Whether to try to win the girl again and go to farming or to give up the farm and take up a profession. Answer: Long years of trial and heart weariness have demonstrated that love is one of those eccentric articles that is always doing just what is not expected of it. One thing is certain, that it is almost useless to try to win back lost love. It is done in books very often, but in real life rarely. The most sensible course is to make up your mind that love that is not freely given will never freely abide. Better find out before marriage that the younglady is fickle than to wake up to it afterward. As to taking up the farm, it appears as though, having a good start, it would be folly to give it up. > About Mourning Dress. L. B. asks if it is proper to wear surah, gloria or black lace when dressing in mourning? Are small sleeves fashionable again? Answer: Acording to strict rules, none of these materials are mourning goods, but there is so much variety in individual opinion that rigid lines cannot be drawn. French mourning includes lace and many things that our ideas would not approve. If you want to be dressed in a genuine mourning costume, wear only crape and soft, black all wool goods, without figure or much luster. Small sleeves are not fashionable.

Politely suggest to such persons that you have no time to give advantage from any ministerial assothem during business hours. Nothing would please them so well as to have you renounce your occupation and associate with them. Much of the time they lounge around the doors of engine houses, or after the dining hour stand upon the steps of a fashionable hotel or an elegant restaurant, wishing to give you the idea that that is the place where they dine. But they do not dine there. They are sinking down lower and lower, day by day. Neither by day nor by night have anything to do with idlers. Before you admit a man into your acquaintance ask him politely, "What do you do for a living?" If he says, "Nothing, I am a gentleman," look out for him. He may have a very soft hand, and very faultless apparel, and have a high-sounding family name, but his touch is death. Before you know it, you will in his presence be makes a large bow. I turn the wheel of the mill. I rock in my crystal cradle muckshaw and water-lily." And so, while the world plays, it works. Look out for the man who always plays and never works.

You will do well to avoid those whose regular business it is to their places. I never derived so much ciation as from a ministerial club that went out to play ball every Saturday afternoon in the outskirts of Philadelphia. These recreations are grand to give us muscle and spirits for our regular toil. I believe in muscular Christianity. A man is often not so near God with a weak stomach as when he has a strong digestion. But shun those who make it a life's occupation to sport. There are young men whose industry and usefulness have fallen overboard from the yacht. There are men whose business fell through the ice of the skating pond, and has never since been heard of. There is a beauty in the gliding of a boat, in the song of skates. in the soaring of a well-struck ball. and I never see one fly but I involuntarily throw up my hands to catch it: and, so far from laying an injunction upon ball-playing, or any other innocent sport, I claim them all as belonging of right to those of us who toil in the grand industries of church and

But the life business of pleasureseeking always makes in the end, a criminal or a sot. George Brummel was smiled upon by all England, and his life was given to pleasure. He danced with the peeresses, and swung a round of mirth and wealth and applause, until, exhausted of purse, and worn out of body, and bankrupt of reputation

and ruined of soul, he begged a biscuit from a grocer, and declared that he thought a dog's life was better than man's.

This is an age of machinery, of science, of law. Law, we are told, governs everything. We live by law, fall sick by law, are doctored by law and are pious by law. But law in reality cannot do anything. Law is as powerless as an old wooden image. For what is law? It is the principle by which a thing acts; it is a method of procedure. But, observe, somebody must proceed. There must be a living agent behind the law, for laws cannot make or execute themselves .- Rev. W. C. Blakeman, Methodist, Brooklyn, N. Y.

A Brave Young Teacher. In a town in the Rockies, a short while ago, a young girl, who taught in the little schoolhouse of the place, performed an act of heroism worthy of the highest commendation. One of her scholars had a pet antelope, a sweet docile little creature, that followed its mistress to the school, remaining quiet

near the door during class hours. One day it lay as usual near the door, lazily basking in the sunlight, while the children pored over their studies. Suddenly there came a light thud and a scream. There, with his fore feet crushing the little creature, crouched a big mountain lion, savagely switching his tail from side to side and eyeing transient nature of the many phys-the children. saw puss coming through the tall grass with something in her mouth. She carefully jumped the fence, ran along to the shed and in the corner of the wood house leaped into the box that had been the nest of the lost kittens. A moment later she came out and disappeared. Going to the box, the visitor found a little fuzzy bunch of fur, with long ears and soft chesnut brown eyes—a baby wild rabbit. He could hardly believe his eyes, but there it was, cuddled in the hay uninjured. A short time afterwards puss bounded in again with another rabbit, and when she went out the boy followed her and was led to a cosy nest of a wild hare in the grass of a neighboring field, in which were several more young. These she took, one by one, and transferred them to the new home. What the mother hare did when she discovered her loss no one, of course, knew, but it soon be-

Farewell to His Creditors. From Courier-Journal: A Marshall ounty man adopts a novel method of bidding his creditors farewell. He writes them this affecting message through the Benton Tribune, feeling. no doubt, that it would be too much of a job to write personal letters to all

of them: "To the Public and Especially My

Creditors: "It becomes my painful duty to hereby announce that for the good of my creditors and securitors I am bound to leave for parts unknown to them, as s is impossible for me to meet my obligations, while I remained here. Gentlemen, you have been my friends. On account of never-ending reverses I must leave you, seemingly, in a very ungentlemanly manner, but, according to my own views, 'tis better for us, both you and I. By so doing I may pay what owe, otherwise I never can. So, goodbye, my friends! If Providence permits, you will not only hear from me again, but see me when I am able to reward you for your losses in befriending me. Respectfully.

"John W. Estes."

Wouldn't Get It Renewed. From the San Francisco Post: Attorney Garrett McEnery recently appeared as counsel in a case before a justice of the peace at Suisin. McEnery foun it necessary to make frequent objections to the evidence that the opposing counsel was attempting to introduce. The justice, whose first rule of evidence is "everything goes," looked first annoyed and then indignant. Finally he could contain himself no longer, and, as a rule on one of Mr. McEnery's ob-

iections, roared: "Mr. McEnery, what kind of a law yer are you, anyway?" "I am a patent lawyer," replied the

attorney facetiously. "Well, all I've got to say is that when the patent expires you will have a hard time getting it renewed. Go on with the case."

"I know, but I don't work by the clock. I work by how long it feels." "Ou, aye! Then ye must be chargin" for aboot twa days!"

Another View. "And finally." said the retired business man to his son, who was just entering on business life, "don't be too second, you will waste a lot of time Journal. waiting for the other fellow."

State Bar Association at Grand Rapids "Aunt" Sarah Haviland Pardoned from Jackson State Prison by Gov. Rich-Archwood in Great Luck.

State Bar Association. The seventh annual meeting of the Michigan State Bar association was held at Grand Rapids, with about 200 in attendance, the largest in the history of the organization, The address of President Geo. P. Wanty, of Grand Rapids, was in the nature of a review of the work done the past year and favoring the proposed revision of the rules of practice. He spoke for the relief of the overcrowded condition of the appellate courts; stricter discipline and adherence to the precise issue in all trials; for a better class of men on junies; a more simple transfer of land. and other matters of interest to the members of the association. The committee on examination of candidates for admission the bar reported that the law enacted by the last legislature was found to be very satisfactory in its operations, and conducive to higher qualifications for practice. The committee on legislation and revision of court rules submitted a volumnious report and a new set of rules throughout for the supreme and circuit courts The present rules were adopted in 1858 and are in many respects antiquated. Newton Fiero, of Albany, delivered an address, advocating codification of the laws and abolishing the distinction between law and chancery practice. Henry M. Duffield, of Detroit, was

toastmaster at the annual banquet. Officers elected: President, O'Brien J. Atkinson, of Port Huron; vice-president, Michael Brennan, of Detroit; secretary, Lincoln Avery, of Port Huron; treasmrer, Wm. A. Jenks, of Port Huron.

Only Woman at Jackson Prison Pardoned Gov. Rich granted an unconditional pardon to "Aunt" Sarah Haviland, the only woman convict at the state prison at Jackson, where she has been confined for nearly 30 years. During all these years Mrs. Haviland has been engaged as a servant in the families of successive wardens. She has endeared herself to the ladies and children of the successive administrative household, and was allowed many privileges and liberties.

Sarah Haviland was sentenced from Battle Creek June 7, 1866, to life imprisonment, for the crime of murdering her three children so she could be free to marry a man who told her the only bar to their marriage was the children. There is no doubt that the crime was committed under the influence of the man's stronger mind. She is the only woman in Jackson prison, and the oldest timer there save one, her prison number being 20. Her age when she was sent there was 38, and is now 68. She is beloved and trusted by the officers of the prison as no prisoner has ever been before. She has a daughter living in Tecumseh, Ont., who will provide her a good home and who is

Big Victory for Ironwood.

Ironwood has been saved \$200,000 by a decision of the U.S. court of appeals at Cincinnati. In August, 1893, the city sold \$150,000 of public improvement bonds to Caffin & Stanton, of New York, who paid \$25,000 down and agreed to pay the remainder in installments, but soon became financially embarrassed. Ironwood got only the first installment. The bonds passed into hands of other men, who demanded the payment of interest. Ironwood refused, holding that the bonds were illegal, for the reason that, between the time of the voting on the question of issuing bonds and their sale to Caffin & Stanton, territory was added to the city, and the new citizens were given no opportunity to vote on on the bonds. The district court of Marquette decided against the bondholders and its decision has been affirmed by the court of appeals.

SEEN AND HEARD IN CONGRESS.

SENATE.—125th day.—The struggle over the Santa Monica, Cal., deep water harbor amendment to the river and harbor bill was disposed by a compromise being effected whereby a commission appointed by the President shall determine the matter. An amendment urged by Mr. Gorman, limiting the expenditure under the contract authorizations of the river and harbor bill to \$10,000,000 annually led to a lengthy debate. A motion by Mr. Vest to table the amendment failed. House.-A contested election case and a few other

minor matters filled the day. SENATE-126th day-The river and harbor appropriation bill was passed, making direct appropriations of \$12,-200,000 and authorizes continuing contracts of \$64,000,000, an aggregate of about \$76,000,000. During the debate the statement was made that this was the, largest aggregate for a river and harbor bill in the history of the government. Mr. Gorman sought to secure an amendment to the bill limiting the contract expenditures to \$10,000,000 annually, but the amendment was tabled. A number of house bills on the calendar were passed during the day, including the bill requiring a year's residence in any territory as a requisite to divorce. House.—After one of the hardest fought parliamentary battles of the session, which continued until 9 o'clock at night, the contested election of Rinaker vs. Downing from the Sixteenth Illinois district was recommitted to the committee on elections, with instructions to recount the ballots in dis pute.

SENATE.—127th day.—The Dupon ease, involving the right of Henry A. Dupont to a seat in the senate from the state of Delaware, was taken up with a view to concluding the debate. I wo speeches were made against the bill proposing additional restrictions on immigration, by Mr. Gibson Dem. Md., and Mr. Nelson Rep., Minn. Mr. Gibson severely arraigned the A. P. A. declaring that it inspired this bill. and that the organization was seeking to evade politics. House.—The entire day was given to private pension bills: among those granted being that to the widow of Gen. O. M. Poe, \$50 per month. SENATE-128th day-The struggle of the Republicans to seat Mr. Dupont as a U.S. senator from the state of Delaware, which has been in progress off and on for many weeks, was ended when Mr. Dupont, by a vote of 31 to 30, was declared to have not been elected. The Populists voted solidly with the Democrats. A resolution was agreed to for an inquiry by the finance committee relative to the competition of Oriental products with those of this country. Resolutions were proposed by Mr. Morgan, of Alabama, for an inquiry as to our treaty rights with Spain, and by Mr. Gallinger, of New Hampshire, relating to the need of additional tariff enactments. House-The House occupied itself in passing the private pension bills which were favorably acted upon in committee of the whole during the two special days given to their consideration. Mr. Erdman, Democrat, of Pennsylvania, and Mr. Talbert, Democrat, of South Carolina, threw such obstacles in the way of the bill as they could. Thirty-four were held up because they were no

The trial of Scott Jackson, charged with the murder of Pearl Bryan, has ended at Newport, Ky., and the prisoner was found guilty. The jury was out about three hours and there was a death like stillness when the foremen gave the verdict as follows: "We, the jury, find the defendant, Scott Jackson, guilty of murder in the first degree and fix his penalty at death." The judge had previously announced that no demonstration of approval or disapproval by spectators would be permitted. Consequently the verdict was heard with silence, but immediately upon the adjournment of court the spectators rushed to the jurors and shook their hands heartily.

Jackson himself received his doom with no manifestation or emotion except ashen paleness of the face. None of his relatives were present. The aged father of Pearl Bryan and her when the verdict was rendered. In an interview Jackson admits his surprise over the verdict and claims that he had proven an alibi. He still maintains that Walling killed Pearl Bryan. Walling was also interviewed and expressed his satisfaction. He asserts that Scott Jackson killed the girl and in his interview repeatedly stated that Jackson deserved hanging.

SCORES KILLED IN A STORM. t Least 80 Killed and 200 Maimed by

A cyclone terrible in its effects passed over the state of Texas. The funnel shaped cloud in its disastrous passage whipped up within its vortex everything in its reach, leaving death, suffering and destruction in its wake. Fully 80 persons were killed, while the maimed and mangled will number 200 more. The destruction of stock and property and the money loss is incalculable. The town of Sherman suffered most severely and at least 50 people were killed. The towns of Howe, Denison, Justin, Denton, Marshall and the intervening country were struck by the

monster and lives were lost at every point. The first blast of the cyclone was felt at Justin, in Denton county, more than 100 miles from Sherman. The work of ruin was quickly accomplished there. From there the cyclone swept through Gerald, Denton and Mingo, to obligations. The English are indignundred miles was traveled in an hour. The small settlements along the line of the M., K. & T. railroad, north of Denton. all suffered. The southeast end of Sherman received the full force of the storm, which, while sweeping over Denton conty and a part of Grayson seemed to have gathered new fury to have wreaked the worst of its ruin on Sherman. The list of dead reaches 90. and several of the wounded are expected to die. It is estimated that some bodies are vet unrecovered, but fields, digging up the debris and dragging the creeks.

Kansas Suffers From Cyclones.

A funnel-shaped cyclone struck the north part of the town of Sabetha, Kas., near the Nebraska state line, destroying the Grand Island railroad depot and elevator and about 20 residences. Twenty people were wounded, several of whom will die. Twenty families were rendered homeless, losing everything they had. The cyclone passed. off towards Falls City, and evidently did great damage in the country. A devastating cyclone passed through Senecal. Everything its path was completely wrecked and four people were killed and a number injured. Couriers from the country report great damage to property and probable loss of life. There were many miraculous escapes from instant death. The streets are impassable, blocked with debris of buildings and fallen trees.

At Oneida several buildings were destroved and three children of James Sherrard killed. The west half of the village of Baileyville was swept away, but no one was killed.

A terrific cyclone swept down upon he town of Frankfort, Kas. Everything in the north and west ends of the town was completely wrecked. Probably three score of buildings were razed to the ground. Some of the best residences of the town were blown to atoms. Reports coming in from the country, where heavy damage has been done, will materially swell the loss. Many are reported painfully injured, but so far as known no one has been brother, Fred Bryan, were present killed. Many head of horses, cattle and other stock have been killed.

Another cyclone visited north central Kansas, starting in the northern part of Clay county, and passed in a northeasterly direction through Riley county and into Marshall and Nemaha counties. The little hamlet of Bodaville, in Riley county, was entirely swept away. Several are reported killed there and many injured, but nothing can be learned definitely. At Spring Valley, the storm demolished a church in which 150 people were worshiping. Many

were injured. Schooner Ayer Sunk-Five Drowned. The steamer Onoko, ore laden rashed into the schooner Mary D. Ayer, off Racine, Wis., during a fog. Thinking the schooner was not badly damaged the steamer continued on her course to South Chicago where the accident was reported and a tug sent to help the Ayer. The schooner became unmanageable and drifted about 24 hours before she was sighted by the steamer City of Duluth, which started to tow her to the shore but she made such poor weather that the tow line was cast off and the Duluth tried to take the men off. Before she could do so, all three masts of the schooner went by the board, and she sank stern first. The captain and four men were drawn down by the suction. Two men were saved. The Ayer was owned by F. F. Ayer, and was used in the lumber

trade. She was valued at \$5,000.

Gen. Hancock's Statue Unveiled. With imposing ceremonies the heroic questrian statue of Maj.-Gen. Winfield S. Hancock was unveiled at Washington before an immense gathering, which included President Cleveland, Vice-President Stevenson and representatives of the supreme court the diplomatic corps, both bodies of congress, the army and veterans and colleagues of the late general. The unveiling was preceded by a military demonstration. The principal address was delivered by Senator John M. Palmer. of Illinois.

Republicans of Washington in structed delegates for McKinley and declared for sound money and an international agreement regulating the ratio of gold and silver. The Republican state convention at

REVIEW OF TRADE.

General trade throughout the country remains quiet, wholesale merchants continue conservative and the distribution of general merchandise is almost of a hand to mouth character. At large eastern centers travelers are preparing to start out, but unfavorable features in recent weeks with respect to cotton, and woolen and steel and fron industries show no change. Collections in most directions continue unsatisfactory. Concessions have been made in prices of wool, and the manufacturers of cotton goods complain, that prices are below. made in prices of wool, and the manufacturers of cotton goods complain that prices are below a parity with the cost of raw material. To-bacco is depressed by trade embarrassments. Demand for iron and steel is disappointing. Unseasonable weather has had an unfavorable influence on sales of clothing and other staples, while labor disturbances at some western cities have checked demand. Request for lumber is smaller than anticipated. Wheat is unchanged in spite of all rumors and the Atlantic exports, flour included, which were last year greater than, western receipts, have this year been only half as large. Failures for the past week were 224 in the United States against 211 the corresponding week of last year.

CHAPTER II.

T was not until late in the afternoon of the next day that I could bring myself to meet again the man whom I had always believed to be my father. During the time while I held myself aloof from him I passed

through many stages of sorrow, but I believe my anger was greater than my grief. I was but nineteen years of age, but I fancy that my thoughts and ideas were in advance of my years. The curious, almost solitary, life which I had led for so many years at Herstal Abbey no doubt conduced to make me older than I really was. Till the time came for me to go to Oxford, I saw little of any one save my supposed father, my tutor, and the servants of the house.

But latterly all had changed for the better. I had been two terms at the university. I had made many friends. Life was just opening to me; a new, fresh life, full of pleasure and excitement. I found myself fairly popular with my fellows. I was well supplied with money. I was looked upon as an only son, and heir to fine property. In a name, is not Julian Loraine good short my lot seemed to be one in ten

housand. And that moment Mr. Loraine had chosen to reveal to me the secret of my lowly birth. To dash me from the pedestal upon which he had placed me. To show me that I had no claim upon him-that instead of being young Mr. Loraine of Herstal Abbey, I was no one!

I remember how, shortly before he told me the tale of the shipwreck, I had been discoursing in a somewhat arrogant, self-satisfied and glib manner as to the duties incumbent on old families and landed gentry; asserting that the existence of the aristocracy was an unmitigated blessing to the land. In fact, I was giving my supposed father a hash-up of a speech which I had heard at the Union. I thought my sentiments gave him satisfaction. He smiled and looked amused. No doubt he was amused, so amused that the demon of sarcasm rose within him, and hurried on the revelation which he may or may not have intended ful arrogance must have been irresistible to Mr. Loraine. From a child I had noted this cruel trait in his character. I had noticed it with servants, myself with equanimity. My grief, if not as deep as it should have been, was really sincere. It was some time before I began to reflect as to the immediate consequences his death would bring to myself. I had money in hand, for the allowance made me by Mr. Loraine had always been an ample one-so large, indeed, that when the truth of my birth was known to me, I had asked him to reduce it. The right I presumed to claim fell far short of this. Mr. Loraine told me scornfully not to bother him about money matters; so I had been unable to follow out the plan which I had laid down, of taking from him only sufficient for my needs. Nevertheless, I had not spent the surplus, and it would now serve me in completing my education. From him I expected nothing. Who were his heirs, or to whom his wealth would be left, were matters about which I troubled little. # THE WEDDING DRESS.

Barbara and Lettice Maitland were orphans, the children of a doctor whose direction of spending than of saving, and who at the time of his death had left his family almost penniless.

Now, however, Barbara was earning a modest income as assistant secretary to Lady Glendower, well-known for her philanthropic efforts, and Lettice added to their store by teaching the children of a prosperous linen draper. Lettice had been for some weeks

staying at Broadstairs with her young charges, and Barbara was alone, but much happened during these few weeks -much that Lettice is at present in "I did not know you were an adopted ignorance. If we enter their little sitting-room and listen to the conversation being

carried on by the two occupants we shall learn the nature of what has taken | you.' place. One occupant is Barbara Maitland herself. The other occupant is a man about 40, dark, handsome, albeit tanned by ex-

posure to wind and weather, as well he may, having only lately returned from should be made. The temptation to parentage to my friends was gall and heard Mr. Loraine speak of any rela- his fruit ranch in California. He is Lady Glendower's brother. "It all seems so strange," said Bar-

> bara. "to think that we are actually en gaged to each other, and yet that we don't profess to love each other in the very least." "Yes," responded her companion; then he added: "Barbara, would you

not like to know why I first thought of taking a fruit ranch in California?" "Yes, certainly I would." "That was the cause," and Goeffry

placed in her hand a tiny morocco case, wherein was framed the portrait of a lovely girl, spirituelle, yet full of vivacity, with deep blue eyes and golden hair.

"She died, and now little woman you

'GOEFFRY SELHURST'S BRIDE." know why I told you I could never make love to any woman again. I was nearly mad with grief for a time after I lost her, and I went out to California and plunged madly into work. At first, as you know, things did not prosper, and I lost a lot of money. Now I have regained all I lost, and am a comparatively rich man, but a wife is an absolute necessity to me."

That same evening Lettice arrived Lettice was 19, and had a tall, supple figure, and a face of wondrous beauty. Her eyes were of that rare blue violet shade: her hair a soft nut-brown. They had finished tea, and Barbara was seated in a low chair by the open win-

dow; Lettice on a stool at her feet. "What, Barbara, a new ring?" cried the younger sister, capturing Barbara's left hand and examining the lovely sapphire flashing on the third finger. 'Ah, you are blushing. What have you been doing while I have been away? Come, tell me all about it."

"I have been getting engaged," replied Barbara, demurely. And then, to her sister's great surprise, she told her all about it.

So Lettice was introduced to this new brother, and the new brother and Lettice got on very nicely together. Lettice was just of an age to be fascinated by a man of Goeffry's age and style, rather than by one nearer to her own age; and Goeffry was taken by her fresh girlish ways and by her natural, unconventional style.

So it was all arranged-a marriage of mutual satisfaction and esteem, but no love-making. But the little god was not to be

cheated. So two hearts, after one ec-

static bound of passionate joy, as they realize that they are all the world to each other, are plunged in anguish and despair as they also realize that they are both in honor bound never to be more than friends.

Look into Goeffry Selhurst's room late one evening toward the end of August, as he paces up and down, heedless of the fact that the clock is already registering the small hours.

"Fool-fool that I was!" he ejaculates. "Fool to tell myself that my heart was dead and buried with my lost love, and now it is beating as wildly and with as passionate love for another, and I may not claim her. I am bound in honor to her sister."

"Barbara shall never know it," murmured Lettice as she lies awake in her silent misery through the long night. "I will bear my pain alone. Her life shall not be spoiled."

It was the evening before the wedding; a lovely, still September evening. The three were together in the Maitland's sitting room.

"Bab, you have not tried on your wedding dress," cried Lettice. "It looks lovely. Do go up stairs and put it on. I know that Goeffry is dying to see it." "Yes, do," said Goeffry. "I should like to see it."

"Very well," said Barbara, smiling. "I will gratify your curiosity and my vanity. I will run and put it on." For a few seconds silence prevails. Then Lettice crosses over to Goeffry

and, taking both his hands, gazes at him with sorrow-laden eyes. "Goeffry, you will never let her know never let her guess? You will be true to her and good to her always, will you not?

"Lettice, Lettice! I want you. Come and help me put my gown on," cried Barbara's voice from up stairs. "Come and help me, Lettice. Miss Frazier has made a mistake. My gown is much too long and too large. She seems to have made it by your measurements instead genius had developed itself more in the of mine. Try it on, Lettice, and let me

> Lettice consented to array herself in the white silk and lace draperies, and very lovely she looked in them. Her tall figure easily carried off the superflous inches that had so distressed Barbara, and she looked with pardonable girlish vanity as her sister placed her in front of the glass.

"Did you think I could not guess what had happened, little sister?" said Barbara's sweet, low-toned voice, while her arm stole gently around the amazed Lettice. "Here is Goeffry Selhurst's bride! Come let me take you to him.' "But, Barbara, stop! How did you find out? We never meant you to know! I will not take your lover from

"Goeffry is not my lover! and he is only going to marry me because he is too chivalrous and honorable to disappoint me, and though I like him very much and esteem him immensely, I him, as I known foolish little girl would do, if I had gone away with him and left Schenectady, N. Y., for 50 cents per box. should never fret my heart out about her in England."

"I say Rah!" quo or so later, when the trio were seated at supper, and Lettice was once more arrayed as an everyday maiden, "you must come out with us now."

"I have every intention of doing so. replies Miss Maitland, calmly. "Though I have every confidence in you, if you think I am going to trust my Lettice out there you are very much mistaken.' Six months later there was a wedding out in California, and this time the bride's dress fitted perfectly, and even if it had not done so, she would have gone to church and have been married in it all the same, for Barbara declared that Hugh Denham, the clever doctor, had won her heart and soul completely

## YOUNG AT FIFTY.

HOW A METHODIST MINISTER CARRIES HIS YEARS.

From the Times, Oswero, N. Y. Probably no man is better known or more highly respected in Oswego, N. Y., than the Rev. William Young, of the Methodist church. Mr. Young holds a responsible position with the Oswego City Savings Bank, where he has been an employe for the past twenty years.

In the spring of 1894 Mr. Young looked as if his time on earth was limited but, instead of failing as was predicted, he soon gained a more healthy look and appeared stronger. As the months went by this improvement continued, until now he is as rugged and apparently as healthy as a young man of thirty, although his gray locks denote a more advanced age. A Times reporter, determined to find out what had made this great change, called upon Mr. Young at the bank and put the question direct and received the following reply: "In truth I am a changed man, and I

owe my present good health to Dr. Williams' Pink Pills. In the spring of 1894 I was all run down and had commenced to think that my time had come. I had to be prescribed for by physicians, and although I received temporary relief, the same old trouble came back again and I was worse than before. I had no strength or appetite, and playsically I was in a miserable condition. After my work I would go home, but the general lassitude which hung over me left me without any ambition, and when I would go to the table. to eat, my appetite failed me and I would have to leave without taking hardly any nourishment. My kidneys were also badly affected, and I was in utter despair. One day, here at the bank, I happened to pick up one of the local papers, and my eye fell on the advertisement of Dr. Williams' Pink Pills. The advertisement gave a description of a man who, afflicted as I then was, had been cured by using Dr. Williams' Pink Pills. I was not a believer in that Pink Pills. I was not a believer in that kind of doctoring, but concluded as a last resort to try a box of the pills, making up my mind that if they did not help me I certainly would not be injured any. Going to a drug store I purchased a box of Dr. Williams' Pink Pills and commenced taking them according to directions. Very soon after I began to feel better and I saw I had made no mistake in trying the pills and made no mistake in trying the pills, and before the first box was emptied I felt so much improved that I immediately purchased another. I had taken seven boxes of the pills, and at the end of last summer I felt I was entirely cured and summer I felt I was entirely cured and discontinued their use, but always keep a box handy if occasion requires. I am now entirely cured. The lassitude has left me, my kidneys are all right and my appetite—well, you should see me at the table. I am a new man again, and instead of feeling like a man of fifty, which is my age, I feel like a youngster of twenty, and I give Pink. Pills the full credit for this great change. I have recommended these pills to several of my neighbors and acto several of my neighbors and acquaintances, who have been relieved of their complaints."

said the pawnbroker, "the public has an idea that we are a hard hearted lot, but that is only one side of the story. A man in this business who had tears to shed wouldn't have a roof over his head inside of a year."

"You mean you can't afford to pity the misfortunes of others on a cash basis?" I queried. "Very few people come here on ac-

## USE THE RIGHT HAND

A PREFERENCE THAT IS SHOWN IN NEARLY EVERYTHING WE DO.

in Mechanics, at Table and In Games It Is the Rule-The Buttons on Our Clothing-Customs That Recognize the Superiority of the Right.

The other day, on offering to shake hands with a self possessed "young gentleman," I received from him the left hand for salutation, and his revered parent instantly remarked, "That is the wrong hand." Before I had well gotten everything in the house covered with most easy going fashion. There are left handed players in the baseball field, in At least it has happened to some the cricket field and in the tennis court, and it is curious to note the changes made in the disposition of the "field" in the first two cases and the evident discomfort of the other players in the third case. We may even see left handed gunners in the sporting clubs, but the bystanders instinctively draw back when one appears on the line, as if they were afraid that the weapon held in the left hand might shoot round the corner.

These things, and many others of like kind, are considered abnormalities, for men and women are supposed to be normally right handed and not left handed. There are, however, some marked inconsistencies, as, for instance, that we must hold our knife in the right hand and not eat with it, but with the fork held in left hand.

The results of the prevalent right handedness of man are shown in many curious ways. If we look at dress, we find that a man's buttonholes are on the left, while the buttons are on the right. "A man in buttoning grasps the button in his right hand, pushes it through with his right thumb, holds the buttonhole open with the left and pulls all straight with his right forefinger. Reverse the side and both hands at once seem equally helpless." Not very long ago the buttonholes and buttons of women's dress were on opposite sides to

those of men. It may be so to a large extent even now, but I am told on very good authority that with the introduction of tailor made dresses the old rule s going out of vogue. If so, this last padge of masculine superiority is doomed, and the future man will have but little difficulty in donning the coat of the new woman. A man generally carries his loose cash in his right hand pocket in order that he may reach it with ease. His pocket handkerchief is placed in the right pocket of his "sack" coat if low down, in the left breast pocket if higher up for a similar reason. His railway ticket and nickels for car fare occupy a middle position on the be "handy." A soldier wears his sword holds his reins in the left hand, while

of offense. The right hand is the seat of honor at banquets and ceremonies, and the hrase has come into use for the post of lignity in matters both sacred and secular. We hold out the right hand of fellowship, not so much perhaps from any sense of its superiority as because in days gone by it was found that if it was extended in greeting it could not be used to grasp the sword and thus give an unforeseen blow.

the right carries the whip as his weapo

In the way of tools, screws are made to be turned by the right hand, and that useful article at picnics—a corkscrew—is fitted for dextral and not sinistral use. Clocks and watches run round from left to right, as the sun appears to do, although the earth, whose time they are keeping, is so perverse as to move from right to left.

In walking down the street we keep to the right hand, and that is the rule of the road in driving, as well as the way in which trains move along the track. When we come to augury, matters become mixed up. The Romans held that a lightning flash from left to right was propitious, while one from right to left was unfavorable. It may have been because, as the lightning was supposed to be hurled by Jove, from left to right would be the way in which it would be seen if the Deity had his face toward the suppliant, but if Jove turned his back on the watchers the lightning hurled by his right hand would move from right

to left. But why is there this difference in our hands at all? The truth is, our bodies for tears, sighs and tales of sorrow, but are one sided. The heart is, after all, a very important item in a man. An injury to it is fatal. Hence even savage man found out that he had to defend it and devised the plan of covering the region of his body where it is located with The real obstacle in the way of inter- a shield. A FLOOD REMINISCENCE.

How a Young English Engineer Saved Lowell From Destruction.

The city of Lowell was saved from destruction in 1852 by the foresight of one young man. About 1835 a Lowell antiquarian named Uriah A. Boyden devoted much attention to investigating a tradition of a great flood in the Merrimac in 1785 and found an old man who remembered that his father marked the height of the water by driving a spike in an apple tree. Mr. Boyden persevered in his search until he found the tree in Tyngsboro, several miles above Lowell our left, while a spoon must be held in Its trunk was hollow, and entering it the right hand, and the soup conveyed from below he discovered the spike, its to the mouth by that, for every eye at head wholly concealed by the bark, at a mourn his loss. His work stood bravely, and the Boston Advertiser, five days later, said that if it had not been constructed "every vestige of the old guard right hand side, in order that they may gates would have been carried away and a mighty and uncontrollable river would on the left for convenience: the driver have swept through the heart of Lowell, destroying everything in its course.' A service of plate was presented to Mr. Francis, and during the remainder of his life, which ended only recently, he was one of Lowell's most honored citizens. For more than 40 years he was agent of the corporation controlling the water power. - Chicago Inter Ocean.

> One Way of Catching Fiddler Crabs There are various ways of catching fiddler crabs. One way of catching the black or mud fiddler, the one that bores into meadow banks along salt creeks, is with two boards so placed as to form a deep sided letter V. The fisherman seeks a spot where there is a little strip of sand at low water, between the base of the mud bank and the water's edge. The crabs come out of their holes and go down to the edge of the water, often in great numbers. The fisherman comes over the meadow with his boards, which he sets up on edge as quietly as he can on the sand, with the opening of the V toward the water. Then he alarms the crabs, and they come scurrying up the little beach in multitudes, bound for their holes. As they come they carry their big claw aloft, somewhat as the soldier carries his gun. It is from this habit that the fiddler crab gets the name of soldier crab, by which it is also known. Those crabs that are opposite the opening in the V hustle with the rest of the line, but when they strike the board sides they are thrown more and more together, until they converge in a mass at the point. The fisherman,

How to Treat a Wife.

For sale by T. H. Fritz.

(From Pacific Health Journal.) First, get a wife; second, be patient You may have great trials and perplexities in your business, but do not therefore, carry to your home a cloudy or contracted brow. Your wife may have trials, which, though of less magnitude, may be hard for her to bear. A kind word, a tender look, will do wonders in chasing from her brow all clouds of gloom.-To this we would add always keep a bottle of Chamberlain's Cough Remedy in the house. It is the best and is sure to be needed sooner or later. Your wife will then know that you really care for her and wish to protect her health. For sale by T. H. Fritz.

from below he discovered the spike, its head wholly concealed by the bark, at a considerable distance above the ground. It showed that in 1785 the water had risen to a point 18½ feet higher than the top of the dam at the mouth of the canal, which furnished the Lowell water power in 1835.

The engineer in charge of this power was James B. Francis, a young English man, who urged the directors of the corporation to provide against the recurrence of such a rise of water. His arguments prevailed, and he was allowed to construct two immense wing walls of masonry, diverging from the canal lock and inclosing the entire country between the canal and the river. Over the water way he hung an immensely strong gate, weighing 20 tons, which was suspended by a wrought iron chain. A sledge and a cold chisel were placed in the care of the watchman for use when needed. The work was finished in 1850, and for two years was laughed at as "Francis' folly."

On the merning of April 22, 1852, the waters rose so high that the city of Lowell was threatened with destruction, and the young engineer was sent for. He rode to the dam without a saddle and hurriedly cut the chain, releasing the great gate. His work stood bravely, and the Receive Advantive for the corporation of the care of the canal canal canal the received the sail mortgage and executed by Sarah Noble to Milford M.
