depositors in the state of Delaware. HOUSE—The House got into a series of deadlocks over the New Mexico statchood bill. The bone of contention was an amendment originally proposed by Mr. Smith (Rep. Ill.), requiring the public schools to teach the English language. The consideration of the bill was not concluded at the hour of adjournment. A cablegram from the French government acknowledging the action of Congress relative to the death of President Carnot was laid before the House; also a message from the President tinued. A large number of amendments were Iouse; also a message from the Presiden ransmitting the latest Hawalian correspond once. A resolution was adopted extending the appropriations for the current fiscal year for address from the 30th inst. as the Senate will not be able to act on any appropriation bills before the expiration of the fiscal year.

SENATE. -164th day-When the Senate convened Mr. Hoar made a point of no quorumonly seven Senators being present. The House joint resolution to continue for 30 days after June 30 the appropriations of the present fiscal year was first taken up. Mr. Cockrell, chairman of the appropriations committee, moved to refer the resolution to his committee. Mr. to refer the resolution to his committee. Mr. Hoar superseded this motion with one that took precedence, moving to refer with instructions to report back as an amendment the sundry civil appropriation bill as it passed the House. Mr. Hoar protested against keeping the tariff bill before the Senate to the exclusion of all other legislation, and said that when the majority asked the minority to continue existing appropriations in order to press a bill that the minority believed injurious they asked too much. The income tax was the tariff measure under consideration. The pending amendment was that of Mr. Hill to limit the time to the period between Murch I and August I of each year, when the books of corporations should be open to inspection; lost. Mr Hill made a motion to strike out the income tax feature of the tariff bill; lost. The spirits schedule was taken up and a number of amendments presented and rejected. The committee amendment fixing the tax at \$1.10 per gallon and extending the bonded period to eight years was then agreed to without division. Mr. Aldrich moved to double the special tax imposed on dealers in distilled spirits; lost. Mr. Daniel offered an amendment to repeal the section of existing law providing that every farmer or planter selling leaf tobacco shall make a statement, verified by oath, as to the amount of his sales, and make his refusal to do so a misdemeanor punishable by a fine of \$500; agreed to. Sec. 104, the last but one of the bill, providing for the repeal the repeal of the receiprocity provisions of the McKinley bill and the abrogation of all agreements under it, was reuched. Mr. Hale moved to strike it out. As this motion would bring up the whole question of reciprocity it could not be disposed of. The Senate thereupon adjourned. SENATE.—165th day—The joint resolution continuing the annual appropriations 30 days after June 30 was adopted. The tariff bill was taken up, and Mr. Vest moved an amendment to the clause repealing the reciprocity feature of the McKinley bill. Agreed to. Senator Peffer offered as a new section the amendment levying a tax of \$50 per head on all aliens landing in the United States to engage in industrial occupations. Tabled, 40 to 12. Mr. Jowes then saked unanimous consent to make a number of amendments overlooked as the bill was being considered. The amendments were agreed to as fast as read. Most of them were verbal and unimportant. The bill as a whole was then reported to the Senate, and after an bal and unimportant. The bill as a whole was then reported to the Senate and after an executive session the Senate adjourned HOUSE.—With the exception of a short time, the day in the House was consumed by a Populist illibuster over the contested election case of Watson against Black, of the Tenth Georgia district. The latter was seated, only the Populists dissenting.

boycott.
Chicago: The employes of the Chieago Great Western railway went out, making a total of 11 Chicago roads now tied up or crippled by the American Railway Union boycott, of Pullman cars. The roads so far affected by the strike at this point are the Illiois Central, Santa Fe, Chicago Great Western, Chicago & Northern Pacific. Western Indiana, Wisconsin Central, Chicago & Eastern Illinois, Wabash, G. and Trunk, Monon and the Balti-more & Ohio. The strike has precipitated a fuel famine on the steamboat locks. There is not a pound of coal o be had on any of the docks, and business on the river is at a standstill. The strike came so suddenly that it ound the coal menutterly unprepared for it, and while they have plenty of coal in the switch yards of the Illinois Central, they cannot get it to the docks. Livingston, Mont: All men em-ployed in the Northern Pacific yards vent out on strike and all shop hands went out. Not a single employe of the switch department in Montana is at work. All American Railway Union men refuse to work on engines hauling Pullman cars. Not a train is now

noving in either direction. Detroit: The prospect is that Detroit vill experience little or no trouble from the boycott of the Pullman cars. The only road into Detroit using the Pullmans to any extent is the Grand Trunk. The Wabash road, between Chicago and Detroit, uses the Wagner and the Mann boudoir cars, but has the Pullmans on its line between Chicago and St. Louis. The Michigan Central and other roads use no Pull

California Fruit Growers Ruined. San Francisco: In the great strugle between the American Railway nion and the Southern Pacific th strikers seem to have the upper hand. Traffic on the great railway system is paralyzed so far as the Pacific coast is concerned. No trains are running north or south from Ogden, Deming and El Paso. Little effort has been made to move freight. An order was issued from the general offices of the Southern Pacific closing all the freight offices, and informing the clerks that their pay would cease until further notice. It is this freight blockade that is the most disastrous to the business interests of California. Severe losses to the fruit growing interests are inevitable and fruit growers and dealers are face to face with bankruptcy. Hundreds of cars laden with perishable fruit are sidetracked. In Railway Union and the American northern California this is the fruit Federation of Labor at Chicago, resomen's busiest shipping season, and peaches, apricots, cherries, plums and ter organization to aid in the present berries are fast ripening orchard. A blockade of only a few days will see fruit to the value of hundreds of thousands of dollars too ripe for shipment. All this will be a total loss to the growers.

The Wisconsin Central is tied up fused to work with non-union firemen and are thus tacitly helping the A.R.U.

San Francisco is completely shut off from railroad communication with the utside world, though there are no strikers there. The seat of trouble is at Oakland, across the bay, where many trains and tons of mail and express matter are tied up.

Many of the commission houses at the Chicago stock yards regard the situation as serious, and have notified their clients in Iowa, Kansas, Ne braska, Missouri, Texas and other states not to ship stock unless the railroad companies agreed to deliver the shipment and to be responsible for long delays or responsible if there are any losses on account of delay.

IT GROWS VERY SERIOUS.

Battle Creek: The Grand Trunk tieup is complete. Several trains are here on the tracks loaded with passengers. The Brotherhood of Locomotive Firemen have struck, and there are no prospects of manning an engine to nove trains. Some of the more feeble passengers are being cared for at notels. The strikers say they will not interfere in any way with the move-ment of trains, but will not go to work themselves. No freight whatever is being moved. All the labor organiza-tions in the city have caught the in-fection, and it is rumored that several strikes will occur. Managers of two of the largest manufacturing establishments have privately stated their intention to close their works. Chicago: Firemen and engineers on

the Illinois Central road have gone out This was followed by the announce ment that the switchmen and firemen on the Wabash, a Wagner line, had struck. The general managers are reparing to meet violence with force and the strikers are anticipating legal complications which may compel a new George M. Pullman quietly left the

Notes from the Pullman Strike. The Northern Pacific is completely ied up from Chicago to the Pacific and

all shops are deserted. Two thousand men in the Southern Pacific shops at Sacramento, Cal., went out, and the tie-up is now complete.

The boycott at Cairo, Ill., has assumed serious proportions. Every railroad entering the city is blockaded. The Santa Fe road has over 250 hrough passengers tied up in Kansas City and has abandoned hopes of mov-

ing trains. At a mass meeting of the American lutions were adopted pledging the latin every strike. Attorney-General Olney was condemned for his action in reference to the hauling of trains carrying mails as beyond the province of his office. The railroads were condemned for refusing to haul mail cars, when detached from Pullman cars, and a committee was appointed to ask Gov tight. The brotherhood engineers re- Altgeld to revoke the charters of such roads, on the ground that they were

obstructing the mails. Washington: Acting Postmaster-General Jones held a short conference with Attorney-General Olney, at which the movements of the strikers were discussed. It was decided to rigidly insist upon carriage of all mails and to prosecute all who interfere with postal transportion.

The general officers of the A. R. U. have estimated that 85,000 men are now out on strike, as follows: Illinois Cen'ral 20,000, Chicago & Alton 10,000 Atchinson, Topeka & Santa Fe 15,000, Chicago & Eastern Illinois 2,500, Northern Pacific 15,000, Southern Pacific 15,000, Denver & Rio Grande 8,000.

Perier of his election to the presidency, M. Challemel-Lacour delivered an eloquent oration. A little later a fourhorse landau drove into the courtyard. M. Casimir-Perier entered the vehicle and started for Paris escorted by a detachment of dragoons with lances from which bright-colored pennons were flying. The new president received an immense ovation from the dense crowds of people who lined the route from Versailles to Paris.

The ministers, shortly after the

president's arrival, formally tendered their resignations to him. Casimir-Perier requested them to remain in office. It is doubtful, however, whether Dupuy, the prime minister, will retain office. It is expected in the event of his insisting upon his resignation being accepted that the president will summon Bordeau to form a cabinet. This will enable Dupuy to hold his old position of president of the chamber of

WEEKLY REVIEW OF TRADE.

NEW YORK.—R. G. Dun & Co.'s weekly review of trade says: The great strike of coal miners has ended at most points, but another threatens to interrupt business more seriously for a time, though the number of hands engaged is comparatively small. Travel and file are well nigh arrested on about 20 roads aready, and strikes are threatened on all roads which use Pullman cars. On the whole, other changes during the week have been for the better. Many manufacturing establishments which were stopped by want of fuel have resumed. The depletion of the treasury reserve has been checked by the voluntary deposits of gold by the New York banks. Exports of gold have almost ceased. Congress has made much progress toward final disposition of the tariff question. Crop prospects grow better as the harvest draws nearer. The resumption of work in mines and mills has made good progress, but the demand for products is as yet smaller and less urgent than was expected. Buyers apparently wait for lower prices of iron and steel products, which manufacturers are sow to give in view of the increased cost of materials and production. After a suspension of half the working force for more than a f materials and production. After a suspe on of half the working force for more than aonth it was expected that orders for product ould be very large, but instead there is gen ral complaint of dullness and narrow demand he textile manufacturers are much embar assed by the near approach of probable hange in the tariff, the effect of which canno t be calculated. In spite of this reason for ferring orders and purchases, the number of milis quitting work is not yet as large as was expected, for there appears a little more demand from clothiers and jobbers. Wheat has declined 2 cents, corn has declined 2c, and a heavy crop is expected. Pork products are a \$\frac{1}{2}a\$ a shade lower. Fallures have been 214 in the United States, against 307 last year, and 35 in Canada, against 37 last year. Of late the number and importance of fallures have increased a little, as is usual near the close of a half year.

John and Joseph Hampton, two giltedged and diamond-bedecked fellows charged with burglary, knocked down the turnkey of Saginaw's jail and ran away. They were chased by a large crowd and recaptured. As Mrs. Rollna Farley, of Albion,

was filling her gasoline stove, an explosion occurred which resulted in her death. Her clothing caught fire and she rushed to her bedroom, where she was found by Mr. Ford, who was attracted by her screams. Before the fire could be extinguished she was so badly burned that she died in great agony within five minutes. Mrs. Farley was 77 years of age.

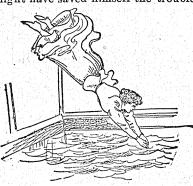

DIVED IN A STREET DRESS. A Plucky California Girl Who Wouldn't

Take a Dare. Miss Josie Sheehy, a trim, natty young girl wearing a tailor-made gown and a jaunty bit of millinery on her head, was leaving the Olympic natatorium, in San Francisco, a few days ago, followed by the other members of the female class. Standing near the door were a number of young men waiting for the hour when they should be admitted, among them being Arthur Callan, an acquaintance of Miss Josie. Young Callan made a remark jocularly reflecting on the ability of girl swimmers in general and Miss Sheehy promptly retorted in kind. Repartee was exchanged laughingly for a few moments, and at last Miss Josie said, unguardedly:

"I wouldn't be afraid to jump in as "I dare vou." said Callan, as Miss

Sheehy hesitated. "I'll bet you \$25 you dare not."

The bet was promptly accepted, and the whole party returned to the swimming school. Despite his offer, young Callan had some difficulty in putting up his part of the stakes; but the \$50 was finally placed in the instructor's hands, and Miss Sheehy removed the pretty little hat, that being apparently the most highly prized part of her costume. One of the attendants swam out into the tank to be in readiness in case of emergency, but he might have saved himself the trouble.

SHE TOOK A HEADER. The plucky young girl tripped light-

y to the gallery, which is fifteen feet bove the water, and posed herself for moment. Then she brought the tips of her fingers together above her head. The next moment there was a swish of skirts as she dived, followed by a splash as the trim figure struck the water. The diver rose gracefully to the surface, and with a couple of long strokes reached the steps, up which she climbed laughingly to claim her \$50. The money was turned over, and one of Miss Sheehy's friends was dispatched for dry clothing. Young Callan ignominiously fled, and at last accounts had not reappeared at the scene of his discomfiture.

The Roothermic institute in Rome is "cure" place where people go to drink fresh blood for the cure of gout, rheumatism and the great prostration and anæmia caused by the malarial fevers of the Tontine marshes. The blood to be imbibed is first rapidly freed from fibrin by a carefully aseptic method, the animals from which it is derived having previously undercone inspection by a veterinary surgeon. Some patients bathe either a part or the whole of the body in the warm blood and, Italian doctors think, with great benefit.

Croup and Diphtheria.

Bacteriologist Herman M. Biggs of New York has made a report to the board of health of the results of his nvestigation into 268 cases of so-called "membraneous croup." He says that nis observations justify the conclusion that the disease is nothing more or less than laryngeal diphtheria. He recommends that the membraneous croup should be put on the list of contagious diseases, concerning which reports from physicians to the health board are required. It is said that the recommendation will be adopted.

A Doll's House.

Perhaps the finest doll's home in England is that ordered by the duchess of Portland for her little daughter. Lady Victoria Bentinck. The reception rooms are hung with broeade, the stairs carpeted, the doors open and shut and the bedrooms are beautifully furnished. For a little New York neiress a doll's house has lately been constructed which cost several thousands of pounds.

Ape European Ways.

Central Asian potentates are growng very European in their ways. Since the Emir of Bokhara visited St. Petersburg he has quite adopted western habits, throwing open his palace to Russian ladies and giving regular balls. After European comforts he finds his palace very bare, so he has invited a French architect to build another in European style.

A London Fad.

The latest fad in men's dress is to have the skirts of the long coats lined with silk that rustles. In some instances fashionable tailors are putting a certain kind of material between the silk and the cloth to supply the "swish" when the silk doesn't sufficiently rustle.

Superannuated Warships.

Five warships were sold out of the service by the British admiralty two weeks ago, being unfit for further employment. One was a wooden battle ship built sixty years ago. Three of the others were also wooden ships, and one was an iron troop ship.

World's Death Rate.

It is computed that the death rate of the world is sixty-seven a minute and the birth rate seventy a minute, and this seemingly light percentage of gains is sufficient to give a net increase of population each year of almost 1,200,000 souls

Cardinal Richelieu Founded on the Play of "Richelieu," by

Lord Lytton.

CHAPTER IV-CONTINUED. His lace ruffles were valuable, and fell thickly and snowily upon muscular hands; the inner sleeves, of equally as fresh and costly linen, peeped out of the slashes in the purple double sleeves and in the interval between the upper garment and the blue velvet breeches. His boots of unblacked leather had been pulled up to the knee for walking through the wretched streets, since he had come in a friend's coach and had no horse on which to return home; his baldric was richly wrought in silver on the sable which predominated as

The Clew. Women are so overjoyed at a success in perfidy that no indignation of an honest man at being suspected of infidelity could equal the white hot fury of Marion Delorine in being debarred from the secret confabulation of the prince of Orleans, Baradas, and their confederates. This formal conclusion did not render her a stranger to their negotiations since she had been enabled to inform the cardinal of so much of their support, and it would have been remarkable in that period of intrigue if a house especially built for a dominant beauty should not contain traps and "eavesdroppers' holes."

But she was piqued; and a Marion piqued is a woman dismissing every thought but the desire for reprisal

out of her mind. [TO BE CONTINUED.]

Childhood Sayings of an Empress The Empress Frederick must have been a deliciously naughty child, if all the stories told of her juvenile days are true. Everybody knows the "Goodnight, Brown," story, but here are a few others not quite so familiar: Walking one day in Windsor forest with her daily governess, the princess, then 3 years old, showed a good deal of rather naughty temper. "Look," said the governess "at that very nice little girl over there. How good she is! How quiet!" "I dare say she may be," retorted the little princess, "but then I also see she has no daily gov-"Shall we meet every one in erness!" yes, my dear," was the reply. BRAKEMAN'S HAND CRUSHED COUPLING CARS.

Gangrene Causes Blood Polsoning and Paralysis-Pronounced Incurable an Paid His Insurance Money-The Man Restored to Health.

TORONTO, July 2 .- The Daily Mail of this city lately published a series of articles that make out a story hard to believe. The subject of the articles is a Grand Trunk brakeman named Sam Murray, who has crowded into his twenty-nine years of life an experience that would kill a dozen men.

One day a few months ago Murray had three fingers crushed while coupof the Atlantic the officers of the ship ling cars. In a short time the injured hand became gangrened, and the three fingers had to be amputated. It was five months before the hand healed and then Murray went back to his work as brakeman. But he never have any poison symprecovered his old time health. On the toms. I have gained contrary, he fell in weight from 200 12 pounds since taking Hood's." C. E. Bohall, to 140 pounds. He was constantly troubled with pain in the back and dizziness. He failed so that many thought he was going into consumption. Still he kept on with his work.

He was walking down street one evening, when he suddenly fell. He was carried into the office of a doctor, who pronounced the case one of paralysis. Murray recovered in a little while, but was advised by the doctor to be very careful. A few days afterward his arms gave out. This loss of control of the cable is slowly hauled aboard over his limbs occurred with alarming frequency. Pimples and boils appeared all over his body, and his limbs became swollen so that he could not wear boots. His physician told him that he had blood poisoning and he

was as good as a dead man. Murray belonged to the Brotherhood of Railway Trainmen and to the insurance branch of the Grand Trunk railway, and received sick benefits. The Grand Trunk had Murray examined when his case became so serious, and four physicians certified on oath that he could never recover. Then the Grand Trunk company paid him his life insurance money on account of total disability.

About this time Murray heard of Dodds Kidney Pills, and of cases similar to his they had cured. He at once bought a box and before it was finshed he had begun to improve. One dozen boxes cured him. To show that there is no doubt of the cure, and that it is permanent, Murray has since had his life insured in a leading company, after a thorough examination by two physicians as to his physical condition, and is to-day a healthy, happy and hearty man.

These pills are now within easy reach of every citizen of the United States. If the local druggist has not got them in stock, they may be procured by writing The Dodds Medicine Co., limited, Buffalo, N. Y., or Toronto, Canada. Price, 50 cents per box, or six boxes for \$2.50. Be sure to get

Stampedes of Mining Days.

There have been many stampedes in Montana within the last thirty years. Not stampedes of horses and cattle, but of men. From the discovery of gold on Grasshopper creek, in Beaverhead county, in 1862 to the present day stampedes to new diggings have been of frequent occur-From Bannack to Alder rence. Gulch, from Alder Gulch to Last Chance, and thence to Confederate, to Highland, to Silver Bow, Pioneer, Lincoln, Bear, and a hundred others. But, according to the Butte Inter-Mountain, one of the worst stampedes that ever took place in Montana was to Sun river in the spring of 1866. That was one of the coldest springs ever experienced by white men in Montana. A terrific blizzard set in shortly after the stampede fairly began for Sun river. No one knew what had been discovered or whether anything at all, but a rumor got abroad that rich diggings had been found, and nearly every man who could rustle a small grub stake and cayuse started for the supposed new gold fields. At that day the country to the north was not inhabited, and the sufferings endured by the stampeders were terrible. Many were frozen in the pitiless storm, a few lost their lives, and to this day a few old-timers are living in the state minus fingers and toes from that fearful trip. It turned out also that there had been no discovery of gold made, which added disappointment to

ily shortened. But no one seemed to know then nor does any one now know exactly how the great Sun river stampede started. It is supposed to have been caused by a letter written by a man who had gone North from Last Chance in the fall. This man, in his own estimation, had met with flattering success. He had fallen in with some friendly Blackfoot Indians, secured a squaw who had some horses and a tepee, and was in a land filled with wild game of all kinds. He thought it was the next thing to paradise. He wrote to a friend in Helena that he had struck it rich; intended to stay all winter, and was well fixed and well satisfied with his find, failing to state what that particular find was. To the miners who saw it there was but one meaning to be attached to his words: He had struck diggins, and that is what started the great Sun river stampede in the early days.

What Nature Does For Her Trees. The wild forest vrees bear a great abundance of foliage, and this shows that nature provides for her own in a most bountiful manner. The inferiority of the foliage of the mountain trees and those growing near lakes and rivers is due to the rich substances contained in decayed leaves and water forming a chemical action with the solar rays. Oxygen, hydrogen, nitrogen, carbonic acid and the gaseous substances in na-

ture are sufficient to complete the annual growth of forest trees of all classes. Along the broad reaches of the northern and southern rivers this fact is clearly seen and well defined. The rich navigable lowland rivers, such as the Thames in England and the Loire in France, display the richest and most luxuriant rees.—Boston Transcript.

The Extra Shilling.

Here is a trick that is played every day during the season on Americans in London, says an exchange. It nearly always works, simple as it is. A gentle man from Rochester, N. Y., who is well known in that city, bought a pair of gloves on Oxford street the other day, gave the man a sovereign and took—as Americans very generally do-his change without counting it, shoveled it off the counter into his pockets. He was walking down Oxford street when a breathless person overtook him and tapped him on the shoulder.

E. T. Balch's youngest child, that has been having fits at times since last fall, died Monday. It was taken with them Saturday night. Dr. Livingstone of Caro was called to see it, but it was past help.

Card lost her cow last week Monday. The cow was seen in the afternoon of that day near J. Hubinger's banking ground, and the same night she was found near there dead.

The picnic came off in Mosher's grove last week Friday and school is closed for this summer in Dist. No. 1, of Ellington. The teacher, J. M. Ewing, will probably attend the Tuscola Normal when in session.

The news has leaked out that a move is on foot to effect a change in the postmastership of Ellington, which it is thought by some will be affected soon. It is not a very paying business, let who will get it, referee or no referee.

The Ladies' Aid Society of the M. E. Church of Ellington will meet on Wednesday of next week at Mrs. J. O. Adam's, of Elmwood, at 10 a. m. for dinner. All are cordially invited to attend and partake, and have a good

Who are our great men that are really typical Americans? Mr. Woodrow Wilson undertakes to answer the question in The Forum. He dismisses Alexander Hamilton and President Madison as "great Englishmen bred in America." On the other hand, however, he classes Washington, who in many characteristics esembled these two, as a typical Ameri can. He explains it by saying that Washington was not at all the cold, colorless, prudent individuality represented by his biographers, but was as thoroughly American as Jackson or Lincoln. He informs us that what we take for lack of passion in him was "but the reserve and self mastery natural to a man of his class and breeding in Virginia." The fact that reserve and self mastery are natural to them will be news to most men of any

Americans are not aware of it. Franklin Mr. Wilson classes as a "sort of multiple American." One would say he was. A greater brain than his never blessed this country with its wise thoughts. Robert E. Lee was a great typical American, too, the writer says So was Daniel Webster. Emerson and Asa Gray, the botanist, belong to the world, not to America. They "might A call solicited. have been native to any clime."

Abraham Lincoln, however, Mr. Wilson puts as the "supreme American of our history." Other men belonged to the east, the west or south. In Lincoln the elements were combined and harmonized. He was a genius in the common thought of the American people America. The only important rise in and a genius likewise in the mastery of fundamental politics. "The whole coun-

In courthouses, town halls and schoolhouses there is scope for all the budding artistic instinct in the American soul. Public buildings may be improved by architectural additions, and beautified by paint and repairs, by decorating the walls and ceilings and by the addition of pictures and sculpture. The farmer will have his share of the work chiefly in improving the public roads and beautifying the landscape. He will first remove from the public view all unsightly objects and structures on his grounds. The expenses of the public decorative league can always be met if people are public spirited.

Great Americans.

John Adams and John C. Calhoun come under Mr. Wilson's category of great men, but they were not typical Americans, because they were both provincial, he says-Adams a New England provincial, Calhoun a southern one. "In Henry Clay we have an American of a most authentic pattern," while Andrew Jackson, a thoroughly great man, was altogether of the west, we are told. Clay and Jackson were somewhat alike, but Clay had the "art and sophistication of the eastern politician." If in these days the eastern politician has more of art and sophistication than the western one,
