THE judge who sentenced hurglar Virgin, of California, to life imprisonment did an excellent thing. for society. Incidentally he expressed some views concerning hypnotism that must be regarded as lucid and valuable. In his opinion a criminal inspired by a mysterious spell to do evil is no more to be encouraged than one who becomes a lawbreaker for what there is in it. Divorced from hypnotic influence Virgin might be as pure as his name, and the method employed by the judge to bring about the divorce will be commended as just and effective.

A NEW JERSEY farmer whose wife and baby had been killed by burglars in turn killed the burglars. The populace set him up on a pedestal and drew near to worship. The farmer did not say much, and when the populace heard him raise his voice there was an awful hush. The farmer was haggling with a dime museum man who desired to buy relics of the tragedy, including the raiment worn by the victims. Then the populace retired. The pedestal is empty now. The farmer has been eliminated from the hero class and is in the "meanest man" competition with every chance of winning.

THE statement that President Peixoto of Brazil has whipped the rebels and re-established his administration is somewhat misleading. Peixoto has not had one fraction of the terror to Mello and Da Gama that time and party disintegration have had, and it is to these forces that credit is largely due for the end of the war. Of glory, if Commander Benham's exploit be excepted. there has been none in the entire affair. "Well, this latest hint should be sufficient," he said, bitterly; to himself. "Only an idiot or a scoundrel would prosecute a girl with attentions after such an intimation."

He was not generally an idle fellow. His fellow-clerks felt frequently rebuked by his determined industry. But now he sat a long time with his hands gripping the arms of his chair, and his gaze fixed blankly on the opposite wall. He thought it all over; his love-story was not a long one. Three months previous he had met Vivien Van Roosevelt at the home of his cousin. He had straightway fallen headlong in love with the girl-with her stately dark beauty, her gentle manner, her delicious sense of humor. her voice, that was so mellowly fascinating. And he never once reminded himself-after the absurd fashion of men in love-that he was only an architect's clerk, and she "a lady of honor and wealth.'

Of this fact the little blind god seemed also oblivious, or to it indifferent. For when Gilbert had said, boldly and yet tremblingly, "I love you, dear?" she lifted to his sweet eyes that were dim but illumined. And she had pledged him her heart,

hand, and womanly fealty. But when he urged speaking to her

guardian she had tremulously protested. "He is a hard man, Wayne. I am not quite of age yet. Anthony Van

Roosevelt has other plans for me. I must not at once let him know that that they can never be realized." So they had continued to meet at

the house of Mrs. French, Gilbert's cousin, until ten days ago. Then Vivien had failed to keep her appointment. She ignored the gifts he sent her, the flowers, and books, and matince tickets. He dared not go to the house himself, after her express command to the contrary. He asked Mrs. French to do so. She came back saving the message given to her was that Miss Van Roosevelt was engaged.

"It appears to me, Wayne." his cousin commented, in repeating the incident. "that Vivien had merely proffered an excuse for the sake of politely dropping our acquaintance." He could not bear to hear another

A Foster Mother Pours Bolling Water

into a Boy's Boots and He Must Lose His Feet-The Blizzard.

A Woman Without a Heart.

A story of most terrible brutality comes from the village of New Loth rop, Shiawassee county. Ira Burpee, a 12 year old adopted son of Mrs. Ursulla Burpee was found by neigh bors to be starving and suffering from frightful injuries. His legs, especially the feet, were raw and the flesh was hanging to the bones. This the mother explained to some was the result of freezing. To others she said that 10 days before she sent him for some straw, when the stack tumbled and imprisoned him. The woman told so many different stories that suspicion was aroused and the neighbors began to investigate. The straw stack which she said had imprisoned the boy for 10 days contained less than 350 pounds of straw, and the theory now is that the woman, who bears a name for extreme cruelty, poured boiling hot water into the boots of the lad and starved him. A council of doctors decided that both of the boy's feet must be amputated and that the injuries are the result of a burn or scald. Mrs. Burpee has been arrested.

Big Damage to Michigan Fruit.

Benton Harbor special: The mercury took a drop downward far below freez ing point with a howling northeast wind, changing to a veritable blizzard from the northwest, with snow whirl-ing in a blind fury. This will prove a fearful calamity to all fruit growers in this fruit belt, as the continued warm weather so early had started the buds of early peaches, grapes and blackberries. Many thousand trees were just ready to blossom, but every bud is black and dead, doing many thousand dollars damage. Strawberries were starting up green, but are frozen to death.

Many farmers had put mortgages on their farms to live through the unusually hard times, depending upon the re turns from early fruit to pay them off. This is without doubt the worst calamity that has befallen the growers in this fruit belt since the peach yellows scourge of 1876 and 1877. Business prospects were very flattering for the farmers until this freeze, but now many a man is despondent with his principal resource gone.

Four Men Lost on the Lake. Gene McKay, Charles Petrie, Irving Shake and Cal Shaefer, young men about twenty-five, employed in the Coppon Bertsch tannery, left the West Michigan dock at Holland in a small duck boat and said they intended to fish, but they must have found it too cold. Frank Haven found the boat bottom up in Big Bayou, between Point Superior and Macatawa park in Black Lake. The hats and lunch baskets of the men were also found. "Two hundred employes of the tannery dragged the lake for their bodies. The young men were all popular, jovial young fellows, and the city is greatly excited over their sudden loss.

MICHIGAN VETERANS. Department Encampment Held at Owosso Well Attended.

The sixteenth annual encampment of Michigan G. A. R. was held in Owosso with the largest number of delegates in attendance that attended any state encampment during the past ten years Department Commander Gen. J. H. Kidd was presented by the Owosso post

with a gavel made from wood taken from an oak tree on the battlefield of Chickamauga.

The report of Assistant Adjutant General Phelps, of Ionia, shows the gain for the year to be 943, losses 1,504, making a net loss of 597. During the past year five posts were organized and mustered in, and three posts were disbanded, leaving a net gain of two in the number of posts. The address of welcome was delivered by George M. Dewey and responded to by Depart-ment Commanders Gen. J. H. Kidd and Mrs. A. T. Bliss. The election of officers resulted: De-

COXEY'S MARCHI COMMONWEAL ARMY STARTED

ON ITS MARCH

With Only a Small Portion of the Num her Expected Troubles and Trials From the Start.

The much-heralded "army of peace" planned by "Gen" Coxey, of Massilon, O., started on the march to Washington, "to demand of congress some re lief for the suffering thousands in the United States." Instead of several thousand men being in line when the start was made, as had been expected, only 100 men-mostly tramps-were ready to "fall in" when the order was given. The March blizzard was blow ing and the wind whirled the snow in

a very disagreeable manner. Carl Browne, chief marshal, headed the procession. He was mounted on a white horse and was followed by half a dozen aides, all mounted on horses belonging to Coxey who rode in a carriage drawn by a pair of spirited steeds. The procession consisted of the marshals, Coxey, his wife and sister, a bugler, four covered wagons, contain-ing camping outfits, baled straw and several quarters of beef; a brass band that played all kinds of music at once, and the soldiers of the commonweal on foot. They marched single file and two abreast as pleased their fancy. With very few exceptions, they were a hard looking lot of citizens. This they claimed was the fault of our system of government. Canton, eight miles from the starting

place, was the first night's camping. Fully 10,000 groated the army as it marched through the streets. A big tent was pitched and straw served as beds. Big fires outside the tent was the only means of cooking their meals and keeping warm. As many as could found lodgings in the police station. Coxey claimed to be well pleased with the beginning, saying that it exceeded his expectations. Two inches of snow impeded the march after camp was broken at Can-ton, and only 72 commonwealers had

the courage to face the wintry blasts. But 50 more were added before the next night's halt at Louisville, O.

Estimated that a Half Million Tobacco Users Will be Cured in '94 by the Use of No-to-bac, Causing a Loss of Many Millions of Dollars to Tobacco Manu-Facturers.

It has been reported at Chicago that a large sum of money had been offered the proprietors of the cure for the tobacco habit called "notobac," which is famous all over the country for its wonderful effect. This offer, it is said was made by parties who desire to take it off the market and stop its sale, because of its injury to the tobacco business. Mr. H L. Kramer, general manager of the notobac business, was interviewed at his office, 45 Randolph street, and when questioned, promptly said:

Fruit Killed by the March Blizzard.

Chicago special: The cold wave brought with it a decided drop in temperature and snowfalls varying from occasional light flurries to quite heavy storms. At Mascoutah and Anna, Ill. the thermometer dropped 15 to 20 degrees, doing great damage to early fruits and vegetables, and some reports come in from widely separated points. The federal judges denied their aid to Prendergast, and when they an-nounced that they would not grant the petition for writ of habeas corpus, the

assassin's attorneys renewed their ef-forts by raising the question of their client's sanity. The point now raised is that Pren-dergast has become insane since the

trial. So they applied to Judge Chetlain and he consented to hear argument to show that he could properly take up the matter. It was nearly 10:30 p. before the attorneys concluded their opening arguments and Judge Chetlain decided that he could rightfully take the case up. The regular court venire was then summoned and the jury selected. Having heard the arguments Judge Chetlain announced his decision extending the time of the execution of the sentence two weeks, to April 6.

International Trouble at Rio.

Cable from Rio Janeiro: The Portuguese warships were allowed to leave this harbor under the stipulation imposed by the Brazilian government, that Admiral Da Gama and the insurgent officers and men who are with him should remain on board the Portuguese ships until the question of their ultimate destination has been settled between the two governments. The international feature of the complications arising from the revolt and subsequent surrender of the Brazilian war vessels in these waters is assuming a grave aspect. There is considerable excitement here in regard to the action of the Portuguese naval officers who have so far protected Admiral Da Gama and the insurgents who are with him. It is feared that the action of the Portuguese in giving shelter to the rebels will lead to dangerous complications. This is all the more likely as it appears that President Peixoto has ob-

New York, March 26.—R. G. Dun & Co.'s weeky review of trade says.—It is perplexing to be obliged to report that business grows larger in volume and at the same time not more profit-able. Uncertainty does not diminish, but has rather increased, in the judgment of many com-mercial bodies, which have urged the president to veto the seigniorage bill. Prices of commo-dities do not rise, but are on the whole 1.5 per cent lower than the previous week, though then the lowest ever known in this country, and are 12.9 per cent lower than a year ago. More mills are at work, though the proportion of produc-tive force unemployed is still from a fifth to a third in different branches of industry, and many mills are stopping because their orders have run out even while a large number are starting of four furnaces by the Illinois Steel Co. and one other at Pittsburg increases the output of iron, and some large sales have been made at the lowest prices yet reported, with in-dications of continued demand for structural work, especially at the west. cotton goods is fairly large, but with reduction in prices of some grades, and the accumulation of print cloths continues. Sales of wool for three weeks have exceeded last year's 23.9 per cent, though transactions in March last year were about 40 per cent below the average. The termination of the rebellion in Brazil opens a new crop of coffee, which is reported very large, but prices are as yet steady. Cattle are low abroad, almost beyond precedent, so that ex-ports are retarded. Wheat, cotton and pork have declined a little. The failures the past week number 244 in the United States, against 217 last year, and 50 in Canada, against 26 last year. It is noteworthy that Canadian failures are considerably increasing.

said:

The size of the tablecloth must, of course, be determined in a general way by that of the table. Where an extension is used, there should be one cloth large enough for the table when all of the leaves are in place; but such a spread would be entirely out of place when half of the surface had been taken away, and smaller cloths should be provided of proper size for the ordinary use. While any approved pattern may be purchased, it is generally a mistake to select fancy-colored linens. The white is always standard, always appropriate, looks well, and will be in fashion; but as much cannot be said for the colors, which may be popular one season and entirely under the ban within a year.

Besides, when the cloth has become so worn that it is not available for further use on the table, its utility is very much greater if white than if colored. In the former case it may be cut over and acceptably used in a multitude of ways.

Tablecloths may be bought either woven and finished complete or by the yard, and not infrequently for general use, the latter is an entirely satisfactory way, while it is decidedly more economical. The ends may be secured by a simple hem, or finished in an approved manner, and some very pleasing effects may be produced by the housekeeper skilled in such work, and having a little spare time which may be thus employed.

Italy, in 1823. Her father, William Edward Shore, of England, inherited the estates of his grand-uncle, Peter Nightingale, and in pursuance of his will assumed the name of Nightingale, As the child of wealthy parents, Miss Nightingale was well educated. From early childhood the care of the sick was a favorite occupation of hers, and in 1849 she entered, as a voluntary nurse, a school of deaconesses to qualify herself to minister to the sick. In 1854, at the solicitation of Secretary of War Sidney Herbert, she went to Constantinople as the superin-tendent of a staff of nurses to care for the soldiers of Great Britain who were wounded in the Crimean war. By her rare executive ability and thorough knowledge of what was necessary she made the hospital, which was in the most deplorable state, a model in the thoroughness and perfection of its appointments. So immense were her labors that she frequently stood twenty hours in succession giving directions. Notwithstanding this her pleasant smile and kind words to the sick made her almost idolized by the army. She returned to England September 8. 1856. Her services have secured her the sincerest gratitude of the English people and a world renown. Queen Victoria sent her a letter of thanks, with a superb jewel. "It was a quarter to one by my vatch when I recovered from the fit." "May I ask, miss, without offense, a thing o' this kind has ever happened to you afore?" asked the Judge. "As a child I was timid, but I can not ever remember being so frightened.'

We all went out on the lawn which faced that part of the building in which Edith's room was situated. On the way Van Hoeck, who had taken my arm for guidance, gripped

it tightly and whispered-"What did I tell you? This is the beginning of the end."

CHAPTER VI.

It is necessary for the reader to know what kind of building Monken Abbey was, and something of the disposition of the rooms, in order to follow clearly the action of the drama that took place within its walls. I can do no better than to give the description by which I brought the facts home to the comprehension of my blind partner.

"Tell me what you see Thorne," he said, as we stood on the lawn. "An old Gothic building, flanked by two later additions in the Tudor

style, that project beyond it. "The great door is the center of the old part, the dining-room is on one side, the library on the other. The floor above is occupied by the picture gallery. celles' are in the left." "What means of communication are there? For instance, how could Sir Edmund get to your room?" "By simply passing through the

picture-gallery. "I understand; go on."

"There are two oriel windows and a bay in the end of the left block facing us as we stand here.

"The oriel on the left." I continued, "projects from Sir Edmund's room, that on the right from Miss Lascelles. There are stone mullions ing at Miss Lascelles intently, his at the angles of the oriel and lattice shaggy brows bent over his quick windows between, hung inside with

tion to the stairs, the bay, and the picture-gallery." I complied with his request, mark-

ing the several parts with figures, which I explained to him."

CHAPTER VII.

But I was still incredulous. How was the girl hiding in the woods all day to know of the existence of the edge? It was true she had access to the house at night, but I doubted if it were possible for her to see the ledge in the dark even from the bay window. But admitting the possibility, would she risk her life for no purpose but to alarm Miss Lascelles? There was too much strength in Lola's character for such a senseless and feeble device to be acceptable to her. It was not the act of a rational being, but of a mischievous or malevolent idiot. I was inclined to believe that the

explanation Miss Lascelles had offered was a just one, and that what she had seen was purely imaginative and the result or fear, inspired by those mysterious sounds which might yet be explained.

This was not Van Hoeck's opinion. nor was it Brace's.

"I will not say the Kid has done it," he said; "there's no savin' what greaser blood will not do. For the sake of argument, we will say she did, but I undertake she shall not play the same bower twice, if her father's persuasion counts for anythin';" and he went off at once to search for Lola in the wood.

When we were alone, Van Hoeck said: "Ask Sir Edmund; he will tell you, as he told me, that Brace was in the woods yesterday while you were philandering with Miss Lascelles. What was he there for but to find his daughter and employ her in working out this plot?"

"Good heavens!" I exclaimed. osing my temper; "what notion have you got hold of now? Last night you suspected Sir Edmund-"

"I would suspect any one who has the opportunity to possess himself of such a treasure as you hold. Do you blame the man who protects himself when his life is in danger? That diamond is life to me! What could I do if it were lost? You hold that diamond - my life - in your keeping. You are bound to take every precaation for its safety. You

have no right to despise my warning because it does not agree with your reckless trust in humanity." "What possible connection can there be?" I asked, "between the

safety of our diamond and the event of last night?" "A palpable connection. The event of last night was an abortive attempt to obtain the diamond."

As I heard this, and looked at Van Hoeck, I almost doubted if he were in his right mind. "The plot failed," he continued,

Many times women call on their family physicians, suffering, as they imagine, one from dyspepsia, another from heart disease, another from liver or kidney disease, another from nervous exhaustion, or prostration, another with pain here and there, and in this way they all present, alike to themselves and their easy-going and indifferent, or over-busy doctor, separate and distinct diseases, for which he prescribes his pills and potions, assuming them to be such, when, in reality; then are all only symptoms caused by some womb disorder. The physician, ignorant of the cause of suffering, encourages his practice until large bills are made. The suffering patient gets no better, but probably worse by reason of the delay, wrong treatment and consequent complications. A proper medi-cine, like Dr. Pierce's Favorite Prescription, directed to the cause would have entirely removed the disease, thereby dispelling all those distressing symptoms and instituting comfort instead of prolonged misery. The lady whose portrait heads this articles is Mrs. Ida Coventry, of Huntsville, Logan County, Ohio. She had an experience which we will permit her to relate in her own language. It illustrates the foregoing. She writes: "I had 'female weakness' very bad—in bed most of the time, dragging down pains through my back and hips; no appetite; no energy. The family physician was treating me for 'liver complaint'. I did not get any bettey under that treatment so I thought I would try Dr. Pierce's Favorito Prescription and his 'Golden Medical Dis-covery.' I felt better before I used one bottle of each. I continued their use until I took six bottles of each. In three months' time I felt so well I did not think it necessary to take any more. In childbirth it does what Dr. Pierce's Favoric of Smart-Weed to those who have never tried it ; it surely is the best thing for cholera morbus, or pain in the stomach I ever used ; it works like a charm. I try never to be without it." The following is from Mrs. Harriet Hards, of Montpelier, Idaho : "I Pierce's Favorite Prescription, for leucor-rhea and uterine debility than I have for sixteen years. looked upon as a fancy attachment, adapted only to "stuck-up" people and to children. It is historically interesting to read that almost as far back as books of etiquette are to be found. including such as have come down to us in manuscript from a time prior to the discovery of the art of printing, children were directed to wipe their hands and mouths with their napkins; but it does not appear that grown people were supposed to use these convenient articles earlier than the middle of the fifteenth century. At that time tablecloths among the wealthy-and nobody else had them at all-were long enough to come nearly or quite to the floor, and the ample margin, which hung over the edge of the table, served the purpose for which the handcloth is now em ployed .- Good Housekeeping.

True Hospitality.

Sometimes when a certain little housekeeper gets discouraged because she cannot give great big dinners like her neighbor, Mrs. Crœsus, she consoles herself with the thought that perhaps her simply cooked, delicate viands are as acceptable to the palates of her guests as are the more gorgeous repasts to the favored ones seated at her neighbor's board.

When you come to think of it what a tiresome rout ne it must be to always be obliged to eat state meals. Doesn't it seem probable that the great ones of the earth, such as queens, emperors and princes would bedriven to desperation and would hie themselves away incognito to some unknown restaurant or the humble abode of one of their subjects where they could eat plain food in plain fashion

It isn't always the truest hospitality that prompts to the greatest extravagance. President Arthur once told a young woman he was thoroughly exhausted by the overwhelming elegance that everyone thought necessary when he was invited out to dine.

"If only once," said he, "they would give me corned beef and cabbage, how much more I would appreciate it than the interminable courses, with champagne accompaniment, that they think necessary to serve me with. I receive invitations galore to such of white powdered, a teaspoonful of functions, but no one ever ventures to ask me to go home with them and Pour the mixture into buttered flat take things just as I find them."

This spirit is shared by many; therefore, no hostess need feel badly because she cannot outdo or keep up with her neighbors in the way of expensive entertaining. Give what you have to give in cordial fashion. Serve it daintily and together with pleasant conversation and a beaming welcome. The truest sort of hospitality will be within your reach.
