OLIVE SCHREINER IS ACTIVE IN THEIR BEHALF.

Wants the Tyranny of Britain Clearly Understood - Sketch of a Peculiar Woman's Life-From South African Farm to Merited Fame.

One of the most peculiar of contemporary writers is Olive Schreiner, who suddenly leaped into great popularity over ten years ago by her strong romance, "The Story of an African Farm." Since then she has never produced another sustained bit of imaginative work, but in several smaller books she has shown creative power of a rare kind. Her father was a German missionary and her mother an English woman, and all her girlhood she spent at a remote station in Cape Colony. This lonesome life she has reproduced with startling fidelity in her book, which was a powerful protest against the world's failure to permit a girl to enjoy the same training as a boy. Her sketches of Boer life were as graphic as Rider Haggard's in

issued for the arrest of two executors on the ground that they had failed to turn over certain moneys as directed THE STRONG SWIMMER LAST by the court. > Ruling of a Country Judge Which Made Lawyers Gasp.

"Church congregations are always nightily well pleased to see their pastors in their pulpits after the summer season is ended, but not as thoroughly when the judges return from their vacations," remarked a prominent Brooklyn lawyer. "Why do you make the distinction between the emotions of church congregations and lawyers?" I asked. To which my friend replied: "Well, a congregation is not forced to accept the views of a poorly informed country parson who comes to the city as a substitute for a brighter man who appeal can be heard; have got to submit to the rulings of this and that second-class country judge who comes to the city to make a show of his unjudges return to their seats. During 'ast summer a case came under my ob-

informed man on either side of the water in regard to the intricate nature of Spanish-American politics, being thoroughly conversant with the situation in every republic in all Central and South America. This is by no means an easy task when one considers the frequency of revolutions everywhere else but in Mexico. Senor Mariscal has a great admiration for the United States, and every plan for more cordial relations between the two republics has had his cordial approval,

IGNACIO MARISCAL. while, indeed, many of them originated in his active brain.

Cucumber Crop Destroyed. The great cucumber district, embracing hundreds of acres southeast of Benton Harbor, Mich., with an annual output of over 1,000,000 bushels, has been destroyed in the last two weeks by a foreign red bug. The new pest, although much smaller, belongs to the 'lady bug" family. One of the leading cucumber growers today said: "About three weeks ago the vines, which were in fine condition, as well as the fastmaturing cucumbers, were discovered to contain hundreds of small eggs, which the warm weather soon hatched cut. producing the unknown bugs, which soon destroyed the vines. The

cated case in the following terms: "You have all heard the evidence; you have also heard what the learned counsel have said. If you believe what the counsel for the plaintiff has told you, your verdict will be for the plaintiff; but, if, on the other hand, you believe what the defendant's counsel has told you, then you will give a verdict for power, and 350 tons greater displace- \*ervation which will illustrate the in- and don't believe what either of them the pang and the outrage and the har- you that a man cannot save himself, ment, was approximately equal to that exampletency of some of these country has said, then I'll be hanged if I know

SUNDAY'S SUBJECT.

From Isa., 25:11, as Follows: "He Shall Spread Forth His Hands in the Midst of Them, as He That Swimmeth Spreadeth Forth His Hands."

(Copyright 1899 by Louis Klopsch.) In the summer season, multitudes of called for; that the Supreme court people wade into ponds and lakes and could not interfere with a case under rivers and seas, to dive or float or the jurisdiction of a surrogate. And swim. In a world the most of which so the poor prisoner had to sweat in is water, all men and women should jail because this countryman did not learn to swim. Some of you have know the law. That ruling made every learned the side stroke, introduced by George Pewters in 1850, each stroke of tuat kind carrying the swimmer a distance of six feet, and some of you may use the overhand stroke, invented by Gardener, the expert, who by it won ter in 1862, the swimmer by that stroke carrying his arm in the air for a more may tread the water as though you had been born to walk the sea; but most usually take what is called the "Jess" or "Swallow." Olive Schreiner ico. Before he accepted the portfolio breast stroke, placing the hands with the backs upward, about five inches apart under the water, the insides of the wrists touching the breast, then pushing the arms forward coincident with the stroke of the feet struck out to the greatest width possible, and you thus unconsciously illustrate the meaning of my text: "He shall spread forth his hands in the midst of them, as he that swimmeth spreadeth forth his hands to swim."

The fisherman seeks out unfrequented nooks. You stand all day on the bank of the river in the broiling sun, and fling out your lines, and catch nothing, while an expert angler breaks through the jungle and goes by the shadow of the solitary rock, and, in a place where no fisherman has been for ten years, throws out his line and comes home at night, his face shining and his basket full. I do not know why we ministers of the gospel need always be fishing in the same stream. and preaching from the same texts that. other people preach from. I cannot understand the policy of the minister who, in Blackfriars, London, England, every week for thirty years preached from the epistle to the Hebrews. It is an exhilaration to me when I come across a theme which I feel no one else has treated; and my text is one of that kind. There are paths in God's word that are well beaten by Christian feet. When men want to quote scripture, they quote the old passages that every one has heard. When they want a chapter read, they read a chapter that all the other people have been reading, so that the church today is ignorant of three-fourths of the Bible

You go into the Louvre at Paris. You confine yourself to one corridor of that opulent gallery of paintings. As you come out, your friend says to you: "Did you see that Rembrandt?" "No." "Did you see that Rubens?" "No." "Did you see that Titian?" "No." "Did you see that Raphael?" "No." "Well," says your friend, "then you did not see Louvre." Now, my friends, I think we are too much apt to confine ourselves to one of the great corridors of scripture truth, and so much so that there is not one person out of a million who has ever noticed the all-suggestive and powerful picture in the words of my text.

This text represents God as a strong swimmer, striking out to push down iniquity and save the souls of men. "He shall spread forth his hands in the midst of them, as he that swimmeth speradeth forth his hands to swim." The figure is bold and many-sided. Most of you know how to swim. Some of you learned it in the city school, where this art is taught: some of you in boyhood, in the river near your father's house; some of you since you came to manhood or womanhood while summering on the beach of the sea. It is a good thing to know how to swim, not only for yourself, but because you will, after a while, perhaps, have to help others.

I do not know anything more stirring or sublime than to see some man like Norman McKenzie leaping from the ship Madras into the sea to save Charles Turner, who had dropped from the royal yard while trying to loosen the sail bringing him back to the deck amid the huzzas of the passengers and crew. If a man has not enthusiasm enough to cheer in such circumstances. he deserves himself to drop into the Royal Humane society of England was established in 1774, its object to applaud and reward those who should who has performed such a deed of daring has all the particulars of that bravery recorded in a public record and on gold and bronze, anchor and monogram and inscription, telling to future generations the bravery of the man or drowning. But if it is such a worthy thing to save a body from the deep, to save an immortal soul? And you spreadeth forth his hands to swim.'

In order to understand the full force of this figure, you need to realize that thousands of souls out of the kingdom our race is in a sinking condition. You of heaven. It is because they cannot sometimes hear people talking of what consent to let Jesus Christ begin and they consider the most beautiful words | complete the work of their redempin our language. One man says it is tion. "Why," you say, "then is there "home"; another says it is the word nothing for me to do?" Only one thing "Jesus"; but I tell you the bitterest hold of Christ and let him achieve word in all our language, the word your salvation, and achieve it all. I most angry and baleful, the word that do not know whether I make the matspell it with three letters, and yet those can do it, and will do it if you ask

bad in the universe. Sin is a sibilant word. You cannot pronounce it without giving the siss of the flame or the hiss of the serpent. Sin! and then if describes every one of us by nature— God, not occasionally, or now and then,

sinneth, it shall die." What the Bible says, our own conscience affirms. After Judge Morgan had sentenced Lady Jane Grey to death, his condeed that he became insane, and all "Take her away from me! Lady Jane Grey! Take her away! Lady Jane It was the voice of conscience. Grev!" And no man ever does anything wrong, however great or small, but his conscience brings that matter before him. and at every step of his misbehavior it says, "Wrong, wrong!" Sin is a leprosy; sin is a paralysis; sin is a consumption; sin is pollution; sin is death Give it a fair chance, and it will swamp you and me, body, mind and soul, forever. In this world it only gives a faint intimation of its virulence. You see a patient in the first stages of tyflushed, the hands somewhat hot, preceded by a slight chill. "Why," you say, "typhoid fever does not seem to be much of a disease." But wait until the patient has been six weeks under it, and all his energies have been wrung out, and he is too weak to lift his little finger, and his intellect gone, then you see the full havoc of the disease. Now, sin in this world is an ailment which is only in its first stages; but let it get under full sway and it is an all-consuming typhoid. Oh, if we could see our unpardoned sins as God sees them, our teeth would chatter and our knees would knock together, and our respiration would be

from everything that is good and blessed. Then what do we want? A swimmer! A strong swimmer! A swift swimmer! And, blessed be God! in my text we have him announced. "He shall spread forth his hands in the midst of them, as he that swimmeth stretcheth forth his hands to swim.' You have noticed that when a swimmer goes to rescue any one he puts off his heavy apparel. He must not have any such impediment about him if he is going to do this great deed. And when Christ stepped forth to save us he shook off the sandals of heaven, and his feet were free, and then he stepped down into the wave of our transgressions, and it came up over his wounded feet, and it came above the spear stab in his side—aye, it dashed to the lacerated temple, the high-water mark of his anguish. Then, rising above the flood, "He stretched forth his hands in the midst of them, as he that swimmeth spreadeth forth his hands to

when in the last day the water is all drawn off. It will be a line of wrecks from beach to beach. There is where the harpooners went down. There is where the line of battleships went down. There is where the merchantmen went down. There is where the steamers went down-a long line of wrecks from beach to beach. What a spectacle in the last day, when the wa- | A good many are coming to this conter is drawn off! But oh, how much more solemn if we had an eye to see the spiritual wrecks and the places where they foundered! You would find ing of becoming out-and-out vegetarthousands along our roads and streets. Christ came down in their awful catastrophe, putting out for their souls, "spreading forth his hands as a swimmer spreadeth forth his hands to pear eaten from the hand is conducive swim"; but they thrust him in the sore to a physical sense of well-being that heart, and they smote his fair cheek | makes life seem worth the living. And and the storm and darkness swallowed have you noticed that the leading resthem up. I ask you to lay hold of this taurateurs are doing themselves proud Christ and lay hold of him now. You will sink without him. From horizon to horizon not one sail in sight. Only one strong swimmer, with head flung you will recall the fact that the most I hear many saying, "Well, I would

back and arms outspread. like to be a Christian. I am going to nothing but just the most straightforwork to become a Christian." My brother, you begin wrong. When a sea and have no one to help him. The man is drowning, and a strong swimmer comes out to help him, he says to stuffing, and as a general thing served him: "Now be quiet. Put your arm on my arm or on my shoulder, but pluck up life from the deep. Any one don't struggle, don't try to help yourself, and I'll take you to the shore. The more you struggle, and the more you try to help yourself, the more you imhis breast a medal done in blue and pede me. Now, be quiet, and I'll take you ashore." When Christ, the strong swimmer, comes out to save a soul. the sinner says: "That's right. I am woman who saved some one from glad to see Christ, and I am going to help him in the work of my redemption. I am going to pray more, and I ask you if it is not a worthier thing that will help him; and I am going to weep extravagantly over my sins, and shall see, this hour, the Son of God that will help him." No; it will not. step forth for this achievement. "He Stop your doing. Christ will do all or shall spread forth his hands in the none. You cannot lift an ounce; you midst of them, as he that swimmeth cannot move an inch, in this matter of your redemption.

This is the difficulty which keeps three letters describe the circumference him. Oh, fling out your two arms- make an equal weight of paper.

SERMON. and pierce the diameter of everything the arm of your trust and the arm of OUR BUDGET OF FUN your love-around this omnipoten swimmer of the Cross,

Have you ever stood by and seen

some one under process of resuscitation you add three letters to that word, it after long submergence? The strong swimmer has put him on the beach sinner. We have outraged the law of after a struggle in the waters. To excite breathing in the almost lifeless but perpetually. The Bibles declares body, what manipulation, what friction it. Hark! It thunders two claps: "The of the cold limbs, what artificial moveheart is deceitful above all things, and ment of the lungs, what breath of resdesperately wicked." "The soul that cuer blown into the mouth of the rescued! And when breathing begins, and after a while the slight respiration becomes the deep sigh, and the eyes open and the blue lips take on a smile, what science troubled him so much for the rejoicing, what clapping of hands all up and down the beach! What conthrough his insanity he kept saying: gratulation for the strong swimmer and for all who helped in the restoration! What shouting of "He lives! He lives!" Like this is the gladness when a soul that has been submerged in sin and sorrow is "coming to." What desire on the part of all to help, and, when under the breath of God, and under the manipulation by the wounded hands of Christ, the life-eternal of the soul begins to show itself, all through the ranks of spectators, terrestrial and celestial, goes the cry, "He lives! Rejoice, for the dead is alive again!" May the living Christ this moment put out for your rescue, "spreading his phoid fever. The cheek is somewhat hands in the midst of you, as a swimmer spreadeth forth his hands to

Pink Satin.

A pretty anecdote of a revolutionary

swim!

bride is related by Ellen D. Larned in a recent little volume upon the local deeds and traditions of a Connecticut county. The incident occurred soon after the first successes of the rebel privateers. A beautiful young girl, betrothed and shortly to be married, admitted one day to the house a wandering peddler, who undid his pack and displayed his wares. She expected. doubtless, to purchase some pretty trifle to add to her wedding outfit; but times were hard, there was little money to spare, and, moreover, it was many months since all imported finery had been so frowned upon that no patriotic young woman could venture to buy it, nor any dealer to sell it. What, then was the young woman's amazement and delight when the peddler unrolled a voluminous piece of the most beau tiful pink satin-satin, too, quite innocent and inoffensive to the most ardently patriotic eye, since he explained that it was a trophy of war, the booty of one of our own privateers! She gazed upon it in fascination. What a wedding dress it would make! But the cost-she could not, she dared not, ask so much money of her father. Nor did she. But, unrolling the exquisite fabric yet further, she draped the rosy folds flowingly about her supple young figure, and, crossing the room to where all the time her father, a stern and silent man, had sat writing at his accounts, observing nothing, she sank upon her knees at his feet. A hand was laid on his knee; he looked down, wondering, and she looked up, pleading -and then he understood. Not a word was spoken on either side, but the old man's hand went quietly into his desk, drew out a purse, opened it, and laid | the two girls look alike?" in his daughter's hand forty silver dollars. At the wedding that soon ensued the bride's gown and the bridegroom's waistcoat were both of pink satin, and there was one more pretty story to hand down of a real Daughter of the Revolution.

Improvement in Luncheon Dishes. From the Boston Transcript: Of course, it is being trite to say it, but we do eat altogether too much meat. clusion and trying to reform, so an observing person remarks, by eating no meat at luncheon. They aren't thinkians, but they are thinking that a luncheon menu made up of two or ing." three kind of vegetables, wound up with a fruit salad or with a peach or in catering to this sensible demand of their customers? Ten years ago. if your memory can take you back so far, comprehensive menu at your favorite lunching place offered you tomatoes in ward and unadorned guise, but today it's very different. They are fried and broiled and roasted, with or without with a sauce that you are accustomed to having with steaks and chops, which, of course, makes them seem so much more a "dish." What you have noticed in regard to tomatoes is as true of other vegetables, though very few lend themselves to the elaborating process as they do. And to think that now and then you run across a barbarian who declares he "had to learn to like tomatoes!"

Newspaper Wood Pulp. In the manufacture of newspaper

wood pulp, according to present methods, a cord of spruce wood is estimated to equal 516 feet of board measure, and this quantity of raw material will make half a ton of sulphite pulp or one ton of ground wood pulp. Newspaper stock is made up with 20 per cent of the sulphite pulp and 80 per cent of the ground wood pulp. Now, as figured by experts, the best of spruce land, virgin growth, possesses a stand of about 7,000 feet to the acre; on twenty-two acres, therefore, of this best spruce land there will stand 154 .-"mother"; another says it is the word have you to do, and that is to lay 000 feet of timber, which an average company of loggers will cut in about eight days. But this entire quantity of wood, turned in at any one of the the defendant. But if you are like me, accounts for all the loathsomeness and terplain or not. I simply want to show large mills, will in a single day be converted into about 250 tons of such rowing, and that word is "sin." You but that the Almighty Son of God pulp as goes to make up newspaper stock, and this amount of pulp will

his name count for fact. We all know rarely attain a length of over 12 Soon afterward she espoused a Pole, inches here, but at Aru, Fiji, and who met his end in a duel. Her next thereabouts they grow much larger, and the bill, armed with sharp teeth, is a weapon to be dreaded. The fish bask habitually at the very surface of body of her sixth husband, likewise a the water, and become extremely ex- native of France, was found in a wood cited, and, in the larger specimens, vicious at the slightest alarm. The gentleman who describes the incident was collecting specimens of shells along the reef in the Aru Islands, natives towing the boat along the streets and byways, tossing the useless specimens and bunches of coral overboard again. In doing this he noticed that almost invariably the large gars that were in the vicinity would start out of the water and dash away at headlong speed, glancing in and out of the water like a shot. One of the fish coming near the boat, he observed that termined, the native lifted up the peculiar flat basket that he carried and held it as a shield, at the same time raising his club. The idea of using a basket as a shield seemed a comical one, but was nevertheless a good one, as a few moments later a native some 300 yards to the left lifted up a huge branch of coral, and finding nothing in it hurled it back again. It fell with a loud crash, and almost instantly four or five gars darted from the water, rushing away with incredible speed. Two of the largest came flying toward the boat, clearing the water and glancing out again, and the native had barely time to utter a warning cry, when one of them passed directly over where his head had been a moment before. The other came full at the native. For a second it was under the water, then out with a bound, flashing in the sunlight like a meteor. The quick eye of the native, however, had followed it, and, stepping back, he raised the thick basket shield and received the flying gar full upon it. The blow was so heavy that, for the instant, the man staggered, and was nearly thrown over, while the fish, evidently stunned and confused by this sudden arrest of its progress, lashed the water about him into foam. A spear was soon put into it, and the dangerous living arrow thrown into

the boat.

Mongolia may be set down as a country of barbarians, if not of religious fanatics. They are idol worshipers of the most pronounced type, and at Urga, the capital town and the seat of the Grand Lama. religious intoleration is to be seen in its most despotic form. Urga is a town with a considerable population, a town of mud, wattleroofed houses, pig-tailed inhabitants and innumerable dogs. Its center is occupied by the house or palace of the Lama, who is practically ruler over all Mongolian Chinese. Should any reader happen upon Urga and walk through its streets the first that will strike him will be a peculiar clanging noise on all sides. It will not take him long to discover whence proceeds this strange clangor of bells, for at every corner, in almost every open space, he will see a peculiar erection like nothing so much as a gigantic turnstile. the center of which is boxshaped, and from whose sides protrude several bars of wood. The turnstile arrangement is covered by a conical canopy to protect it from the elements. and forms the celebrated praying mill of Mongolia. The drum or wooden box in the center is filled, sometimes to overflowing, with prayers written on all sorts of material. A passer-by, wishing for something good, writes a prayer (if he has the ability), and then puts it in the box, after which he seizes one of the handles of the machine and walks solemnly round, the idea being that this system of grinding is necessary before the prayer can reach its proper destination. In front of the palace itself there are some scores of

IN THE ODD CORNER, these praying mills, while, not dependent entirely upon these, every Mongol who has any respect for himself will carry a miniature mill in his hand, and as he walks, or as he sits, or as he eats or drinks, he will from time to time turn this mill, in which he has already deposited his latest prayer to

#### Unlucky Wives.

A Mexican lady, Senora Rey Castillo, has, between the years 1880 and 1895, lost no fewer than seven husbands, all of whom met with violent deaths. Her first was killed by being thrown from a carriage, her second was accidentally poisoned, her third lost his life in a mine accident, her fourth committed suicide, her fifth had a fatal fall while hunting, her sixth was killed by a fall from a scaffold and her seventh was drowned. Not long since a fisherman named Belot was drowned near Havre. He was his wife's fifth husband, her four other partners having likewise met their death at sea. Last year at an inquest held upon a signalman named North, who was killed by an express train, his widow stated that her first husband had also met his death on the railway, having committed suicide on the line near Thames Ditton. Two weeks previously a Mr. Amaziah Butters was killed in a railway accident near Grimsby. He, too, was his wife's second husband, his predecessor having died under very similar circumstances. There is at the present time residing at Manchester, England, an old lady, whose six matrimonial ventures have all ended tragically. Born over 80 years since at Washington her first two husbands, who were citizens of Hawaiian Weekly: This is a fish the United States, were both brutally murdered—one shot down by a desa man who signs "F. R G. S." after perado in a gambling saloon, the other stabbed by a business partner. the "gar," a long, thin gentleman like | Coming to Europe, settling in Dresan elongated pickerel that often occu- den, she married a German, who was pies a stall in our fish markets. The Cat and the Coon. "One of the strangest cases of animal friendship I ever laid eyes on," said a Baronne street business man, "may be seen at a big machine shop out on Bayou St. John. A few weeks ago the engineer caught a good-sized o'clock train. Of course, I saw to the coon-I mean a coon of the four-legged variety—prowling around the loft. How the heast got there nobody knows, and at first he showed fight as soon as its direction could be degineer is one of those men who seem to have a mysterious natural power over wild animals, and in a few days his prisoner was eating out of his hand, coming at his call, and going around loose, as tame as a dog. That would be sufficiently wonderful of itself, but it was nothing to the friendship that soon developed between the newcomer and Tom, the pet cat of the establishment. Tom is a monstrous black and white feline, and such a talented scrapper that he has frequently licked full grown dogs. The first time he met the coon there was a battle royal, which impartial spectators declare was a draw. At any rate, it must have given the pair a mutual respect for one another, for they immediately agreed to a protocol, and have since entered into a full treaty of peace, including an offensive and defensive alliance against all other cats or coons found on the premises. At present they sleep curled up in one furry ball, eat out of the same dish and play together like a couple of kittens. One of the coon's favorite tricks is to throw his paws around the cat's neck and make the latter drag him around the yard. It is a strange sight, and I could hardly believe my eyes when I first saw them. I pity any quadruped that attempts to tackle that combination .- New Orleans Times-Democrat.

Bullet Shot Through Six Men. A remarkable story reaches us from reliable source, illustrating the deadly effect of a new rifle named the Mannlicher, which is being used by continental troops. At Podhorz, near Prague, two gendarmes while on their round entered an inn and sat down, placing their Mannlicher rifles in a corner. One of the guns slipped and fell, catching the trigger against a projecting seat. The ball went through the door of the room, struck a musician sitting beyond, passed through his body, and then through five of his companions who happened to be sitting by his side. The first man was killed and the others seriouly injured. It is said that such penetrative force has never been found in any other rifle, and further experiments are about to be made.-Golden Penny.

## Wonderful Fireworks.

In Nagasaki, Japan, there is a fireworkmaker who manufactures pyrotechnic birds of great size that, when exploded, sail in a life-like manner through the air, and perform many movements exactly like those of living birds. The secret of making these wonderful things has been in the sossession of the eldest of the family of each generation for more than four hundred

## A Hat of Diamonds.

Sir Jung Bahadur, the prime minister to the king of Nepaul has a hat made of diamonds, worth over £500.000, and perched on top is a single ruby of incalculable value.

### LADY'S MAID'S STORY.

"Yes, miss, certainly, I lived with Mrs. Birch-Miss Grigg that was before she married Mr. Birch-and I knew all about that affair. It was very singular, indeed-very. I'm not sure that I ought to mention it, for if a lady's maid can't hold her tongue she can't find good places. Dear me, I'm no talker; I'm as mum as a mouse. Bushels of pearl powder and quarts of rouge have I applied with my own hands and never so much as hinted at. As for cotton, bless your heart, I've never breathed about it, and I did live with a lady once who took arsenic regularly for her complexion. That's no secret, for she took too much one day by accident and died.

"There was an inquest and it all came out. It's well it did, for suspicion pointed to her husband. Somethat a husband is the likeliest person to wish a wife out of the way. But this isn't anything about paint; Miss Grigg, being on the stage, made no se- and biscuits and wine, and she threw cret of that. She played queens and en me and gone with my young man to see her act. And when she was haughty and curled her nose, like, her shoulders, and talked way down in her throat like a pigeon gurgling, she was splendid, miss. It made me think how nice it would be to be a

queen and to take airs over everybody. "Well, Miss Grigg was engaged to be married. Mr. Birch had fallen in love with her when she was playing Hamlet's ma. Perhaps you have seen the play, miss? The young man objects to his ma getting married a second time, so I seemed to make out, and acted most impertinent, giving sass to his ma and his step-pa, and carrying on awful. And there was a poor young lady quite out of her mind that afterward got drowned.

"Well, she was playing Hamlet's ma and Mr. Birch fell in love with her and sent her a letter and called and made an offer, all in no time. She accepted him, of course, and the preparations for the wedding began. I don't think any lady ever had so many dresses before-silks and satins and velvets and

"At last everything was finished. The trunks were packed, 15 of 'em, miss, and 14 were to go on that afternoon, and one-the one with the wedding and traveling dresses-was, of course, to be left and go with the bride when she started next day. She was to be married at 10 o'clock, in church, and then change her dress and catch the 3

NOW, LEAVE US. trunks, and I was very careful, but just when I was needed most, just as the trunks were going downstairs, Miss Griggs called to me.

"Miss Griggs was a lady who didn't like to wait. I went to her at once, as was my duty, and I said to Bridget Duster, the chambermaid:

"'Bridget, watch that black trunk and see that the men don't carry it off! "Bridget understood with her elbows, of course, miss, and after I'd been to the land's end for two yards of blue ribbon of exactly such a shade as she wanted, and got back, I found that she had sent off the black trunk first of all and was very proud of having been so careful. The trunks were all miles away by that time.

"There was nothing for it but to tell Miss Grigg. She flew at me, miss. I don't blame her for being angry; I would forgive her in such a case. She flew at me violent, miss, and then, miss, she had spasms. She beat the sofa, she tore her hair, she screeched, and me

all the while saying: "'Remember your eyes, miss. Think now dreadful you'll look. Your nose is swelling dreadfully, miss." "Finally she came to and bathed her

face. And says she: "'Flora, what-shall-I do?"

"'I don't know, miss,' said I, 'unless you telegraph for the trunk.' "'No,' said she; 'that's unlucky; be

sides, one never knows. None ain't to be depended on.' "'You might borrow a dress,' said I

"'As if I'd be married in one that didn't fit!' said she. 'Stop; don't speak word; I've an idea.' "She sat with one finger on her lips

for awhile. Then she said: "'My embroidered dressing gown The white one! That's here?' "'In the bureau, miss.'

"'Very well,' said she. 'I'll be married in that. Telegraph for the trunk, Flora. "'The white dressing gown, miss?" said I, nearly astonished out of my

"'Yes, said she, 'the white dressinggown, goose; you don't think I'm going to be married in church in that. won't put off the wedding, and won't stand up before a crowd in anything but my white satin dress! But I'll be married at the appointed hour, for all that; so telegraph for my trunk

and come back at once.' "When I came back I found Miss Grigg in bed and the doctor sent for. He was puzzled—I could see that. He couldn't tell what was the matter, and | habit of it."-New York Journa?

Miss Grigg was too faint to speak. He questioned me. I said she had been very much agitated. He prescribed something and went off hidding me

send for him if she seemed worse. The evening paper published the report that Miss Grigg was seriously ill, and Mr. Birch came to the hotel in a terrible fright, pale as a sheet, to ask how she was. I took him down 'her love, and she was very ill.' "Then Miss Grigg said to the ladies

who had come in: 'Leave me with my faithful Flora,' and we were left alone. I can't say I was surprised when she sat up in bed and said briskly: "'Lock the door, Flora. I'm sick of

lying on my back. I've taken them in, haven't I? You see what I am about now? "Exactly, miss," said I: "to be too

ill to be married when the time comes.' "'No,' said she; 'to be ill enough to be married in the white dressing gown. how it always seems to strike a jury | I'm going to be married on my dying bed, Flora.'

"I gave a screech, and she laughed, and then she made a supper of sardines the medicine out of the window. Early such, miss. I've often had tickets giv- | next day the doctor come. I answered his question as to what sort of a night the patient had passed by saying she had been 'much the same.' And then miss, and looked at other folks over I took a little note she had written to Mr. Birch.

"I knew what was in it. She told him 'that rather than leave the world without keeping her vow to him, she would be married on her "dying bed." I powdered her up well, miss, and I dressed her in the embroidered dressing-gown, with tube roses at the throat. I pulled down the green shades and darkened the room. She fixed the pillows to prop herself up with and then skipped into bed.

"'Give me my pearl bracelets,' she said, 'and the handsomest of those handkerchiefs, and all my rings; and, Flora, mind, you must sob all through the ceremony. I'm going to be calm.' "We hadn't five minutes more, but just as the first knock came to the

door, she whispered: slow music. Couldn't you catch that and was called from his berth. Though 'Traviata" organ, Flora, and get him to play for half an hour outside the window? He's always on the corner, | was quick work to be done, and he ap-Flora. I'll leave you something handsome if you do.'

"I did it, short as the time was. I caught that man, and he ground out | mand in spite of his curious appearhis quarter's worth.

foot. The groomsman looked dreadful- remarks with three shots from his rely sorry. The four or five intimate calm smile and her powdered face, one his! I was glad I'd been told to sob; novel uniform retired once more below. I had to do something. And so they were married.

"'I feel,' said Miss Grigg, slowly, that this, perhaps the last moment of my life, is very sweet. To die thus, with my hand in yours-ah! Dear friends, adieu. Flora, my faithful maid, take this ring.' I saw her pick out the cheapest; but no matter. 'Remember me by it. Now-leave us.'

"Then everybody kissed her and vent out of the room, sobbing. "In a moment more there was a scream; Mr. Birch had fainted away.

It took an hour to bring him to. "The reporter of the evening paper was waiting outside for the news. It was published all over that night, but by the next afternoon the traveling dress came back in the black trunk.

"Yes, miss, of course-Miss Grigg-I mean to say, Mrs. Birch-recovered at once. And that's the whole story."-New York News.

Cooking in Sweden. A lady who has just returned to this country from the Land of the Midnight Sun said to a Philadelphia Press reporter: "After we had seen our fill of rocky headlands and enchanted lakes and fjords, we went to a seaside resort, where we had rooms overlooking the water, and went to a matsal, or 'meatroom,' for our meals, as every one does in Lysekil. We had a special table and were waited upon with the never-failing amiability by a special waitress, and we paid for one party of four \$10.60 per week for our meals. What did we get to eat? Not canned peas or skimmed milk or tough chicken. For breakfast we had meat, eggs, tea, coffee, delicious fish and fancy breads. For dinner, soup, fish, meat and a dessert, the whole preceded by the Swedish smorgasbord, which is a sort of side table where all sorts of relishes are laid out. Rarebits, eggs, sandwiches, raw or pickled herrings, with chopped onions, sliced sausages, caviare, anchovies, cheese, sardines, pickles and salted and savory meats are served in endless variety, and, though tourists usually fight shy of the smorgasbord, we became perfect Swedes as far as it was concerned. We had such a good time in Lysekil and saved so much of our precious pelf that we were able at the end of our stay to take a trip to Paris for a few days' shopping, a dinner at the Ambassedeur's, and a peep at the budding revolution.'

Horrors of the Modern Duel. The lie had passed between the two rival scientists and a duel was inevita-"Name your weapons," said the ble. challenger, his pale face denoting that he fully realized the gravity of the sitnation. A Prosperous Manufacturing City.

A Prosperous Manufacturing Constitution of the prosperity of the shoe industry that it will, no doubt, prove a matter of interest to a large number of people to learn the actual average earning capacity each individual employed in the maker of each individual employed in the maker of each individual employed in the maker each end in the each end in of each individual employed in the mak-ing of the world-famed Brockton shoe. For illustration: At the factory of the W. I. Douglas Shoe company the pay roll for the week ending Sept. 30, excluding superintendent, foremen, salesmen, and all clerical help, shows the average earnings of the employes, large and

and an electral neigh, shows the average earnings of the employes, large and small, to be \$15.54 per week. This was not an extraordinary week. It was the customary pay roll.

The amount earned per week, however, does not always tell the story of prosperity. The number of weeks employed each year is the determining factor in the wage earners' prosperity. The Douglas factory has been closed but one week this year, and that for the usual summer stock taking, and it will be closed but three days the latter part of December. This would make but nine days out of the year that the factory is closed, which is surely as steady work as the most industrious shoemaker could desire.

It is believed that the average pay and the number of days worked is larger at the factory of the W. L. Douglas Shoe company than at any manufacturing institution in Massachusetts.

Owing to increased business, another addition is to be made to the Douglas factory. It will be 100 feet long, 40 feet wide, and five stories high. It will be ready for occupancy early in December. This addition increases the capacity 25 per cent. The W. L. Douglas Shoe company has the largest factory in the world, producing an advertised line \$3.50 and \$3.00 shoes.

Mr. Douglas says that the prospect for successful business for Brockton manufacturers was never so good as now, and that collections are better than for years.—The Brockton (Mass.) Times, Oct. 10, 1899.

### DEWEY IN AN EMERGENCY.

How He Circumvented a Desertion Con spiracy After the Civil War.

One striking characteristic of the admiral is the readiness with which he meets every emergency, says Leslie's Weekly. He is resourceful as well as prompt in action. An illustration of this occurred during a cruise which Dewey took after the civil war, in the Mediterranean, on the old ship Canandaigua. The war fever had died out and men frequently deserted. On menof-war, boats cannot be lowered without an order, except in case of a man overboard. Several malcontents in the crew one night, therefore, raised the "man overboard" cry, lowered a boat and scuttled off into the darkness "'Oh, dear! if I only could have Dewey was executive officer of the ship, even then particular as to dress, he didn't care about uniform when there peared clad only in his night shirt. He rushed up to the quarter-deck in half a gale of wind and promptly took comance. He knew his men thoroughly. "The clergyman was a very nice, and acted promptly in spite of the

neat, near-sighted old gentleman. Mr. | darkness. "Come back here, Jim Birch was the dreadfulest sight-pale Brown, Tom Robinson, and the rest of as a ghost, and shaking from head to you," he shouted, and punctuated his volver. The shots, the ghostly figure friends looked as though they were at on the quarter-deck, and the sudden a funeral, and to see her, with her use of their names startled the men into obedience, and they came sneaking hand against her heart, the other in | back to the ship, while Dewey and his

## Deafness Cannot Be Cured

v local applicati object applications as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucus lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearinflamed condition of the mucus lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by catarrh, which is nothing but an inflamed condition of the mucus surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

### FOR 30 DAYS YOU CAN TRY IT FOR 10 CENT READ Has to say who has had 35 YEARS of active Practice of Medicine:

Has to say who has had 35 YEARS of active Practice of Medicine:

I have never before in my 35 years of practice of medicine given my testimonial or recommendation to any patent medicine, but there is a remedy, the result of which has come under my own observation; for there is no Disease which has so baffled the medical skill of all ages as Rheumatism and to find a Reliable remedy for the same. At last we have found it in "5 Drops," manufactured by the Swanson Rheumatic Cure Company, Chicago, Ill. The "5 DROPS," has proven itself wonderful for its curative power in Rheumatism, not as a Temporary Reliever only, but to give a Permanent Cure even in chronic cases. Sometime ago, I had among others several Rheumatic cases under my treatment and prescribed for these patients the very best Remedies which I skillfully selected, but without desirable results. I then heard of "5 DROPS" and of its Wonderful Cures, and prescribed it to a few patients who found relief from its use within a few days. After that I prescribed it to a great number and to my surprise, I will say that in the course of Two or Three Weeks after they had used "5 DROPS" and "5 Drop" Plasters they were a few who had, for a number of years, been suffering with Chronic Rheumatism, who had piloted themselves around on Crutches. They came to my office without Crutches and told me they were perfectly Well. They give all the credit to "5 DROPS" and o"5 Drop" Plasters, in a great many instances, I can Truly recommend them and also that the firm is perfectly honest and reliable to deal with.

SWANSON'S C. A. JACKSON, Physician and Surgeon, Kearney, Neb., Aug. 29, 1899.

15 DROPS" Is the most powerful specific known. Free from oplates and perfectly harmless. Relief is usually felt the first night. It is a positive cure for Rheumastism, Seriatica. Neuralgia. ## Suffered

Twenty-five Years"

66I suffered for twenty-five years from heart trouble, and tried endless remedies without relief. I steadily grew worse and became unable to lie down; my heart would palpitate and flutter, and at times it seemed as though I could not get my breath. I used three bottles of Dr. Wiles' Heart Cure, and thank God I am enjoying good health as a result. It cured me. Mrs. Ella Schindhelm, Mt. Vernon, Ia. 33

Blanurk's Iron Nerve. 2 6 Was the result of his splendid health Indomitable will and tremendous energy are not found where Stomach, Kidneys, Liver and Bowels are out of order. If you want these qualities and the success they bring use Dr. King's New Life Pills. They develop every power of brain and body. Only 25 cents at T. H. Fritz's Drug Store.

The Rev. Charles M. Sheldon, who inswers the question. "Is Christianity Practical in Worldly Affairs?" in the November Ladies' Home Journal, does not regard "In His Steps" as the best of the several books he has written and published. The reading public however, does not agree with him, and its verdict is accepted. It is common-Farming is about over for the season ly supposed that "In His Steps" netted its author a very large sum, but such is not the case. It was copyrighted in this country only, so the author receives no royalty from Eugland, where it has had the largest sale. In this book on the market so as to sell it at a low price in order that it would have wide circuation. This was his sole consideration, otherwise he would have received in royalties an independent fortune.

## EXHAUSTED NERVES

Are Restored and Revitalized, and the Body Flled with New Life and Vigor, by Using

Dr. A. W. CHASE'S

NERVE AND BLOOD PILLS. If nervous exhaustion were better un derstood, the numbers of insane and epileptic persons would be greatly reduced, and there would be less paralysi

and nervous prostration. Business and professional men would not be overcome by brain fag, nervous dyspepsia and headache; teachers and students would not be exhausted by their work, and women would not be pale, weak and nervous, and suffer the miseries caused by derangements of their

peculiarly feminine organism. To get at the cause of these troubles you must nourish and restore the wasted nerve cells. Dr. A. W. Chase's Nerve and Blood Pills are the greatest restoratives known to modern science. They are not purgative, nor have they the weakening effect of a purgative, but restore by building up the system.

Dr. A. W. Chase's Nerve and Blood Bills.

Pills are prepared from the favorite pre-scription of Dr. A. W. Chase, the fam-

ous author of Dr. Chase's Recipe Book. and have proven the greatest cure of the watery blood and exhausted nerves. A few weeks' regular treatment with this popular remedy will completely restore pale, weak, nervous men, women and children to robust health. By in-creasing the corpuscles in the blood, and creating new nerve force, they fill the body with new life and vigor, and banish disease from the system. There is no guess work about the results of Dr. Chase's Nerve and Blood Pills. You can rely absolutely on their restorative and curative properties. Fifty cents at troubles. Bond's drug store.

Oyster shells, mica crystal grit and ground bone for poultry at right

and curative properties. Fifty cents at all dealers, or by mail on receipt of price, by Dr. A. W. Chase Medicine Co., Buffalo, N. Y. On every box of the genuine will be found portrait and fac-simile signature of Dr. A. W. Chase.

The best-informed men and women in the world use the AMERICAN MONTHLY REVIEW OF REVIEWS to keep well informed, and call it the "necessary" and "indispensable" magazine. In the busy rush of to-day ambitious men and women must know about the important questions of the month, and not only this, they want to know about them at the right time. When the whole country is puzzled over the gigantic combination of trusts, a well-informed article is printed in the AMERICAN MONTHLY, giving the facts, and its editor discusses the theory; when the Dreyfus affair is in everyone's mouth, the best story of Dreyfus and the great case comes out in this magazine.

Every month, in "The Progress of the World," Dr. Albert Shaw gives a comprehensive picture of the world's history during the previous thirty days. In the departments, the valuable articles and books that have been published during the past month are reviewed and quoted from, so that the readers of the AMERICAN MONTHLY can get the gist of them. In every issue nearly a hundred pictures are printed, including the portraits of the men and women who are making the history of the month.

To be thoroughly well informed helps any man or woman in his her work. A subscription to the AMERICAN MONTHLY REVIEW OF REVIEWS represents an investment for the best kind of profit, as well as entertainment. One subscriber has just written: "Count me a life subscriber, and when you send me a number beyond the limit of my subscription and secure no renewal from me, consider it a notice of

### CONCISE AND INTERESTING.

Commander Pealer of the G. A. R. Issues General Orders and Announces the Aides-de-Camp Staff-One Killed In a Wreck on the Electric Railway.

Commander Pealer Issues General Orders. Commander Pealer, of the Michigan department G. A. B., in general orders. issued on the 26th, expresses his thanks to all who contributed to the success of Michigan's representation at the recent national encampment. The orders set forth the action of the national encampment in important matters, especially the report of the committee on pensions, and urges the comrades, now that the season for outdoor reunions and encampments is over, to make a special effort to recover into the ranks the large numbers who have been suspended and dropped for various causes, and to gain new members. Every comrade is urged to act as a recruiting officer. The annual election of post officers and representatives and alternates to the 22d annual department encampment will take place at the first regular meeting of the posts in December.

Appointments on aides-de-camp on the staff of the department commander are announced as follows: H. H. Williams, Bancroft; F. W. Barkley, Hartford; B. H. Rutter, Berrien Center; B. F. Smith, Ithaca; Thos. A Ball, Hawkins; E. P. Gifford, Saranac; Abner S. Fritz, Solon; Wm. Harmon, Fremont; Edwin Brown, Galesburg; Abner R. Byrd, Day; D. Z. Kline, Grand Rapids; T. M. Harvey, Bangor; J. T. Robinson, Bloomingdale; J. R. Edwards, Dowagiae; A. M. Foote, Williamston; M. C. Barney, Flint; Norris Richardson, Cassopolis; W. S. Hill, Escanaba; J. C. Haddock, Holland; L. #### Wreck on the Rapid Railway.

Just before midnight on the 26th a Rapid Railway car, bound for Mt. Clemens and known as the opera car, was struck by a M. C. freight at the Belt line crossing, corner Beaufait and and Gratiot avenues, Detroit, killing one person and injuring the remaining 24 passengers. The accident was the result of a slippery track and insufficient sand on the electric car. The fact that the freight was going slow at the time of the accident was doubtless the cause of so few deaths. The trolley car was a complete wreck and the engine of the freight was quite badly wrecked. Had not the electric car been tipped over on its side, it is said, the escaping steam from the engine would have scalded the passen-

The Sugar Beet Yield. Bulletin No. 175 of the experiment station, the latest issue, gives a list of 20 species of insects found to be troublesome in the state during the summer of 1898. It was prepared by R. H. Pettit, assistant entomologist at the Agricultural college. Formulas for insecticides are also included with suggestions for their application. The analysis of sugar beets sent in from various parts of the state show a much less percentage of sugar than those of 1898, averaging about 20 per cent less. Late reports, however, indicate that there has been an increase of 10 to 15 per cent in sugar during the warm

Chas. Russell Goes Free. The case against Charles Russell, the last of the captured Richland bank robbers, who furnished information that convicted Slater, Allison and Spellman, has been dismissed on motion of the prosecuting attorney. Russell, it is believed, has only a short time to live. During his imprisonment, his self-admitted common-law wife. Lulu Copeland, formerly of South

The Commercial National bank of Detroit was awarded the contract for Monroe's municipal electric lighting bonds for \$20,325. The bond issue is for \$20,000.

In view of the fact that Admiral Dewey will not come west this fall, the unveiling of the Dewey cannon at Three Oaks will be postponed until next spring.

Mrs. August Wall, of St. Charles, is dead from the effects of taking arsenic in mistake for quinine, her husband having purchased the deadly poison at a drugstore for quinine.

Oct. 22d was the first Sunday since the season of quail and partridge opened, and it is dollars to doughnuts there were more men out hunting for

the birds than there was in church. Nearly all the convicts give fictitions names when they enter prison. Brown. Jones and Smith are the most popular They like John, James, William and

George the best for their front names. It is announced that the new Detroit & Northwestern Electric railway will have cars running between Detroit and will be built between Detroit and

Farmington. Bay county supervisors have agreed to submit to the electors of that county at the April, 1900, election, the proposition to bond the county for \$100,000 for the purpose of extending the stone

roads system. Berrien Springs has almost landed that canning factory she has been after. The villagers subscribe for \$5,000 worth of stock and provide a site, and in return get an industry which will be a good thing for the village and the farmers in the neighborhood.

From all over the state come complaints of shortage of freight cars to transport crops to market. Hay shippers have no chance whatever, all available cars being used for grain and apples, and even those commodities

The average number of patients in the university hospital of the University of Michigan for the summer of 1899 was 57.5 as against 48.25 for the about 17 per cent.

It is reported that within a year at least 2.500 more men will be employed in the copper mines near Calumet. It is said the Calumet & Hecla Co. will employ no less than 1.500 new men before the middle of next summer.

Fred Lempke, aged 56, of near Traverse City, suicided on the 24th by the strychnine route. Four different times previous to his last act he had tried to hang himself, but was discovered by members of his family and cut down in time to save his life.

D. P. Markey, of Port Huron, supreme commander of the Maccabees of the World, on the 25th issued a special enlisted in Canadian regiments, to participate in the Transvaal struggle without forfeiture of policies.

Alpena county farmers might profit by the experience of an Allegan county man who some years ago planted the waste places on his farm to chestnut trees, and is now reaping the benefit by selling the nuts from them, which always command a good price. The first trainload for this year of

western sheep for farmers around Vernon arrived at that village recently. It was made up of 24 carloads, or 6,000 sheep in all, from Montana. These will be taken in small lots by the farmers and fattened for market. The Metropolitan Opera company,

which recently completed a threenights' engagement at Detroit, carried of the Richland bank robbers, was away \$17,000 of that city's good money. There are 167 people in the company and it requires 10 cars to transport them and their baggage from place to

The secretary of the treasury on the 23d issued a warrant in favor of the governor of Michigan for \$20,599, being the first installment of the amount due for expenses incurred by the state in aiding the United States to raise the volunteer army in the war with Spain.

It is doubtful if there is another place in the state which can show such a record in the way of quick growth as Onaway has made. Two years ago it was a hamlet of 100 population, but now there are 1,500 residents, with mills and numerous industries to match.

Potato digging has been in progress in northern Michigan about two weeks, and the result is very disappointing to the farmers. The crop is not averaging more than one-third of the yield of former years, and in many instances not more than 20 or 25 bushels to the acre is being obtained.

John H. Adams, of Homer, dropped about two spoonsfuls of gasoline into the bunghole of a cider barrel, with a Oil has been struck in the vicinity of view of burning out the interior. He then touched a match to the vent, and has been unable to locate the barrel since. Mr. Adams is thankful that his life is spared to tell the story.

The building of the board of supervisors of Washtenaw county have decided to adopt five or six rooms in the upper story of the county house for a detention asylum for the insane until county. Schools have been closed the patients can be accommodated at the overcrowded state institutions. The jail has been used heretofore.

Black bear are very numerous at present in the neighborhood of Oliver the secretary of state, that did not file Hill, about six miles from Frankfort. the required statements in 1898. The They have become so tame of late that number of days elapsed since they beit is not an uncommon sight to see one or more shambling down the highway liability to the state of \$8,000 for each taking a morning constitutional or in search of breakfast or a late supper.

Frankfort has one fruit grower who will make a success of his business if he keeps up his present pace. In every barrel of apples packed for shipment on his place, he drops in his name and address written on a card. Upon the reverse side of the pasteboard is this legend: "I consider this an honest barrel of apples.

In accordance with action taken last year this year's annual meetings of the various state live stock associations, which have always heretofore been held in Lansing, will be held in Detroit. The dates have been set for Dec. 19, 20 and 21, so as to avoid conflicting with the annual sessions of the State Grange and State Association of Farmers' clubs.

Men are scarce in Oceana county. Farmers are offering \$1.50 and \$1.75 per day to dig potatoes and pick apples, and can't get help at these figures. The apple season is drawing to a close, after harvesting a large and profitable crop, but the potato digging has just commenced. The quality is good, but the average yield will only be about 65 bushels per acre, owing to the dry weather through Julyand August.

It is rumored at Plymouth, Eng., that the admiralty is about to mobilize a reserve fleet in home ports and that this and other naval undertakings are Pontiac by Dec. 1. A double track due to the intention of Russia to seize a port in the Persian gulf.

The British war department has ordered out eight battleships and five cruisers. It is thought their destination is a Spanish or Portugese port, as the vessels have taken out bills of health from the consuls of those coun-

tries. The chancellor of the exchequer, Sir Michael Hicks-Beach, made a statement in the house of commons at London on the 23d on the question of the expenditure entailed by the Transvaal war. In part he said: "As British colonies had been invaded, he considered it to be consistent with all the laws of war when it was brought to a successful termination the Transvaal taxpayer should at any rate have to

bear part of the cost." The assessed valuation of Saginaw county as reported by the commissioner on equalization is \$22,637,357, of which \$2,914,624 is personal property.

### RELIABLE AND INTERESTING.

Returning From Klondike Region-Admiral Dewey Acknowledges Receipt of the Deed of His Home

Klondikers' Terrible Experiences. After a voyage of 28 days from Cape Nome, during which two men died from starvation and others were half crazed from want of food and water, the schooner Hera arrived in port at Seattle, Wash., on the 24th with nearly dispensation, allowing members who 200 passengers on board. From the statement of passengers it is learned that the agent of the ship at Nome guaranteed them plenty of good provisions on the way down. They were charged \$50 for their passage. When they were a few days out, meat, sugar and butter ran out. The menu consisted of salt pork and canned mutton. There was a little dried fruit, but only enough to supply the table three times with dried peaches and twice with dried prunes. From that time on for nearly 24 days their food consisted of flour and coffee. There was plenty of flour, but the water was short. Four days before the boat reached Seattle the last of the unpalatable salt horse was consumed. Had it not been for

rain storms which fell for a few days

they would have been without water

The house on Rhode Island avenue, Washington, recently purchased for Admiral Dewey by popular subscription, was formally turned over to him on the 25th by Assistant Secretary Vanderlip and United States Treasurer Roberts of the Dewey home committee. Mr. Fitch, the owner, went to the treasury department on the above date and presented the deed, which was immediately filed for record. The purhase price was about \$50,000.

The following letter was received by Mr. Vanderlip after Admiral Dewey eccived the deed of his home:

WASHINGTON, D. C., Oct. 26, 1899. Dear Sir-I acknowledge the receipt this day of the title deeds to the beautiful house presented to me by my countrymen. My heart is full of gratitude to them for this overwhelming expression of their regard for me, and I request that you will also accept and convey to the committee my heartfelt thanks for your and their efforts.

Very sincerely yours, GEORGE DEWEY.

\$24,000,000 is Involved.

Twenty-four million dollars is to be demanded through the courts from corporations in Cook county for violaons of the Illinois statutes. State's Attorney Deneen will make the demand in a few days by filing 3,000 suits, the largest batch ever seen at one time in the offices of the court clerks of the county. The purpose of these proposed suits is to satisfy the law, which calls on every corporation in Illinois to file a statement with the secretary of state every year. Failure to comply is punishable by a fine of \$50 a day. There are 14,000 corporations whose names are on the books of came delinquent makes the total of

corporation. Chicago Man has 42 Wives Forty-two wives scattered throughout the world, four of whom are in Chicago, was the confession made on the 24th by Walter L. Farnsworth, a Chicago candy commission man, who was arrested the day before charged with bigamy. He also admitted that he was a man of many aliases. "I cannot tell exactly how many women I have married, said he. "I know of 11 in Europe, four in China, three in Peru, one in England and over 20 others in different parts of the world, but to save my soul I could not tell how many. I married them for different reasons. I did not live long with

1,381 Italian Immigrants.

The Vincenzo Florio with 892 Italian immigrants and the Albio with 489 arrived at New Orleans on the 24th and the whole day was spent in inspection. They all proved a healthy lot and were passed as desirable, only about 30 being held for further investigation. Most of the Italians have relatives in the U.S., and the majority are going to settle in southwestern Louisiana.

12 Feet of Snow in Montana. A special from Helena, Mont., says that the northern part of the state is digging itself out of the snow. For four or five days recently snow came down almost unceasingly. At the by the Boers at Kraalpan are now retown of Choteau, county seat of Teton county, it was 10 to 12 feet deep in drifts and at least three feet on the level. Old timers are agreed that nothing like this fall of snow has been seen in October for 20 years. Eight sheep herders are known to have perished and 15 more are missing and have been given up for lost.

The Boers hoisted the flag of the Transvaal over Vryburg on Oct. 18, and are about issuing a proclamation that Bechanaland now forms part of the Transvaal. This is regarded as a move on the part of the Boers to induce the colonial Dutch to join the republic without incurring the risk hereafter of the charge of high treason if the Boers are ultimately defeated. Col. Kekewich, on hearing of it, immediately issued a proclamation notifying the people that if any British subjects were found assisting her majesty's enemies, either directly or indirectly, such person would be punished summarily as a base rebel. Several arrests of Cape Dutchmen have since been made.

Gen. Yule of the British forces made a brilliant stratigical movement on the 24th and effected a junction of his forces with those of Sir George Stewart White, slightly to the north of Ladysmith. The two are now in a position to offer battle. The two sections of the Boer army, which outnumber the entire British force three to one, are now only 40 miles apart. Hence it H. W. Lawton, U. S. V., and colonel will be necessary for the British forces to make swift and telling action. Before Gen. White's forces were united with Gen. Yule, they were attacked by the Boers who killed 12 and wounded 89 Britishers. ,Five are missing.

During the momentary lull in the fighting in Natal comes news from the western border, which temporarily shifts the scene of chief interest to the beleagured British force at Kimberley. The sharp struggle there on the 24th appears to have been the result of a sortie with the view of breaking the cordon surrounding the place. The British, apparently 500 strong, met 700 Boers, and, according to the official and other accounts, routed them after severe fighting, in which the armored trains appear to have done valuable service. The British loss was slight.

The colonial office at London has received a cablegram stating that President Stevn of the Orange Free State has issued a proclamation annexing that part of Cape Colony which is north of the Vaal river. This means Griqualand west and Bechuanaland and is apparently in consequence of the Free State forces having seized the railway and all stations north of Kimberly, except Mafeking, unless Mafeking has fallen since the last news from there, which is now more than a week ago.

A special cable from London says: London was startled on the 24th by direct charges that the war office had deliberately suppressed news of a crushing British defeat at Glencoe, with heavy loss. The London correspondent of the Paris Temps says that the British were defeated in the second attack on Glencoe and sustained such losses that the war office wishes to await news of another favorable en-

gagement before announcing them. After the victory of the 20th the British imagined they were free from further molestation for some days, but they soon found that the earlier reports of a sweeping success were exaggerated. The reported capture of all the Boer guns was incorrect. The burghers succeeded in removing some of them before the British carried the hill, leaving only the riflemen behind to cover their retreat.

A dispatch from Ladysmith on the 26th says Gen. Yule's column marched into that place at midninght after a very hard march during a night of exceptionally heavy rain. It is now apparent that Gen. Symons' fight at Glencoe was not anything like the decisive victory at first alleged, and Gen. Yule would in all probability have been annihilated or have met with the same fate as the captured Hussars if he had not retreated.

Mrs. Fred Lingham, of Belleville, Ont., has presented a silken flag to the Belleville detachment of the Canadian contingent going to the Transvaal and promises the Belleville man who places it on the walls of the Pretoria jail, where her husband was confined by the Boers during the Jamieson raid, shall receive the finest gold watch purchasable in Canada.

According to returns at the London war office the British have suffered a loss of 579 killed and wounded since the war started. Of this number 18 officers have been killed and 55 wounded; 76 privates killed and 435 wounded. and 13 unaccounted for. This total however, does not include the 18th Hussars.

A special from Cape Town on the 27th gives details of the defeat of 700 Boers by the British at Riverton, north of Kimberley in which the Boers were completely routed with heavy loss, the British loss being three men killed and 20 men, including two officers, wounded.

In a second attack on Glene e on the 22d 300 Burghers were killed and wounded. The Boers were compelled to make a disor leriy retreat over the plains, many prisoners and horses being captured.

The official London dispatch says that the British casualties at the battle of Elandslaagte was 72 killed and 175 wounded; grand total, 247. Ten men are also missing.

Great Britain will bring her huge airship into use in her war with South Africa. It will be used in making observations of the Boer movements. The London war office on the 26th issued orders for an additional 5,000

sail between Nov. 4 and Nov. 18. The prisoners who were captured when the armored train was destroyed ported alive and well treated.

troops for South Africa. They are to

propriate 850 beds in private houses at

M. Ruperto Santiago, one of the wealthiest Visayans, who had taken the oath of allegiance to the United States, and who, posed as a friend of Americans, has been arrested at Iloilo, while his friends are being watched. The prisoner is charged with organizing a revolutionary junta. Santiago owns sugar estates throughout the island of Negros. It is asserted that a council of 10 and the manager of the junta met daily at Santiago's office for the purpose of engineering an extensive scheme of collections for an insurrection. One of Santiago's steamers was captured carrying supplies to the rebels. His arrest caused rumors of an outbreak of the natives of Iloilo, and precautions have been taken to prevent trouble.

A special from Washington says that these important military appointments have been decided upon: Brig.-Gen. John C. Bates, U. S. V., and colonel of the 2d infantry, regular army, to be major-general of volunteers to fill the original vacancy caused by the increase in the enlisted force; Maj.-Gen. in the inspector-general's department, regular army, to be brigadier-general of the regular army, vice Burke, retired; Brig. Gen. Frederick Funston, U. S. V., to be retained as brigadiergeneral of volunteers, to fill the original vacancy caused by the increase in the enlisted force.

A special from Washington says: Senor Antonio Regidor, now in London, will sail for the United States within three weeks, and as a fully accredited representative of Aguinaldo will present to President McKinley new terms for ending hositilities and reconstructing the government of the islands. It is understood that Aguinaldo's representative will ask that the islands be made a republic with an American protectorate, the government to be like that of the United States; American officials to handle revenues, judiciary like that in Cuba and military and naval stations to be established.

The insurgents around Calamba and Angeles have bothered the Americans lately with their repeated attacks, like most of the Filipino attacks, consisting of the shooting of a lot of ammunition into their opponents' camp from long range. Maj. Chatham's battalion of the 37th infantry, three companies of the 21st infantry, a battery of the 5th artillery and a gatling gun sailed out on the morning of the 23d from Calamba, drove the Filipinos from their trenches and pursued them for three miles, inflicting heavy loss on them. One American was killed and three were wounded.

Iloilo is stirred by the expectation of important fighting. Gen. Pulion began "unrolling the bloody scroll," as he promised his followers in a recent speech, by firing volleys at the American outposts nightly. Since Oct. 22d, reinforcements have been arriving from he north This activity is d to divert the Viscayans from their dissatisfaction against the Tagalos. Aguinaldo has ordered the release on parole of Arenito and other Visavan leaders, who are disposed to negotiate for peace, and is watching them to pre-

vent further negotiations. Capt. Sigsbee is to be relieved of the command of the Texas about Dec. 1, and assigned to duty in the navy department as chief of the bureau of naval intelligence, relieving Commander Richard C. Clover. The latter will go to London as naval attache of the United States embassy there, relieving Lieutenant-Commander J. C. Colwell.

On the 25th Admiral Sampson was presented with a sword by Gov. Voorhees on behalf of the state of New Jersey, as a mark of appreciation of his services during the Spanish war.

Miss Helen Miller Gould has given \$6,000 to the League for Social Service. to be used in a crusade against Mormonism. The league has issued 1,000.-000 pamphlets, in pursuance of Miss Gould's directions.

Col. Pando has been elected presi dent of Bolivia in succession to Senor Severo Fernandez Alonzo.

Ayer's Pills are liver pills. They cure constipation, biliousness, and dyspepsia. 25c. All druggists.

BUCKINGHAM'S DYE Whiskers

There have been various

written about the stealing of the Baltimore and Ohio Rail Road engines at Martinsburg, W. Va., during the rebellion and their transfer across the country for service on southern railroads by Col. Thomas Sharp, who is still living in Ohio. Recently, an official of the Baltimore and Ohio Rail Road made some inquiries of old employes who were at Martinsburg at the time the incident happened and they say that on June 19, 1861, 200 men of Gen'l Stonewall Jackson's command were detailed to destroy the Baltimore and Ohio's equipment at Martinsburg. They piled wood and coal over 41 engines and nearly 400 cars and then set fire to them. Only ten or twelve of the engines, however, were seriously damaged, and these not by the fire, but because the water was first let out of the boilers. Col. Sharp arrived in Martinsburg on August 18, 1861, and remained there until the following March, engaged in removing engines, machinery, etc. He -took eight engines across the country over the turnpike, either to Staunton, Winchester or Strasburg, (and there are some historians who disagree on this point) 32 horses being required to haul each engine. He also removed all the duplicate parts of engines and cars and all the rough iron at the station, and took away all machinery and tools which were afterward used in the Southern arsenals. The country around Martinsburg is extremely hilly and the work of getting the engines over the country roads required considerable engineering ability. It has been currently reported in late years that one of the locomotives was the Winans camel-back No. 99 which at that time was numbered 77, but Col. Sharp did not care for this class of engines and took only ten wheel and passenger engines. There was only one eight wheel locomotive taken and that was No. 34. Some years after the war Col. Sharp was employed on the Baltimore and Ohio Rail Road as Master of Transportation.

### KITTY'S HUSBAND

By Author of "Hetty," Etc.

CHAPTER X.

A beautiful woman, about whose beauty there could not be two opingrace that she was rarely described as | moment brought in, was banished by a head well poised, gray eyes that had more tenderness, more passion in their opposite to mine and sank back in it depths than any other eyes I had ever seen, mobile lips as expressive as the eyes, a face a perfect oval, clearly, delicately cut, bright, brown wavy hair, growing gracefully around a perfect brow-the most beautiful woman I had ever seen, ever dreamt of-Madame Arnaud.

She had the gracious ways which a beautiful woman learns by the time she is thirty years of age. If thirty years had taken the first soft, peachlike bloom from her complexion, that was but a small loss. With her queenly ways, her slow yet radiant smile, she was far more charming than any mere girl could be. In her presence, even Meg's prettiness seemed inexpressive. I, who had scarcely any claim to prettiness, was overwhelmed

with a sense of my own insignificance. We saw much of Madame Arnaud. She came often, and she generally came in the evening when John was at home. Ostensibly, her calls were on me; but, when she left the drawingroom, John accompanying her across the little hall, she fell at once into a softer, more familiar tone; sometimes, half an hour after she had bidden good-night to me, she was still talking in a subdued, confidential voice to John in the hall or in his study; and now and then John would go with her the short distance that lay between our houses, and if the evening was quiet I could catch the sound of their footsteps as they passed and repassed up and down the pavement, until at

I poked my fire obediently. The merry blaze shot up and dispersed the shadows. The firelight was so pretty ions-of goodly height, yet so full of that the lamp, which the maid at that tall-with a certain gentle stateliness | Meg to the piano in the corner. The that no words can quite describe—with | little afternoon tea table was wheeled before the fire, and Meg drew her chair with a sigh of luxurious content. "One question, Kitty," she said.

Will John come in?" "I think not-not yet."

"Then I'm happy," she replied; "I breathe freely. Now confess, Kitty-I'll never tell a soul-don't you feel a sense of relief when John goes out?" "No, I don't."

"Kitty, you're snappish. Your temper was never nice-and it's getting

I laughed and began to pour out the tea. Meg leant back in her chair and looked critically at her blue cup, and stirred her tea slowly with the quaint little apostle's spoon, then removed the spoon to examine it.

"I like your silver and your china. Kitty. The sight of your silver and china would almost persuade me to marry, if anyone would marry me. But the sight of you and John counteracts the rash desire."

"How do John and I look?"

"Look at yourself in the glass, dear; the glass will speak for one. And John looks worse. Do you keep him on cold mutton chops, Kitty? Nothing but an unvarying diet of mutton chops could account for his profound gloom."

"John's not gloomy-you imagine that." I declared, with a little sharp catch in my breath even as I made the decisive assertion.

"And you're not gloomy?" questioned Meg, stirring her tea, and putting out her neatly-shod little feet to the welcome blaze. "Is he a tyrant,

"DID YOU NOT KNOW SHE HAD BEEN ENGAGED TO JOHN?"

last she went indoors and John re- | hitty? Does he smile deceitfully beturned alone.

A month went by-a chill, gray October, with raw mornings and misty evenings and rare glimpses of pale wintry sunshine. I grew more than one month older in those four long weeks. I scarcely knew what troubled me; I tried to put the thought of the trouble away-I shrank from facing it. John asked me sometimes if I was happy: I always assured him "Yes;" and perhaps the assurance was more eager than spontaneous, for he would look at me gently and turn away with a little sigh.

He was always gentle. I wished im patiently sometimes that he would be less patient, less good, less kind. Were men so invariably patient with wives they were sure they loved? Again and again his sister's words came back to me-"You loved her because you wished to love her. Is such love trustworthy? Will it wear a lifetime? Husband it with all your energy!" The words seemed to echo in my brain; I could not, strive as I would, put them away from me.

It was a misty, chilly afternoon toward the end of October. Meg had run in to see me. She was full of life and spirits; she laughed at me because I was sitting in the twilight; she kissed me and rang the bell for the lamp and tea; then she kissed me again and bade me tell her I was glad to see her. When I assured her of my gladness she put her hands upon my shoulders and shook me a little, because my assurance, she said, was too lukewarm; then, repenting, she kissed me again because she had shaken me.

"Kitty, my dear, whenever I see you, I say to myself, 'Don't marry,' " she said, divesting herself of her trim little sealskin jacket, and looking round for the most softly-cushioned chair. "Poke your fire, Kitty; let us have a tell John." blaze.'

fore the world, and then in private beat you?"

"Have some more tea, Meg, and don't be a goose."

"Thank you, Kitty. Turn the handle of the teapot this way, dear, and let me help myself-don't be such an officious hostess. Do you know the first ing resting upon these ancient foundalaw in the code of a hostess' duties?--Cultivate an air of repose. When your guest politely asks you, 'Does your hus- eral names, and is at present known as band beat you?' don't dash at her with the "Fighting Cocks." There is a 'Have some more tea. Take another wooden tablet on the front wall setpiece of sugar.' Your guest will naturally conclude that your husband does beat you."

"She would need to be an imaginative guest," I returned, laughing. "I cannot imagine John's being anything

but very good to me." "Don't you find it dull, dear?" asked Meg, with a reflective air. "I couldn't possibly love a man whom I couldn't imagine being anything but good to me. Tastes differ! Talking of tastes, Kitty, my dear, I like cream, not milk, in my tea. Don't be economical so early in life, it's a vice that grows. Behold mamma! I think mamma grows worse than ever; father promised to take tickets for the Haymarket next week and we had such a fuss about it. It seems, Kitty, that the expenses of your very quiet wedding were quite ruinous; we mustn't dream of the ex- | lint, its afraid Oi am that Oi'll overtravagance of the theater for a year to | slape meself in th' marnin' an' be too come. Of course, father yielded; so I late fer early mass. Hennessy-Don't ran in to see John this morning as I worry a' tall, a' tall, Mary Ann. Av passed the office; I thought I might | ye foind yourself overslapin' jes' tech drop a hint that you were pining for the theater and pining to take me with | State Journal. you. So I strolled ostensibly to ask John if I might tie my shoelace and if a black speck had not dropped upon my cheek.'

"Meg, what a cheat you are! I shall

and she invites us all."

CHAPTER XI. The firelight was very bright. eant back in my chair to escape from it. My heart had suddenly turned cold; I waited for a moment, then asked a question very quietly. "Was Madame Arnaud there-at the

office, Meg?" Meg hesitated for a moment. She put down her cup, folded her hands in

her lap, and looked closely at me. "Kitty, for goodness' sake, he a rahad meant to be jealous of Madame don't be jealous at this late date."

said. "I wish it every day, Meg. I

have spoilt his life. I have made him

"Kitty!" Meg was as serious now as I. She came round to where I sat, and seated herself on the elbow of my chair. I put my head against her shoulder and sat in silence, looking perfectly hope-

wretched."

lessly before me. "He loved her," I said at last, still speaking in a quiet tone, still looking before me into the glowing fire. "Some one should have told me! No one told me: I did not know-I did not know! "And I did not know it until after-

wards," said Meg gently. "I had heard of her, but I had only heard half the story. I heard it again the other day more fully." "Tell me.'

"But John has told you." "No."

"How strange! It's a long story; I scarcely know where to begin. Ten or | fastened in an instant, without needle eleven years ago Madame Arnaud-she was Lucia St. John then-was an ance of a sewed one, and which will actress. a singer-but you know that." "I know nothing."

"She sang in opera; they said she was the coming prima donna. She sang for two seasons; then her voice failed her."

"Go on, Meg."

"She had been engaged to Johnhow strange it is, Kitty, that I should know this and not you!—did you know she had been engaged to John?"

"John ought to have told you. I think. Well, she had been making a big income, and the income dwindled down to nothing suddenly, and John was poor. He was very poor, you know, in those days; he was only a solicitor with a precarious sort of practice, with a reputation yet to be made. Then he was struggling to pay off his father's debt-he was poor, hopelessly. She had made him promise that, after their marriage, she should not give up her career-she was to be allowed to go on singing. She had been singing in Paris; she was coming home. It was midwinter, and she and Miss Mortimer, who was always with her, chose to remain on deck when sensible people would have been sleeping in their cabins. She took cold. When she got well again her voice was gone—gone as far as her profession was concerned. That's her story."

"But not all. Go on." (To be continued.)

Was Rebuilt After the Flood. It is claimed for a building near St. Albans, England, that it is the oldest inhabitated house in that country. A part of it, at any rate, is more than 1,000 years old. This is the foundation which was built by King Offa. The structure was originally used as a fishing lodge by the monks of the abbey of St. Albans, of which monastery it formed a part. It was situated on the bank of an immense fish pond near St. Albans, belonging to the royal palace of Kingsbury, of which little but the name now remains. The present buildtions was probably erected during the fifteenth century. It has possessed sevting forth that it is "The oldest inhabited house in England." But this, though enough to satisfy any reasonable being, is feeble when compared with a former sign which ran: "The Old Round House: Rebuilt after the flood.

## Triumph of Realism.

CURRENT NOTES OF DISCOVERY AND INVENTION.

Protection from Lightning — Button Without Thread - A Handy Fixing Trough-Graphite's Many Uses-Mental Effects of the Weather.

Mental Effects of the Weather. Everybody probably feels that his or her mental condition depends, to some extent, upon the character of the tional being!" she exclaimed. "If you weather. In gloomy weather we are apt to be depressed, and in fair weath-Arnaud, you should have been jealous er exhilarated. When the atmosphere before you married John, and not have is stimulating, the mental and physical married him. For goodness' sake, energies are enhanced. Starting from these generally recognized facts, Mr. "I'm not jealous," I replied, in a dull Edwin G. Dexter has made a study of conduct, the results of which are rather surprising. He shows, by a systhe clock on the little chimney-piece tem of tabulation, that misdemeanors ticking audibly in the stillness of the involving violence, such as assaults, room. Then it was I who broke the are more common in bright weather, and that the same is true of suicides. On the other hand, mental errors, such as mistakes in bank figures, are more common in damp, rainy weather. His inference is that the excess of energy produced by a bracing condition of the air is responsible for more violence than is the "ugly temper" caused by bad weather, because the latter, while lowering the spirits, diminishes the ac-'ivity of men.

Lutton Without Thread.

A detachable button, which can be or cotton, and which has every appearstand a great deal more strain, is a thing which will appeal to the man who lives in single blessedness.

This button has as an attaching device a metal hook, which, after being thrust through the material, is held firmly by a locking bar folding over the point of the hook, and held in this position by a spring.

Protection from Lightning. A monograph on "Lightning and the Electricity of the Air," recently issued by the United States Weather bureau, affords some interesting information upon the question of protecting buildings from lightning. To what extent is it practicable to protect a building and to what extent is it profitable to attempt such protection when it is practicable? Before answering these questions it is necessary to convey a clear idea of the nature of the lightning flash. The old idea is that the flash, like the moderate current of electricity with which we are familiar, follows the line of least resistance, and can be diverted by a conductor of a certain size. In this view the lightning-rod is like a channel made to convey a flow of water, and a small channel will empty a large reservoir if given time enough. But the Weather Bureau likens the lightning flash rather to an avalanche, a landslide down the side of a mountain or the breaking of a dam-the whole force is exerted in one instant and there is no after current. The flashes, however, vary greatly in volume, some of them being mild affairs. And it is always true that a well-constructed and well-arranged lightning-rod will, if given time, silently convey away a vast deal of electricity, thus lessening greatly, if not preventing, the ultimate flash. It is on this account that lightning strokes are comparatively infrequent in large cities, where lofty spires and roofs drain overcharged clouds before the stratum of air between the cloud and the houses is strained to the breaking point. It follows from the avalanche-like nature of lightning that absolute protection of a building is impracticable unless the building itself-as being a steel structure-is itself a good conductor. But a very large measure of protection is within our reach. A chimney or church spire well provided with rods is almost perfectly protected and rods distributed to exposed points will reduce the risks of a wide roof area as much as seventyfive per cent. There is no definite "area of protection." The old rule was that a rod protects a radius equal to its height, and the rule may stand for want of a better, but as a matter of fact it holds good only with electrical discharges of moderate volume. Whether it pays in a particular case to invest money in lightning-rods depends upon circumstances. Sometimes the risk is so slight as to be neglected. The cost of the rods may be such as to render fire insurance preferable. But where the risk of being struck is very great-as in case of church spires and high brick chimneys—the value of the property threatened renders the lightning-rod a necessity. It may be said to be necessary also where the risk is less, as, for example, for buildings that contain a great number of persons-

large summer hotels, large school

buildings, asylums and expensive pub-

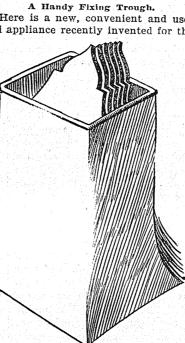

lic buildings. A very costly building

section of the i.sh rod be enough larger to compensate for its inferior conductivity. A rod of iron weighing thirty-five ounces per foot is held to be equivalent to a copper rod weighing siz ounces per foot. A flat conductor the rod should be pointed and plated 'to run a rod down the side of a building and neglect the grounding, as is so were a dangerous bug which could be safely disposed of by being induced to crawl down to the bottom of the rod, and which might then be left to jump off as and where he pleased. The correct way of looking at it is to consider the rod as a channel down a mountain side to guide a possible (or the less the total electrical resistance of the whole rod)—the more sureled through the channel provided for

Graphite's Many Uses. One of the most familiar substances nal. Not a single iron casting, says a writer in Bradstreet, is taken from its sand mold without the sand being first faced by graphite; not a gun projectile is cast but the steel is melted in a graphite crucible; not a tool, not a saw is made but from graphite crucible steel; every pound of nickel, of copper, of composition metal, of brass, is cast in some way the metal being reduced in a graphite crucible. Every printing house, for the perfection of its electrographite; every electrician and every under the same tribute. Graphite lubricates friction ways, and it is notably the most enduring paint pigment; the electric light, too, would shine much less easily but for graphite, the production of steel rails has an equally intimate relation to this mineral. Among its peculiar characteristics are its immunity from any effect by heat and cold, the highest and lowest extremes of either failing to influence it

Here is a new, convenient and useful appliance recently invented for the

dark room. It is a porcelain fixing trough in which six plates can be accommodated at the same time. Any plate can be lifted out and examined by transmitted or reflected light without soiling the fingers or without any danger of dropping and breaking the plates. The six dippers are celluloid and are the quarter-plate size.

cannot be wisely subjected to a slight Liquid Air and Magnetism. risk from lightning if protection can When steel is dipped into liquid air, be obtained. The risk on farm buildings is greater than on any other class its magnetism is curiously affected. Non-magnetic nickel steel acquires of buildings, but where their value is magnetic properties after being imsmall it is usually preferable to rely on insurance for protection. As to the | mersed for five minutes in liquid air. property of A. A. McKenzie at the west end of Main Street. Various stands across the alley.

and beautiful, and a fine collation was served at the close of the ceremony.

The chief editorial topic in the American Monthly Review of Reviews for November is the war in South Africa. In "The Progress of the World" the editor gives a full exposition of the British and Boer sides of the quarrel, respectively. The subject is also treated in the department of "Current History in Caricature," and Mr. Stead contributes a character sketch of "the man of the month" in South Africa-Cecil Rhodes.

At last Port Huron realizes that she must have an electric line up the lake shore to Lexington and thence to Sanilac Centre and Bay City. Already Sanilac county is the best patron we have from outside. It is not an idle tale to say that road must and will be built at an early day. The men who are at the head of it have both money and brains. They see a good opportunity and are going to sieze it .-- Port tion are doing well. In the evening Huron correspondence to Lexington

The excursion to Detroit last Thursday was well patronized by our people, as well as from nearly all points along the line. Those going from here not mentioned in our last issue were:-A. A. Hitchcock, W. A. Fairweather, O. K. Janes, H. B. Fairweather, H. Mickle, J. Cornellan, J. S. McArthur, A. Bond, John Wilder, Will McTav-The Social Workers of the Baptist ish, C. H. Wood, H. P. Lee, Mrs. J. C. Lee, Miss Lena McDonald, Mrs. A. A. McKenzie, Mr. and Mrs. W. J.

A. A. Hitchcock entertained a se guests on Tuesday evening at his Fred. A. Bigelow did not return home, corner of Leach and Sanilac with the Detroit excursionists last Streets. The earlier part of the the reception room of the Opera House, where they tripped the light fantastic to their heart's content. Lunch was served about midnight to which all did justice. The host's ability to entertain is so well known that it goes without saying everyone enjoyed themselves immensely.

We publish an advertisement of Kodol Dyspepsia Cure in our columns this issue, and wish to say to our patrons that we believe this preparation is worthy of a trial by any person together with a top buggy from H. S. suffering from this agonizing com-Wickware. It makes him a nice outfit plaint. Kodol Dyspepsia Cure is prepared by the well known and reliable firm of E. C. DeWitt & Co., Chicago, and from experience with this firm as advertisers, we feel safe in saying, that they would not place on the market a preparation for the cure of dyspepsia unless they had a remedy of the highest merit. We further add that if this preparation is equal to the other well known remedies which they make, viz:-DeWitt's Little Early Risers, De-Witt's Witch Hazel Salve and One Minute Cough Cure, it will speedily win its way into public favor.

Wm. Vivian, representing the Tillson Company, of Tilsonburg, Ont., who owns and operates the Carsonville pea mill, was in town on Friday last fessor? and purchased a carload of peas from Frutchey, McGeorge & Co. for the Carsonville mill. Mr. Vivian helped to install the plant at Carsonville, several years ago, and he and his son Carmel, have had charge of the same. in the abdomen by a horse, resulting There are now three other mills—two at Port Huron and one at Ublywhich look to the farmers of the Through the medium of the circula-Thumb to furnish the necessary peas tion and the nervous system they Though it was rainy outside, last so that it is becoming difficult to get farmers to remember this. The proments going to New York and eastern the appearance of our town.

The editor spent a very pleasant time in Detroit last Thursday, com-Novesta, and surprised their little bining business with pleasure. He wages \$2 per week; in country. Addaughter Murl. She received a num-incidently dropped in at the business dress, Mrs. E. H. Stowell, Pontiac, place of Harris & Frutchey, corner of Mich. time was reported, in spite of their Woodbridge and Shelby Streets, and found both gentlemen "at home." They are located in a veritable sea of commission warehouses and offices and are having an excellent run of business, handling butter and eggs exclusively. They also have a branch house on High Street, doing a nice \$43 and odd cents on D. M. Ferry, business. Mr. Frutchey informed us that although the quantity of eggs bought by his manager, Wm. Kile, in the vicinity of Cass City this year, was last, completed a deal whereby he be- ab ut as usual, the amount of cash comes posessor of the fine residence paid for the same was considerably in exe ss of any former year, owing to the aigher prices prevailing. We also modern improvements will be made in called on Geo. J. of Tumblers. Upon returning to the Franklin House, which by the wav is a well ordered and nicely kept hostelry at the corner of Larned and Bates streets, we were agreeably surprised to meet D. L. Caven, of Saginaw, colonization agent of the Canadian northwest, with whom we had a very pleasant interview, treating of course of the subject nearest his heart. Among other things he informed us that the Canadian government were installing butter and cheese factories wherever practicable at their own expense, furnishing an experienced foreman until local help had acquired a knowledge of the art, then selling the plant to the patrons at actual cost or less. Iu this way the dairy business is being placed on a substantial footing in the northwest, the government having become convinced that the dairy business may be made a boon to the farmer. Mr. Caven states that the
