Good roads are more and more be coming an imperative necessity, and Mrs. McTavish has returned from not only the comfort of a good road, but its bearing upon the development of the community, and all the country through which it passes.

Here is a most alarming statement from a contemporary: "People who pick up a nice luscious peach and eat it without peeling, are probably not aware that they are also getting away with about ten million microbes. The

During the storm of Monday night the barns belonging to Chas. Schutz, some twelve miles north-east of here in Greenleaf township, were struck by lightning and burned to the ground togther with the contents. Wm. Bannister was living upon the place which he had rented and is a heavy loser. His team implements grain.

day of last week he started out to bring his wife and child home. On the way out he stopped at his brother's, w. J. M. Jones, and one or two other places, and these parties can now recall some of his actions which were rather peculiar, but were not noticed at the time.

Upon arriving at the house he found

which he had rented and is a heavy loser. His team, implements, grain, etc., were all burned

The "thick-set-foreigner" with the "spanking team" and the dollar soap boxes "did up" a portion of our town last Monday, but happening to meet a lady who "fancied she'd seen him before" he decided to leave rather hastily for parts where his game was not known. If his stay had been a few hours longer our townspeople would doubtless have arranged a hearty reception for him.

Upon arriving at the house he found Mrs. Jones and the baby both seriously ill with typo malaria and this sad surprise together with his own partial illness seemed too heavy a strain for his mind. After speaking to his wife he went and sat down by the window, leaning his head upou the sill. Remaining in this position for some time, his sister-in-law approached him and found his forehead covered with great drops of cold sweat. She at once administered a stimulant and persuaded him to lie down. In a short time he arose and started towards the barn. Rev. S. G. Anderson moved to the new parsonage on Leach Street, Men-day.

Miss Clara Covey, of Unionville, was the guest of Miss Kobbie Brooker last week.

Dorman & Son have placed a wagon head." He placed his hand tohis throat and it was found that he had made a gash four or five inches long with a Mrs. Moore and daughter Kezzie, ot Bad Axe, were Cass City visitors over Sunday.

ATEMS OF NEWS OF VARIOUS VARIETIES,

Michigan Odd Fellows Meet in Fiftieth Annual Convention. - Missing Doctor Returns and Tells a Strange Story .-Small Pox Epidemic at Manchester.

Odd Fellows of Michigan The grand lodge of the Independent of Odd Fellows of Michigan ensued, when Flowers struck one of convened in the fiftieth annual session at Grand Rapids, with 800 delegates lodges. The grand secretary's report to the sovereign grand lodge shows arrest the crooks one of whom pull-the number of subordinate lodges is 430, with a total membership of 27,920. During the year the number of deaths was 171. The amount expended for was 171. The amount expended for the entire coach load of passengers the relief of distress was \$29,765; for tried to head them off, but with rethe relief of widowed families, \$4,653. volvers in their hands they forced The total receipts for the year were 332,618. The encampment branch total membership is 3,778; the amount paid for relief, \$1,060; receipts, \$6,113. The Rebekah department in Michigan has 191 lodges, with a total member-ship of 10,089. Amount paid for assistance to members during the year, \$516; available assets at the close of

The report of Grand Master Davis showed that during the year 12 new lodges were organized; also showed that 13 lodges of the Daughters of Rebekah had been formed. Among other suggestions the grand master strongly recommends the establishment of a home for orphans and aged members in this jurisdiction.

Dr. Conklin's Very Strange Story. Dr. Conklin, who has been missing for six weeks, returned to Cassopolis giving abduction as the reason for his absence. He says that Sunday night, September 2, he was met in his office by two colored men. Before being able to get a light he was struck down unconscious. When he came to The found his hands and feet bound. He was gagged and driven until 4 o'clock in the morning. He says he was kept by the Negroes one week and then transferred to the keeping of two white men, who kept him in the putskirts of a strange town about a week. They then traveled by night for four weeks. Everything appeared to have been prearranged. They slept En strawstacks or any convenient

place. He was constantly guarded.
At last he was allowed his liberty and he took to the highway, walking into the city of Cincinnati. He was comwelled to pawn his watch in order to secure money to return home. He was not robbed of his money or watch, except his cuff buttons with his initials engraved on them. He was allowed to Treep his money and was told that it was desirable that he should be kept out of Michigan for a while. His re-Zease came immediately after Dr. Anderson's acquittal at Traverse City.

Bantist Ministers of Michigan.

The annual conference of the Bantist ministers of Michigan was held at Lansing. The attendance was very Jarge, 400 ministers being present, and the conference affairs were reported to be in excellent condition. Forty-eight new members were received. Rev. W. B. Matteson, of Owosso, was elected president; Rev. A. L. Lockert, of Milford, vice-president, and Rev. C. S. Lester, of Eaton Rapids, secretary and treasurer.

The twenty-first annual meeting of the Woman's Baptist Home Mission society of Michigan was also held. Reports submitted showed receipts for the year of \$3,679.65 and disbursements of \$3,635.65. The society decided to hereafter co-operate with the Woman's Home Mission society of Chicago, and elected the following officers: President, Mrs. William A. Moore, Detroit; vice-presidents, Mrs. E. H. E. Jamieson, Detroit; Mrs. L. C. Davidson, Grand Rapids; Mrs. J. Fletcher, Plainewell: Mrs. A. R. Bower, Albion, and Mrs. P. Hoffmaster, Battle Creek; corresponding secretary, Mrs. A. J. Fox, Detroit: recording secretary, Mrs. B. H. Rumsey, Detroit; treasurer, Mrs. E. J. Davis, Detroit; auditor, Mrs. J. A. Warren, Detroit.

Muskegon's Fire Chief Killed. Fire broke out in the Thayer Lur ber company's yard at Muskegon. A general alarm was turned in and the entire fire department, together with the fire tug and other tugs, were soon at work. The fire was helped along by the heavy north wind, and for a time it looked as if that entire part of the town was doomed. Hard work confine the flames to five piles of lum-

ber and the loss was about \$2,000. While the fire was at its height Assistant Chief John W. Ellens, with four men, stood in front of the highest burning pile. Suddenly that pile begin to topple and the crowd yelled to the firemen. All managed to get away except Ellens, and he was buried under the burning lumber. It was 20 minutes before he could be rescued. He was unconscious and his legs and zrms were broken, skull smashed. He was frightfully burned and expired a few minutes later. Ellens was 38 years old, born in Muskegon, and had been connected with the department since 1877.

Mrs. E. M. Jeekson died at Ganges from injuries recently received from a horse stepping on her.

Miss Myrtle Beach, of Ogden, besame despendent and attempted to commit suicide with laudanum. A stomach pump saved her.

Eugene Maloney, who had been working forged checks on Adrian houses, was traced to his Mather's home, near Spring Hill, O., and placed under arrest.

Charles Bass was struck by a switch engine at Mershon, while standing on the track. He was thrown into the ditch, breaking his collar bone and in-Juring him seriously elsewhere.

Myron B. Gilbert, formerly of Albion, and later American Express messenger at Dowagiac, was arrested at South Bend, Ind, for alleged defalcation in his accounts with the company.

While driving near the Wabash crossing three miles south of Adrian, done in marble by an Italian sculptor. Mrs. Emory Morris and her sister were thrown from their carriage against the side of a passing train in such a smanner as to break both of Mrs. | that the flames were kept from spread-Morris' arms and one of her sister's.

Battle With Crooks on a Train. A fight between confidence men and

assengers, in which guns and knockdowns played prominent parts occurred on board a D., L. & N. train near Grand Rapids. Three confidence men tried to work Geo. H. Flowers, a Detroit drummer, and Reuben Reynolds, a Grand Rapids man. Their game failed and then they began work on Father O'Connell, pastor of St. Andrew's church, Grand Rapids, and had succeeded in flimflamming the good priest. Flowers and Reynolds took a hand and endeavored to force the confidence men to restore what they had obtained the crooks and knocked him down. Reynolds hit another crook and floored him. The third man then drew a revolver. The train crew tried to Then there was a fight for liberty on the part of the confidence men and

Eli Giranord was run over by a Michigan Central freight train at Marshall and instantly killed.

George Clark's carriage was run into by an engine at Oakley. Both horses were killed and Clark was hurt.

John L. Curave, of Traverse City, started across the bay and is missing His boat was found bottom side up.

The Michigan Manufacturing company, of Otsego, will shortly remove their overall plant to Grand Rapids. W. L. Wilson, of Port Huron, deputy great commander of the Maccabees has decided to make his headquarters

at Saginaw. Edward Jones, of Ubly, slashed his throat and his abdomen in an attempt it suicide. He was distracted over the death of several relatives.

The warehouse established in Manchester, Eng., by Grand Rapids furniture manufacturers has proved a suc ess. Orders are pouring in.

About 150 survivors of the Seventh Michigan cavalry attended the annual reunion at Lansing. The association nas 400 members, scattered all over the country.

Ray and Lee Brothington, two 11year-old children of Escanaba, were ooling with a revolver and as a result Ray accidentally shot Lee and he was instantly killed.

Rush Culver has instituted a libel suit against the Iron Herald of Negaunee, owing to its editorial charging him with dishonest practices in reference to land cases.

On October 8 Lansing physicians diagnosed the case of a German named Himeldinger as smallpox. Many persons have been exposed. Two more of the family have since taken it.

C. H. Robinson, a prominent citizen in his room in the hotel at Elkhart, Ind. He had been drinking. It is supposed to be a case of suicide.

Some one threw an apple at Charles Knapp while he was at play in the school yard at Grand Ledge. It struck the boy in the eye, bursting the eyeball and totally destroying his sight.

Sheriff Wilson has been called to Blissfield to investigate the shooting of Mrs. Robert Elftman. Later developments lead to the suspicion of murder. The woman cannot recover.

Prof. J. C. Knowlton's elegant new esidence at Ann Arbor was injured by fire, the loss being estimated at from \$1,000 to \$1,500. Nearly all the housenold goods were saved. Mrs. H. C. Adams had one arm seriously burned

The Sixteenth Michigan volunteer infantry, 50 strong, had a jolly re-union and banquet at Ann Arbor. New officers were elected: President, Menze Swart; vice-president, Theodore Hoeninghausen; secretary and treasurer, A. M. Apted.

Miss Dana Douglas, aged 22, cashier at the Livingstone dry goods store at Kalamazoo, shot herself in the side and died soon after. The only cause assigned for her act is that she was not invited to Miss Jessie Livingstone's wedding, while other clerks were.

Miss Maggie McDay lives near Leetsville in Kalkaska county. She is the possessor of a heavy growth of beard, which covers her face and extends down her back. It is of a yellowish tint, coarse and long and resembles the shaggy mane of a lion.

The river steamer May Graham has made her last trip for the season up the historic St. Joseph to Berrien Springs. This closes all egress from the county seat of Berrien county by common carrier to the outside world except by the antediluvian carryall over dusty or muddy roads.

4Wm. C. Liphardt, the member of the Detroit board of education who was convicted of accepting a bribe, was sentenced by Judge Chapin to five years at hard labor at Jackson. Walsh, the second to be tried, was acquitted after the jury had been out about 20 hours. He proved an alibi.

A 14-year-old son of O. C. Clarke, a painter at St. Johns, was killed by a cow which he was leading with the end of the rope tied around his body. The cow became frightened, jerked the boy to the ground and in her flight dashed the boy against poles and trees along the street until he was dead.

Fully 2,000 people went to Richmond to witness the dedication of the new Soldiers' and Sailors' monument, which was erected through the efforts of the Woman's Relief Corps. The ladies have been at work on the project for three years, and its completion was made an occasion of rejoicing. Capt. E. P. Allen, of Ypsilanti, made the dedicatory oration. The design of the monument is the figure of an infantry streets, and all precautions have been soldier at parade rest. The figure is

The C. & G. T. oil' house at Schoolcraft, burned, and it was with difficulty

The D., L. & N. depot and elevator at Lansing, with 2,000 bushels of wheat, burned. Loss about \$2,500.

James Perry, whose wife is seriously ill at Saginaw, while intoxicated took a dose of carbolic acid, but was pumped

M. G. Hartly and a friend went to bed in a room at Saginaw where gas was used as a means of illumination. They blew it out. An investigation was made just in time to save their

United States engineers are expect ing the Shiawasse, Flint and Bad rivers to determine the feasibility of making them navigable for lightdraft vessels.

The French Land & Lumber company's dry kiln and heading plant at Rose City was burned. Loss about \$12,000. The origin of the fire is supposed to have been spontaneous combustion. The barn and hennery of Ed. Roy,

at Imlay City, burned with all the contents, including a fine registered horse, 500 eggs and 200 chickens. A lamp exoloded in an incubator. Albert Upham, of Flat Rock, fell on

tention to it. Now blood poisoning has set in and may end in lockjaw and horrible death. A farmer near Benton Harbor raised cabbage head three feet in circumerence and weighing nearly 12 pounds.

Three Oaks now comes forward with a

read four and one-half feet around

and weighing 26 pounds. Senator Calvin A. Brice, of Ohio who recently bought the C., J. & M. railroad, is contemplating an extenion north to Mackinac to connect with the D., S. S. & A., and a southern

extension to touch Alabama. The Calumet & Hecla company, sinking the Red Jacket shaft, cut the Osceola amygdaloid, which is exceedngly rich. The mine has already paid stockholders \$41.850,000 in dividends. and has resources today that will yield stockholders \$20,000,000 more.

Fifty survivors of the First Michigan eavalry were fittingly entertained by he citizens of Flint. The following officers were elected: Capt. E. M. Stevens, Caseville, president; Samuel Wylie, Albion, vice-president; G. W. Demorest, Lapeer, secretary and treasurer.

Gerald W. Jones, aged 22, of Detroit, took rough on rats and died at his The reason Jones took his own home. life was because he was not appointed as a regular fireman to fill one of the vacancies made by the Keenan & Jahn fire, where six brave men lost their lives.

Nathan J. Nixon, the sixth of the A R. U. men implicated in the Chicago & Grand Trunk wreck at Battle Creek. was arrested in Rochester, N. Y. Dixon was for many years conductor on the road. He has a wife and three chil-the Japanese at that place. A force of In default of \$10,000 bail he dren. was taken to the county jail at Marshall.

In the Michigan Central yard in Marshall, a man was crushed to death between two freight cars. The victim houses on the 20th inst. passed, by a was about 45 years of age and was ordinarily well dressed. Papers found on his person indicate that his name penditure which involved a total sum was J. Ward, a resident of Ontario, and a plasterer. He had been stealing

Rapid River, a little town at the nead of the bay a few miles from Escanaba, was greatly excited over the murder of Jesse Mercier, a young esident of that place. Andrew that place, shot Mercier, instantly killing him, because he, with a crowd of others, were making too much noise. White was captured.

Another surprise was sprung by detectives at Battle Creek by the announcement that Wm. R. Hall, for three years night switchman at the C. & G. T. yards, had been arrested as one of the perpetrators of the wreck The next day after the wreck Hall left the city and went to Chicago. secured a job with the C., B. & Q where he was working when arrested.

Upon testimony developed at the inquest over the body of Wm. Johnson, found dead in St. Joseph river, near Colon, with four bullets in his body, A. D. Swartz, brother-in-law of Johnson, and Milbourn Rockwell, the hired man of the family, were arrested the law prevailed, however, charged with the crime. It is alleged that Johnson had trouble with Swartz and recently went to law with him.

Christian F. Wetzel, an employe of was working at a ripsaw, when a piece of wood flew out and hit him in the been in the service of the company for

the University. The 2:15 p. m. incoming train on the Big Four road with 150 passengers nar-rowly escaped a disaster eight miles south of Benton Harbor, while coming through the Pipestone cut, one of the most dangerous points on this division. The train ran into an obstruction of oak plank and a fencepost, so arranged that it was only a miracle that disaster was averted. No clue to the villians who made the attempt.

War on pot hunters has been in-augurated in Dickinson county by state and county officials and half dozen arrests were made. Parties were caught in the very act of shipping venison out of the state. At pres ent there are fully 400 hunters from Ohio and Indiana engaged in violating the game laws of the county, and the officers are certain to make some extensive captures. Suits are also to be commenced against the transportation companies.

Several new cases of smallpox have developed at Manchester, but only two cases are reported in town, the others being in the immediate vicinity. The common council has forbidden all public meetings. The public schools are closed and a pesthouse established outside of the village limits. Circulars have been sent to parents requesting taken to prevent the spread of the disease. No deaths have thus far resulted, but more new cases will undoubtedly develop.

Samuel J. Archer, of Hesperia, coming to the freight and passenger depot. mitted suicide by taking morphine.

CHRONICLE OF NEWS.

EVENTS OF GENERAL INTEREST AND IMPORTANCE.

The Czar of Russia is Doomed to Die So but May Live Some Weeks-The Czarina and Grand Duke George also Very III. -Oriental War News, Etc.

London: Dispatches from Livadia and St. Petersburg regarding the illness of the czar show that no hope is held of his recovery, and the political situation of Europe is in suspense, waiting the end of the present ruler of the Russias and the beginning of a new regime when his successor shall have been crowned. One dispatch says it is in accordance with the usual course of of the czar's malady that he should still be able to rise and dress at his usual hour. Suddenly a spasm accompanied by diffi-culty in breathing attacks him and the nervous crisis is attended by sharp a rusty nail. It made a slight wound in his knee, but he at first paid no atthere are days when these distressing symptoms are entirely absent, and the imperial patient regains his normal spirits. The night time is the most dreaded, as sleep can only be obtained by ever increasing injections of morphia. In spite of the latest bulletins there is reason to believe his life may be prolonged by careful treatment, for

weeks if not months.

It is asserted that the physicians have now been compelled to turn their attention to the czarina, whose mind is said to have been seriously affected by the strain of nursing her husband and anxiety concerning the Grand Duke George, who is also ill.

JAPANESE REPULSED.

They Attack the Chinese Intrenched on the Yalu River-Other War News.

London: A dispatch received here from Shanghai says that, according to Chinese advices, a severe battle has been fought on the lower portion of the Yalu river. The Japanese are said to have crossed the river and to have attacked the Chinese, but, it is reported, after fierce fighting the Japanse were repulsed. Both sides are said to have lost heavily. The Chinese do not claim a conclusive victory, but they declare that they still maintain their position. No confirmation of this dispatch is obtainable, but it is thought probable that fighting has actually occurred.

Negotiations for Peace. London: A dispatch received here from Shanghai states that negotiations for peace between China and Japan have been reopened.

Yokohama: Several hundred natives of Collada, Korea, have risen against Japanese troops has been dispatched to the scene of this disturbance. The Japanese diet has manifested the greatest willingness to grant everything unanimous vote, the bill introduced by of \$150,000,000.

Americans in China Will be Protected. Washington: A cablegram received at the state department from U. S. Minister Denby, at Pekin, is calculated to reassure persons who have friends in China and who have been fearful as White, keeper of a house of ill-fame at the that place, shot Mercier, instantly the reports of danger to the foreign residents of Pekin are exaggerated. There has been only one instance of an attack on Americans, and adequate punishment was meted out at once to the perpetrators. A proclamation has been issued by the authorities enjoining protection for foreigners.

> A Monstrous Crime. Charles O'Neill, a Negro, was ar rested at Hicksville, O., charged with outraging Harriet Heckerman the 3year-old daughter of Mrs. Daniel Heckerman. The child was discovered unconscious in a barn and when she came to she told how she had been carried there by O'Neill. The latter admitted the charge and for a time it was thought he would be lynched. The law prevailed, however, and

Suicided Because Her Lover was Hurt. Anna Ringwalt died in the resort the Michigan Furniture company, at Ann Arbor, was killed by accident. He came from Detroit. She had a lover, George Fisher, a switchman on the Pennsylvania road, who had just lost head, causing almost instant death. his leg in an accident and the girl was The deceased was 60 years old, and had prostrated and under the doctor's care n consequence. She was left alone for 20 years. He leaves a widow and four a few minutes when she arose and took sons, three of whom are graduates of nearly half of the medicine which was used to quiet her and died in a few minutes.

> Killed Her Husband and Burned the House The conditions of the bodies of Silas fones and his wife found dead in their partially burned home, near Knoxville, O., together with surrounding circumstances, leads to the belief in the community where they lived that the burning of Jones' house and their death was not accidental but that Mrs. Jones in an insane condition murdered her husband and burned the house over them.

> Mrs. Luther Bailey, of Vergennes while temporarily insane, committed suicide by taking poison.

Liberty Center, O., was almost totally destroyed by fire. The entire business portion of the city, together with a number of residences, were consumed. The fire was incendiary. Loss, \$100,000. Three suspicious characters have been arrested.

Eugene Schaweker, 31 years of age, a wholesale grocer of Cincinnati, committed suicide at Mt. Carmel cemetery, at Baltimore, on the grave of his first wife by shooting himself through the heart. He left a letter to his second wife begging her forgiveness. A dispatch from Berlin says that a

Copenhagen paper published under reserve a statement that the czar intends to change the succession and appoint his third son, Grand Duke Michael, heir to the throne, owing to the czarewitch's political views, and to the fact that the illness of his second son, Grand Duke George, precludes his succession.

CITIZENS SHOT BY TROOPS.

Bloody Tragedy at Washington C. II. Ohio, While Trying to Lynch a Negro. William Dolby, colored, who criminally assaulted Mrs. Mary C. Boyd, aged 55, at Parrots Station, near Washington C. H., O., was captured at Delaware and taken into court. An angry mob gathered about the iail after Dolby had been identified by his victim, and Sheriff Cook called to his assistance the local militia company. This action increased the fury against Dolby, and Gov. McKinley was appealed to for additional assistance, and troops from Columbus were sent; Colonel Colt in command. The mob attempted to take Dolby from the officers when removed from jail to the court house for trial, but were kept at bay by the free use of bayonets. Deputies with revolvers drawn guarded the prison into the court room. Dolby cried like a baby, and pleaded guilty. He was promptly sentenced to 20 prison. The prisoner was then taken to the grand jury room. A mob gathered about the court house and it was impossible to get the prisoner through to take him to the train.

The mob kept Dolby and his guards prisoners in the court house until 6 p. m., and then made an attack. The militia repelled them without firing at first, but at 6:45 p. m. the south door was forced open. This door opens upon the street, which was filled with men, women and children. The detachment of the guards finally fired on the attacking party. A dozen or more persons in the street were struck, two killed outright and four more were fatally wounded, one having since died. Nearly all of those shot were merely

spectators.
Smith Welsh, aged 16, died in an hour; Jesse Judy, aged 25, mechanic, shot through the heart; W. G. Johnson, of Kyle Station, Butler county, shot through the stomach; William Sams, shot through the bowels, fatally George Keating, aged 14, shot through both legs and groin, will die; T. L Niederhaus, an old and prominent citizen, was shot through both ankles. A full list of the wounded cannot be had, as they were taken away promptly, but six are known.

The people were frenzied and threatened to dynamite the court house. Additional troops were ordered from Cincinnati, Columbus, Chillicothe and other points.

Japs Win Again-Big Battle in Prospect Shanghai: It is reported that Port Arthur, the Chinese stronghold where the fleet of China has been refitting after the battle fought off the mouth of the Yalu river, has been captured by the Japanese.

Wi Ju, Korea: The Japanese and Chinese armies are facing each other on the banks of the Yalu river. Both are perfecting their arrangements for a battle. Field Marshal Count Yamagata, commander of the Japanese forces, is awaiting the arrival of supplies and heavy artillery. Spies report that the Chinese army is 25,000 strong.

Two Nuns and Two Patients Burned The worst fire in the history of Houston, Texas, broke out at 2:40 a. m. and before it was placed under control. at 4:30 o'clock two sisters of St. Joseph were burned to death, two infirmary patients perished and a third sister was dangerously injured. A property loss of \$500,000 was sustained by business property.

Two Killed in a Boiler Explosion. The boiler of Henry Waters' planing mill exploded at Carey, O., tearing half the building into fragments and fatally injuring the engineer, Soloman Sterling, who was buried under the debris. Jack Green, a laborer, had his left leg torn off and will die. Tom Hart was blown out of the second

story window, but escaped injury. Two Girls Burned to Death. The residence of Herman Berthold at Green Springs, O., was destroyed by fire. Barthold and his wife and son escaped with their lives. Two daughters, aged 12 and 7 years, were burned to death.

NEWS IN BRIEF.

A G. A. R. post of 16 members has een organized at Harrisville. Theo. Ammerman and Wm. Lains vho were wounded by militiamen durng the lynching riot at Washington H. O. have since died. This raises the number of victims to five. Relatives of the dead talk of bringing civil and criminal proceedings against Col.

Agents of the Pacific Express company in the Indian Territory have been instructed to discontinue the handling of money. This action is the result of the frequent depredations made by bandits without interference on the part of the federal or the Indian Territory government. The result is that already the wheels of commerce have been clogged by the absence of money, and complaints are beginning to be heard.

An international anti-gambling association has been incorporated under the laws of Illinois and with headquarters in Chicago. The incorporators have heretofore taken active parts in moral reforms. The organization is the outgrowth of the antigambling crusade in Chicago and the purpose is to enlist lecturers and otherwise excite and crystalize public sentiment throughout the country

against gambling. The medical fraternity is agitated over a remarkable case of the recovery of sight and hearing by Wm. Jennings, of Zanesville, O., who is 88 years old. He has been paralyzed for 10 years, and for three years has been deaf and blind. A few days ago his daughter walked into his room to extend the morning greeting, and was surprised when he recognized her by sight, and when he showed that his deafness had nearly disappeared.

At Latta, Paulding county, O., as the express messenger on the eastbound Nickel Plate train was throwing off packages, a strange man picked up a package of fur garments and started to run. The messenger fired, hitting the robber in the side. He droppe the package and escaped after a halfmile chase, being picked up by a buggy with two men, evidently waiting for him. His entire route could be traced by the blood he lost.

Byron Eby's house at Mifflin, O., was robbed. At Jeromeville Marshal Isaac Heffelfinger tried to arrest the robber, but the latter shot him in the right breast. He will die.

Another Big Train Robbery

Four men, unmasked, approached a section gang on the Texas & Pacific ailroad near Gordon, Texas, and forced them to obstruct the track and flag a west-bound passenger train as it approached, and when the train had stopped the bandits scared the express messenger into opening the door of the car. They then forced the section men to try to batter the combination off the big safe with a sledge-hammer. but their attempts were futile. They did open the small way safe and thus secured about \$5,000. The next day being pay day at Thurber at the mines there was in the big safe about \$30,000 consigned to the Pacific Coal company at Thurber.

Brutally Beaten and Assaulted by a Negro A Negro went to the home of Mrs. Catherine Niebling a widow aged 53, in the outskirts of Newark, O., knocked her insensible, tied her hands and gagged her with strips of clothing, outraged her person, threw her into the cellar and disappeared. Half an hour later she recovered and crawled to a neighbor's house. A physician found Mrs. Niebling's nose mashed, her body badly bruised and lacerated, and her nerves prostrated. The police immediately arrested Simm McGruder and his brother and Ben Ward. Mrs. Neibling identified Ward as her assailant. He was jailed and heavily guarded for fear of lynching.

One Quantico Train Robber Caught. Chas. A. Morganfield, in attempting o get on a train at Chester Park, O. lipped and broke his leg. He acted suspiciously in refusing to go to a hospital or to receive medical attendance. He was placed in charge of the basin, she had flung mouse, sugar and police, who are of the opinion that he is one of the Quantico, Va., train robbers. He was loaded down with money of all kinds and answers the description of one of the thieves.

Turkey. WEEKLY REVIEW OF TRADE.

NEW YORK.-Bradstreet's trade review say With few exceptions the leading features of the business situation the past week have been these of continued moderate improvement although the total volume of business will require considerable expansion to compar favorably with corresponding totals two year ago. This relatively favorable bank clearing report is offset in part by a decline in prices of ago. This relatively favorable bank clearing report is offset in part by a decline in prices of staples, coffee alone scoring a slight advance Nearly all the more important business centers west and northwest report moderat activity, but few of them announce any new features. Conditions prevailing at Cieveland Cincinnati, Louisville, Detroit, Milwaukee and St. Paul in preceding weeks are practically St. Paul in preceding weeks are practically without change. The production of iron and of Bessemer steel continues as heavy as here tofore, and quotations have been further shaded. Lard is lower in price and the pros-pect for cessation of textile labor difficulties at he cast has weakened the print cloth market As serious as any decrease is that in cotton.

As serious as any decrease is that in cotton.

New York.—Dun's weekly review of trace, says: Cotton below 6c and wheat below 55c, in New York City, each lower than ever since present classifications were known: exports of gold instead of products at such prices in October, were the salient features in business last week. Distribution of goods to consumers goes on fairly, with gains at nearly all points in comparison with last year, but far below that of 1892, and not yet at a rate to sustain the the present volume of manufacturing production, so that prices have weakened. With many features of encouragement business has not yet reached expectations and it is evident that the loss of part of the corn crop and the unnaturally low prices of other great staples, affects the buying power of millions. Domestic exports from New York in two weeks of October were 18 per cent less in value than last year, while the increase in value of imports has been 27 per cent. With this heavy increase in purchases, and a decrease, in sales of products abroad, the market for foreign excange is in a position to be quickly affected by withdrawals of capital or apprehensions regarding to future peace of Europe. It appears that three New York trust companies new hold over \$40,000,000 idle money and that castern mill loans are being taken from New York by New England banks, while the northwest. ern mill loans are being taken from New York by New England banks, while the northwest by New England banks, while the northwestern demand for noney is unusually small. The treasury is again falling backward in reserve and large imports yield less revenue than last year, while the internal revenue for the past three vecks is \$4,600,000 smaller than a year ago. During the past week the failures have been 253 in the United States against 341 last year, and 43 in Canada against 39 last year. last year, and 43 in Canada against 29 last year. W. E. Stauffer, a well-dressed man of about 24 years, engaged a room at

Dooner's hotel at Philadelphia, and five minutes afterward shot himself in the left breast with a revolver. Stauffer registered from Ashland, O. The bullet was extracted from the back. Stauffer said that his act was the result of a love affair, and one of three letters which he left was addressed to Miss Lois Starr, of Ashland, to whom he referred as a lovely girl. He will die. At Sacramento, Cal., Otto Zeigler, of San Jose, covered a mile in 1:50. The ding was under proper supervision

official.

SOME "PROFESSORS."

They Make Self-Respecting Men Glad to Drop the Title. Nowadays the professors in our colges would do well to be addressed simply as "Mr. Smith," "Mr. Jones,"

the title "professor" being no longer distinctive. A short time ago, as I walked through the hall leading to my boarding house bed room, I was surprised to see the door open and a man on his knees in the corner. I inquired of the

chambermaid why he was there. "Oh, he's all right," she answered

'He's Professor Wilkins.' Professor Wilkins! Had the man suddenly gone mad? asks Kate Field's Washington, or had he discovered some new specimen of unimated nature in my apartment?

"Why did you bring him up here?" I asked. "I always wish to have callers wait for me in the parlor."

"Oh," giggled the girl, "what would he be in the parlor for? He's Professor Wilkins, the mouse man. Some of the boarders complained there was mice in the house, and he's looking

for them." When I interviewed Professor Wilkins he informed me that he was a professor of rodentology, and I found that his mind really had a scientific turn. He gave me some interesting facts in connection with the mousebatching business. One tale was of a lady who was sued by her maid for damages, because, in her terror at discovering a mouse in a sugar

casin at the girl's head. Another story illustrated the influence of certain conditions on dreams. The professor assured me that one of his customers dreamed of nice whenever she ate cheese.

On the register of a hotel in a Western town I read; "Professor Pekkins and staff." A geological survey was in progress. Probably, I reflected, Professor Pekkins was conducting it.

That night, through the transom of my door, I heard an unusually penetrating voice instructing a class, but the subject was not geology. The stranger was giving points to his agents on setting forth the merits of a certain soap. The principal point was the purity of the ingredients. The oil was of such a quality that in the soap factory, at the lunch hour the operatives left the butter provided for them, preferring to dip their bread in the sweet and delicate oil. This was no reflection on the butter, which was the best creamery.

I was so interested in this stranger that I inquired of the clerk: "Who has the room opposite mine?"

"Professor Pekkins and two of his staff." Professor Pekkins was a professor

of savonology. Professor Null, tonsorial artist, lives across the border. Shortly after his marriage, walking with his darkskinned bride, he met a customer, one of the 400 of his city. "Mistah Blankins," he exclaimed, blocking the way of the astonished man, "Mistah Blankins, pahmit me to intahduce Mrs. Professor Null. Mrs. Professor Null Mistah Blankins."

RICH AMERICAN ARTISTS. Some Make \$35,000 a Year, and a Num ber Run Into Five Figures.

Eastman Johnson, devoting himself exclusively to portraits, has a regular income of \$35,000 a year, says Art Interchange. Mr. Huntington, long the president of the academy, has \$30,000, while a number of men not exclusively portrait painters, such as Messrs. Chase, Blashfield, Beckwith, Millet. and H. O. Walker, derive a large portion of their incomes from that branch of their art. Again, there is a group of men who do not attempt portraits, and whose incomes rise to a pretty figure up in the thousands. In this group stands Messrs. Inness, Gifford, Tryon, Homer, J. G. Brown, Low, La Farge, Hovenden, Blum, Poore, Bolton, Jones, Maynard, Horatio Walker, Wiggins, Church and others, none of whose incomes will fall below \$5,000, and several of which will run above \$20,000. In such a classification no account is taken of our popular illustrators, men like Remington, Frost, Castaigne and Smedley, whose work in black and white brings them handsome returns. In addition, there is a large number of men not so well known who receive considerable sums annually from the book and magazine publishers for their work in black and white, which supplements the incomes derived from painting pictures. On the whole it would seem that our artists were a more fortunate class than our literary men, for of the latter it is said that less than twenty receive sufficient incomes for their writings alone to support them, while it may be set down as a positive fact that more than forty of the artists receive

Aluminum on Glass.

incomes of \$5,000 and over.

M. Charles Margot, of the physical aboratory of the university of Geneva, says L'Industrie, has just made a curious discovery. He has found that by rubbing on glass with an aluminum point we can obtain clear metallic lines, which cannot be removed by washing no matter how often repeated. This property which aluminum possesses of adhering closely to glass, or in general to any substance having silica as its base, is most plainly shown when the surface is dampened or covered with a very light coat of moisture. as, for instance, when a man breathes upon the surface of the glass. An indispensable condition is that the glass

In a Different Sense

and aluminum point shall be clean.

Chollie-The idea of a man sendng a business letter with a P. S. Chappie-Doosid bad form, surely Chollie-But that isn't the worst of it. In this case it means .Please and L. A. W. rules, which makes it | Settle."

MY JO, JOHN.

BY HELEN B. MATHERS.

CHAPTER VIII—CONTINUED. She put the letter back, and re-

placed the coat. Dusk was falling when John Anderson lifted his latch and came in. The hall lamp was not lit. Through the open dining-room door he saw

the table laid for one. He passed into his study, and looked at his books—those beloved books that Mary had been so jealous of, since they robbed her of many an hour of his company! He might sit at them now as long as he liked-

there was no one to rebuke him, no him, and love was gone. There was nobody to notice now if he went out all askew, nobody to wouldn't go out walking with him

for worlds-then tie her bonnet on. she had forgotten to sew on a button, for she did all those things about money." for him herself, and never trusted the maids. Perhaps he would understand soon, when no one cared how long he read, or how late he sat up. that her grumbling had sprung from love-love only-because she loved him so that she could never weary of his company, however much of it

Mechanically he looked in the glass, and half lifted his hand to twist his moustachios as she liked to see them, and then he remembered, and his hand fell to his side.

The cook came awkwardly, with unaccustomed cap and apron, and called him to dinner, to which he went obediently, feeling like a stranger sitting at his own table, and with a weight of misery on his heart that rose up to meet each mouthful and nearly choked him. What was it that he missed, and

that he was so lost without? And this is what he missed. The little railing voice that could be so sweet and say such true and tender things . . . the officious little hand (that his own swallowed so easily) which never wearied of

serving him, though often it would vex his soul by disarranging his table . . . the blithe little presence that never suffered dullness or ennui to come nigh him, and that so amply supplemented and filled out his quieter nature that, until it was withdrawn, he scarcely knew whence the sunshine came . . these were some of the things he

missed. And then ran in his head those most pathetic lines out of the Lay of

Virginius: "And none will weep when I go forth,

Or smile when I return,
Or sit beside the old man's hearth' Suddenly he sprang up, and went

into his study.

There were writing materials among the litter, and he seized them

and began to write. MARY (he said) .- You have left me, and for a reason I deplore, but it is one that I can-

not alter, and I must bear the miserable con-sequences of italone. God help me, for you will not, and I have been too supremely happy with you in the past to go on livin; beside yo under our altered circumstances.

'God bless you, good-bye.

'Your Jo. John.'

CHAPTER IX. Mother!"

"Yes, Tom?" "The poor old dad must have gone off his chump!"

"Not a bit of it. He was more reasonable, and standing more by himself, you know, Tom, than he has

done for wears." Mother and son, who had been walking along comfortably, with their arms round each other's should hanker after strange women shoulders, stood stock still to look was past Tom's comprehension. at one another, and woman-like she suddenly observed how much bigger got some wrong idea in your head, and broader he had grown, and ex- and that you wrong father I am cer claimed, at the change in him:

on me for everything, and now you are grown up, and soon you will have secrets of your own-like your father-and be getting a wife, and of course you will like her best. Po and asking me to forgive him. But you remember," she added, in that I have not dorgiven him and I will tone of eager looking back which is not. Only you must not be unkind never used by a woman who is happy to him, Tom, for it is no sin against in the present, "how you asked me once which I loved best, grandma or you? I said 'you,' and was rebuked Look at the light falling on that by your telling me that one should

love one's mother best!"" Dear little mother," said Tom, kissing her tenderly, and so I always shall-at least until I find someone better than you."

They had come out for a walk and a talk together, choosing the path all the loveliness around will not to the wood, and under other circumstances Mary in such company would have been enjoying herself down to the ground.

"You know, Tom," said Mary, her tired eyes roving from the wind flowers to that delicate white wonder of the woods whose trefoil leaves are folded like a heart, "your father and looking anxiously at the slender was always quiet and absent-minded, hand that she had slipped into his, I

silent and self-absorbed that there the rings were slipping off it. was no getting a word out him, and then he took when I asked him, would not tell me where he went, and I got snappish and-and rude, Tom, positively rude."

"Worried about something," said Tom, thoughtfully.

"And he would not answer me, Tom-always answer your wife, dear, when you have got one, unless you wish to drive her mad-and always, always give her the last word." "I think dad always let you have

that, mother," said Tom broadly. "But I behaved very badly that day—the day a separation was agreed upon," said Mary, hanging her head and flushing vividly. "I-I actually father, and I have seen them whisasked him to hit me, Tom, that I pering together at church, and I can might get a divorce.

"Mother!" "Yes, Tom-may Heaven forgive ne! Did ever you know such an unwomanly woman? And I said-O! I thought it clever then, but I see now how vulgar it was-I told him that after all I didn't want a divorce, as I might get married again, and I didn't want to make a second mis-

take!" Tom put up his hand to hide a grin, he thought his mother had

been going it with a vengeance. "Dad knew you didn't mean it," he one to care if he did, or didn't. said soothingly. "It isn't your way It was only love's eye that wanted of talking at all. But has it struck you, mother," he added with sudden gravity, "that perhaps father has been losing money? You know if brush him up, to tell him he was our youngest child does get an idea a disgrace to be seen, and she into his head, it is generally a wrong

one " "No," said Mary with her head in and go out with him as pleased as the air, "it has not struck me at all. Punch! There was no one to be Mr. Goldsworthy has managed our sorry now and look a culprit because affairs for years, and he would never allow it. No, it is nothing

Mary, like most women, would prefer to hear that her husband had lost every sixpence that he possessed rather than know that the smallest corner of his heart had been filched from her by another woman.

"Then what have you quarreled about, mother?" said Tom point

blank Mary blushed.

How could she tell this boy that his father was treating her so ill? Naturally he loved his mother best, and the words would stick in her

"Your father does not care for me any longer," she said in a low voice. her eyes fixed on the blossoming "He was willing that we should separate, he hurried it up as fast as he could, and I don't believe he breathed freely till I was packed out of the place, and sent here like a naughty child in disgrace!"

"But mother," said Tom helplessly. "Dad simply adores you, he thinks of no one on earth but you, and he did not even take me into a momen's consideration. There must be some frightful misunderstanding somewhere.

"No," said Mary doggedly. "there is none."

"He never even cared to cultivate his friends," went on Tom. ··He seldom spoke to a man, and never

looked at a woman." Mary's cheeks flamed and her eyes flashed, thereby letting in light on Tom's not altogether unsophisticated

"Wh-e-w!" he whistled. "Why, mother," and he began to laugh softly as at an irresistibly absurd idea. "fancy the poor old dad flirting! Why he doesn't even know the way!

and if he did he's much too lazy to take the trouble!" Mary made no reply, and tried not to look unutterable things.

"I think, Tom," she said after little pause, "that some weak people find the courage to do things that strong people are positively afraid to do, and they will go on doing it too perseveringly, though they know it is wrong, and they suffer horribly for it right away through.'

Tom's face had grown very grave, even stern at his mother's words. "If father has been serving you badly, mother," he said, hotly, then paused abruptly. It was an upsidedownness of every thing that the "youngest child," the care of the whole establishment, should have revolted against the love that had always surrounded him, and that he

"Mother dear," he said, "you have tain. It is much more likely that he "Tom," she said, wistfully, "it has lost money, and is afraid and seems yesterday that you were a askamed to tell you, but feels he boy, a little innocent boy, depending cannot be with you and keep it back."

> "No," said Mary very distinctly. "it is no mistake and I read her letter, and he wrote to me admitting it. you-none at all. Pick me that hyacinth over there-how blue it is glade and thicket. I ought to be happy here ought I not? With such walks and drives—such a delicious little house, and my own mistress, Tom, just as if I were a widow, indeed! But I've found out, Tom," she added wistfully, "that even this wood and satisfy me. Nature leaves you out in the cold, somehow, and you must admire her in couples to get the human touch into your love for her. I

suppose that is why people all migrate to the big cities, they must be with their own kind or they perish. "Mother!" said Tom distressfully.

but for weeks past he has become so and which had grown so thin that CURES

"And when your vacation comes we will have fine times together. It to going out by himself, and, is like a glimpse of heaven your being here for these few days," she went on with feverish hurry, "and, oh, Tom! it's so good to have some one to speak to besides servants!"

"But there are neighbors," said Tom, looking up at the clouds drifting across the vivid blue, and thinking, though he was by no means poetical, that even so were the first clouds drifting across his own sunny life, "don't they call?"

"They called, of course," said Mary, holding up her head like a "the other one" who deserves whipping, "and they inquired for your pering together at church, and I can see as plain as a pikestaff that they think me a deserted woman. People always take it for granted it is the woman's fault, chiefly, I suppose, be-

a man, and so are not disappointed. "Mother," cried Tom, "you are growing bitter-not like you. And as to the people, let 'em talk," he added robustly, and the world let it howl! It howls outside, not in. If you have comfort and warmth and love indoors-

cause they don't expect anything of

"But I have not," almost whispered poor Mary.

"Sit inside, and laugh! What's the world?" continued the young philosopher, contemptuously. "Will it feed you, clothe you, warm you, bury you? Not much. But it will take the last morsel of cake out of your mouth to feed itself, and handsomely provide you with a character that might be that of your worst enemy for all the resemblance it

bears to vourself!" "Really, Tom!" said Mary laughing a little, as the young fellow paused for breath, "Oxford is ceryou are a little hard on the world, after all. What is it composed of but suffering, erring creatures like ourselves, who may be in worse trouble than ourselves, at any moment, or who may die even while they are blaming or pitying us, and isn't the outside opinion, I feel, Tom, it's the loneliness in the house, by the hearth and here,"-she pressed her hand upon her breast as if to

hold down her heart. "Little mother," said Tom, to whom the sunshine had suddenly grown dim, and all the loveliness around a mere callous hard-eyed selfishness, that understood nothing of human misery, "I shall leave Ox-

ford and come home to you." "And spoil your career" said Mary calmly, and blaming herself bitterly for having loosed the vials of her speech and sorrow. "Never! I shall do very well here till you come back, and your Aunt Mamie is coming home next month. She will

come straight to me, of course." "Then I shall go to father," said Tom resolutely, "and get to the bottom of this miserable affair. I'll never believe that dad looked at any to diphtheria, but it is also a certain other woman but you, or that so true gentleman as he is, could behave

as you think he has done." "Think?" said Mary fiercely. "Look here Tom. There's an old proverb. "Twixt bough and trunk place not the finger,' and you must not interfere in this thing-I will not have it. If you brought your father down to-morrow, I would walk

out of the house rather than the same roof should cover us." Mary had risen, and was walking capidly homewards, just as if the delicious winding ways of the glades were not set thick with loveliest surprises, not one of which would last year have failed to ravish her

happy eyes. "But I shall go all the same," said young Tom to himself, nodding as he followed her, "and if they won't kiss and be friends, I shall just chuck up the 'varsity and come home and take care of mother."

[TO BE CONTINUED.]

The Coming Cab. Eastern and Western cities are getting to resemble each other so much that the few points of difference between them are naturally noticed. About the only difference on the nacks, which out West seem to be cd by the system from the throat. built for weight and strength alone, while in the East the European craze for lightness is rapidly taking hold. One or two cabs with tinplate bodies have been imported. They weigh less than 1,000 pounds, and are wonderfully pleasant riding on fairly good streets, although they are not very nice when driven rapidly across street car tracks and obstructions. The English style of eab is also getting more common in the East, and although these vehicles have been held up to ridicule for more than a generation they are

hacks which ply for hire in Western cities. Many Forms of Macaroni. Persons accustomed to see only one form of macaroni on their domestic tables are astonished at the many varieties shown by macaroni dealers. There are at least forty forms of the article, some of them interesting and artistic, as the macaroni and egg, in which the paste has a yellow hue, is formed into discs two and a half inches in diameter, and stamped with various ornamental devices. This retails at ten cents a pound. There are half a dozen others quite as dis-

vastly superior to the very heavy

tinctive. No Longer Owls. Jess-They had been married a month before her father suspected it. Bess-What aroused his suspi-

cions?

DIPHTHERIA.

KOCH'S GREAT DISCOVERY EX-PLAINED BY DR. CYRUS EDSON.

By His System of Treatment, It Is Claimed, Absolute Protection Against Diphtheria Can Be Given and in Its Early Stage the Dread Disease Itself Can Be Cured.

One day last week a dozen or more newspaper reporters gathered at the aboratory of the board of health, according to the New York Sun. It is an interesting place. It is there that child in disgrace who knows it is the existence of germ diseases is determined.

The reporters witnessed experiments and heard a few brisk, clear explanations on a subject of vital interest. It concerned an investigation that had been going on for a year and has reached results which should be greeted

Colonies of Diphtheria Bacilli. with grateful satisfaction by the per ple of New York. The meaning of it all was best expressed by Dr. Cyrus

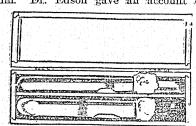

Edson when he said: Let me say, in conclusion, that if we were furnished with such means as we want and for which we shall ask, we could save 1,200 lives before the end

of another year. These figures show the mortality each year from diphtheria, a disease so quick in its course and so rapid in its spread and so fatal in its results that tainly expanding your idea's. But it is feared by all physicians. It is most dangerous in cities, because it is apt to spread in the congested regions where people swarm in tenement houses

like ants in a hill. The New York board of health was the first under any government to conduct a systematic examination of cases of suspected diphtheria. Since it was so it is our turn to pity them? It started men have been sent here from the principal cities to study the system, and many inquiries have been received from European capitals. More than 10,000 outfits for the culture of bacilli of diphtheria have been sent to cities outside of New York, and it is now c rtain that the system as founded here will be adopted in all ceneters of population where the boards of health have the energy and ability to keep pace with progress in medical science.

But all the work done so far by the health department is only preliminary to the establishment of a plant that will lessen the mortality in New York greatly. The anti-toxine treatment for dirhtheria is carried am in the Koch institute for infectious diseases at Berlin, will, if money needed is appropriated, become a permanent feature of the health department. The tremendous importance of this treatment may be judged when it is said that, according to experts, it not only affords protection to people who have been exposed

cure for the disease in the early stages. health department sent Dr. Herman M. Biggs, chief inspector of the bureau of bacteriology and disinfection, to Ber-lin. Dr. Edson gave an account of

The Tubes and Cotton Swab the treatment to the reporters.

said: "One of the most important and significant features of the treatment depends upon the absolutely innicuous character of the remedy, it having apparently no influence, either favorable or unfavorable, in health or in dis ease, excepting as to its power of neutralizing the poison of diphtheria; so, while it has enormous capacity for good, its use is absolutely devoid of danger. The treatment is based upon

the following observations: "L In diphtheria, death as a rule is due to the poisoning by a chemical substance (a toxine) produced by the diphstreets is in regard to the cabs and theria bacillus in the throat and absorb-"2. A certain degree of immunity, which is temporary only, is afforded by

one attack of diphtheria, and this immunity is the result of an arquired tolerance to the 'toxine.' This applies to both animals and man. "3. If large animals, such as horses, cows. goats. etc., are inoculated with minute but increasing quantities of the 'toxine' as derived from cultures of

the diphtheria bacillus, they become

gradually tolerant to its poisonous action, and will withstand the introduction of larger and larger quantities through the immunity which is acquired from smaller doses. "4. The immunity thus produced is the result of the development of the blood of some substance (anti-toxine) which has the power of neutralizing the p ison (toxine) produced in d'p theria, and in animals which have been highly immunized (i. e.: capable of withstanding very large doses of the

'toxine' though repeated inoculations of

doses minute but constantly increasing

in size), the blood, even in small quantities, acquires the power of neutralizing very large, even fatal, quantities of the 'toxine. "5. When animals have thus been immunized, blood is withdrawn from the circulation in quantities varying with the size of the animal, and is employed through injections underneath the skin for the treatment of cases of diphtheria, and the anti-toxine thus introduced neutralizes the toxine absorb-

ed into the circulation of the sick person from the throat, and thus renders him artificially insusceptible to its action. By this method it is apparently possible to protect persons from the con-truction of diphtheria when they have

been exposed to the disease and infected, if the symptoms have not yet appeared, and also to cure nearly 100 per cent of cases where patients are ly treated in the early periods of the disease. Unfortunately, however, for the rapid and general use of this substance for the treatment of diphtheria. its production requires the constant surveillance of skilled and trained men. A comparatively long period, often four to six months, is necessary to render animals immune to the disease so that their blood can be employed for the treatment, and finally, when thus rendered immune, they can furnish only sufficient blood, as a rule, to treat a comparatively small number of cases. Therefore the production of the substance must necessarily be costly, and it can only be produced in

sufficient quantities and be placed at the disposal of poor people by municipal and state sanitary authorities."
The conclusion of Dr. Biggs are that any person exposed to diphtheria can be rendered immune to the disease if the symptoms have not already developed, and that if cases can be treat ed within the thirty-six hours, or perhaps fortyeight hours of the disease the mortality may be reduced practically to zero. After that time the val-

ue of the treatment becomes progres-

Until very recently the health department treated diphtheria as it has treated other infectious diseases. Inspectors were kept on duty in infected districts, disinfection was carefully provided for and infected persons were isolated. All authorities agree that it is difficult to determine from the symptoms whether the case is genuine diphtheria or pseudo or false diphtheria. For instance, the bacteriological examinations of cultures at the Willard Parker Hospital showed that from 30 to 50 per cent. of the cases were false diphtheria. To insure accurate diagnoses a new system was started under the charge of Dr. Biggs. Dr. William H. Park and Dr. Alfred L. Beebe are the assistants of Dr. Biggs and the results reached are to be credited, in a large degree, to their

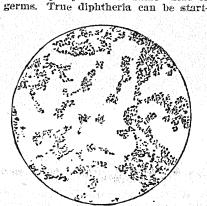

watchfulness. It is a harmonious arrangement be tween the health officers and 95 per cent of the physicians of the city. There are now forty stations at drug stores in different parts of the city, the majority being in the sections where the population is crowded. A physi-

Bacilli of Diphtheria.

cian finds a case of suspected diphtheria. He has no means of knowing whether it is a case of true diphtheria or useudo diphtheria. Under a powerful microscope the fresh bacilli in each case looks very much alike. All he has to do now is to run a swab of fleecy cotton along the membrane of the patient's throat and thus gather some bacilli. He then places the swab carefully in a glass tube, which is sealed, sends the package to the nearest station and notifies the health department that he has ac use of suspected diphtheria. An agent of the health department makes the rounds of the stations and collects the labeled tubes each day, or if the call is urgent he makes an extra trip to the station nearest the section where diphtheria may be contagious.

The tests at the laboratory where the tubes are sent are made and reported upon within twenty-four hours. Dr. William H. Park, or one of his assist ants will remove the swab and rub it gently over the surface of a bit of serum or coagulated blood. The bacilli fall unseen from the swab onto the serum. Dr. Park heats a long platinum wire over a gas jet, passes it over the serum, and removes the bacilli with the wire. The wire in turn is rubbed on a piece of glass. This glass is put into an oven kept at blood heat, and there the bacilli are developed. When finally the glass is removed the bacilli have stretched in long irregular lines. that is if they are the true bacilli of diphtheria. The bacilli of false diphtheria would be in round spots. Then again, the slide glass may be covereed with a fluid which will show the two forms of bacilli under different colors. The tests having been completed and the nature of the disease having been established a report is immediately forwarded to the physician who sent the swab and he treats the patient accordingly. If Dr. Park desired, for scientific reasons, to make a more complete or a final test, he would put the bacilli in beef tea and inject hypodermically into the skin of a guinea pig. Guinea pigs are preferred, because they always

react equally to the same dose of

False Diphtheria. ed by rubbing the germs upon a wound mucous membrane of the throat, but this would cause the animal to suffer. After the broth culture is injected the animal becomes drowsy in the course of twenty-four hours and dies a painless death. Dr. Park dissected a guinea pig before the report- and audibly praise the goods displayed ers, and showed the congestion under the point of injection. The changes are the same that take place in a man who dies from diphtheria.

THE MODEST POTATO

In Occasion When They Tasted Almost Too Good for Eating.

"The potato," remarked the Montanan, "is a vegetable which does not command any great admiration or respect in a country where it is plentiful and easy to get. In fact, it is considered a low-down sort of an affair and is generally spoken of with derision, not to say contumely, by those who eat it because it is served every day, and do not appreciate its many good qualities.

"Now, when you have been without potatoes for awhile, because you could not get them, not because you didn't want them, you will begin to think the potato is a bird of rich plumage and high degree. It is strange what a hold that simple tuber has on us. It is more a part of our daily lives than we think. I spent the last three years along the line of the Great Northern road, where I was storekeeper for one section of the contract. We had a good many thousand men working on the road, and most of the stores for a great portion of them went through my hands, or, rather, were handled under my direction. When we were on the last stretch of the road in Montana and Washington the supplies of vegetables ran out, and we were compelled to live for three months on canned peas and corn and such truck as that. Finally, they got a car-load of fresh vegetables through to us. Three-quarters of the car was loaded

with potatoes and the other quarter with onions. "On the day that car arrived in camp there was a general jubilation. The cook announced that he would serve potatoes in every style at dinner, and all hands were there to take a whack at them. I forget the number of bushels the cook fixed up, but that is immaterial, for if I were to tell you, you would not believe me. The men ate them until I thought they would all be sick. There was one man though, who made a record. His name was Murphy (singularly enough n the light of his achievement), and ne was an assistant time-keeper. He got to the table early and stayed late, and while he was there he ate thirty seven good-sized potatoes, and ther leaned back and said that never in his

TEA CULTURE IN AMERICA Segun Ninety Years Ago, It Has Advanced to a Promising Stage.

life had he tasted anything so good.

The cultivation of tea in the United states was attempted first by the French botanist Michaux, who, in 1804, conducted a series of experiments in South Carolina. Since that the climate in the neighborhood of Charleston has been generally regarded as favorable, and the ultimate success of the experiment has not been unexpected. Until recently, however, the experiments have not, according to the Montreal Herald, been altogether satisfactory. Little patches, in some instances large gardens, have produced tea of fine flavor, though generally it has been devoid of strength of infusion. It has been argued that this failure in pungency is argely due to defective cutting and especially to inadequate rolling of the leaf, in consequence of which the cup qualities are not fully developed. About ten years ago the national department of agriculture made the first serious attempt to produce commercial tea on a scale sufficiently large to arrive at a decisive result; and since that time a considerable share of the cost of procuring tea seed in Asia has been borne by the United States gov-

ernment. The most recent experiment has been encouraging. The experts of a firm of tea merchants in Baltimore have stated that the tea grown on the Summerville estate near Charleston is equal to English breakfast tea of the best grade and superior to many Chimese and Indian grades. The samples submitted were all of one quality and character. They were black, crisp and well scented. They made a strong beverage, and this fact was said to be due to the treatment employed in the processes of fermentation and curing. The firm thinks it highly probable that perfected methods of curing the American product will give tea similar to the various kinds that come from China and India; and it is freely prophesied that the American teas will be shortly able to enter into effective competition with the teas of the East.

The Earth Rocked for Ten Days. The greatest earthquake that has ever occurred within the limits of the United States since the discovery of America began in California at 2:30 o'clock on the morning of March 26, 1872, and continued until the 4th of April, during which time the surface of the earth was continually agitated not being quiet for as much as a single moment. The most remarkable thing in connection with the whole affair (especially when we consider that Mount Loa, Sandwich islands, and Mount Hord, Oregon, were simultaneously agitated) is the fact that the re gion around San Francisco did not receive a single vibration. The entire face of Inzo county, California, was changed and thin y-four persons killed.

A Queer Profession. "Window-gazing" is a profession in London. A couple of stylishly dressed ladies pause before the window of a merchant, remain about five minutes inside. Then they pass on to another store on their long list of patrons.

III the Chit-Chat From the Country Round About Briefly Told For Busy Readers,

KARRS' CORNERS.

Charles Damoud, of Highland, is visting at O. Maxfield's at present. Walter Marks has rented Neil Mc aren's farm for a term of years. Mary Muma has quit working for

Mrs. Burton and now intends going to We hear of sales about every day somewhere in the country. Somebody has got to win.

Paul Brown and sister, of Shabbona were visiting at Mr. Muma's last Sat-

urday and Sunday.
Duncan Battel and John Profit have returned home from working on the

James Ward visited Bay City last week and on his return home visited the lake shore and purchased a load of fish.

Pat Landrigan's bunty sheep escaped from the field last Tuesday evening and Pat can not find him. Anyone finding the same just let Pat know about

WEST GEANT.

Clyde King resumed work for Burnett & Shafer Monday.

A. McVicar and C. King were in Oliver Monday on busine E. Burdon, of Gagetown, was a caller

at Mr. Burnett's Sunday. Chas. Youngloye, of Bad een in our burg Sunday

L. Burk steps high now-a-days. baby girl at their place. Miss Gertrude Williamson is visiting

friends in Cedar Run at present. R. E. Mathews, of Washington, is igain in our midst. He reports dull

imes out west. Jas. Grea, of Detroit, attended the funeral of his sister, Mrs. T. Cosgrove, last week Sunday.

Mr. and Mrs. J. Body, of Nebraska, are visiting their many friends in this

locality at present. Wm. McKinnon, of Croswell, return-

ed home Tuesday after spending a few days visiting friends at this place. M. R. King finished his well job for Mr. Hare Monday, after drilling two hundred and ten feet. Both parties are happy over it. Mr. King will com-mence drilling for Mr. Summer's in the near future

ELMINOOD.

Mrs. Jas. Belknap was away visiting relatives part of last week.

R. Webster and wife spent Saturday and Sunday with D. Freeman's, in Cass

Mrs. L. H. Huffman has a sister from Petrolea, Ont., making her a visit at present.

Mrs. Wm. Ostrander, of Grand Rapids, is visiting with W. A. Lockwood's this week. Jas. Whitsell and daughter, of Green-leaf, visited at Jas. Whitsell's, of Elm-

wood, Sunday. Most of the farmers in this part are

all busy husking corn. The few who have tried plowing say it is very dry

A very pleasant party was held at Mr. Ewing's on Wednesday evening of last week. All those present had a very nice time

Ira Hayes had several fine sheep bad ly injured by dogs on Sunday night and called on Justice Webster Monday to appraise the damage.

Artie Hargraves made the trip from Caro to Elmwood on his wheel in thirty five and one-half minutes one evening last week. That is pretty good for only having had a wheel about two months

Quite a number of people from this part have visited the "wall" of Novesta lately and all agree that there is a wal there, so I guess Bro. Deford we, with the other skeptics, will have to believe

MICHAULANDIW.

Mrs. S. Ostrander is very sick at this Robert Brown now rides in a new double buggy

E. Flint, of Karr's Corners, Sundayed at S. Gale's. Herb Darling Sundayed with frieuds

in Novesta. Chas. McAvoyand wife, of Bad Axe, Sundayed at John Haggerty's. Jacob Maxwell, of North Dakota, is visiting with friends and relatives in

A. G. Houghton delivered a Populist address to a large crowd at Holbrook

Misses Nora Justin and Nellie Bailey of Novesta, visited several days at D. Hefflebower's last week. Miss Ida Marshall, who has been vis-

A republican rally will be held in the school Satarday night, Oct. 27. Several speakers are billed.

E. C. Babcock, of Sanilac Centre, de livered a Democratic address to a small crowd in the school house Saturday evening.

A large number of people pass by here every week mostly on Sunday, to see the noted stone wall in the swamp west of here. The general idea is that it has been a fort, but yet it is a myst-

Henry Kivel has purchased the building on the corner, of A. Wickware which he will fit up for a store. He will build a stone wall under it, and also side it.

Jas. Hiliker, our genial blacksmith, has purchased a drive barn of A. Wick-ware and moved it south of the shop. He will plaster it and make other improvements for a dwelling house.

CO WW HO TO HO A B. NO.

A. H. Ale, of Elkton, was in the burg

J. D. Owen was in Saginaw Wednesday and Thursday on business Jas. Gray, of Detroit, called on friends here the past week. Robert McKee has leased Jas. Mc-Kinnon's farm for the next year.

Jas. Anderson's smiling face was seen in town Saturday and Sunday last. J. D. exchanged his hay press for a horse the past week to Geo. Young, of

Grant. It would be interesting to know just how Jimmie enjoyed his walk Sunday

evening. Miss Mamie Hughes is quite ill at the present writing. Dr. Morris is attending her.

R. Ballagh drove over to Elkton Friday on business. A. H. Ale accompanied him on his return.

Special meeting at the Tent Saturday evening last which made quite a stir in town for a short time.

Sam Mosher, east of town, had a log rolling bee on Saturday afternoon last and got a good job done. Jake McKague exchanged his driv-ing mare for a pair of farm horses the

past week with Gagetown parties. John McCollum is pressing the entire stock of hay on the Ballagh farm south of town, which will be marketed shortly.

H. D. Hager has taken his departure from our midst to his old home in Marlette, where he will open a general store shortly.

Thomas Hughes and his mother re turned to their home in Ontario Friday, after a month's visit with friends

Some of our local hog buyers will look rather blue when they return from Buffalo Tuesday if things do not change su'donly.

Jas. Showfelt sold and delivered \$150 worth of sheep and hogs to R. Case Friday last. How is that for farming in this moral heritage, Jake? John McCollum purchased the Chis-

holm property, one-half mile east of town, from R. Ballagh the past week and will move in town shortly. Ben Armitage is laying very low

with an attack of typhoid fever at the present writing with but small hopes of a recovery, so we have learned. Ben White, of Caro, was in this part looking after his farming interests the past week. He was accompanied to his large farm at the above place by Thomas Davidson an old employe, who

goes to resume the duties as in the R. Ballagh and Pat Bliss, of Elkton. exchanged farms the past week. The former gets an eighty acre farm close to the village of Elkton while the lat ter named gentlemen gets the old homestead one and one-half miles south of this place.

Several parties in this locality will change their place of residence the coming week amongst those with whom we are familiar are: John Finkle will move from the Bentley farm to another in the town of grant, while C. Chisholm mill move from his old residence to the Finkle farm and John McCollum will reside in the Chisholm house; also Thomas Campbell will move onto the Ballagh farm, near Elkton, while Mr. Bliss will settle on his farm sonth of town, vacated by T. Campbell. Thus changes are constantly taking place in our midst.

Don't Stop My Paper.

Don't stop my paper, printer,
Don't strike my name off, yet:
You know the times are stringent,
And the dollars hard to get;
But tug a little harder
Is what I mean to do,
And scrape the cents together,
Enough for me and you.

I can't afford to drop it; I find it doesn't pay To do without a paper, However others may,
I hate to ask my neighbors
To give me theirs on loan;
They don't just say but mean it,
"Why don't you have your own?"

You can't tell how we miss it,
If it, by any fate,
Should happen to not reach us,
Or come a little late;
Then all is in a hubbub,
And things go all awry,
And, printer, if you're married
You know the reason why.

I cannot do without it, It is no use to try,
For other people take it,
And, printer, so must I.
I, too. must keep me posted,
And know what's going on,
Or feel, and be accounted,
A foggy simpleton.

Then, take it kindly, printer,
If pay be somewhat slow,
For cash is not so plenty,
And wants not few, you know,
But I must have my paper,
Cost what it may to me,
I'd rather dock my sugar,
And do without my tea,

So, printer, don't you stop it. Unless you want my frown, For here's the year's subscription And credit it right down, And send the paper promptly

And let it bring us weekly

D. W. Fuller, of Canajoharie, N. Y. says hat he always keeps Dr. King's New Discovery in the house and his family has always found the very best results follow its use; that he would not be without it, if procurable. *G. A. Dykeman, Druggist, Catskill, N. 7., says that Dr. King's New Discovery is undoubtedly the best Cough remedy; that he has used it in his family for eight years, and it has never failed to do all that is claimed for it. Why not try a remedy so long tried and tested. Trial bottles free at T. H. Fritz's Drug Store Regular size 50c. and \$1.00.

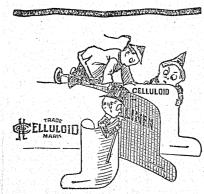

Did You Ever Try Electric Bitters as a remedy for your troubles? If not, get a bottle now and get relief. This medicine has been found to be peculiarly adapted to the re-lief and cure of all Female Complaints, exerting a wonderful direct influence in giving strength and tone to the organs If you have Loss of Appetite, Constipation, Headache, Fainting Spells, or are Nervous, Sleepless, Excitable, Melancholy or troubled with Dizzy spells, Electric Bitters is the medicine you need. Health and strength are guaranteed by its use. Large bottles only fifty cents at T. H. Fritz's Drug Store.

Bucklens' Arnica Salve

THE BEST SALVE in the world for Cuts, Bruises, Sores, Ulcers, Salt Rheum, Fever Sores, Tetter, Chapped Hands, Chilblains, Corns and all Skin Eruptions, and positively cures Piles, or no pay required. It is guaranteed to give perfect satisfaction or money refunded. Price 25 cents per box. For sale by T. H. Fritz.

A wealthy man endeavored to show That Fortune comes to those who advertise A poor man said "'Twas money thrown away' And seemed the other's logic to despise.

They argued long till each to his own view, Unknowing had the othre one converted The rich man hastened to withdraw his ads The poor man rushed to have one inserte A year or more it is, I trow, Since those two men thus argued and conversed.
One rich, one poor, they still exist today—
But Fertune their position has reversed.
—Yankee Blade.

'CELLULOID" COLLARS AND CUFFS are made by covering a linen collar or cuff with "celluloid," thus making them strong, durable and waterproof. When soiled they can be cleaned by simply wiping off with a wet cloth. No other waterproof goods are made with this interlining, consequently no other goods can possibly give satisfaction. Do not forget that every piece of the genuine is stamped as follows:

Insist upon goods so marked and refuse anything clse if offered. If your dealer does not keep them you can procure a sample from us direct by enclosing amount and stating size and whether stand-up or turned-down collar is wanted. Collars 25c. each. Cuffs

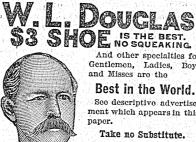

50c. pair. The Celluloid Company, 427-429 Broadway,

"Yes, healthy." "I dinna comprehend. I have heard of a healthy man and of a healthy morning, but never of a healthy book." A. A. P. McDowell, Publisher.

CASS CITY, - - MICHIGAN.

THE rifle competitions of the regular army for 1894 are drawing to a close and the records are pronounced excelient. The United States will soon have an army made up entirely of rack shots.

REFERRING to the new Ohio law which requires the adulterator of food to so label his product that purchasers may know what is in it, the Wheeling Intelligencer wants a law passed in West Virginia requiring every burglar to ring an alarm before breaking into a house.

An Indiana farmer highted a fire in a stove wherein his good wife had secreted \$200 in greenbacks. It is sad that people should ever lose money; but since it must be so, the sort that pack their wealth in stoves would seem to be appropriate selections on the part of Providence.

THE Japanese statesmen propose dividing China into three parts or separate powers, as a means of forcing European ideas and civilization upon the Orientals. In this recipe for cooking the Celestial hare the Japs are omitting an important preliminary, to-wit, first catch the hare.

One can become a famous chicken man, or hog man, or cattle man, or horse man, as he chooses, but he must remember that each road to fortune requires special knowledge. Our fathers made money in a haphazard way, we hardly know how, but in these days of competitive effort this canno be done.

THERE seems to be a hitch in the new football rules, which were intended to make the sport less brutal. The first time the Yale team went on the field nine men were injured and retired. But as up to date no deaths have been reported, the impression prevails that the right step has been taken. One of these days a game of into play, work the contrivance. football may be as harmless as a French duel.

THERE is a discussion going on now in marine circles as to whether the boatswain, or "bo'sun," as we have learned to call him, should be dispensed with on board ship. On the one hand, it is argued that with the substitution of steam for canvas his occupation is gone; while on the other it is held that he could find useful employment on a steamship, and that if he is done away with there would be nothing for the common sailor to

EMPEROR WILLIAM's action in reducing the term of obligatory service in the German army from three to two years has had the unexpected effect of diminishing not only the number of suicides but also the average of disciplinary punishments inflictthat most of the suicides used to take place in the third year of service with the colors, and that nearly the regulations were committed by third-year men.

Courage, hopefulness, patience and relief of the difficulties and burdens of the journey of life with a song and a laugh, and a cheery hail to the passerby, these are the essential characteristics of the teachings of Oliver Wendell Holmes. It will be as the sublimation of the Yankee character in its most benignant and amiable qualities of mind, heart and intellect, dealing profoundly as the Yankee ever philosopher and poet will be reckoned country when posterity has viewed them grouped.

Ir doctors' carriages in the country had distinguishing lights, so that people could tell one as it passed in the night, it would be a good thing. People in the more scattered suburbs would appreciate such an arrangement also. An incident in point: A country doctor returning home from a professional visit to a house twelve miles mile beyond the one he had just road in the darkness, but for lack of mental image and its concrete symbol. distinguishing lights had not been able to speak to him in passing.

HERE and there pure food advocates Mrs. Rorer among them, are injuring their cause by urging the uselessness of the potato as an article of food. They are attacking a staple that more than 300 years of constant use have vindicated. They are declaring that this delicious tuber has no nourishing qualities about it, when it has constituted almost the sole food of many hardy people in Southern Ireland for generations. If the betterfood advocates are to waste their energies fighting an article with as much virtue as the potato, what good can they be expected to accomplish when they attack some article that really pernicious.

Ir has been discovered that the rage for physical culture is giving the women big feet. However the dear creatures will not mind over-nutrition of the feet if it is a necessary accompaniment of the growth of their understanding.

in gold within reach for a rainy day, building up of new systems, new though the fact does not appear in the treasury statements. It is safe to remark that Russia will not open hostili-ties by sending her war chest to the heat, chemical action and all other

front.

SCIENCE.

SIGNS OF PROGRESS IN LATE INVENTIONS.

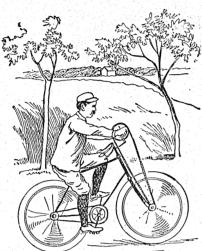

Bievele Run by Hand Power Is One o the Latest Innovations-About Mirror Writing-Liquids in Equilibrium-Scientific Notes.

made to utilize the strength of arms as well as legs for the propulsion of bicycles. One of the latest endeavors was the Valere running machine, which proved to be only a theoretical success, however, and could

not be used practically. It was too difficult to keep it balanced. But here is another solution of the same problem, also a French invention, which seems to be very simple. The 'Quadrimotive O'Keenan' is an

ordinary bicycle to which a second chain is added. This chain unites two pinions; one is on the axis of the propelling wheel, the other is placed

on a support fastened to the handle bar. Two handles, easily brought New York Press.

Mirror Writing.

Many left-handed people have great facility in writing in this way, and it is really the natural way in which writing would be done with the left hand. It is taken advantage of by such as can use it freely and readily in writing, say post cards, for it is a simple and easy way of concealing the meaning, so long as those through whose hands the document passes are ignorant of the simple solution. For this it is only necessary to hold it before a mirror, when the writing appears as ordinary left to right writing. Hence the name "mirror writing" is the one commonly applied to it. As regards its explanation, it is not easy to understand that mirror writing would be naturally used in writing from a copy, because even if it were, in ed. Investigation has now shown an automatic way, a comparison of the copy with the original show the difference; but, on the other hand, in writing without a copy the all of the more serious offenses against mental image will, in case of one who reproduces it with the right hand, fall into certain lines and curves produced in a certain way, while if the left hand is used the lines and curves will naturally be written in the reverse way-the way easiest for the left hand. It may be asked, Why then does not every one who tries to write with the left hand not write mirror writing? This, we believe, depends upon the strong association which years of habit have formed between the mental picture of the word and its actual reproduction on padoes with great themes that this wit, per, an association so strong that the mind, as it were, rebels and forces among the great literary men of his even the left hand to reproduce the old familiar form. In left-handed people this reversed writing is, as we have said, not uncommon when the left hand is used. In a certain proportion of others who have never written with the left hand the attempt to write a given word with the left hand will naturally be made in the right to left and reversed form. Thus it is sometimes seed in the case of patients who, having lost the use of the right hand, in trying to write away found a call to a house half a with the left naturally write mirror writing. But it is uncommon, as we The gentleman who had have hinted, probably on account of come for him had passed him on the the strength of the bond between the

Matter and Motion.

Apart from matter, energy has in reality no existence. We can not conceive of motion unless something moves, of warmth unless something is heated, or of any of the various states or conditions which are indications of energy unless immediately associated with matter. Hence the co-existence of energy with matter is, to our minds, an inevitable conclusion. But now, let us inquire, can matter for an instance be considered apart from energy? Can any one imagine a body neither hot nor cold, neither in motion nor at rest, and not under the influence of some attraction. some force, or some other form of energy? No! Should such be the case for a space of time inconceivably short, that time would suffice for the rending apart of the universe. Planets would fly asunder; life would be instantly destroyed. The very ether would become, in common with all else, at once disorganized, and the universe, filled once more with impalpable world matter, would recommence, as RUSSIA is said to have \$500,000,000 it did millions of centuries ago, the

worlds and new men. Energy manifests itself to us in

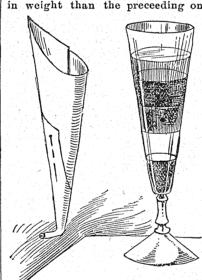

phenomena included in the category TABERNACLE PULPIT. of the physical world are exhibitions of transformation of energy from one form to another. The sum total of energy in this world has never increased nor diminished. Like the matter in the universe, it is and will always be an unchangeable quantity. -Electrical Age.

For Offensive and Defensive Warfare. A new electrical invention soon to be turned out of the workshop of Edison is prebably destined to revolutionize modern warfare. At present it is the design of the great electrician machine, if such it may be called, is built after the pattern of a modern locomotive and is capable of emitting at a dense forest of ten thousand acres hand for defensive purposes.

Italian Wages. The British vice consul at Ancona, district, gives an additional instance of the low wages paid in Italian industrial establishments. At the metallurgical works of Messrs. D. Cattro & Co., a firm giving constant employment to over 200 hands, although cent in the last three years, the average rates paid per day of 101/2 hours are—to boilermakers, 3s 2d; iron turners, 3s 2d. The works are being provided for building steamships of iron, and all materials for boiler making are imported from Great Britain.

Liquids in Equilibrium. It is an interesting feat of color the ingredients can be found. A tall, ends being turned over, so as to form crane and the swallow observe the

The liquids will remain in repose as long as the glass is not moved. The secret lies in the careful pouring in of the liquids through the paper fun-

Rice Paper. The rice paper tree, one of the most interesting of the flora of China, has recently been successfully experimented with in Florida, where it now flourishes with other subtropical and Oriental species of trees and shrubs. When first transplanted in American soil the experimenters expressed doubts of its hardiness, fearing that ters. All these fears have vanished. the climate of this country as to that of the famed Flowery Kingdom.

It is a small tree, growing to height of less than tifty-one feet, with a trunk or stem from three to five inches in diameter. Its canes, which vary in color according to sea son, are large, soft and downy, the form somewnat resembling that noticed in that of the castor bean plant. The celebrated rice paper, the product of this queer tree, is formed of thin slices of the pith, which is taken from the body of the tree in beautiful

cylinders, several inches in length. The Chinese workmen apply the blade of a sharp, straight knife to these cylinders, and turning them round either by rude machinery or by hand, dexterously pare the pith from circumference to center. This opera tion makes a roll of extra quality paper, the scroll being of equal thickness throughout. After a cyclinder has thus been pared it is unrolled and weights are placed upon it until the surface is rendered uniformly smooth

throughout its entire length. It is altogether probable that if rice paper making becomes an industry in the United States these primitive modes will be done away with -St.

TALMAGE PREACHES OF OCTO-BER THOUGHTS.

"The Stork in the Heavens Knoweth Her Appointed Time, but My People Know Not the Judgment of the Lord," Jer. 8:VII

BROOKLYN, Oct. 21.—Rev. Dr. Talmage, who has left India and is now to withold all information relative to on his homeward journey, has selected the invention, so very little can be as the subject for his sermon to-day authentically written about it. The through the press, "October Thoughts, his text being Jeremiah 8:vii.

When God would set fast a beautiful thought, he plants it in a tree. When electricity at the rate of 50,000,000 volts | he would put it affoat he fashions it a second. "If this force," says an au- into a fish. When he would have it thority on electricity, "were directed glide the air, he moulds it into a bird. My text speaks of four birds of beautinot a splinter would be left in ten ful instinct—the stork, of such strong minutes. With such an engine of affection that it is allowed familiarly warfare a dozen men could in ten to come in Holland and Germany, and seconds annihilate the largest army build its nest over the doorway; the ever put on a field. If directed from sweet-dispositioned turtle dove, minga warship at a city of two million ling in color white and black, and population, not a trace would be left brown, and ashen, and chestnut; the in half an hour's time." It seems crane, with voice like the clang of a rather doubtful, however, that such a trumpet; the swallows, swift as a dart force could be concentrated so as to shot out of the bow of heaven, falling, do effective destruction in times of mounting, skimming, sailing—four war. If there really is anything of birds started by the prophet twentythe kind in prospect it would be the five centuries ago, yet flying on through duty of the government to take it in the ages, with rousing truth under glossy wing and in the clutch of stout claw. I surpose it may have been this very season of the year-autumn-and in a recent report on the trade of that the prophet out-of-doors, thinking of the impenitence of the people of his day, hears a great cry overhead.

Now, you know it is no easy thing

for one with ordinary delicacy of eye-

sight to look into the deep blue of

noonday heaven; but the prophet looks wages have increased by about 10 per up, and there are flocks of storks, and turtle doves, and cranes, and swallows drawn out in long lines for flight southward. As is their habit, the founders, 2s 11d; riveters, 2s 11d; cranes had arranged themselves in two lines making an angle, a wedge splitenlarged, and accommodation will be ting the air with wild velocity, the old crane, with commanding call bidding any size or tonnage. Coal, coke, pig them onward; while the towns, and the cities, and the continents slid under them. The prophet, almost blinded from looking into the dazzling heavens, stoops down and begins to think blending, which can be performed at how much superior the birds are in the dinner table, where usually all sagacity about their safety than men about theirs; and he puts his hand upon narrow stem glass is the best. Four the pen, and begins to write: "The funnels are made of cardboard after stork in the heaven knoweth her apthe pattern shown in the sketch, the pointed times; and the turtle and the time of their coming; but my people The first liquid which is poured in- know not the judgment of the Lord." If you were in the field to-day, in sweetened. After this the funnels the clump of trees at the corner of the are used. A like quantity of water field, you would see a convention of comes next, which is poured through birds, noisy as the American congress a funnel, the bended edge of which the last night before adjournment, or is held close to the edge of the glass. as the English parliament when some For the third claret is used, olive oil unfortunate member proposes more for the fourth and alcohol last. All economy in the queen's household-a the liquids are poured in as described convention of birds all talking at once, through the separate funnels. Each moving and passing resolutions on the of these liquids floats on top of the subject of migration; some proposing other, for each is specifically lighter to go to-morrow, some moving that in weight than the preceeding one they go to-day, but all unanimous in tack us, and by the grace of God we the fact that they must go soon, for defeat them again, but, saying all the they have marching orders from the time in the old encampment, we have Lord written on the first white sheet of frost, and in the pictorial of the changing leaves. There is not a belted kingfisher, a chaffinch, or a fire crested wren, or a plover, or a red legged partridge but expects to spend the winter at the south, for the apartments have already been ordered for them in South America or in Africa: and after thousands of miles of flight, they will stop in the very tree where they spent last January. Farewell, bright plumage! Until spring weather, away! Fly on, great band of heavenly musicians! Strew the continents with music, and whether from Ceylon isle, or Carolinian swamps, or Brazilian groves men see your wings or hear your voice, may they yet bethink themselves of the solemn words of the text: "The stork in the heaven knoweth her appointed times; and the turtle and the crane

their coming; but my people know not the judgment of the Lord." I propose so far as God may help me, in this sermon, carrying out the idea of the text, to show that the birds of the air have more sagacity than men. And I begin by particularizing and saying that they mingle music with their work. The most serious undertaking of a bird's life is this annual flight southward. Naturalists tell us that they arrive thin and weary, and plumage ruffled, and yet they go singit would be unable to stand the win- ing all the way; the ground, the lower line of the music, the sky, the upper however, and it is now the universal line of the music, themselves the notes opinion that it is as well adapted to scattered up and down between. I suppose their song gives elasticity to or mountain top, or shock of musketry, used, but, the man becoming violent their wing and helps on with the jourfour hundred. Would God that we out this morning with a sack of corn tian song with our every day work! I get them to stop, they are now so far morning and keeping it all the day. I | them. Oh, that we were as wise about think we might take some of the dull- the best time to start for God and est, heaviest, most disagreeable work heaven! COURSE OF TRUE LOVE DIS-TURBED AT THE ALTAR.

What a Little Mouse Can Do-Scare Bridesmaids, Brides, and Everybody-The Loss of a Heel a Serious Mishap -Her Train Torn Off.

Not long ago an accident of a somewhat amusing kind accurred at a rustic wedding, says a London paper. The bride was attended by two bridesmaids, one of whom exhibited much aneasiness during the ceremony.

She dropped her bouquet on two separate occasions—this in itself was sufficiently alarming, as it is considered a sion of ill omen in some country districts to drop anything during the wedding service-and at a most unlikely moment the girl threw up her hands and, shricking hysterically, fainted in the arms of the best man.

And the cause of all this alarm was an innocent mouse, which for some minutes had been amusing itself by running in and out of the altar rails, at no great distance from the affrighted bridesmaids. This disturbance caused a general uproar, the congregation pressing up to the front to discover the reason. Not until a vigorous fanning had been applied was the originator of all this hubbub able to ex-

villagers, judging by the number of At the critical moment, when the ring her effort to restore her equilibrium

It is reported that the union of two

He put a nervous finger in the

If report be true, this is by no means the only instance of the kind. At a fashionable wedding in New York last summer an accident of a painful kind to the fair bride happened. Instead of the customary bridesmaids this lady had two little boys, dressed in Fauntlerov suits and curls, to attend her: and one laddie in his hurry trod on the rich satin train—which was his duty to support—tearing it quite apart and falling over it. The consternation of the bride was great, but a few pins, kindly supplied by a guest, who deftly attached the train n place, proved a satisfactory, if temporary arrangement; after which the lady walked down the aisle with apparent unconcern, though her feelings must have been anything but pacific.

Enterprise Steam Printing house,
Cass City:

a young man I counted among my close friends a private detecof us were enjoving a quiet

smoke and chat in his cozy little office one day, when the door opened and his boy ushered in a lady client. She was apparently under 20 and was quite fashionably attired. Her form was tall and slender and her face exceedingly attractive, but it bore traces of some sudden and overwhelming affliction, for her eyes were red with weeping.

"Mr. Banks, the detective, I presume?" she queried, turning, after a quick glance at me, to my more mature companion.

"At your service, madam. Pray be seated.'

"I am in sore trouble, sir," she said, in tremulous tones, applying her handkerchief to her eyes. "Death has suddenly robbed me of a father, and the prison-if nothing worsethreatens to take a dear cousin from

"That is very sad," my friend said, sympathetically. "But compose yourself, my dear lady; we may yet avert the latter half of your trouble.'

"Oh, sir! God grant that you may, for my cousin, whom they suspect of the murder of my poor father, was to be my husband," she said, the seriousness of the case quite overcoming her natural modesty. 'But he is innocent; I know it, I feel it, in spite of the evidence against him. Oh, believe me, sir, Harry is as innocent of this dreadful deed as I am!"

"My dear young lady," said Banks, encouragingly, "before hearing the first detail of your case I am convinced that he is. My belief in feminme intuition is based upon the solid foundation of experience. Be calm, therefore, and let me have the story from the beginning:

The circumstances she related were as follows: Her father, Thomas Kempton, was the proprietor of a large furniture factory. He was a man who paid strict attention to business, and was in the habit of remaining in his office after the factory had closed for the night and the men had departed, in order to finish up his

large correspondence. One of the clerks in his employ was a nephew, a fine young fellow, strong of body and generous of heart, but not free from the follies of youth. Harry Stanton was a graduate of college and a thorough athlete, and being yet scarce twenty, he had not outgrown his youthful enthusiasm for sports, clubs, and semi-incidentally

late suppers with the boys. Now, the old are not always so tolerant of the ways of the young as recollection should make them, and so it happened that the frequent transgressions of the uncle's office rules by the nephew caused between the two considerable friction. On the evening of the tragedy, there had been quite a serious quarrel, and the young fellow had left the presence of his employer in hotheaded haste and with angry

words. One hour later, and half an hour after the factory was closed, Mr. Kempton was found murdered in his private office. He was seated in his chair, his head falling forward on the desk before him. A pocket knife had been used to accomplish the deed, and this lay on the floor in a pool of blood at the murdered man's feet. On being cleansed and examined the fatal weapon was instantly recognized by the clerks as young Stanton's.

There was no indication of a struggle; the blow had evidently been struck from behind, and with unerring aim had pierced the heart. The safe had been rifled of its valuable contents, and there was evidence that the assassin, in making his exit through the general office had stopped to open Stanton's desk and remove such things as the young fellow, in making a permanent departure, would be likely to take

So much in substance had by interrogatory promptings been drawn from the girl, when Banks said: "And now tell me what steps have

been taken.' "Poor papa's head clerk has employed a detective-a Mr. Gregg, who,

after looking into the case, started off in hot pursuit of my cousin, whom he firmly believes to be the assassin." "Um!" came from Banks, as he gazed musingly into the fire. "Then

young Stanton has disappeared?" "Yes; 'tis all a strange combination of circumstances, but I trust, sir, you still believe him innocent."

My dear young lady, a professional opinion based on the merits of the case would be rather premature. For the present, you must draw what comfort you may from my faith in your intuitions. If you desire it, I shall proceed at once to the factory

in order to secure some further data." "Kindly do so in my behalf, Mr. Banks," responded the girl, and then exhibiting to the full her perfect confidence in her hunted lover, she said, "I wish you to spare no expense in bringing the criminal to justice."

Receiving my friend's promise to call at her home and report if any important clew was discovered, she stepped into her carriage and was driven away.

At his request I accompanied him to the scene of the tragedy. An did as requested. One, two, three- tion will be accompanied by a botanist.

brought out beyond what we already man had been seen near the factory ook a little bit blue.

"Has this desk of Stanton's been touched?" he inquired presently, pulling out the upper drawer.

"The contents have not been materially disturbed," responded the head clerk. Detective Gregg simply noted the missing articles and the bloody finger marks on the paper where it had been lifted to get at ome old letters Stanton used to leave lying around the bottom. The whole matter seemed so clear to him that he was here scarcely ten minutes before he started off in hot pursuit."

"Um!" said Banks, in his peculiar way, and then he proceeded to go through the contents of the drawer. Being slightly acquainted with one of the clerks, I stepped up to him for a moment's conversation. When I returned to my friend's side he was pocketing a sheet of paper which he had been examining with his microscope. A quick glance at his face showed me that he had hit upon a promising clew. "I think we have seen sufficient,"

he said immediately, and in a few minutes we were on our way back to

"Found something, Banks?" "A mere trifle," he responded; "but

mum's the word, my boy, even for you. A little spice of mystery, you know, will sharpen your interest. "I was hoping it was of sufficient importance to lead to an immediate

and favorable report to our charming client," said I. "Comforting the distressed, when aforesaid distressed is feminine, young, pretty, and rich, is right in my line. Banks laughed good-naturedly, and

then relapsed into ruminating silence. It was about 4 o'clock in the afternoon when we again entered the factory office. Banks carrying a package about fifteen inches square. It was wrapped in plain brown paper bore no label, tag or address of any sort, and, as far as I knew, might be any one of the thousand things between a tin of biscuits and an infernal machine. Neither Gregg nor his quarry had yet been heard from.

"You will oblige me by gathering all the employes of the factory together in this office, Mr. Williams," said Banks addressing the head clerk. "Let the outer doors be locked, and when the men are all in here see that the office door is securely fastened also. I wish to try an interesting little experiment."

"I observe that you use a typewriter," he went on, after Williams had given instructions to have the men called. "Will you kindly remove the ribbon, or, if you have an unused one, better still.'

This being brought, Banks proceedthe outer wrapper, he laid bare a dashed across a meadow. plain cardboard box, the cover of which he was on the point of lifting, when he looked up to see the eyes of all present gazing upon it with eager curiosity. Mine, he afterwards told me were fairly popping out of my

FOUND MURDERED IN A PRIVATE OFFICE head. As there was no particular hurry, the little devil which tempts us to tantalize entered into him; he staved his hand, and with a most quizzical expression of countenance, he lounged back in his chair and coolly puffed at his cigarette.

In five minutes the men, looking omewhat mystified, were all assembled, and everything was ready for the next step. With a quick glance Banks ran his eye over the forty faces before him. Then, turning to me, he whispered mysteriously:

"Stand close beside me, and when it comes to names jot down those I give you the signal to. It will save $_{
m time}$.

"Now, men," he said, addressing the gathering, "as little more can be done in the matter of the murder until we hear from Detective Gregg, Mr. Williams here has kindly consented to allow me this favorable opportunity to put to test a little theory which has recently been brought to my notice. It is said that in China all holders of public offices, and especially soldiers, are known by their thumb marks. The arrangement of the grooves and furrows on the skin, it is claimed, is alike in no two individuals. That I wish to prove or disprove conclusively. As each man's name is called he will please step forward, press his left thumb on the typewriter ribbon, and then make an impression on this strip of papered glass. To distinguish one from another, I desire each man to record his name on the label I have affixed under the space for each im-

oression." Banks eyed each man keenly as he came up in answer to his name and land and Iceland waters. The expedi-

hour investigation bore rather bar- all innocent-looking fellows enough FRIEND OF AMERICA. ren results. The only important fact went by, but the fourth individual had a sullen sort of look, and receivknew was that the suspected young ing the nudge of which I had been forewarned, I jotted down his name. shortly before the discovery of the | So the registering procession moved murder. Banks, I thought, began to along until at last all had left their thumb marks and I had lisstd just about a dozen names.

> "Now," said Banks, lifting the mysterious package, "I have here a small magic lantern through which I propose to put the slide bearing the impressions. It is now dark enough I fancy, and-yes-the back of that large calendar yonder will serve excellently as a white surface. Oblige me, Mr. Williams, by turning its face to the wall. Thank you."

While speaking my friend had busied himself in preparing the lantern, so that matters moved absorbingly and without delay.

"To make the test a little more interesting," he continued, "I will first show you the thumb mark of a gentleman whom I have a great desire to meet. We will compare the others with this one."

wall appeared a peculiar arrangement of lines, jagged, running into widowed mother of the count of Paris each other, beginning nowhere and ending at the same place. Presently, with my list before him

stopped at No. 4. For a few seconds he allowed it to show out beside the first. It exhibited a conformation entirely different. He then subreimposed them, and placed the figure on the moving slide directly over that on the stationary one. The result was a confused network of interwoven lines.

Quickly he hurried through my list, treating each in the same manner and allowing the dissimilarities to speak for themselves. Presently one of the thumb marks fitted so nicely over the stationary one that not a single variation could be observed; there was no crossing of the lines and no blur. So perfect was the matching of the impression that I turned my eyes toward the lantern to be sure that the two slides were really there. As I did so I noticed a commotion in the back part of the room. Then came a yell from Banks. "Seize him-John Trasker-the

murderer! Don't let him escape, men!" Before a hand could be raised to stay him John Trasker had plunged headforemost through the window and was flying, with terror in his heels, down the street

Ere the doors could be opened and hue and cry raised he had secured a long start. As it was only dusk outside, and there were few houses near the factory, he was still in view, however, and the men tore after him with cries of "Stop the murderer! Stop

Presently a clatter of hoofs was heard, and a horse and rider dashed past them and gained rapidly upon the fugitive. Seeing he would be shortly overtaken if he kept the road, ed to untie his package. Removing | Trasker climbed a stone wall and

> With a leap the rider cleared the saddle; with a single bound he went over the wall, and almost before the other pursuers realized what was happening, John Trasker was struggling to free his pinioned arms from the iron grasp of his muscular captor.

"Why, if it isn't Stanton!" cried Mr. Williams in surprise as he and the others came up.

Arriving at the factory Trasker broke down and made a most abject confession. He had planned to remain behind that evening to rifle the open safe. Overhearing the quarrel between uncle and nephew, he saw how it might be used to his advantage. On his way through the general office he looked through Stanton's desk and secured his knife. Returning after the deed to complete the evidence against the young fellow, he had left the incriminating thumb mark. As for Stanton, his story was very simple. He had returned to the premises last evening with a view of apologizing to his uncle, but pride overcoming his good intention he had gone away again without entering. Shortly afterward, meeting a friend who lived some twenty miles from town, he had been tempted with the prospect of a day's shooting to accompany him home. Three o'clock that afternoon, and just after they had got back from the woods, the first information of what had occurred reached him, and, borrowing his friend's mare, he started for the factory, with what result has already been made known.

Banks received a check and abundant thanks from his charming young client, and some fifteen months later an invitation to the wedding,

What Defendant's Counsel Said. "And, your honor, when we reflect

on the very strong safe, the bad tools, the poor light, cramped quarters and my client's natural weakness, am I not right in claiming he earned the stolen twenty thousand marks by the sweat of his brow?"-Fliegende Blaetter. What We Can Come To.

THE LATE LOUIS PHILLIPPE FOUGHT FOR THE UNION.

He Remained in the Army a Year As Captain Under McClellan-In Battle at Yorktown and Richmond-His War

HE LATE LOUIS Philippe Albert d'Orleans was born in the Tulleries in Paris, Aug. 24, 1838. On the morning of Feb. 24, 1848, Louis Phillippe, king of the French, hearing a fusillade before the gates of

aware that it "meant business," abdicated in favor of his grandson, the count of Paris. But this attempt to establish an Orleans dynasty was On the disc of light thrown upon the fruitless. A second revolution had been proclaimed in France and the and his younger brother were forced to flee from the country. They went to England, where the young count of Banks pushed the long slide in and Paris, whose full name and title were Louis Philippe Albert, duke of Orleans, was educated.

The especial interest which American readers will feel in connection

THE LATE LOUIS PHILIPPE.

13.1861, when he landed on American soil. He had crossed the Atlantic in the old side-wheel steamer Africa, whose dock was in Jersey City, and as it was 10 p. m. when the vessel reached her warf, he and his distinguished fellow travellers remained on board until the next morning. Imagine any Atlantic vovager with the price of a night's lodging in his pockets remaining aboard ship all night after making a landing as early as 10 p. m. in these davs

upon that the leading New York newspaper of that era devoted less than half a column's space to the landing of the royal party the following day, saying, among other things:

"A great number of persons assembled yesterday morning on the wharf of the Jersey side, but strictly con-forming with the express wish of the Prince de Joinville, who headed the royal party, everything was got readv for leaving the Africa in the most private and unostentatious manner. The prince, accompanied by his young friends and suite, went over the side of the steamer and entered a rowboat. which took them to the foot of Chambers street, where carriages were in waiting to convey the party to the Brevoort House.

The party, whose arrival in New York city was thus summarily dismissed, consisted of the Prince de Joinville, his son, Pierre Philippe, Due de Penthievre, and his nephews. the Comte de Paris and the Duc de Chartres.

A genuine sensation was occasioned a few days later when it was known that they had applied for permission to enter the Union forces in the war of the rebellion, which was then raging, and been appointed to the rank of captains of the staff of Gen. George B. McClellan. The terms under which the count of Paris and his brother were received into the army stipulated that they should serve without pay and be privileged to resign whenever they saw fit. They served a little less

COMTESS OF PARIS.

than one full year, but during that time the count of Paris saw hard fighting at Yorktown and Richmond and formed impressions of American soldiery which aided him in writing, as it doubtless influenced him to write, his celebrated history of the civil war. Said Gen. James Grant Wilson in a paper which he prepared after the count's second visit to America: "While the active service to the raising of fruits and vegetables, of the youthful count as a staff officer with the rank of captain in the Army | sumer, the surplus going to the of the Potomac cannot, of course, for cannecies. Mrs. Mary E. Harris of Roxbury, Mass., has had for thirty years the hobby of collecting buttons, until now her collection numbers 12,000 different kinds.

1

E ST

Thirty years ago she made a wager that they were more than 999 different kinds of buttons. She reached the thousand mark inside of a year, but once started in the fas-

cinations of 'collecting," her pur- MARY E. HARRIS. suit was kept up. Mrs. Harris has some interesting buttons in her collection. One was worn by a soldier in Napoleon's army; another by a soldier in Washington's; there are buttons from the uniforms of half a dozen European armies, as well as from those of the South American republics, the Confederate army and the uniforms furnished by different states during the civil war.

MONEY CURED HER. Lots of Human Nature in This Brief

Street Incident. A tired looking little girl dawdled down Eighth avenue yesterday morning pushing before her with one hand a baby carriage with a good fat baby within. Under her arm, rolled up in newspaper, was a large block of ice. The child's thoughts were evidently not on baby and ice, for she hummed dreamily to herself and with a far away look in her eyes.

All at once the paper burst, there was a crash and her ice lay on the pavement in a thousand pieces. Then she came back to earth and broke down in a violent bit of sobbing. Gazing sorrowfully at the ice, she be gan picking up the pieces, and after a second's thought discarded the broken paper and set to packing the fragments in the carriage around the baby's feet. As she did so a big tear splotched upon every one. The baby kicked at the chips half uncomfortable, half amused, and every kick the baby gave was fresh reminder of misfortune to the little girl and was answered by a catching sob. The bystanders looked on pityingly, but no one offered to do anything. There are two ways of in tervention in a case like this and re sults are quick to prove the better

"You foolish, silly little girl," called out one woman, breathlessly. 'You're positively wicked. Don't you see you're chilling that baby? You'll give it its death. Stop crying, throw out that ice and wheel the child home.'

The little maid sat down on the curbstone at this and bawled. 'Twas bad enough to face a probable spanking, but a scolding beforehand just broke her all to pieces

Feeling she had done her duty, the woman passed on, and then the right man came along. He was a jolly faced truckman. "Why, cheer up, nothin' on earth that money can't cure. How much was it? Three cents. There, run now and get a new

Fortilizing With Sugar.

melons. Sandy, light soil, very highly fertilized with phosphate and with salt, will produce an abundant crop of large, fine melons, but there are many plant- II ers who affirm that they should be planted on a good quality of soil without fertilizers of any kind, as the artificial ingredients contained in the fertilizers detract from the native sweetness of the fruit. They also claim that the highly fertilized vines bear all their fruit about the same time, making a short season, while vines planted in unfertilized soil will bear gradually one melon after another, affording fresh fruit for a long period, even until it is so late in October that the first frosts have killed the vines. An old planter of ancient days, fond of experimenting, fertilized the soil in which he planted his melon seeds with quantities of sugar, producing a most satisfactory result, the melons being of unusual size and sweetness. That was done in days when expense was no object. -South Carolina Cor. Philadelphia Times.

A Historical Mistake. In the September Forum Dr. George F. Shrady says that Dimsdale, a prominent physician of London, was called to vaccinate the Empress Catherine II of Russia in 1762. There must be some mistake here, for Jenner did not confirm his discovery in regard to the protective value of vaccination until 1796. -New York Tribune.

MOTTOE.

To the Electors of the township of Elkland, Notice is hereby given that a meeting of the board of registration of the township of Elkland will be held at the Town Hall in said township on Saturday the 3rd day of November, for the purpose of registering the names of all such persons as shall be possessed of the necessary qualification of electors in said township, who may apply for that purpose, and that said board of registration will be in session on the day and at the place aforesaid from nine o'clock in the forenoon until twelve o'clock noon, and from two o'clock until five o'clock in the afternoon, for the purpose aforesaid. ose aforesaid,
Dated this 22nd day of Oct. A. D. 1894.
H. S. WICKWARE,
Township Clerk.

NOTICE.

Notice is hereby given to the Electors of the township of Elkland in the County of Tuscola and State of Michigan that the next ensuing general election will be held on Tuesday succeeding the first Monday of November next, being the 6th day of said month at Town Hall in said township at which election the following officers are to be chosen to-wit: A Governor, Lieutenant Governor, Secretary of State, Treasurer, Auditor General, Commissioner of State land Office, Attorney General and Superintendent of Public Instructions. Also a member of the State Board of Education in the place of Perry F. Powers, whose term of office will expire on December 31st, 1894. Also a Representative in Congress for the eighth Congressional District of this State, Also a Sentor for the Twenty-first Senatorial District. Also one Representative in State Legislature for the second Representative district in Tuscola County; and on the County Ticket: A Sheriff, Clerk, Treasurer, Register of Deeds, Prosecuting Attorney, Surveyor, Two Circuit Court Commissioners and Two Corpores.

Treasurer, Register of Deeds, Prosecuting Attorney, Surveyor, Two Circuit Court Commissioners and Two Coroners.

The polls of said election will be opened at eight o'clock in the forenoon or as soon thereafte as may be and will be continued open until five o'clock in the afternoon. unless the board shall in their discretion adjourn the polls at twelve o'clock noon for one bour. t twelve o'clock noon for one hour.

Dated at Eikland this 22nd day of Oct. A. D. '94
