They say the Japanese call us a nation of dogs. The little wretches know how to fight, but their statistics are abominably incorrect.

Queen Liliuokalani denies that she has abdicated her throne in favor of her niece. In fact she has not seen her throne for a term of years.

It is a fact that a German lover made a bet that he could kiss his sweetchart ten thousand times in ten hours, that he kissed her nearly four thousand times in three hours, and that then his lips became paralyzed and he lost the bet. Foolish extravagance like this ought to be severely rebuked; and yet it is likewise a fact that the girl was in prime condition at the close of the contest and felt hurt when the referee called off the match.

Posthumous fame, or notoriety, sometimes depends more upon an incident than upon a life-work. A public man of good ability, upright, respected by all and beloved by his friends, a holder of high official positions and a faithful officer in each of them, was recently called from this life. In the newspaper accounts of his death he was universally designated as the man who, in a moment of impatience, kicked his way through a closed door in the hall of the national house of representatives.

The Kentucky Bankers' Association, recently in session at Frankfort, voted that at its future banquets ladies should sit at the tables, and no wine should be served. One of the relics of semi-barbarism is the prevalent custom of admitting ladies to balconies in time to hear after-dinner speeches while inspecting the remnants of the feast and inhaling the cigar smoke of the well-fed men. Ladies cannot attend public dinners where wines, liquors and cigars are served, and the Kentucky bankers have made a wise and manly choice in voting that they will henceforth have the ladies "as the only stimulant."

English law provides for the punishment of any person who publishes "any proposal or scheme for the sale of any ticket or tickets, chance or chances, in a lottery." Under this law the printer of a London newspaper was recently prosecuted and fined, as being "a rogue and vagabond," because he published the advertisement of a medicine in such a form as to make it a missing word contest. The prize offered for supplying two omitted words needed to perfect the sense was divided among six persons guessing the missing part of the advertisement. Of course the trial of the offender advertised the medicine, but it served e purpose of showing that the law nach against lotteries was to be construed so as to shut out schemes wearing an inncent look but really involving an illegal principle. "Nothing but Fun," is the queer heading under which a great newspaper describes a "jubilee day," when thirty thousand school children of a Pennsylvania city attended a "Wild "West" show. One of the features of this performance was a "realistic lynching." A colored fellow pretended to steal a horse, was lassoed, dragged a quarter of a mile over the ground. and hanged on the gallows: and then "the cowboys amused themselves firing at the struggling body, while the band played 'Nearer. My God, to Thee.'" It is to be regretted, but hardly to be wondered at, that the press generally has refrained from commenting on this brutal travesty of law and religion. Journalists probably feel that words are powerless to characterize the persons who would put before children such a degrading exhipole. bition. The women of Cuba have now taken up the fight, and propose to carry it on by means of the boycott, so far as they can. A report from Havana says: A proclamation issued by the Revolutionary club of Cuban women is largely circulating in Havana city and the rest of the island, and has caused a sensation among Cubans and Spaniards alike. THE POMOLOGY OF THE HOLY BIBLE.

God Among the Orchards-"The Finit Tree Yielding Fruit After His Kind"-Genesis; Chapter L, Verse II,-Why Was the Orchard First?

T IS Wednesday 8987 morning in Paradise. The birds did not sing their opening piece, nor HO CH the fish take their first swim until the following Friday. The solar and lunar lights did not break through the 11 thick, chaotic fog

the world's manufacture until of Thursday. Before that there was light, but it was electric light or phosphorescent light, not the light of sun or moon. But the botanical and pomological productions came on Wednesday-first the flowers, and then the fruits. 'The veil of fog is lifted, and there stand the orchards. Watch the sudden maturity of the fruit! In our before they bear fruit, and peach trees three years, and apple trees five years; but here, instantly, a complete orchard springs into life, all the branches bearing fruit. The insectile forces, which have been doing their worst to destroy the fruits for six thousand years, had

not yet begun their invasion. The curculio had not yet stung the plum, nor the caterpillar hurt the apple, nor had the phylloxera plague, which has devastated the vineyards of America and France, assailed the grapes, nor

grub punctured the nectarine, nor the

a lusciousness of taste, and an aftake thousands of years more of study of the science of fruits to reproduce.

Why was the orchard created two days before the fish and birds, and three days before the cattle? Among other things, to impress the world

with a lesson it is too stupid to learn -that fruit diet is healthier than meat diet, and that the former must precede the latter. The reason there are in the world so many of the imbruted and sensual is that they have not improved by the mighty, unnoticed fact

that the orchards of paradise preceded the herds and aviaries, and fish-ponds. Oh, those fruit-bearing trees on the member of the Royal Academy and a banks of the Euphrates, and the Gidistinguished painter, died in his sixhon, and the Hiddekel! He wants the permissions of a profligate life. The one membership, the one bad habit, the one carousal robs him of all the possibilities and innocent enjoyments and noble inspirations of a lifetime.

You see what an expensive thing is sin. It costs a thousand times more than it is worth. As some of all kinds of quadrupeds and all kinds of winged creatures passed before our progenitor that he might announce a name, from eagle to bat, and from lion to mole, so I suppose there were in paradise specimens of every kind of fruit tree. And in that enormous orchard there was not only enough for the original family of two, but enough fruit fell ripe to the ground, and was never picked up, to supply whole towns and villages, if they had existed. But the infatuated couple turned away from all these other trees and faced this tree; and fruit of that they will have though it cost them all paradise.

This story of Eden is rejected by some as an improbability, if not an impossibility, but nothing on earth is easier for me to believe than the truth of this Edenic story, for I have seen the same thing in this year of our the borer perforated the wood, nor the Lord 1897. A Recent Discovery That Is Working Wonders.

The most prevailing afflictions that for a century have been engaging the most scientific skill of the medical world are rheumatism, neuralgia, catarrh, asthma, la grippe and their kindred ailments. The country is full of sufferers from these complaints. Although the most learned experts of the medical profession have labored for a century to produce a curative, until quite recently no positive results were effected. To the Swanson Rheumatic Cure Co., 167-69 Dearborn street, Chicago, belongs the credit for having

produced the new remedy. It is being extensively advertised under the trade mark of "Five Drops." The trade mark is self-explantory. Five drops make a dose. The effect is magical. In days gone by other alleged cures have been marketed with the promise to take effect in thirty days or more. Five Drops begins to cure at once. Immediate relief is felt. In order to more effectively advertise its merits the company will for the next thirty days send out 100,000 of their sample bottles of this positive

cure for 25 cents a bottle by mail prepaid. Large bottle, 300 doses, \$1 (for thirty days 3 bottles \$2.50.) Those suffering should take immediate advantage of this generous offer and write them to-day.

\$100 Reward, **\$100**. The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Ca-tarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and as-sisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hun-dred Dollars for any case that it fails to cure. Send for list of Testimonials. Address F. J. Preacher Turned Rat Catcher. J. C. Hull, once a preacher in St. Paul, Minn., and now an inmate of the state prison at Stillwater, under conviction of attempting to poison his wife, has been assigned to the duty of catching rats that infest the cells and corridors, and is reported to be becoming quite efficient in the task. When there are no rats that require catching he is kept busy with odd jobs about the yard.

NEGLECT IS SUICIDE.

Plain Words From Mrs. Pinkham, Corroborated by Mrs. Charles Dunmore, That Ought to Bring Suffering Women to Their Senses.

If you were drowning and friendly hands shoved a plank to you, and you refused it, you would be committing suicide! Yet that is precisely what women are doing if they go about their homes

almost dead with misery, yet refuse to grasp the kindly hand held out to them! It is suicidal to go day after day with that dull, constant pain in the region of the womb and that bloating heat and tenderness of the abdomen, which make the weight of your clothes an almost intolerable burden to you. It is not natural to suffer so in merely emptying the bladder. Does not that special form of suf-

It is inflammation of the womb!

Labor Commissioner Cox Shows that the Warmers and Workers of Michigan ane Enjoying Prosperity-A Village Wresident Arrested on Serious Charge

Did He Commit Suicide? It is believed that John P. McKinucan, formerly a wealthy lumberman, for a number of years a resident of Detrait, committed suicide by jumping From the steamer City of Alpena somewhere between Cheboygan and Detroit. Mr. McKinnon boarded the steamer at Cheboygan and was given a boat check to be taken up upon leaving the boat at Detroit as is customary, and was assigned to stateroom 49. When the boat arrived the check was not taken un and Mr. McKinnon's overcoat and grip were found in the stateroom, and in one pocket of the coat was found a note ascribing his family troubles to a certain person. His wife, who had separated from him, says his mind was weakened by an illness a few years ago and since then he had been so insanely jealous that she had to leave him. McKinnon was about 50 years of age, his wife is under 30.

Evidences of Prosperity in Michigan. State Labor Commissioner Cox says that evidences of returning prosperity in Michigan are abundant. The office is receiving reports which shows that there are far less unemployed men in the cities and willages of Michigan, than there were a year ago. Factory employes have increased nearly 8,000 more than last year being reported from Detroit alone, and the canvass is not vet completed. Prices of all farm products have increased and the condition of the farmer is much better. Many farm mortgages have been canceled or partly so, and debts of other kinds wiped out by the farmer. From an estimate made from a partial canwass it is shown that there have been more than a thousand new mercantile and manufacturing institutions started up in Michigan within the past year.

"Allegan's President Arrested for Larceny

Dr. L. F. Stuck, president of the village of Allegan, has been arrested upon the complaint of E. T. Van Ostrand, a druggist, charged with embezzlement and larceny. The doctor was supplied with a key to Van Ostrand's drug store so that he could go in at any time and obtain medicines for use in his practice. Van Ostrand claims to have missed various articles other than medicines during the eight years over which this arrangement has run and three clerks have been discharged under suspicion. A detective was employed and he alleges that he discovcred Dr. Stuck taking advantage of his opportunities. Van Ostrand estimates his loss at \$2,200. The prisoner denies his guilt. The doctor has a wife and two sons, one of the latter attending the U. of M.

Reciprocity and Other Friendly Move Being Considered by Uncle Sam and Canada-Great Britain Says France Must go Slow in Western Africa.

It is even suggested that Canada is ready to offer the United States an equal footing with England in tariff matters. while speaking of the pope's action.

Later.-Definite arrangements have been made for taking up the subject of a reciprocity treaty between the United

States and Canada, and to this end meetings have been fixed between Hon. John W. Kasson, who is specially delegated by President McKinley to conduct reciprocity negotiations, and Sir Wilfrid Laurier, and Sir Louis Davies. This is the result of the long and friendly conference held between Secretary Sherman and Sir Wilfrid. It is not expected that the reciprocity treaty itself can be matured during the present visit of the Canadian officials, the desire being to arrive at some common understanding at this time, and then perfect the details later.

A dinner given at the White House by the President assisted toward a friendly settlement of pending questions. There were no toasts and no speeches, but at its conclusion the Canadian guests accompanied the President and his cabinet advisers to the blue room, where a wholly informal and personal exchange of views occurred.

Lord Salisbury Threatens France.

At the lord mayor's annual banquet at London the marquis of Salisbury, the British premier, after referring to other matters, introduced the trouble between England and France in West Africa, and said: "It might not achieve the general conciliatory process desired if I entered frankly into all the negotiations between the powers respecting Africa. NOVEMBER GALES. Several Vessels Suffer Severely from the

Austria-Hungary Being Estranged From Wind and Waves.

Germany's position in Europe is becoming more perilous than before by the attitude of Austria, which has effected an agreement with Russia and France regarding its policy in the east. The recent visit of the Austro-Hungarian minister of foreign affairs to King Humbert of Italy is regarded in Berlin political circles as being of the highest importance. The visit is interpreted as meaning a closer under-standing between Austria-Hungary and Italy and as a leaning of those two powers toward Great Britain. The Mediterranean interests of both Austria and Italy are of vast and far-reaching importance, and they cannot be subserved so long as there is a latent antagonism against England as a feature of the dreibund policy.

TROUBLE IN EUROPE.

Germany.

From editorials in Berlin papers it appears that while the dreibund is still n force, Germany must trot along side of the other powers or pursue her own oriental and colonial policy unaided and apart from the other nations. The original reason of Austria's attitude is said to be the uncalled for affront given to England by Emperor William's letter to President Kruger. Famine is now said to threaten the fatherland, and the Prussians are enraged at the remarks of the kaiser, who bitterly attacked the Prussian kings

Short Session of Congress Predicted. The approach of the date for the as-

embling of congress is already drawing many of the leaders to Washington and some work is already being done to shorten the session or at least get down to solid business at once. It is the intention of Chairman Cannon, of the appropriations committee of the house, to begin the preparation of the appropriation bills at the earliest possible date. He has announced the appointment of the sub-committees, and those on the pension and the legislative, executive and judiciary bills have been called to meet Nov. 27, a week in advance of the assembling of congress. As the house is fully organized, by the appointment of all the standing committees, it will be expected to get down to business as soon as it reassembles. Most of the members who have already arrived express the opinion that this will be the shortest regular long session of congress in years. Ordinarily the long sessions last from six to 10 months. Mr. Hopkins, of Illinois, one of the prominent Republican leaders, predicts that congress will have completed its ' /ork' and adjourned before May 1.

Some Ohio Republicans Oppose Hanna. A Columbus dispatch says: Charles L. Kurtz, former chairman of the Ohio Republican state committee, has made a statement in which he throws down the gage of battle to Senator Hanna and promises to defeat him for reelection to the senate. It is the first authentic statement from the anti-Hanna forces.

Mr. Kurtz is one of the best known Republicans in Ohio, understanding fully what is being done by both sides, and is the chief manipulator of the forces opposed to the re-election of Senator Hanna. Mr. Kurtz says: "Before the Ohio legislature meets the Republicans of this state will be asked to show their senatorial preferences, and Mr. Hanna will have no following that will make him considered even a leading candidate for the senatorship. While leaving port at Ashtabula, O., in a heavy northwest gale, the steel steamer Roman of the Hanna fleet was caught in a heavy sea and dashed against the bottom of the lake, almost breaking the strong, stanch ship in two. It was only by a miracle that tugs were able to get the Roman back into the harbor before she foundered. The Roman had just passed outside the piers bound for Milwaukee with a load of coal when suddenly a big sea seemed

to run out from under her, dropping her heavily upon the bottom of the lake. The steel plates and frames were cracked and broken by the crash at a point nearly in the middle of her length. The break extended from the water line through the rail and even to the hatch on deck. The steamer struck bottom but once. Had she suffered another such blow it seems impossible that she could have been

The schooner Groton, of Detroit, slack coal, was caught in the gale and Stanley, Ont., where she foundered. The crew, consisting of six men, took to the yawl boat and were discovered by Capt. Una Went to the Bottom

The schoooner Una sank in the harbor at St. Joseph, Mich., and the seven men aboard were taken off by the life saving crew after a narrow escape.

The Una was dashed against a dock and had a big hole stove in her hull. Two Young Girls Tarred and Feathered A most terrible outrage was perpetrated at the village of Oakwood, Pauldng county, O., by whitecaps upon two girls, Edith and May Roberts, aged 19 and 17 years. The girls had retired to their room early in the evening and were awakened by a band of 8 or 10 men entering and dragging them from their beds in their night cobes. They

were taken to the near-by road, where they were terribly whipped and the whitecaps then gave them a coat of tar and feathers and took them back to the house, where they were found unconscious the next morning. May, the youngest of the two girls, is in a critical condition, her flesh be-

ing cut to the bone by the whips. A card containing 10 names was found tacked to the front door, but none of the names are known about that place, and there is no other clue.

DINING AND FEEDING.

American Table Manners Not So Open to Criticism as Formerly.

It has been conceded that the degree of civilization a people has reached may be accurately measured by its dietary, says the Woman's Home Companion. Now, some one has said that "the American feeds, the Englishman devours, the Frenchman dines." In view of this statement one wonders what the English have been doing Capt. John H. Christie, loaded with through the centuries to have advanced so little. We do not pretend to ancame to anchor 12 miles west of Port swer for them, but would say for ourselves, we have been hewing our way through forests, pioneering in every direction, in every sense-ample apology for feeding instead of dining. But of course it was a Frenchman who made the declaration, and of course he made it long ago, when, mortifying though it be, honesty compels us to acknowledge that we may have been

guilty. Times, however, and conditions have changed, and not even the most bigoted Frenchman will refuse to admit that when the American has reached the dining point he will have more to dine upon than any other man in the world. The culture of man in America will demand all the art in his cuisine that France has by study evolved, with the added merit of honesty in his food, the disguises incident to poverty of material not being a necessity. There is no department of supply in which we have not the advantage and we are learning to use our

materials as rapidly as we have been

obliged to learn all other things.

Baffled Many Times but Success Comes

The following incident would be hard to believe if it had not occurred right here in Grand Rapids, and investigation by our representative has placed it beyond the reach of doubt. These are the facts in

detail : Mr. J. H. White of No. 25 Haifley Place, has been an instructor in penman ship in different business colleges for the past fourteen years. He says : "Last Ocpast fourteen years. He says : "Last Oc-tober I was suddenly taken ill. I consulted a physician, who said the pain was from 'gravel' stones; gradually grew worse; the pain was in my back and side. My back swelled up in a great ridge, and I finally grew so bad that I was taken to bed, as helpless as a child. I passed and when the pain was at its worst I was like one crazy. The doctor injected morphine to give me relief, but further said he was powerless, and than that he nothing would do me any good but a surgical operation. I believe my flesh was literally cooked in the attempts to relieve my agony, everything was used, mustard plasters, turpentine, hot cloths and all such things. I was in this condition, given up by the doctor, and almost out of my nind with suffering. I commenced taking Doan's Kidney Pills, and really I felt easier in 20 minutes. After about two hours 1 had a passage of urine, and passed blood and some 'gravel' stones which greatly relieved me. I rapidly improved. I took in all six boxes, and I feel to-day entirely well. Mine has been a wonderful case. I feel that I cannot say anything strong enough for Doan's Kidney Pills. My great wish is that they may become well nown. They will prove a boon to man-

A Fatal Runaway.

Adley Franks, aged 56, was instantly killed in a runaway accident at Port Huron. Franks resides in Kimball township and had been in the city all day in the company of Mr. and Mrs. Shettler, of Wadhams. About 7 o'clock they started for home in a single rig drawn by a team of colts. The horses became frightened and dashed down the street. When near the corner of Lincoln avenue and St. Clair street the buggy came in contact with a telegraph nole. Franks, who was driving, was thrown forward and struck the pole with his head. His neck was broken and face badly cut. Mrs. Shettler, was badly injured about the body, being thrown to the ground. Mr. Shettler was sitting in the back of the buggy and was also injured. Franks was an old soldier and a widower.

Women's Clubs of Michigan

The third annual convention of the Michigan State Federation of Women's clubs which was held last week at Saginaw, was attended by over 200 members. The following officers were elected: President, Mrs. Anna A. Palmer, of Saginaw; vice-presidents, Mrs. Martha A. Keating, of Muskegon, and Mrs. Frank E. Withey, of Manistee; recording secretary, Mrs. Florence E. Bulson, of Jackson; corresponding secretary, Miss Cora C. Leon, of Battle Creek: treasurer, Mrs. Mary L. Ambler, of Northville; auditor, Mrs. Stiles Kennedy, of St. Louis.

A Hunter Mistaken for a Deer. Fred Cawling, a well-known young business man of Iron Mountain, was shot dead four miles from Channing. He was mistaken for a deer by an old hunter named Wamsley and shot in the back, the ball passing through the heart. Governor Bushnell introduces his Thanksgiving proclamation as follows: The year just drawing to a close has been filled with blessings of fruitful fields and healthful skies. Neither war nor pestilence nor disaster have come upon us. Harbingers of peace have been our morning joys and evening benedictions. God has been good to us as a people, and it is fitting we should publicly make acknowledgment of His loving kindness. The governor therefore designates Nov. 25, as the day for giving thanks. Heartfelt thanksgiving! Oh! let it rise Like the mist of morn Toward the azure skies: Let the heart be glad And the song be gay. As we welcome the joys Of Thanksgiving Day.

How sweet is home With its altar fires! The meeting of sons With their happy sires! The fair young wives And their little flocks, In brand-new coats And Sunday frocks.

We gather around The old-time board. The blessing is asked. The tea is noured. And the children laugh In their merry way, When the turkey comes in On Thanksgiving Day.

But what's this glee To that which comes With the smoking pudding So full of plums? And the rosy fruit Without stint or lack, And, last of all, The nuts to crack?

What beautiful seasons To him who roams, Are these meetings rare In the land of homes, When the young and old, The grave and gay, Lift up their hearts On Thanksgiving Day!

My last point was scored, and can you wonder that I consider Thanksgiving the greatest day of the year, and the American turkey the greatest of birds? But here we call it the falconit sometimes catches mountain birds.

Pleasant games for Thanksgiving, in which both old and young people are interested, are played as follows: Transpositions-Write a list of words

for each person present by using only once the letters found in the names of certain flowers, states, authors, etc. or any words you may select. The letters of these words transposed give the

For instance, take Rhododendron. Using the letters we have the words odd, or, end, horn. From Bachelor's Button, chub, lose, tab, torn. Massachusetts gives seat, suet, smash; or hats, seat, muses. Newfoundland, weld, nun, do, fan. North Carolina, no, chair, la, torn.

From Constance Fenimore Woolson, we have Moore, stain, scowl, fence, noon. It is much easier to ascertain the word sought if designated as a flower, author, etc., but it sharpens one's wits wonderfully to find them without any clue.

In the list of ten or a dozen words, which is about all a person will care to have at once, it is nice to include his or her name.-Claribel.

How long since Emile was the companion of all your happiest hours, and received waiver smiles than any of all your admirers could boast? Have your not known and understood this long time what his visits meant? I blush for you! It is this unknown, low-born fellow, who fled from the Chateau like a very thief-it is he who has wrought this change-peste! I would he had broken his neck instead of his ankle! I might have been wiser than to have allowed you such free ingress to his room. Emile warned me against it, but I counted too strongly on the pride that should fill the heart of a Beauvais."

"Do you wish me to understand there is no hope of escaping a marriage with Count Emile, except by directly opposing my own to my father's will?" asked she.

"I mean you should understand there is no escape whatever. As you well know, a father's will is law. I am the best judge of what your rank and position demand. We'll all visit Paris through the court season. Upon our return the wedding will take place. Look to it, Violante, that you conduct yourself as a Beauvais if you would receive a father's affection or blessing."

A hard, cold expression settled down upon Violante's beautiful face.

"I have no mother to appeal to," she said, bitterly. "What is the blessing of a father who cares more for his own will than for my happiness? Yet I shall not dare disobey you!"

"Perverse child!" said the Count. affected deeply at the sight of her woebegone face. "I am acting for your true happiness. As for that deceiting Bernard, let him beware! Count Emile s upon his track!"

Violante started, and a terrible fear crept over her. She remembered what Bernard had said, and the urgent warning of the latter against betraying himself to the Germains. What if his rash resolve to watch over her should lure him to his own destruction? How or in what way the fatal web of mystery connected him with Count Emile she knew not; but the very vagueness of her fears made them more alarming. She hurried away from her father's presence, and holding her throbbing forehead in her hands, tried to discover some safe and speedy way of warning Bernard, who she felt convinced was somewhere concealed around the mysterious and lonesome cliff. She rose and lifted the heavy curtain away from the window to look out. He always was a non-committal chap, but this time there was no mistaking the signs, so I suspected his homesickness, and judged his case, as one is brow.' apt to do, by the light of my own. No wonder, poor fellow, that he wanted to wipe out the 1,500 miles which alone stood between him and that Thanksgiving turkey! For my own part, I can swear that no power as yet known to man could keep me back from Jim Mc-Kenzie's Thanksgiving dinner, for Mary was to be there-Mary whom all these years I had remembered and loved so well. I had never forgotten her heautiful deep, dark eyes, which seemed to search one's soul with that penetrating look one sees sometimes in a baby's eyes.

There was but little out here in the mountains to relieve the tedium of our long evenings, so Jim McKenzie's weekly visits were always heralded with joy. We made merry over his coming, and our carefully prepared dinner we regarded as a feast. We talked it over in the morning, and when evening came we began to plan for next week's coming. No wonder McKenzie was always welcome. His mind was stored with the thrilling adventures of early days in the mountains. We never tired of listening to the story of his own good luck; how, way down near the stream on the side of the mountain, his quick eye had detected the bits of shining gold; how, day by day and all alone, he followed up the little thread of gold until he had discovered the secret of the mountain's heart, the generous yield of ore which had made him the richest man in "Golden Point." With touching pathos he would tell us of the brave hearted men no less worthy than himself who had come out here to meet only bitter disappointment and blasted hopes. At rare intervals he would speak to us of his own early trials, of his dead wife, to whose loving care and gentle sympathy he confidently and proudly attributed his entire success | even the 'New Woman,' too." and all that was good in him. Then, too, he always brought us news of his daughter Mary. At first her letters were only outpourings of her homesick, loving heart; she was born to live in the mountains, and declared she must have the freedom of the mountain bird. After a while her letters breathed a more that her father was right-he always contented spirit. In an incredibly short time the mountain bird had ceased to was on practical questions. "To do as I do;" and with this the messenger commences to perform some antic which the lady or gentleman must

imitate-say he wags his head side to side, or taps with one foot incessantly on the floor. The person whose duty it is to obey, commands his neighbor to the right or to the left to "Do as I do," also; and so on until the whole company is in motion, when the messenger leaves the room, re-entering it with

fresh injunctions. While the messenger is in the room he must see his master's will obeyed, and no one must stop from the movement without suffering a forfeit. The messenger should be some one ingenious in making the antics ludicrous, and yet keep within moderate bounds, and the game will not fail to produce shouts of laughter. Another game, of much the same

character, is known by the title, "Thus says the Grand Seignor." The chief difference is that the first player is stationed in the center of the room and prefaces his movements, which the others must all follow, by the above words. If he varies his command by framing it, "So says the Grand Seignor," the party must remain still and

decline to follow his example. Any one who moves when he begins with "So," or does not follow him when he commences with "Thus," has to pay a forfeit.

The pennant was lowered and raised again three times. after which, from the one little cave alluded to, shot up a light like that of a rocket, saving that the bright sparks fell away again instantaneously, whereupon from the movement on board the strange craft, it was evident she was preparing to lay by-for a short time at least. When the deepening shades mingled all objects in one undistinguishable mass of blackness, a small boat was lowered from the schooner, and sent swiftly over the water toward the cave. When the keel grated against the rock, the oarsman rose up, and gave three low, but distinct whistles. which were immediately answered and

Come up the cliff into the cave, where we are secured from eaves-droppers. Since you are trusted with the signals, I cannot doubt your fidelity."

The sailor Christopher obeyed the directions, and then came scrambling up the precipitous side of the cliff. It was not dark enough to hide the outline of surrounding objects, but still too secure to make so uneven a pathway as that he was treading at all comfortable, and Christopher muttered something very like an oath, as for the third time he stumbled and went

the second edition of his "Artificial" Clockmaker," published in 1700, mentions an eight-day watch which he was told belonged to Henry VIII., but the context clearly shows a weight timepiece is referred to. Among the possessions of Edward VI, as quoted by Wood from a royal household book, is

being likewise iron gilt with two plummettes of led." The first words of this description may seem to indicate watch with a mainspring, but such are assumption is at once dispelled by the mention of the "plummettes of led." That Elizabeth owned a large numiser of watches is certain. In 1571 the carl of Leicester gave to his royal mistress "one armlet or shakell of golde, all over failely garnished with rubyes and dyamonds, haveing in the closing thereof a clocke." From this it will be seem

that the modern custom of wearing the watch in a wristlet is but a revival of sixteenth century fashion. It is said that Mary Queen of Scots had twee 'death's head" or skull watches, which she presented, one to each of two faworite maids of honor. Among others. which tradition has assigned to that Scottish queen Octavius Morgan mentioned two which he considered to be of the period claimed for them. One was a ghastly memento mori watch in a case of crystal formed like a comm. and the other an octagonal watch. The latter, it is asserted, was given by Mary to John Knox the reformer. The prisssession of many watches is ascribed to James I., but such as he did possess

ANCIENT MEDICAL METHODS The Manner of Doctors' Consultations In the Fourteenth Century.

Coming to Mondeville's exposition of the method of holding a discussion, we find his description almost a story of what might take place today. "First," he says, "we should inquire into the nature of the disease, examining carefully and feeling, because the diagnosis is made by touching with the hand and observing with the eye. All the consultants engage in turn in the examination. Then, if the case demands it, they make a new examination all together, pointing out to one another the symptoms of disease and the special or remarkable features either in the patient or the disfant Tygnonnof them, the highest in ceive very clearly what is the matter
