CASS CITY. - MICHIGAN.

The window glass trust formed in Indiana last week is not a thing to be made light of.

The neighborhood gossips and the bicycle are much alike. They're always running somebody down.

Chicago's postmaster gave a party on the trolley cars. The songs they sang were of the trolley-la-la variety.

What is called the "bicycle face" is really the result of a gradual approximation of the human countenance to the long, solemn horse-visage.

Woman's temper has always been spectacular, but there are possibilities never dreamed of when the new woman discovers that the hired girl has worn her bloomers out.

Miss Stella Dunlap, member of a wealthy Peoria family, and Prof. Henry Albion Molohon, of the deaf and dumb institute at Jacksonville, both deaf mutes, were married the other day. It was a case of mutual affection.

Already the woman's board of the Atlanta Exposition has got a row started. This shows that the Atlanta Exposition is a real exposition, and no make believe. The row on the woman's board is a good test of genuineness.

People who drive horses should be taught by law, if in no other way, that bicycle riders have rights even if the drivers of horses do not like the wheel. The Brooklyn papers tell of a case of two men who deliberately turned out of their course, whipped up their horse, and ran down a woman on her bicycle. Such things are perhaps not common, but when found should be punished.

Wyoming is in the front as the paradise of the fin de siecle girl. The daughter of the governor of the state is his private secretary, and when he is away she is to all practical purposes his representative and fulfills the duties of his office. And she is only 19 years old. It takes a rather bright girl to run a state, even one where woman suffrage has been in force for twentyfive years. Now, when she marriesbut that opens up too wide a field for speculation, and, besides, it is his look-

When the papas and mammas get back home from spending their gold and enjoying(?) the discomforts of European travel some of their boys and girls who have been studying geography should open quiz classes and see whether papa and mamma know half as much about the beautiful and grand scenery in their own country as they do of Europe. The lakes of Killarney do not surpass in beauty the lakes of Wisconsin and Minnesota. The Swiss mountains are nowhere grander than those seen in Colorado, California, Idaho, or Washington. There are no wonders in all Europe to compare with the Yellowstone Park. Yet not one in fifty of European tourists from America ever saw the great west.

From the nature of the case the English market for wheat, or corn, as they call it on that side of the Atlantic, is a bear market. At the very most the tight little island raises only a small part of the breadstuffs required to feed the people who swarm about its hives of industry. A few days ago a London dispatch set forth that there was a glut of grain coming from different parts of the world. One would suppose from the representation made that our farmers ought to be thankful if they got half price for their wheat. Since then there has fallen under observation the estimate made by the Russian minister of finance of this year's wheat crop. His figures are these:

	Quartors.	water ters.		
	24,000,000	24,100,000		
	38,500,000	42,800,000

Totals231,100,000 259,200,000 It will be noted that these figures show a deficit as compared with last year of 28,100,000 quarters. Russia is naturally a bull in the wheat market, and some allowance must be made for that fact. That country wants dear breadstuffs as much as England does cheap. Curiously, John Bull is a bear and the Russian bear is a bull. But making all due allowance for this difference in point of view it is evident that wheat growers the world over have a clear right to expect fair prices for this year's crop.

A paper declares that "Mr. Johnson, a farmer of our village, on returning to his house the other day, found in his ground-floor bedroom, the door of which had been left open, a cow, probably astray." The conjecture expressed in the last two words may be set down as, on the whole, a fair one.

A Fighting Evangelist. Among the numerous incidents in the

life of Jabez S. Swan the following is ported by H. L. Dietz, of New Haven: A certain man became exceedingly angry at Elder Swan, who was about to baptize his wife and daughter, and threatened his life in case he persisted in baptizing them. The madman was at the water's brink at the time of the baptism, and advanced with clenched fists to meet the evangelist as he "came up out of the water," pouring out volleys of abuse, and challenging the preacher to fight. Elder Swan coolly listened to his talk, and told him that as he was somewhat busy that day he would accept his challenge and meet him the next morning at 9 o'clock in front of a well-known office on the main street. He, being the challenged party, had a right to name the time and place of the meeting, and the challenger could do no less than accept the terms. The hour came, the evangelist was on hand, the challenger was there, and a crowd of spectators gathered to see what they would see. Said the elder, "Are you ready?"

"I am," replied the pugilist. "But," said the preacher, "I always Jahez Swan could offer, until the pudown of strongholds."

The Way to Ruin.

Dean Frederick W. Farrar, perhaps the most famous divine in England today, gives some touching pictures of rum's work. He says: "At the entrance of one of our college chapels lies a nameless grave; that grave cov- the right manner will nobly respond. ers the mortal remains of one of its Will J. When I was at King's College I used to sit next to a handsome youth who grew up to be a briliant writer. He died in the prime of life, a victim to drink. I once knew an eloquent philanthropist who was a very miserable man. The world never knew the curse which was on him; but his friends knew it was drink. And why is it that these tragedies are daily happening? It is through the fatal fascination, the seductive sorcery of drink, against which all scripture so often warns. It is because drink is one of the surest of "the devil's ways to man and of man's ways to the devil."

Echoes from Other Anvils.

New York Tribune: The liquor traffic is to-day the heaviest clog upon the progress and the deepest disgrace of the nineteenth century. Cumberland Presbyterian: Giving is

doing; a poor man's missionary dollar stands out for a day's work in preaching the gospel. Surely every Christian should give the price of one day's work each year to carry out Christ's great

Northern Christian Advocate: Love enlarges the heart. The smaller the heart the more malignity, grudges and revenge it will hold. The measure of a man does not depend on the bigness of his body or even of his brain, but of the heart. Magnanimity is greatness.

Mid-Continent: When a skeptic once tried to convince Addison, the English essavist, that the Christian religion was a delusion, "the baseless fabric of a vision," his reply was: "No matter. Call it a dream, if you will. But don't wake me up. Let me cherish the sweet delusion, since it makes me both a hap-

pier and a better man." Christian Leader: We are drawing nearer and nearer to the Infinite Spirit toiling upward in the night, fulfilling the great intelligent purpose. Not one pang is administered that does not prove a stepping stone to higher things. Still we grope onward in the dark, catching here and there a glimpse of light and hope to cheer us on our way. Sunday-School Times: A man speaks

by his eyes quite as much as by his voice. The voice is guided by the will but the eye is controlled by the spirit within, and the will cannot master it One's best inner self shines out through the eye; or, if the effort be made resolutely to conceal all expression, the shadow of furtive concealment will darken the eye. An Oriental proverb says: "Listen to a man's words, and look at the nunil of his eye.'

Weekly Witness: It is still true, as of old, that the successful man usually lives in luxury and fares sumptuously every day, leaving his poor brother to starve or worry through as best he can. There is one word in the Bible which should be engraved in flaming letters in every rich man's banqueting hall, for lines: it will one day ring with awful emphasis in the ears of all who refuse to Plenty of sorrow, plenty of sname. be their brothers' keepers. That word is "Remember!" "Son," said Abraham,

The Christian Herald: The best help that can be given to the church is that of the individual life, every man living for Christ, seeking in every way to commend Him to those who know Him not. Such a spirit will promote comradeship. Each will respect another who is striving in his own way for the same end. There will be a readiness for co-operation, a desire to supplement and assist other men's efforts, an endeavor to fill up what is lacking and a willingness to undertake inconspicuous and humble duties.

Hidden Deeds. How few of the dreadful deeds accasioned by drink are made public! How many are borne in silent agony! John B. Gough, whose name is familiar to all, related the following: "I knew a gentleman who married a very sweet and lovely girl. She was very devoted to him, and when she discovered his dissipated habits she endeavored to shield him. When he stayed out at night, she would send the servants to bed, while she waited and watched for him; and then, in her night dress, and a pair of slippers on her feet, she would glide down very gently and let him in. One night he came home later. The servants were in bed. The house had a front door, then a marble vestibule and then an inner door. She opened the one steppped upon the cold marble and opened the outer door. The drunken husband entered, seized her by the shoulders, swung her round, opened begin my work with prayer. Let us the inner door, quickly passed through, pray;" and dropping on his knees, he and locked it before his wife could enpoured out such a prayer as only ter. She would not speak or cry out, lest she would disgrace her husband gilist broke down beneath it, the crowd before the servants. In the morning of witnesses were awed and melted, the she was found with her night dress ground was cleared, and the preacher, drawn under her feet, crouching in the was a victor without a blow. The man who offers in the milk, and with this diminution there is a corresponding increase in the keeping properties of the product; either milk ought to remain sweet for a considerable longer period than raw milk. Pasteurized and often the sterilized product, however, undergo sooner or later a fermentation induced by the bacteria spores remaining in the milk. These changes differ from those remaining we observe in raw milk. The milk curdles, but the character of the curd is entirely different, and to the taste is not usually very sour. These conditions are brought about by the presence of bacteria that are able to excrete rennet, and the soft, jelly-like curd seen in boiled or heated milk is due to this ferment. Lactic acid or sour milk bacteria, as a rule, do not form spores, so they are easily destroyed by heat. The destruction of these widely-spread organisms leaves the milk seeded with a spore-bearing rennet and butyric acid bacteria, which brings the peculiar change which is noted in pasteurized or sterilized milk.

The physical characteristics of milk treated by heat compared with raw milk as a rule are much less certain. With the sterilized milk there is a marked change in the physical constitution of the milk that cannot be readily detected. The application of heat at a temperature exceeding 158 degrees F. for 15 to 20 minutes produces a coagulation of certain proteid elements, Whatever else is wrong, trusting and at the same time the milk acquires a peculiar cooked taste. With pasteurized milk this change is not so apparent, in fact, no cooked flavor should be perceptible. The physical constitution of the milk is undoubtedly somewhat modified, even with the lower degree of heat used. This is shown in the way rennet acts on pasteurized milk. The coagulation produced by this chemical ferment is entirely different in character, and appears much more slowly than when acting in fresh milk.

A Cheap Silo.

The Colorado State Agricultural College is reported to have an underground silo which is certainly a miracle of cheapness of construction. It has a capacity of sixty-four tons and was built at a cost of forty-three cents for each ton of capacity, which would make \$27.52 for the silo, or, including the cost of four partitions by which it is divided, the cost is placed at sixtyfive cents a ton of capacity, which would make the total cost, including the partitions. \$41.60. It is built on a spot which remains dry the whole year. Here a hole twenty feet square and eight feet deep was dug chiefly with a scraper and team. The studding, two by six, rest on two by six inch sills and are held at the top by a plate of the same size. A single layer of unmatched boards lined with tar paper is held in place by perpendicular slats and these constitute the sheeting. Dirt is filled in against the sides. The silo has no roof and the silage is covered with straw and six inches cf mostened dirt, which is said to preserve it well. A silo could hardly be provided for less money than this is said to have cost.

Raising Geese for the Livers. It was an archbishop of Strasburg, a native of Toulouse, who introduced in the district during the last century the rearing of the Toulouse goose for its liver, says an English writer. In the region of the Garonne, the poorest of the humblest peasants rears every year a dozen geese, and fattens them on maize or millshorts. The goslins are brought up like the chickens and turkeys-members of the peasant's family. The geese are only reared for their liver; that, duly extracted, is sold, and the proceeds pay the rent. The flesh is kept by the family, and potted in melted lard, and this preserve enters into a variety of succulent dishes in the regions of Bordeaux, Pau, etc. The peasants flavor their cabbage soup with a little of it, and it is more liberally served at family fetes, and on holidays. The geese are kept confined and literally stuffed, until there follows a fatty degeneracy of the liver, and just as this shows itself with the animal and death is threatened, the bird goes to the block, and the liver, now developed into enormous proportions, goes to the epicure, who pays a fancy price for diseased liver.

A Frightened Horse.-When a horse becomes frightened, demoralized or otherwise rattled about something he encounters, but does not understand, a good way to quiet him down is simply to talk to him in a good tone of voice. If a horse gets frightened at something he sees in the road, stop him at once and give him a formal introduction to it, telling him in the meantime how very foolish he is to let such a little thing disturb him. Nothing can be worse than to whip a horse when he is frightened. He doesn't get frightened because he wants to. It is only because he has seen or heard something that he is not familiar with. After he once gets thoroughly acquainted with the object of his uneasiness, it will never frighten him again.

Save the Feed.-With a short crop of hay reported from all of the principal hay growing states, he will certainly be a wasteful farmer who does not stack the straw carefully and preserve it in good condition for winter feeding. Choice new timothy hay is now selling for \$12 to \$13 in Chicago, and choice upland wild hay is bringing almost as much. At these prices we can well afford to sell hay and buy cheap by-products, if necessary, to feed with the straw and corn fodder. We do not advocate raising hay to sell, but we he lieve in holding the platter right side up after one year of panic and another of drouth.-Farm and Dairy.

Baffled Many Times but Success Comes at Last.

(From the Grand Rapids Press.) The following incident would be hard to believe if it had not occurred right here in Grand Rapids, and investigation by our representative has placed it beyond the reach of doubt. These are the facts in detail: Mr. J. H. White of No. 25 Haifley Place, has been an instructor in penman ship in different business colleges for the past fourteen years. He says: "Last Oc-tober I was suddenly taken ill. I consulted a physician, who said the pain was from 'gravel' stones; gradually grew worse; the pain was in my back and side. My back swelled up in a great ridge, and I finally grew so bad that I was taken to bed, as helpless as a child. I passed blood, and when the pain was at its worst I was like one crazy. The doctor injected morphine to give me relief, but further than that he said he was powerless, and nothing would do me any good but a surgical operation. I believe my flesh was literally cooked in the attempts to relieve my agony, everything was used, mustard by the doctor, and almost out of my mind with suffering. > A GLOOMY SUPERSTITION, It Brought Bi ter Disappointment to Two Loving Hearts.

The rain was softly falling on D street between Ninth and Tenth. So softly falling that it was hardly falling. This meteorological paradox is presented here for the first time, and the attention of the weather bureau is called to it by the writer. It might also be noted that the rain was falling in other parts of the city, but we shall pass that by. At this moment a clock in the vicinity struck 8 p. m., and ere the last stroke died away a solitary young man in conspicuous attire might have been seen emanating from a doorway not far from the street end of an alley. Over the doorway three auriferous spheroids glinted and glistened in the gloaming. aided and assisted by an arc light. The young man carried in his right hand a lady's silk umbrella with a Dresden china knob for a handle. It was a dainty affair, and must have cost \$2.99, marked down from \$3. As the young man came out of the doorway he glanced nervously toward the corner, where a fair young being was apparently waiting his coming. When she saw him emerge she hastened to him with a radiant smile lighting the lily bloom of her sweet young face, but when she observed the umbrella in his hand her countenance fell, and sile would have stepped on it, had she not stopped in time. "Oh, Harold," she exclaimed, in tones of bitter disappointment, "what ever is the matter?" "No ice cream tonight," he hoarsely responded. "But my umbrella?" she said with a questioning nod towards it. "N. g," he answered. "Why, Harold," and there was a quiver in her pretty red lips, "couldn't you get anything on it?" 'Nixy," he growled. "Not even enough to pay for the cream?" "Nit." "Why not, Harold? Did you try real hard? "Of course I did, but the old duffer wouldn't have it a minute, Kitty. He that? BRIEF ITEMS ABOUT MICHIGAN PEOPLE AND THINGS.

The Strike of Iron Miners in Marquette County Has Come to an End by the Strikers Surrendering Unconditionally -But Few of Them Can Obtain Work.

The long and stubborn strike of the iron miners of Marquette county which was inaugurated July 16 is at last troken and the strikers have voted to return to work as soon as the mine owners are ready for them. There had been mumblings of discontent among the strikers for two or three weeks. many of then wishing to return to work at the scale recently offered by the owners, but they feared for their lives to do so or even to voice their sentiments very extensively and it was only within the last few days of the strike that those in favor resuming work made much of a show of numbers and when they did finally secure the privilege of taking a vote on the question over 1,300 of the strikers assembled at the union park between Ishpeming and Negaunee. After several speeches a vote was taken which resulted in a majority of just 100 in favor of ending the strike. There was a big cheer from the winners and groans from the losers. It was decided to wait until an official declaration of the end of the strike had been made before applying at the mines for work. The men have the consolation of knowing that they return to work at wages about 20 per cent ligher than those they were getting when they went out, but they reflect with some bitterness that they might just as well have been working at this advance for the past seven weeks. It is evident that out of the 4,000 men out, not more than 2,500 can be given employment during the next three or four weeks. Many of the mines are partly filled with water and the largest of the Negaunee mines will not be opened. There is no doubt that the mine bosses of Ishpeming and Negaunee, in selecting their men, will boycott the leaders and the more turbulent among the strikers. The strongest prejudice seems to be against the Cornishmen.

The strike thus ended has been the longest and concerned more men and industries than any that has ever taken place in the iron industry of Michigan. During the hard times of 1895-4 wages were cut down until the miners were getting a bare subsistence. There were no complaints during those times, but when the times began to brighten last spring and the price of iron ore to rise the miners grew dissatisfied and in May made a demand for an increase in pay. It is now conceded that had a raise been granted at that time a strike would have been averted, but the mine owners offered nothing until the strike was inaugurated and then they offered a 20 per centadvance. The miners then wanted their union recognized but this the owners refused to do and there the matter stood until the strikers sur-

Three Children Killed in a Tornado. A tornado struck Port Austin and

did a great deal of damage. Chimneys, trees, fences and grain was blown down. The windmill at Point of Pines was blown to atoms. At Pinnebog the house of Richard Tott was demolished and three children sleeping upstairs were instantly killed. Mrs. Itchu's four barns and orchard were destroyed at Kinde. At Sand Beach two houses and 12 barns were blown down, the depot badly damaged by lightning and nearly every building in town damaged in some way. The grandstand at the fair grounds at East Tawas was wrecked by the wind as were several barns and Richard Evans' house, and several farm houses were unroofed. Lightning destroyed John Curry's barn near Lexington.

A terrific storm of wind, thunder, lightning and rain visited Charlevoix, demolished one house, unroofed two others, blew down outhouses, trees and fences, but injured no one. Traverse City also had a taste of it and several of the tents of the soldiers' and sailors' encampment were carried away. At Williamsburg Geo. Tray's home was destroyed, as were three barns. Jacob Palzer lost has his home by lightning at Saugatuck and Robert Brown's barn at Cass City went the same way.

Michigan M. E. Conference

Albion has been entertaining the sixtieth annual session of the Michigan M. E. conference, which comprises the western half of the lower peninsula of the state. Bishop Hurst, chancellor of the American university at Washington, D. C., presided, with Rev. Thomas Fox as secretary. The Ep-worth League work was made one of the features of the conference and the local league gave a reception. The reports of presiding elders showed that churches were prospering, and when the canvass was completed it was shown that every charge was in favor of women having a seat and voice in the annual conference. HEROES HONORED.

CHICKAMAUGA'S BATTLEFIELD VISITED BY THOUSANDS.

Several States Dedicate the Monument Erected to the Memory of Their Slain -The National Park Dedicated with Very Impressive Ceremony.

It was 32 years ago that a threedays' battle-one of the most sanguinary of the rebellion-was fought on the now historic battlefield of Chickamauga. Thousands of heroes were slain and now their living comrades are doing honor to their memories by erecting numerous and beautiful monuments upon the spots where they fought for their country. The United States has secured a large amount of territory comprising the battlefield and the states of Michigan, Ohio, Illinois, Indiana, Minnesota and other states of the heroes slain have erected the monuments and given them into the keeping of the government.

The city of Chattanooga was filled with thousands of old veterans of both

the north and the south and thousands of other visitors on the occassion of the dedications and a grand reunion of the was conducted by those representing the state of Michigan. On Snodgrass hill, where was established the headquarters of Gen. Geo. H. Thomas, "the the sons of Michigan shed their life blood for their beloved country. A large multitude gathered here when the simple ceremonies of the dedica-tion were held. Capt. C. E. Rich who gave a very pleasing address and then presented the monuments to Gen. J. S. Fullerton as the representative of the national Chickamauga park commission. After Gen. Fullerton had responded Col. Henry M. Duffield delivered an address descriptive of the battles of Chickamauga, Lookout Mountain and Missionary Ridge and the heroic part which the Michigan troops took in them Gov. Rich and the Michigan commission then visited the various Michigan monuments which are as follows:

BLUE AND GRAY UNITED.

The Dedication of Chickamanga National Park a Most Unique Affair. Thirty-two years of peace and pros-

spot to hearts of all true Americans by the spilling of the life blood of over 35,000 heroes, and now the love of a reunited nation has made of that spot a national park to be ever re-tained as a memento of the fact that the last vestige of strife and hatred between the North and the South has been forever wiped away. The cere-monies of the dedication of Chickamauga park while they were simple were extremely impressive and many were the tears of joy shed by the griz-zled veterans of the blue and the gray as a U. S. infantry band struck up the "Star Sprangled Lanner," immediately after the national salute of 44 gun had been fired from Snodgrass hill. The exercises were held at Snodgrass hill because its side formed a national ampitheater and it was here that 32 years ago for a mile the top and side were so thickly covered with dead that one could walk all over it stepping from one prostrate body to another Among the distinguished participants were Vice President Stevenson, Secretary of the Navy Herbert, Secretary of the Interior Smith, Attorney Gen eral Harmon, Postmaster General Wilson, the governors of 13 states and scores upon scores of renowned men who took part in that great struggle. Fully 75,000 people were assembled when Vice President Stevenson was introduced and made the opening speech. After prayer by Rt. Rev. Bishop Gailor, of Tennessee, the vast gathering sang the national hynm "America," and they sang it as though they were inspired. The blue turned to the gray and as their hands clasped in brotherly grip the tears flowed lown their cheeks as together they joined their voices in that beautiful

Gen. John M. Palmer, the venerable senutor from Illinois, who risked his life on this battlefield, made the first dedicatory address. After another putriotic tune the battle-scarred veteran of the confederacy, whom Lee called his "right arm," John B. Gordon, of Georgia, was introduced. He was greeted with no less applause than accorded Gen. Palmer; and he spoke with fully as much enthusiasm and patriotism.

Gen. James Longstreet then spoke apon patriotism and urged against foreign encroachments-upon American soil. When he had finished the vast concourse sang "Auld Sang Lyne," and the exercises closed.

An enormous circus tent once used by Barnum was used for the reunion of the Army of the Tennessee, Union and Confederate; and it was jammed for two nights with veterans who came to hear their old leaders give patriotic addresses. The ceremonies of the lasts day of

DAMAGES FOR LIBEL

A Virginia Raper Brought to Terms by the American Book Company.

A dispatch from Norfolk, Va., 'The American Book company of Nev York has just gained a signal victory in the courts of Virginia and has neceived an absolute and complete vindication after a long and exhaustive trial by special jury in the Circuit court of this city. The Pilot newspaper of this city, upon the awarding of the contract for school books to the American Book company, printed a long article written and prepared by R. E. Byrd, an agent and attorney for Ginn & Co., of New York, in which it was charged that the state superintendent had been bribed by the American Book company. The Pilot was immediately sued for libel, and, after a five weeks' trial, which created an im mense amount of interest throughout the state, a verdict for punitive damages was necently awarded, and the jury found that the statements made were false and a deliberate libel. Not only so, but the company, upon unimpeachable evidence, was proved to have dealt honorably and up-nightly in every particular in their negotiarightly in every particular in their negotia-tions with the state officials. It was furth-er proved at the trial that no letter terms had been made with any other state for school books. In fact, the attorney-general of Virginia stated that the America company 'seemed to throw open their whole business to us. and after full and complete examination of all the original comtracts made with the various states he expressed bimself as absolutely satisfied that the prices were the same in all cases and that no discrimination whatever had been made against the state of Virginia. Furthermore be mentioned that none of the statements of the American Book company has been accepted until every one of them had been absolutely verified by direct reference to the governors of some fifteen states, with whom contracts had been made. This proved conclusively that the representations of the American Book company were cor-rect in toto. This celebrated case has thus ended in a complete triumph in every respect for the American Book company, and has shown in clear contrast the clean and business-like methods in which they carry on their great industry as compared with the attempted use of political pulls and misstaten ents, by their opponents."-Chi-

REVIEW OF TRADE.

Dun's says: In spide of gold exports wheat advanced for some days in all nearly two cents, merely because a single speculator bought, but it fell again. Corn gose and fell in sympathy with wheat, with, as little reason. Good reports of foreign crops, wearness of four in Minnesota and arge exports of corn from this country, all work against a rise in wheat, though scarcity of contract grades may hep a speculative advance. Pork products have been reasonably yielding with prospects of a large corn crop. The surprising increase in production and advance in prices of fron seem to be bringing a natural eneck, as prices have gone so high as to cause some purchases of high and linished products, and also caused a distinct shrinkage in home demand.

From the central and some western states there are ad vices that purchases of seasonable goods were checked because of the recent hot weather. In support of favorable induencing conditions are heavily increased totals of bank clearings, the largest week's aggregate of wheat exports ments of Indian corn in 17 months, the maintenance of full proportions of the extraordi-narily heavy demand for iron and steel and the significant hardening of leading money markets accompanied by reports of increasing mercan-tile discounts.

To Estcourt the dance was even more of a dream than the first one had been. To the thrilling influence of her beauty and her touch there was added that regretful consciousness of the inevitable end which makes the peaceful melancholy of autumn and gives the last perfection of pathos to the deep eyes of passion.

The whirling dance was the chaos of eternity, and the music filled it with exquisite sadness.

But now the measure rose sobbing to a final ecstasy, and lapsed again, and died slowly away upon a single note. He found himself standing by the door with the colonel's bland figure in front

A CAT UP A TREE.

Gallant Policemen Sent to Its Rescue and the Relief of the Ladies.

A singular request was made to Chief of Police Willard yesterday. A woman who lives in the neighbor-

noodhood of 169 Hamilton street called up police headquarters, and this is the conversation that followed: "Hello! Is this police headquarters?"

"Yes." "Is Chief Willard in?"

"Yes; I'm the chief." "Well, chief, have you got a police man who can climb a tree?" "Wh-what? A policeman who can

climb a tree? For what purpose?" asked the chief, greatly surprised at the unusual request. "There's a cat up in a tree opposite 169 Hamilton street, and it has been up there for four days. All the women and girls are in hysterics over it, and I wish something could be done about it. I thought that you could send a police-

man up to climb the tree and bring the poor cat down " "I am afraid our policemen are not very good at the art of climbing, but I will see what I can do.'

There has been much speculation about the so-called Moors living in ear showed the boy that she was in Kent and Sussex counties, Delaware, says the Milford (Del.) Herald. These people are usually swarthy, blackthe next morning he was in the factory haired and black-eyed, though someas soon as it opened, for the first time times of a fair complexion. They are mostly farmers. They have their own schools distinct from the general pubneither with whites nor with blacks. One theory has been that they are of five cents,' answered the man in sur- the Moorish race and that their ancestors were Spanish Moors wrecked on the coast more than a century ago. An-

George P. Fisher, a lawyer long prac-

ticing in Delaware, writes to present what he regards as satisfactory evidence as to the origin of these people. He has been acquainted with these people all his life. Noke Norwood, a giant of the tribe, erect and blackhaired at 75, he knew from childhood. When Mr. Fisher became attorney general of the state he was called upon to prosecute Levin Sockum, one of the race, for selling ammunition to Isaiah Harmon of the same race, the indictment having been found under a statute of Delaware making it a misdemeanor to sell arms and ammunition to any negro or mulatto. Harmon was a man of 20 years, with excellent Caucasian features, dark chestnut hair, rosy cheeks and hazel eyes. Mr. Fisher thought him the handsomest man in the courtroom. Neverthele 1, Lydia Clark, as' Eclectric Oil will positively relieve a kinswoman of Harmon, testified for the most offensive case of catarrh.' the state that according to a family tradition, some years before the revolutionary war broke out, when she was a little girl, their ancestress, a woman of Irish birth, owning and cultivating a farm of rstaqvet- sq'.p-croagfosc40 a farm in the Indian River Hundred, Sussex county, a few miles from Lewes, bought of a slaver that was driven into Lewes Creek a negro slave who professed to be a chief of one of the Congo tribes. The woman, whose name was Regua, shortly after married her slave, and their children, not being allowed to associate with the whites, intermarried with the remnant of the Nanticoke Indians then still living in Sussex county. The witness, a very old woman, looked like an Indian of pure blood.

Metal Wheels for Your Warons. The season for cutting corn fodder being close at hand, it may be well for farmers to get a set of these low metal wheels with wide tires. They can be had any size wanted from 20 to 56 n diameter wi to 8 inches wide. By having low wheels enables you to bring the wagon box down low, saving one man in loading fodder, etc. It is also very convenient for loading and unloading manure, grain, hogs, etc., and will save in labor alone their cost in a very short time. These wheels are made of hest material throughout, and have every possible advantage over the high wooden wheels with narrow tires, and will outlast a dozen of them. There will also be no resetting of tires necessary and consequently no blacksmiths' bills to pay. Wide tires save your horses and prevent cutting up your fields. For further information write The Empire Manufacturing Co., Quincy, Ill., who will mail catalogue free upon application.

all Americans can stand irrespective or religion bellef, namely, the platform of temperance therefore, be it RESOLVED. That we so co-operate with of non-Catholic fellow-citizens in every legitimate effort to restrict the evils of intemperance. RESOLVED, That we are pleased to notice the absence of intoxicants at many of the banquets given by Catholics, and we respectfully request Catholics to discontinue the use of figuors at their outers through Catholics to discontinue the use of figuors at their enterminments.

RESOLVED. That we respectfully require Catholic journals to aid our cause by refusing to publish liquor advertisements.

RESOLVED. That we urge the vormation of total abstinence societies among women, girs and boys, and we urge our male societies to give them every encouragement in their power.

A comparison of these resolutions with those of former years will show would prefer to have a sweet breath, this precious ones will come to light-[Vas- the steady advance the temperance cause is making amongst the members of the Catholic Church. One encouraging feature of this convention was that the spirit was far in advance of the resolutions.

> This Jubilee convention will certainly greatly encourage temperance work-
