the beginning of the century. Lady Lansdowne has never had any reason to regret her choice, for her domestic happiness has been of the most unclouded character: whereas her poor sister, the Marchioness of Blandford, after submitting for a long time to her husband's dissipated habits, was compelled at length by his horrible and incredible cruelty to secure a divorce.

When God Leads All Is Well. (I will lead them in paths that they

have not known.—Isa. 42:16.) There is something comforting in the thought that we are not going through this world at random, like a stone rolling down hill, but that our days are numbered, and our lives decided according to a plan made in heaven. Nothing will give such peace and rest in the midst of trials and perplexities as to remember that God is guiding us with his eye, and that he will decide when, where and by what means we are to be carried home when our work is finished. He knows what kind of a chariot it will be best to send for us, and when the day arrives he will see that it comes to meet us. The consciousness that our lives are according to God's plan, and not according to our own, ought to give us constant peace and joy, no matter where or how we may have to live. The great thought with us should constantly be, that God lives and reigns, and has promised that all things shall work together for good to them that love him, and so instead of being vexed and perplexed when we cannot have our own way, or of beginning to backslide whenever things do not go to suit us, we should find rest in believing that God is still for us and with us, and that everything is bound to come out all right, because he has promised that it shall. ingdom of God.—Luke 9:62.) is to determine to begin with that you will do it. First map out a course that as many respects as he is superior to you intend to stick to, no matter what tries to prevent. Not only the kingdom of heaven, but every kingdom of good, has to be taken by violence. Not as to keep himself always his wife's to resolve to win is to court defeat. The man who says in his heart, "I will try being religious for a little while, and if I like it I will go on," will never get to heaven. It is like starting a steamboat up stream, with no coal on board except that under the boilers. As soon as the fire goes down it will stop and begin to float back. We must say good-by to the devil for good before we can count on Christ for help. The main reason why there are so many backsliders in the church is because they never intended to take more than a short walk toward heaven to begin with. All some people want with religion is to keep them from trembling when it thunders. Too many are like the young woman who joined the Salvation Army, but saved all her nice bonnets and dresses to wear again if she should happen to leave the army. If we keep the things of the world we shall soon be drawn back again into the world. Better cut all bridges and never look back.

"The Best Friend to Have Is Jesus." "It is better to trust in the Lord than to put confidence in man."

Better, because God's mercy for us will never wear out. It endures forever. It is better to trust God, because he loves us better. Nothing is so trust-

worthy as love. We should trust in God first, and then if others fail us we shall not be desolate. in men, but always a blessing to trust m God.

Men can help us out of some of our troubles, but God can help us out of all of them. Those who would help us are not always able to do it. God is able to do

more than we ask or think. Our friends will sometimes help us. such as will be real help.

It is only by trusting God that we can reach our highest best. Every man who is not trusting God is rusting in some man. It may be ix great hope to be the crowning excelimself.

When we trust and are not disappointed, we love that in which we trust. it has never been read to me in history, Make a safe voyage in a steamship, and sung to me in poetry, nor whispered you will ever afterward love it. Trust by angels in my sweetest dreams. God and you will love him.

How to Help the Church. The best help that can be given to the church is that of the individual life, the work of the Lord and the welfare plan would be the diminution of bow-

The stars that nightly wheel in their orbits; the ponderous rock or tiny pebble; the flower of the field or crannied wall withhold from him their histories. So, that man's enjoyment of the world to come will be limited who enters with spiritual faculties undeveloped. That there are degrees of enjoyment in heaven I believe; and the measure of our happiness will be commensurate with the measure of our capacity for the enjoy-

ment of spiritual things. W. E. Penn, Eureka Springs, Ark. Ought pastors to be criticised? Yes, often, for they are human beings in the flesh like the balance of us, and liable to go wrong, but we, too, are liable to go wrong, perhaps a little more so than the pastors, for they are apt to be more watchful: so we may often think the pastor is doing wrong when he is doing right, and thus do him great injustice in our hearts. There is but one safe remedy when you think the pastor has done wrong: keep your mouth shut lips sealed, get into your closet as quick as possible, close the door, get right down on your knees and criticise him to God.

Managing a Wife.

A New York paper once offered a prize for the best brief contribution on the subject, "How to Manage a Wife," Among the competitors was one signing himself "A Joiner." which proved to be the late Rev. Dr. Charles F. Deems, and he bore off the honors. He was a joiner, sure enough, having married many a happy couple in his day. Here is his

This will necessarily stimulate the wife to be always an admiring friend, always an affectionate sweetheart, always a thrifty housewife, always a confiding ward. And this will so react upon her husband that his love for his wife will grow so as to make it easy for the husband, with all his faults, to bear with all the infirmities of his 'one and only' wife."

The Twentieth Century.

Dr. Talmage is an optimist and an enthusiast. That this is true will be seen from a perusal of the following sentences. They form one of the most eloquent songs that has appeared on the dawn of the twentieth century:

"Blessed are the cradles that are being rocked now. Blessed are the students in the freshman class. Blessed are those who will yet be young when the new century comes in: in five or less vears from now. This world was hardly fit to live in in the eighteenth century. I do not see how the old folks stood it. During this nineteenth century the world has by Christianizing and educational influences been fixed up until it does very well for a temporary residence. But the twentieth century! Ah, that will be the time to see great sights and do great deeds. Oh, young man, get ready for the rolling in of that mightiest and grandest It is sometimes a misfortune to trust and most glorious century that the world has ever seen!"

Faith and Hope.

I believe that the sorrows of man will all cease; that every woe will find an oblivion, and that God will, at last, bring all men to a state of felicity, sublime in its nature and endless in duration; that the body will return to the when it would be better for us to help dust, and the spirit to God who made ourselves. God will only give us help it. The man who thus believes can pass serenely through life, chanting in cheerfulness. 'God yet shall wipe away creation's tears, and all the world shall summer in His smile. I esteem this lence of all religion; and if there be any other faith more grand and sublime, Rev. James Shrigley.

The Holy spirit withdraws from scenes of duties. Besides all this there will be an bitterness and contention. A church, then, which desires to secure the Divine favor, multiply its power, enjoy revivals of religion, and be a source of attraction and influence, must be united in doctrine, in fellowship and in serv

Tremendous Prices. It is astonishing what tremendous prices we sometimes pay for things that add no permanent value to us. We pay for our follies, our carelssness, our ignorance, our tempers and our wrongs. We do a great many things in our social life that cost us ten times what they are worth. If a business man should make similar transactions he would be called an idiot. True values increase in just proportion. You can have just what you pay for. In Japan the Buddhist and Shinto priests find it necessary to use "western methods" against the rapid increase of Christianity. They have established "Societies of Buddhist Endeavor," which advocate much of the philanthropy of the New Testament, and even employ "Buddhist Bible women."

Mrs. Ballington Booth has been speaking to the medical students in Philadelphia. Meetings were arranged in the different schools, and three afternoons were devoted to them. Eight different audiences were addressed. Over 5,000 students heard Mrs. Booth. She was received with enthusiasm.

Here is a case from Battle Creek: Mr. Josiah M. Shoup lives at 51 Broad Street, he was a member of the Battle Creek police force for many years. As a member of the force he served the city well, but the rough weather he was often subjected to laid the foundation of kidney disorder, which has troubled him very much. Here

is what he says about it "About three years ago, while on the police force, I contracted from exposure a kidney trouble, which has since given me no end of trouble. The pain was right through my kidneys and across the small of my back; if sitting down and I wanted to stand up, I had to arise very slowly and gently to avoid increasing the pain: I had such tired-out feelings all the time, and I was steadily getting worse. About two months ago, hearing of Doan's Kidney Pills, I got a box. Their action and effect was most complete, they removed the old aching pains for good. I can now get around as quickly as anybody. Crazed by Mountain Air. Lester Perdew, a young man residing in this city, is just recovering from an attack of insanity superinduced by the high altitude of the mountains, says a San Bernardino, Cal., special, Perdew and a party of friends left for Bear Valley early in the week, intending to camp at the lake for several weeks. The valley is at an elevation of 6,000 feet, and the party had no sooner arrived at that altitude than Perdew became violently insane. He threatened his own life as well as all the members of the party, and he finally was thought to be so dangerous that he was bound hand and foot until arrangements were made to bring him back to the city. Then he was strapped to a burro with his hands tied behind him, and two of the party, one riding in front and one behind, started on the journey with him. Arriving at Green Valley, about 2.000 feet lower, Perdew was turned over to the stage driver to be brought on down to this valley. On their way down Perdew succeeded in getting his hands untied, and a desperate encounter with the driver followed. The insane man was finally overpowered with the assistance of a passenger and brought on to Redlands. As they continued to descend he became more quiet, and when the level of the valley was reached he had become perfectly tractable. After resting he seems to be entirely sane.

Their Yacht Thumped by a Whale. John S. Mason, Harry Buckley and Mr. Packard of Providence had an exciting experience with a gigantic whale off the Isles of Shoals last Wednesday night, says a Haverhill, Mass., telegram. Mr. Mason, while at Portland last week, purchased the cutter yacht Pristis, and was returning with Marblehead. Messrs. Buckley and Mason were asleep below about midnight when the boat received a blow that stopped her headway. Going on deck. they saw a gigantic whale off the stern. Mr. Packard, who was on the watch. was paralyzed with fear, but finally found voice to tell his story. He felt the jar, and looking up, saw the whale up directly beside the cutter. Turning, it struck the boat, and later the tender, which was trailing. When the crew anchored at Marblehead the tender, which received the hardest blow, was covered with oil. The escape is regarded by the crew as miraculous, for had the leviathan struck the craft fair blow it must have demolished it.

Dogs That Don't Know the Whistle. Kickapoo Indians are very fond of dogs. Around their tepees or wickiups or Queen Annes, or whatever they call their abodes, there are always half a dozen wolfish dogs. An Indian dog hates a white man as far as he can see him, and loves an Indian as far as he can smell him, and that is saying a good deal. When a white man driving through the Kickapoo country sees a dog by the roadside his natural impulse is to whistle in a friendly way, for somehow in a wilderness of prairie or forest a dog is a comfortable sight. But the instant, you whistle to an Indian dog he turns his tail at 1 is out of sight quicker than if he had been kicked. An Indian never whistles at his dog when he wants his beast to come to him: he places his tongue against his teeth and hisses. The colored population of Oklahoma have almost as many dogs as the Indians. the top and upper portion of the stem. Those who live in the Blackjack sand hills are dog rich. These dog have a deep-rooted aversion for the white man also. When an old colored cotton planter comes to town some of the dogs are sure to follow, and when the old man walks up town the dog stays right between his feet, like a country dog and of the peculiar structure common white man comes within snapping distance the dog gets busy.

Saved by a Woman from Drowning.

The heroine of Plymouth township is Mrs. Frank Freas, who bravely divested herself of her gown, leaped into water fifty feet deep, and by means of the skirt saved a little girl from drowning, says a Conshohocken special. Mrs Freas was going to Young's store last evening, and as she was passing Ramsey's quarries she heard cries of distress. She hurried in the direction whence the sound came and found struggling in the fifty reet of water in the abandened quarry a little Polish girl. There was no fence rail, rope or anything of the sort which she could throw to the struggling child to rescue her. Mrs. Freas hesitated but a moment, and then, divesting herself of her tea gown, she threw it toward the drowning girl, but it was not of sufficient length to reach her. She was not long in considering what next to do, for she sprang into the water, and swam close to the child. She kept far enough away to prevent the victim from grasping her, but just near enough to throw the gown so the girl could reach it. The almost exhausted one seized the dress, and then Mrs. Freas swam ashore with the girl trailing behind.

How She Caught a Rabid Dog. Washington special: A young woman made a clever capture of a mad dog here last Sunday afternoon. She is Miss Roberta West, the pretty superintendent of the emergency hospital. The dog, a full-grown fox terrier, had run into the hospital yard and was rushing again. The black janitor ran for him with a broom, but on seeing his foam flecked mouth fled into the hospital Miss West was at a window watching the Sunday school children pass on the walk just beyond the fence through which the dog was trying to break. Spying the dog she turned and grabbed a sheet from a bed and ran into the yard. The dog saw her and rushed for her. She took hold of the two upper ends of the sheet and let the lower end fall on the ground just before the dog reached her. Then stepping quickly figure given. Usually only one or two Milk and flesh—including in the term back as the dog's feet touched the sheet, she lowered her end, bent it over the dog, grabbed the lower ends, and and an inch thick, roughish, with weak then straightening up, had the struggling, snarling terrier caught like a

Conner's Queer Will. A queer will, made by Nelson Conner July 5 last, was filed for probate, says the Washington Post. He died July 6. 1895, at 315 L street northwest. The will was written by the Rev. James H. Lee, pastor of the Third Baptist Church, who says that Mr. Conner, on his sick bed, sent for the preacher. The testator wills to Louise Conner, his widow, the two front rooms in his house, with the shop down stairs, and the room over it The milky juice is a popular remedy for her lifetime. This is practically the only method of complete extermination unless sentiment is aroused to more vigorous and universal destruction of weeds. Any species, according to the bulletin, can be subdued and controlled within the limits of an ordinary farm. Broken land should not be alowed to lie idle, and the mowing or cutting off of the main stems of weeds is deprecated as multiplying the stock.

All-around Cattle.

The cry is now-a-days, "Give us the good all-round animal." We think there is an element of error in this. herbaceous Carry out this idea to an extreme, and you blot out the distinctive characteristics of every breed of animals existing. No one animal can do everything best. As in the mechanical so in the animal world, there must be a division of labor. We owe all the improvement of the present day in all classes of domestic live stock to special breeding for a definite purpose. Let the breeder of the race horse try to combine the strength of the Clydesdale or Shire with the speed of his thorough-bred, and the result is an increase of strength but a reduction of speed. So let a breeder try to obtain the size of the Leicester with the hardihood of the blackface; does he get it? No, he gets an excellent animal, but utterly unsuitable for enduring the hardship through which the pure blackfaced must live, and, on the other hand, it will not produce so much mutton in a flowers are less than half an inch long given time as the pure Leiscester. to 1,400 lbs. Early arrivals from the range districts show plainly enough that in the matter of flesh and condition the westerns are far ahead of past seasons, they are now maturing rapidly and by the first of August will be coming forward freely. The dressed beef buyers are paying strong prices for them, and after they show a little more hardness and ripeness no doubt buyers for eastern markets and for the export business will take hold of them. All of this goes against the native steer unless he is good enough to sell over and above the westerns, and to do that this year he has to be better than usual. Buyers show a strong preference for the range cattle over native beeves that will not grade up high, and we advise our customers to keep their native steers off the market until they are in shape to stand sharp competition. As we have before stated there is going to be good inquiry for well finished native beeves weighing 1,400 lbs, and upward for eastern and foreign markets, and meantime feeders can be well employed in fattening up this class for the late summer and fall market.—Live Stock Report.

Changes in Clover During Growth.

The Minnesota experiment station has investigated the progressive changes of clover during its growth. Five periods were used: Before the head was visible, at early bloom, full bloom, end of flowering and at maturity. The dry matter increased up to the end of flowering, so did the ash. The increase of protein closed at full bloom, while above figures represent percentages. Of the mineral elements potash increased to the period of bloom and decreased thereafter.

The same was true of magnesia, while lime and the phosphates increased until the end of flowering and then decreased. These investigations are in accord with others, showing that after maturity the crop retrogrades.

The investigator, Prof. Snyder, finds that a crop of 436 pounds abstrats from the soil 66 pounds of potash, 76.4 pounds of lime, 1 pound of soda (would friends of soda expect it to replace the potash?) and the phosphates 28.4 pounds. Analyses by parts of the crop show that the potash was in a larger amount in any other man during the present seathe stem than in the leaves, while the son, and has so far distanced all comlime was greater in the leaves than in petitors in climbing to the top of the the stem.

For canning they have no superior. They can be raised easily and cheaply, are a sure crop will come into bearing the second year and always bring a good price on the market.

I came past a number of gardens today. In all of these were currant and gooseberry bushes, but not a single hill that would produce even fair berries. The grass and weeds were abundant and some of the bushes had I think 200 canes in the hill. I never saw a currant or gooseberry bush thinned enough unless grown by a specialist. My finest iruit is gathered from those hills that have a single stalk, and if planted three feet apart will out-yield any other

method of thinning. I raise from cuttings, rooting them in beds and planting nothing but well rooted plants. I plant four feet apart and plow them two years. No suckers are allowed to grow. When the bush is formed the new growth is well clipped each year. I would as soon think of leaving my hair unclipped as my bushes. It will take but 15 minutes to clip enough for one family's use. Mormons at Nauvoo.

(PUBLISHED BY REQUEST.)

From the Toledo Blade When the Mormons were driven out of Missouri, in 1838, they crossed over into Illinois and founded Nauvoo. In few yearr it had several thousand inhabitants, and in 1841 the foundations of the temple were laid. In 1838 Joseph Smith, the Mormon prophet, has persuaded several women to cohabit with him, calling them his spiritual wives," although he had a lawful wife, marrying her in 1827. His wife became jealous of these women, and to pacify her Smith received, July 12, 1843, a revelation authorizing polygamy. This was whispered at Nauvoo, and created much scandal, and was strenuously denied in public. It was not until 1852 that the Mormon with an aperture at its end which reeaders published the revelation of coives the lower end of the kindling 1843, and boldly avowed and defended tube. When the lamplighter's pole is polygamy.

Meantime, in 1843 and 1844, Smith nade advances to so many women in Nauvoo, asking them to become his 'spiritual wives," that great uproar was created by the declarations of the women who refused him. Among those who repelled him and denounced him in public was Mrs. Foster, wife of Dr. Foster. Her husband, with Wm. Law and others whose wives had been solicited, renounced Mormonism and started a paper at Nauvoo called the Expositor. In its first number they half. It is almost inconceivable that in our civilized nation in the modern age there are still so many otherwise sensible women who are willsuffer tortures for the sake of wearing shoes just a little too small, or which are, as they imagine falsely, pretty or more fashionable. Old leather or kid is not soft and elastic and does not easily shape itself to the foot or the hand. This is not only a matter of comfort, but of economy. In this, as in many other things, "the best is the cheapest," and as few women, or men either, for that matter, are good judges of leather it will be wise to buy only of honest, experienced dealers, in whom we can confide, for we cannot afford risks in a matter where so much is involved. An uncomfortable shoe is really a very serious matter when we take into consideration the pain and discomfort, the probable deformities in the way of corns and bunions, the wear on the pervous system and the unpleasant consequences of our irritable tem-

Systematic Plan of Speculation

originated by us. All successful speculators operate on a regular system.

It is a well-known fact that there are thousands of men in all parts of the United States who, by systematic trading through Chicago Brokers, make large amounts every year, ranging from a few thousand dollars for the man who invests a hundred or two hundred dollars up to \$50,000 to \$100,000 or more by those who invest a few thousand.

It is also a fact that those who make the largest profits from comparatively small investments on this plan are persons who live away from Chicago and invest through brokers who thoroughly understand systematic trading.

Our plan does not risk the whole amount invested on any trade, but covers both sides, so that whether the market rises or falls it brings a steady profit that piles up enormously in a short time.

NEWS OF THE HAPPENINGS IN MICHIGAN.

A Strong Effort Being Made to Secure Pardons for the Molitor Murderers-Ugly Insinuations Against ex-Attorney

Molitor Murderers May be Pardoned. An attempt is being made to secure the pardon of the alleged Molitor murderers who were sentenced from Alpena county last year to Jackson prison for life. The prisoners are August Grosmann, August Fuhrmann, Henry Jacobs, Carl Vogeler and Wm. Repke. It will be remembered that these men were convicted of killing Albert Molitor at Rogers City on the night of August 25, 1875, and it was principally on the confession of Wm. Repke-who, after nearly 20 years, says that his conscience troubled him -that the convictions were secured. Repke now makes affidavit that the evidence he gave was false. He further represents that he was induced to swear falsely upon the trial upon the assurance that by doing so he would free himself. He further says that at the time of the first confession he was intoxicated and afterward desired to withdraw his confession, but was not allowed to do so.

In the case of Henry Jacobs, the defense attempted to prove an alibi on the trial. It was shown that the wife of the accused gave birth to a child on August 27, 1875, two days after the murder of Molitor, and that for several days previous thereto Jacobs han been detained at home by his wife's illness. Attorney-General Ellis was conducting the prosecution and it is now alleged that he controverted this testimony in Jacobs' defense by sharp practice. During the closing hours of the trial he introduced a certified copy of the county clerk's record which showed that the child was born in 1876, a year after the murder. But now Joseph Smith, ex-county clerk, makes affidavit that there was an entry of the birth of the child for both 1875 and 1876, but the church records and the testimony of the neighbors show that the latter entry was erroneous. Nevertheless, Ellis directed Smith to make a certified copy of the latter entry and return the record to Rogers City, thus preventing the defense from meeting this evidence before the close of the trial.

But Little Sympathy at Bessemer. Three miners representing the Ishpeming and Negaunee strikers visited Bessemer, presumably to solicit aid to carry on the strike. The notices carcarry on the strike. The notices carrying mass meetings, however, convey the idea among miners that the union is trying to cause a sympathetic strike on the Bessemer range. Several hundred attended the first mass meetings. The feeling expressed was that the strikers made a mistake, and should

return to work. The committee was much discouraged. A later dispatch from Ishpeming says: The strikers' soliciting committee has retured from the copper country, where they expected to secure \$6,000, with but \$120, the situation is becoming desperate for the men who have been idle for six weeks, and who were illy prepared for the seige. The men hardest to keep in line are the Finlanders and it is certain that the first day that hunger really pinches them they will make a break for work. They are growling deeply that the relief funds promised

them do not show up.

Four Drowned in St. Clair River. Frank Derufg his sister-in-law Mrs. Michael Derufg, and Misses Celina Chonski, Minnie Schoenhart and Edith Comier were picnicing on Stag island, near Marysville, in St. Clair river. They saw a storm coming up and started to row home, but when within 300 feet of the shore a squall capsized the boat. Frank Derufg was a good swimmer and he managed to get the women all to the overturned boat, but instead of holding on to it they clung to him. He held three of them up with one hand and kept hold of the boat with the other until one of the women grabbed the hand on the boat all all four went down and were drowned. The Schoenhart girl bravely clung to the boat and was rescued later by some boys. Mrs. Derufg leaves a husband and two small children. The two young ladies were about 20 years of age.

Michigan Good Templars. The grand lodge of Michigan of the Independent Order of Good Templars met at Stanton. The grand secretary reported the present membership as 6,301, a decrease of 2,412 since July 31, 1894. There are now 186 lodges in the state, a decrease of 65. During the year 29 lodges have been instituted and reorganized, six charters surrendered and 88 charters forfeited. Only about one-fourth as many lodges have been organized during the last year. Another cause of loss is hard times. There appears to be a general falling off in interest in temperance matters. The officers of the grand lodge how-ever, think that this lull is only temporary. The grand treasurer reports

Strange Murder at Iron Mountain. John Knutson was murdered at Iron Mountain by two men who followed him from a saloon. He was but a few rods from the door when a number of people saw the men running toward Knutson. An instant later there was the report of a revolver, Knutson fell dead, and the murderers ran down an alley and disappeared. There is not the slightest clew to the murderers, nor the causes that led to the crime.

total receipts of \$4,256.68; orders paid,

\$4,306.52; overdraft, \$48.94.

Norris Green, of Dundee, who hired a hundred or more Monroe laboring men to work on the gaspipe line at \$2 per day and then skipped out, leaving an unpaid board bill, was sentenced to 50 days in jail. Green is wanted in both Toledo and Adrian for working

swindling schemes. The body of John C. Speidel was found floating in the river at Lansing, about a block from the residence of his daughter, Mrs. J. C. Wolf, with whom he lived. It is doubtless a case of suicide, as the old man was slightly deranged and had previously attempted to kill him. He was 86 years old.

TROOPS AT ISHPEMING.

Men at Work on the Steam Shovels at the

Mines-Strikers Very Sullen. In response to requisitions from both Sheriff Broad, of Marquette county, and Mayor Johnson, of Ishpeming, Rich ordered the companies of the Fifth regiment, Michigan National Guard, located at Houghton, Calumet, Ironton and Marquette to report to Col. Lyon of the Fifth at Ishpeming at once. Assistant Quartermaster-General Avery left immediately with necessary camp equipage and 1,000 rounds of ammunition. The first and third divisions of the Michigan Naval Reserves, located at Detroit, were also ordered to be in readiness, with their Gatling and rapid fire guns, to proceed to Ishpeming on short notice.

The cause of all of this military gathering was for the purpose of protecting the men and property at the mines at Ishpeming, it having been decided to start the steam shovels at the mines. The mining companies had asked their men to report for work, but they refused and when the companies announced that they would start the shovels with other help the strikers became very threatening. Sheriff Broad and Mayor Johnson, upon consultation, agreed that they could not muster force enough to protect property and workmen and finally decided to ask Gov. Rich for troops

with the result previously stated. Thus it was that within 36 hours almost 300 troops were at "Camp Ishpeming" ready for duty. The following are the companies which reported Crst: Co. H, of Ironwood, commanded by Capt. Winslow, 62 men; Co. D, of Calumet, Capt. Grierson, 70 men; Co. F, of Houghton, Capt. Miller, 57 men; Co. G, of Houghton, Capt. McArthur, 52 men. Total 287 men. Col. Lyons

is the officer in charge.

Promptly at 7 o'clock the steam shovels were started at the Lake Angeline, Lake Superior and Salisbury mines. The presence of the troops seemed to have a quieting effect upon the strikers for although they as-sembled on the surrounding hills in great numbers they did not venture dangerously near the picket lines. The women were out in force and were more demonstrative than the men. They gathered in groups and crowded towards the stock piles, where men. the men are employed, and keep up a continuous cryof "black leg" and "scab." Their conversation was of the most inflammable nature. The parade of the strikers to Union park was very largely attended by strikers from both Ishpeming and Negaunee. President Coad, of the miners' union resigned and John Roberts was chosen as his

Desperate Murder and Suicide.

Mrs. John Wilson, wife of a hack driver at Battle Creek, left her husband because he did not support her. Wilson several times threatened her life if she did not return, and finally he went to the home of Lee Prine. where she had rented rooms, and tried to shoot her. Wilson pulled a revolver but his wife grabbed the weapon and threw it through a window. The enraged man then caught her by the hair and dragged her down the stairs and into the yard where he found the revolver. The woman broke away, but as she ran Wilson fired and the shot struck her behind the left ear and came out of ber eye. He then put the revolver to his temple and fired, killing himself instantly. Mrs. Wilson was taken to the hospital, but she cannot recover.

An Alibi for Smalley-But 'Tis Too Late. Mrs. John Smalley, wife of the man who was shot and killed at McBain by two deputy sheriffs on the supposition that he was one of the C. & W. M. train robbers and murderer of Detective Powers at Grand Rapids, has received a letter from J. C. Anderson, of Brinton, who says that Smalley was at Brinton on the night of the train robbery and also on the night of the murder of Detective Powers. S. F. Frve. a notary public of Brinton, gives confirmation of this, and has affidavits proving that Smalley was visiting relatives and friends at Brinton, 75 from the scene of the train robbery and the murder of Dectective Powers during the time of these occurrences.

Hot Lumber Fire at Saginaw. One of the hottest fires ever witnessed in Saginaw broke out in the lumber piles of Randall & Boyd. A stiff wind was blowing and the blaze was in a few minutes a whirling mass of flames that rapidly spread from pile to pile. The big plant of the Allington Curtis Co., manufacturers of dust separators, caught fire and seemed certain of destruction, but good work on the part of the firemen was so effectual that the loss was only \$6,000, covered by insurance. In the Randall

Uniform Laws Commissioners Meet a Detroit to Discuss Important Subjects -Chinese Offer to Make Reparation to Americans for the Recent Outrages.

For More Uniform Laws.

The annual session of the boards of commissioners, appointed by the several states to bring about, by voluntary state action, greater unanimity in the statute laws prevailing through out the states and territories, was held at the Cadillac Hotel, Detroit with 16 states represented. For many years past there has been a great desire among lawyers and the people gener ally for unanimity of law throughout the country. The law was passed in 1889 in New York state, creating an expert commission of three members consider the subject and advise with similar commissions in other states. Masachusetts, New Jersey, Georgia, Michigan, Delaware and Mississippi fell in line with the idea. The statutes creating these commissions have largely the same wording in the several states, and the men serve without pay. The subjects that have invited the attention of the commissioners were marriage and divorce, the execution of wills and deeds, notarial certificates, bills and notes, and commercial notes generally.

13 MINERS DROWNED. Flood Breaks Through into Two Mines

and the Poor Fellows Perish The accidental flooding of the Amerieus and Sleepy Hollow mines at Central City, Colo., caused the death of 13 miners. The water in the lower workings of Fisk mine, east of the main shaft, broke through the old workings of the vein that has not been worked for a number of years. It struck the Americus where two Italian miners were at work in the lower part of the shaft and they were both drowned. In its course the water diverted to the Sleepy Hollow mine, the easterly portion of the Fisk vein. Fourteen men were working in the Sleepy Hollow, three of whom escaped. A courier was sent to the adjacent mines and all

Armenians Fear Another Massacre. Advices received from Frzinghamam, rmenia, say that great terror prevails there owing to the attitude of the Turkish authorities. The latter, in consequence of an attack which was recently made by brigands upon a Turkish colonel during which a member of his escort was killed, are believed to be taking steps which will have most serious consequences. The Armenians are accused of being the authors of the attack on the colonel and it is alledged that a large force of Turkish troops has been retaliating by attacking the villages and monasteries of the vicinity and engaging in other acts of violence.

KNIGHTS TEMPLAR IN BOSTON. Parade the Finest Ever Held in America -The Prize Drill-The New Officers.

Boston has just entertained one of the fine t bodies of organized men ever gathered in the United States in time of peace. The tri-ennial conclave of the Knights Templar of America was held in that city of culture and baked beans and the American Athenians were amply repaied for the elaborate preparations they made to entertain the Sir Knights, of whom over 30,000 had made the pilgrimage to that city. The first great feature of the conclave after the arrival of the numerous commanderies was the parade, in which 25,000 Sir Knights participated. It is estimated that fully 500,000 peo-

ple crowded the streets of Boston to witness the grand pageant, and business was entirely suspended through-out the day. Boston has seldom if ever been so elaborately decorated. Practically every building along the ine of of march was clothed in color. with appropriate mottoes and emblems ntertwined with streamers and buntng. As the marching columns passed the reviewing stands before the Most Eminent Grand Commander McCurdy, of Michigan, and Gov. Greenhalge, of lassachusetts, and before Chief Marshal Lawrence and Mayor Curtis, many of the commanderies executed intricate military evolutions which yon the admiration of the thousands of spectators who witnessed them. Detroit commandery, as special escort to Most Eminent Grand Commander McCurdy, attracted much attention and was vociferously cheered as they executed many difficult evolutions. Ohio was well represented, having 17 commanderies in line.

The exhibition drill, participated in by six of the best drilled commanderies of the country, was held at the League ball park and was witnessed by many thousands. The six commanderies which drilled were from Washington, D. C., Troy, N. Y., Chicago, Louisville, Minneapolis and Deroit in the order named. All of them did good work, but when Detroit No. marched out, with 48 men in line, and performed evolutions of a most intricate character with all the preeision of a machine, the cheers of the crowds were tremendous. In order to avoid jealousies no official judgement of the merits of the competing commanderies was given, but the universal opinion of all was that Detroit No. 1 was the finest drilled body of men

ever seen in Boston The election of officers for the next three years resulted in the choice of Right Eminent Sir Warren La Rue Thomas, of Kentucky, as most eminent grand commander.—The other officers are: Deputy grand commander, Very Eminent Sir Reuben H. Lloyd, of San Francisco; grand generalissimo, Very Eminent Sir Henry B. Stoddard, of Texas; grand captain-general, Very Eminent Sir George M. Moulton, of Illinois; grand senior warden, Very Eminent Sir Henry W. Rugg, of Rhode Esland; grand junior warden, Very Eminent Sir W. B. Melish, of Ohio; grand treasurer, Very Eminent Sir Wales Lines, of Connecticut; grand ecorder, Eminent Sir W. H. May, of Missouri. The committee announced the next tri-ennial conclave would be held at Pittsburg in October, 1898.

Hazekiah Roberts, a young farmer at Butler, Ky., cut his wife's throat and then cut his own. Both are dead. The bloody deed was witnessed by their three children.

"By mighty! If that isn't my son Sam! Where on earth did you come from, Sam?"

"Been chasing the buov."

"Chasing the buoy!" This was Captain Floyd's voice. "Yes sir. It broke loose four days ago, and has been drifting round ever since. It's scared the officers of more'n a dozen ships half out of their wits

already." "And well it might. Why, when we heard it we thought we were right on the rocks.'

"And what fetched you out here, Sam?"

"Chasing it for the salvage. Four boats started from the Holl to find it. They are all round here now, for a French steamer heard it last night,-'most scared 'em out of their senses,and now you have run afoul of it. We'll come up with it as soon as the fog lifts. We heard you stop in the fog, and kinder guessed what was the

matter." This speech, distinctly heard by all on the deck below, produced a profound impression. The relief from the strain of fear and anxiety found expression in a sort of inarticulate murmur that broke into loud comments and laughter and ended in a rousing cheer, in which sailors, firemen, and passengers joined. Then followed a scene of confusion, in which everything save gratitude was forgotten. Men swarmed up the steps to the bridge and fairly dragged the frantic enthusiasm.

The officers made no attempt to stay the almost The people seemed to have but one instinct -to make a hero of the man who had so instantly changed the tragedy that had seemed to impend over all their lives into almost farcical comedy. Men shook hands with en tire strangers. Women kissed one another in tears and laughter. One big fellow-a Western man-poured a handful of gold into the young man's cap, and then threw another handful to the crew. Finding the little boat with one man on board still at the ship's side, he gave final vent to his enthusiasm by dropping his pocket-book on the boatman's head, where it struck with a loud whack and bounced into the water amid shouts of laughter from the spectators. Below, corks flew in a sort of fusillade, and every one tried to be happy-some in good

ways, some in bad. In the midst of the uproar of rejoic ing the sun burst forth, and the mist melted away like a torn sail, and there on the sea were the four good boats from the Holl racing frantically for a black dot on the water a mile astern. And through it all the steamer lay

"I hardly know, doctor," said the Judge, "We were on deck when that man-that fisherman-arrived, when she suddenly fainted, and we brought her to her room."

Mrs. Gearing, poor lady, completely unstrung by the events of the day, sat beside the girl, bathing her face and wondering what had happened. Why faint in a moment of such rejoicing? Just then there was a knock at the

"Yes, Captain, but she is very ill." "Ah! Perhaps I understand why. You are her guardian, I think, sir?" "She is traveling with us."

"You represent her?" "Yes, I may say I do. What is wanted?"

"Just this, sir. Her father, Capt Johnson, is on this ship, and—you will excuse me for plain speaking-I fear there has been some misunderstanding betweer sem. I am keeping the ship here that I may take the girl to her own father.'

"He is not her own father." "Who is?"

Her spirit seemed to be equal to anything, and in spite of the doctor's protestations she insisted on going at once with Capt. Floyd.

In the chart-room sat father and son, silent, each with his own grief.

At last the old man spoke: "The ways o' Providence ain't for any man to find out. It may be a marcy, but I don't see it that way-not just now."

"Not a letter, father, not a letter from her since you went away. "Full speed ahead." One bright December morning, four weeks after the whistling buoy had gone adrift, a strange schooner made the little port of Wilson's Holl. I'he truant buoy had been restored to its place by the light-house steamer, and the steamer evidently knew the way into port, for it steered directly for the buoy, and dropped anchor. The hotel and the cottages were closed, and the only life in the place clustered round the little wharf. The new keeper of the light saw the strange schooner first, and telephoned to the postoffice. She might want a pilot, and there were plenty of venerable sea-captains who would be glad to pick up a little job like that.

Wages Are Going Up.

A gratifying evidence of the improved condition of business is afforded by the fact that an increase in the wages of operatives is reported in nearly all the important manufacturing centers in New England, Pennsylvania Ohio, and other states. The advance in some cases is as much as twenty per cent., and in none is it below six per cent. These advances appear to have been voluntarily made in every instance. Such a fact goes to show a restoration of confidence between employers and employes, and justifies the belief that industrial relations are gradually being adjusted to a standard of justice and fair play. There is every ground to believe that business generally will from this time forward show steady improvement, and that the producing classes will not again be reduced to the extremities of the last year or two, unless the persistent agitation of the silver question shall operate to repress intelligent and generous enter

WHEN MARIA JANE IS MAYOR

When Maria Jane's elected to the mayoralty There'll be many wrongs corrected that are now apparent there.

The sidewalks will be carpeted, the streets swept thrice a day,
The alleys be as fragrant as fields of new

mown hav. What with parties and receptions and occasionally a ball,

And each ward in the city will be represented By lovely alderwomen and not horrid alder-

When Maria Jane is mayor, none but ladies will, of course, Be appointed members of the city police force, And in their bloomer uniforms they'll look so The gang to be arrested will consider it a treat.

The stores will be compelled to have a bargain sale each day, And for chewing gum and soda you will not be asked to pay.
Oh, great reforms will be projected, all the wrongs will be corrected

was an ugly charge. The evidence was conclusive against him. "When I went down to court, he came staggering into my room about twothirds drunk. 'Jim,' he said, 'these infernal scoundrels are trying to prosecute me—perfect outrage. I told 'em just wait till I saw Jim Griggs, and we'd fix it—I told 'em we'd let 'em know who to prosecute. And we will. Won't we, Jim?'

In every household the daughter has her appointed work. In all but the richor merchants' houses the daughter's duty is to bring the water from the well evening and morning. It is the gossiping place of the village, this well, and as the sun sets there come running down all the girls of the village. As they fill their jars they lean over the curb and talk, and it is here that are told the latest news, the latest flirtation, the latest marriage, the little scandal of the place. Very few men come. Water carrying is not their duty, and there is a proper time and place for flirtation. So the girls

have the well almost to themselves. Almost every girl will weave. In every house there will be a loom, where the girls weave their dresses and those of their parents. And very many girls will have stalls in the bazaar; but of this I will speak later. Other duties are the husking of the rice and the making of cheroots. Of course in the richer households there will be servants to do all this, but even in them the daughter will frequently weave, either for herself or for her parents. Almost every girl will do something, if it be only to pass the time. -Blackwood's Magazine.
